

Attacking Iraq is illegal and immoral.
In modern warfare 75% of casualties are
civilians.

This war may cause a world recession.

It will cause more terrorist attacks,
greater instability in the middle East,
more refugees,
hundreds of thousands of deaths and injured
in a nation already crippled by UN sanctions,
which have already caused the death of 1.5
million Iraqi people.

This is a US war for Oil!

There is still no proven link between Saddam
and Al Queda.

What weapons Iraq have are incomplete and
are off little threat to the US.
