## ADMISSION FOR INTERNATIONAL STUDENTS

---

This guidebook is a summary translation of the official application guidebook in Japanese on special admission arrangements for international students who wish to apply for admission to the following programs of Keio University:

Master's Program in the Graduate School of Letters

Master's Program in the Graduate School of Economics

Master's / Doctoral Program in the Graduate School of Law

Master's Program in the Graduate School of Human Relations

Master's Program in the Graduate School of Business and Commerce

These special arrangements are intended to provide opportunities for international students who may be disadvantaged in the entrance examinations due to differences in educational background or Japanese language ability. Students admitted to the university by these procedures have the same academic status as students admitted through the regular admission process. Please keep in mind that this English summary is an introductory document designed to provide only general information about the application process. Submission of an acceptable application will require that the applicant consult the official application guidebook (in Japanese) to insure that all necessary information and documents are provided in a timely fashion.

Application guidebooks of **the Graduate School of Science and Technology (master's and doctoral program)** and **International Graduate Programs on Advanced Science and Technology (master's and doctoral program)** are available only from the website below:

<http://www.st.keio.ac.jp/english/index.html>

Guidelines and application materials for **the "International Advanced Degrees Program" in the Graduate School of Media and Governance** are available only from the following website:

[Guidelines] <http://www.sfc.keio.ac.jp/prospective/aboutmag/iadp.html.en>

[Application materials] [http://www.sfc.keio.ac.jp/prospective/aboutmag/application\\_form.html.en](http://www.sfc.keio.ac.jp/prospective/aboutmag/application_form.html.en)

Address further inquiries on special admission arrangements for international students to:

Academic Affairs Center  
Keio University  
2-15-45 Mita  
Minato-ku, Tokyo 108-8345  
Japan  
Tel: +81-3-5427-1713  
E-mail: [igadms@info.keio.ac.jp](mailto:igadms@info.keio.ac.jp)

**Applicants to the following programs must take the regular entrance examination:**

Doctoral Program of the Graduate School of Letters

Doctoral Program of the Graduate School of Economics

Doctoral Program of the Graduate School of Human Relations

Doctoral Program of the Graduate School of Business and Commerce

Master's / Doctoral Program of the Graduate School of Medicine

Master's / Doctoral Program of the Graduate School of Business Administration

Master's / Doctoral Program of the Graduate School of Media and Governance

Master's / Doctoral Program of the Graduate School of Health Management

Law School (J. D. Program)

The Graduate School of System Design and Management and the Graduate School of Media Design (both to be established in April 2008), will not prepare any special admission arrangements for applications by international candidates. The schools will not require Japanese proficiency when candidates apply. Please refer to the website below:

- Graduate School of System Design and Management  
<http://www.sdm.keio.ac.jp/index-en.html>
- Graduate School of Media Design  
<http://www.kmd.keio.ac.jp/index-en.html>

## **MAJOR FIELDS**

---

There are 9 majors in the Graduate School of Letters, 3 majors in the Graduate School of Law and the Graduate School of Human Relations, and 2 courses in the Graduate School of Business and Commerce. Applicants must choose one of the following majors or courses before submitting their application. Changing one's major or course after entering the university is not possible. Applicants may not apply to more than one major or course.

Commerce  
    Academic Research Course  
    Accounting for Professionals Course

## **LANGUAGE OF INSTRUCTION**

---

The vast majority of courses are conducted in Japanese. Only a very limited number of courses are offered in English.

### **MINIMUM RESIDENCY PERIOD**

### **NECESSARY TO COMPLETE A MASTER'S / DOCTORAL DEGREE**

---

Master's Program      2 years  
Doctoral Program      3 years

## ACADEMIC CALENDAR

The 2007-2008 calendar is listed below to provide a brief outline of the academic year. While the 2008-2009 calendar has yet to be finalized, no major schedule changes are expected.

### The 2007-2008 academic year calendar

April 6	Entrance ceremony / Orientation and guidance
April 9	Spring semester classes begin
April 23	Keio Foundation Day (school holiday)
July 18 ~ 26	Spring semester examination period
July 26	End of spring semester
July 27	Summer vacation begins
September 26	Fall semester begins
Late November	The Mita Festival (Keio University Festival)
December 23	Winter vacation begins
January 7	Classes resume
January 10	Founder's Birthday (school holiday) (Yukichi Fukuzawa's Birthday)
January 23 ~ February 5	Year-end examination period
March 28	Commencement
March 31	End of Academic Year

## QUALIFICATIONS FOR APPLICATION

### Graduate School of Letters, Human Relations, and Business and Commerce (Master's Program)

Applicants must graduate with a Bachelor's degree from a university outside of Japan by March 31, 2008 and have completed a minimum school education of 15 years.

- Applicants to the Art Management field of Aesthetics and Science of Art major of the Graduate School of Letters must have graduated at least three years before admission and possess working experience.
- Applicants to the Information Resource Management field of the Library Information Science major of the Graduate School of Letters must have graduated at least three years before admission and possess library-based working experience.
- Applicants to the Accounting for Professionals Course of the Commerce major in the Graduate School of Business and Commerce must have passed the 1st or 2nd Grade of the Japan Chamber of Commerce and Industry Book-keeping Test.

### Graduate School of Economics (Master's Program)

Applicants must graduate with a Bachelor's degree from a university outside of Japan by March 31, 2008 and have completed a minimum school education of 16 years.

### Graduate School of Law (Master's Program)

Applicants must graduate with a Bachelor's degree from a university outside of Japan by March 31, 2008.

### Graduate School of Law (Doctoral Program)

Applicants must graduate with a Master's degree from a university outside of Japan by March 31, 2008.

#### **NOTE:**

Applicants to the Graduate School of Economics, Law, and Business and Commerce **must** submit Examination for Japanese University Admission for International Students (Japanese) or Japanese Language Proficiency Test (level 1) results.

Applicants to the Graduate School of Letters, and Human Relations are **not necessarily required** to submit the results of the Examination for Japanese University Admission for International Students and the Japanese Language Proficiency Test (level 1), but they are to be considered for screening.

See the next page for further information.

## NOTES ON JAPANESE EXAMINATION

### 1. Examination for Japanese University Admission for International Students

The Japan Student Services Organization (JASSO) is responsible for administering the Examination for Japanese University Admission for International Students, which is also conducted in many foreign countries by related overseas institutions.

Although this examination is conducted in June and November, prior registration during a designated period is required to take it. For more information, contact:

Japan Student Services Organization (JASSO)  
4-5-29 Komaba, Meguro-ku, Tokyo 153-8503, Japan  
Tel. +81-3-6407-7457 <http://www.jasso.go.jp/>

#### **Valid Examination Date**

##### Graduate School of Letters(Fall Exam), and Human Relations

Results of the examinations conducted from **June 2006** to **June 2007** are valid.

##### Graduate School of Letters(Spring Exam), Economics, Law, and Business and Commerce

Results of the examinations conducted from **June 2006** to **November 2007** are valid.

#### **Procedure necessary to report the examination results**

##### **< Applicants who take the examination before June 2007 >**

Submit a copy of the score report for the Examination for Japanese University Admission for International Students to Keio University together with the application documents. If you are applying to the graduate school of Letters from outside of Japan, the graduate school of Human Relations or Business and Commerce, and have not received the score report when applying, only the copy of the examination admission card is required.

##### **< Applicants who take the examination in November 2007 >**

##### Graduate School of Letters(Spring Exam), and Economics

Send a copy of the examination admission card for the Examination for Japanese University Admission for International Students to Keio University together with the application documents. Applicants to the Graduate School of Letters residing in Japan, send a copy of the score report.

##### Graduate School of Law, and Business and Commerce

Send a copy of the examination admission card for the Examination for Japanese University Admission for International Students to Keio University by **November 30**.

- Keio University will obtain the applicants' examination results directly from JASSO.
- Applicants not submitting a copy of the examination admission card will not be screened.

### 2. Japanese Language Proficiency Test

For details about the Japanese Language Proficiency Test, contact:

#### **( Administered overseas )**

The Cultural Section or Japanese Language Section of Japanese embassies or consulates.

#### **( Administered in Japan )**

Japan Educational Exchanges and Service (JEES)  
Tel. +81-3-5454-5215 <http://www.jees.or.jp/>

#### **Valid Examination Date**

##### Graduate School of Letters, Law, Human Relations

Examinations conducted before December 2006

##### Graduate School of Economics, Business and Commerce

Examinations conducted from December 2004 to December 2006

### Procedure necessary to report examination results

Send the following documents together with the prescribed Keio University application forms:

- the original score report indicating the score and pass/fail results

The original score report will be returned later.

## SCREENING PROCESS & SCHEDULE

Admission to the Graduate School of Law is decided by document screening. Except for the Graduate School of Law, there are two stages in the screening process. The first is document screening that is based on submitted application documents. Applicants who have successfully passed the first screening are eligible to take the second screening (interview and written examinations). Separate registration is required for the second screening.

Screening Schedule (2008 April admission)	Letters		Economics	Law	Human Relations	Business and Commerce
	Fall Exam	Spring Exam				
First screening (Document screening) application period for applicants residing outside of Japan	June 22-28 2007	November 5-9, 2007	November 5-9, 2007	July 19 -25 2007	June 22-28 2007	June 22-28 2007
First screening (Document screening) result and applicant's registration card will be sent out (overseas applicants only.)	Mid July	Mid December	Mid December	—	Mid July	Mid July
First screening application period for applicants in Japan	August 20-24	January 15-18, 2008	November 5-9	July 19 -25	July 17-20	July 9 -13
First screening result and applicant's registration card will be sent out (for applicants in Japan.)	Early September	Early February	Late January 2008	—	Late August	Late August
Second screening registration period	September 12, 13	February 20,21	February 20,21	—	September 12, 13	September 12, 13
Second screening (written examination).	September 18	February 28	February 27	—	September 25	October 1
Written examination result will be announced.	September 20	March 3	—	—	September 27	October 2
Second screening (interview)	September 21	March 4	March 6	—	September 28	October 2
Final result will be announced.	September 25	March 6	March 7	October 24	September 28	October 3
Final result (for the applicants who are taking the Examination for Japanese University Admission for International Students (Japanese) in November 2007 will be announced.	—	—	—	January 23, 2008	—	January 18, 2008
Completing admission procedures.	Mid-March 2008	Mid-March	Scheduled for March 14	Mid-March	Mid-March 2008	Mid-March

Applicants who do not need to be issued a “Certificate of Permission to Take Entrance Examinations (Juken Kyoka-sho)” from Keio University in order to obtain a visa for travel to Japan for the Entrance Examinations can submit their application documents during the application period for applicants in Japan - even if they live outside of Japan. In this case, applicants should attach a memo to the application stating there is no need to issue a “Certificate of Permission to Take Entrance Examination (Juken Kyoka-sho)”. Applicants are only permitted to submit once.

## **SCREENING FEES**

### **Graduate School of Letters, Economics, Human Relations, and Business and Commerce**

First screening fees	¥ 6,500
Second screening fees	¥ 35,000

### **Graduate School of Law**

Screening fees	¥ 10,000
----------------	----------

## **ADMISSION PROCEDURES**

Successful applicants must complete admission procedures to confirm enrollment in Keio University. Details will be announced later.

Prepare the necessary documents and submit them along with the admission fee, tuition, and other fees in mid-March to the Academic Affairs Center on the Mita Campus.

Refer to the guidebook in Japanese for more details.

## **IMMIGRATION PROCEDURES**

### **1. Entering Japan to take entrance examinations at Keio University**

Keio University will send a Certificate of Permission to Take Entrance Examinations (Juken Kyoka-sho) to overseas applicants who have successfully passed the first screening. To enter Japan, present the certificate and apply for a “temporary visitor” visa to take entrance examinations. It is basically not possible to change a “temporary visitor” visa used to take entrance examinations at Keio to a “college student” visa, especially when there is some time gap between the announcement of the screening results and the beginning of the academic year in April 2008. Thus, students must apply for a “college student” visa at the Japanese embassy or consulate in their home countries. But if there is only little time gap between the announcement of the screening results and the beginning of the academic year, it is possible to apply for a change of status from a “temporary visitor” visa to a “college student” visa in Japan.

### **2. Applying for College Student Visa**

There are two ways to apply for a “college student” visa. Application procedures are outlined below.

#### **A. By applying for the Certificate of Eligibility**

Keio University will send application forms for the “Certificate of Eligibility” along with the Certificate of Admission to admitted students who live overseas.

Students are expected to complete these forms and return them to the Academic Affairs Center, Keio University, as soon as possible. Keio University will then submit the application for the “Certificate of Eligibility” to the Immigration Bureau in Japan on behalf of the student. The certificate is usually issued after about a one or two-month processing period.

When the “Certificate of Eligibility” is issued, Keio University will send it to the student.

Students next apply for a “college student” visa at the Japanese embassy or consulate in their home country.

#### **B. Application without the Certificate of Eligibility**

It is also possible to apply for a “college student” visa at the Japanese embassy or consulate in their home country without the Certificate of Eligibility. However, we do not recommend this method, as it takes longer to obtain the visa.

### **3. Students who are already studying in Japan**

If students are already studying in Japan with a “pre-college student” visa, it is possible to apply for a change of status to “college student” visa at the regional Immigration Bureau in Japan. A Certificate of Admission issued upon completion of the admission procedures will be necessary.

## TUITION AND OTHER FEES

Tuition and fees for one academic year are (2007):  
(Tuition and fees listed below are subject to change without notice.)

	Letters	Economics	Law	Human Relations	Business and Commerce
Admission fee	¥ 310,000	¥ 310,000	¥ 310,000	¥ 310,000	¥ 310,000
Tuition	¥ 470,000	¥ 470,000	¥ 470,000	¥ 470,000	¥ 470,000

## ABOUT SCHOLARSHIPS FOR GRADUATE STUDENTS

Scholarship opportunities are available to full-time international students who are pursuing degrees at Keio University in good academic standing and in need of financial assistance. Other than the scholarships offered by Keio, scholarships are also offered by the Japanese Government (Monbukagakusho), local government, and other private foundations. Since 1994, Tuition Deduction Scholarships supported by the Japanese Ministry of Education, Culture, Sports, Science and Technology (Monbukagakusho), have been granted to self-supporting international students at Keio.

The following table indicates major scholarship categories and gives a record of the scholarship awards in the 2006 academic year, which were granted to students after official enrollment at Keio University. The figures do not include those awards granted under the exchange agreement with Keio, or other scholarships granted to students before arrival in Japan.

Organization	Name of Scholarship	Amount	Period	Number of Recipients		
				Master	Ph.D	Total
1 Keio University	Tuition Deduction Scholarship	Maximum deduction of 30% of tuition, Reapplication allowed	1 year	75	68	143
	Tuition Scholarship	Partial tuition scholarship ¥400,000 -600,000, Reapplication allowed	1 year	18	22	40
	Ken'ichi Yamaoka Memorial Fund Scholarship	Full tuition (except for miscellaneous fees)	1 year	0	2	2
	AEON Scholarship	Monthly Stipend:¥120,000, the tuition, facilities fee and seminar and relation material subscription fee	2 year	3	0	3
2 Japanese Government (Monbu - kagakusho)	Monbukagakusho Scholarship (Domestic Selection)	Full tuition, monthly stipend of ¥175,000, and air fare to return home	Minimum period of enrollment	1	0	1
	Honors Scholarship	Monthly stipend of ¥70,000	1 year	16	18	32
3 Scholarships provided by Local Governments and Private Foundations	Scholarship applicable only from outside of Japan (*1)	Varies	Varies	19	6	25
	Other Scholarships	Monthly stipend of ¥10,000 - ¥200,000	Varies	39	39	78

\* Number of international students (self-supporting) in the academic year 2006: Master: 126 Ph.D.: 123

\* Most of the scholarships require "College Student Visa".

(\*1) Scholarships to be appointed before coming to Japan.

## GENERAL DESCRIPTION OF THE GRADUATE SCHOOL OF LETTERS

### **Overview**

The Graduate School of Letters dates back to 1951, when it was initially comprised of Master's programs in five fields: Philosophy, History, Japanese Literature, English Literature, and French Literature. In 1953, doctoral programs were created in each of these fields, followed by majors in German Literature, Library and Information Science, and Chinese Literature. In 2001, the Philosophy major was divided into a major in Philosophy and Ethics, and a major in Aesthetics and Art History, creating a total of nine majors in all. In 2004, a field in Information Resource Management was created within the Library and Information Science major, and in 2005 a field in Art Management was added to the Master's program in the major of Aesthetics and Art History. These two are for students with at least three years of postgraduate professional experience, with classes offered weekday evenings and Saturday afternoons. From 2007, a field in Teaching of Japanese as a Foreign Language has been added to the Master's program in Japanese Literature in order to develop Master's level graduates equipped to teach and conduct research in Japanese as a foreign language. This field is open to undergraduates regardless of experience or number of years since graduation.

Since 2001, the curriculum has consisted entirely of two-unit single-semester courses. This is designed to allow students to refine specialized skills by pursuing coursework directly relevant to their research interests, while at the same time exposing them to a wide range of other courses. This approach helps to round out a liberal arts education and enables students to combine range of study with the pursuits of their own research interests. The results include greater depth, breadth, and complexity of vision, and facilitate opportunities to study abroad. With a larger admissions quota, the number of first-year Master's students rose to 130 in 2007, and the number of first-year doctoral students to 45. These figures include students from a number of countries.

The Graduate School of Letters has reciprocal credit arrangements with the Graduate School of Letters, Arts, and Sciences and the Graduate School of Education of Waseda University, and the Graduate School of Humanities at Gakushuin University. This enables Master's students in any of these schools to receive credits for up to eight units of coursework taken at a partner institution. A similar arrangement is in place with Sophia University's Graduate Division of Philosophy in the Philosophy and Ethics major. Every year, many students take advantage of this reciprocal credit opportunity, which also serve to increase communication among researchers. The Graduate School of Letters admits non-degree and research students, while the Library and Information Science major features an internship course. A positive approach is taken to the acceptance of credits earned while studying abroad. In recent years, we have been encouraging more students to pursue doctoral degrees. This has led to an increasing number of students being awarded "course" doctorates. Graduate students can present their research findings in a variety of ways within the University—the Mita Philosophical Association, the Mita Historical Society, the Keio Society of Arts and Letters, and the Mita Society of Library and Information Science — opportunities to publish can also be found in the literary coterie journals and collected papers published in the Japanese Literature, German Literature, and English and American Literature majors.

Following the Graduate School of Literature's selection for participation in MEXT's 21st

Century Centers of Excellence (COE) Program and Initiatives for Attractive Education in Graduate Schools, we have recently seen the start of collaboration on projects and the supervision of graduate students between the Graduate School of Human Relations and Institute of Cultural and Linguistic Studies of Keio University, and France's Sorbonne and École Normale Supérieure. A short-stay intensive study abroad program has been launched with King's College London's School of Humanities. Through new interdisciplinary and international exchange projects and programs such as these, we have embarked on educating researchers for a higher international caliber, while maintaining our commitment to well-grounded scholarship.

### **Our vision for our students**

The Graduate School of Letters seeks to produce scholars with both a well-rounded education and great depth in their specialized knowledge. Such highly skilled professionals can serve society as expert teachers, curators, and librarians. We believe that by providing a solid education and opportunities for serious research, students will naturally emerge to become world-class researchers and highly skilled professionals, and that this will, in turn, further their internationalization.

## **GENERAL DESCRIPTION OF THE GRADUATE SCHOOL OF ECONOMICS**

### **Overview**

Economics has been called “the Queen of the social sciences,” because it has prided itself on having the most rigorously logical theoretical framework (or foundation). Given the progress of other social sciences in recent years, it may now be a bit presumptuous to speak in this way. However, it is fair to say that economics still excels in terms of its extremely high level of standardization and the role it plays as a globally shared epistemological framework. In fact, both macroeconomics and microeconomics have become part of the common understanding of people throughout the contemporary world. Global discussions on “foreign exchange” and “trade” are conducted on this basis. Central banks and economic ministries all over the world assemble data on prices and employment according to unified international economic standards, and use the assembled information to develop economic policies. In recent years the classrooms of America's top graduate schools have been flooded with students from China and India that are eager to learn economics. For quite some time, countries of Latin America have selected their best and brightest to send to the economic departments of American and European universities. Since economic issues are a life-and-death matter for developing countries, this makes perfect sense. Nor are economic issues any less important to developed countries. It goes without saying that economic policies, which have direct impact on the lives of the people, are managed by individuals with a high level of specialized knowledge on economics and the actual functioning economy. The Chair of the U.S. Federal Reserve Board (FRB), for example, is at the helm of U.S. monetary policy, and by extension, wields an enormous influence on the world economy as a whole. Current Chair and former university professor Ben Bernanke and, of course, former chair Alan Greenspan both hold doctorates in economics. They are assiduous in their reading of professional journals to keep abreast of the latest developments in the field. Continuing study of economics is essential, not just for the chairman of the FRB, but for anyone in a position of significant influence over economic activities. Economic interdependence in the world will no doubt continue to deepen, and with it the significance of economics as a basis for shared understanding. The study of economics has a longer history at Keio University than anywhere else in Japan. But what is significant is not just the length of that history: Keio has always been a stronghold of economic research in Japan, and a source of new knowledge. The mission of the Graduate School of

Economics is to transmit this crucial knowledge of the field of economics to students with high ideals and aspirations, and to foster talented individuals with advanced professional skills, whether they continue into research or a career in business.

### **Our Vision for Our Students**

Every year a portion of the students complete our Master's program and venture forth into the world, while others enter the Ph.D. program. For both groups, the Graduate School of Economics requires the submission and acceptance of a Master's thesis as a requirement for completion of the M.A. program. This is a major difference from the usual professional school education, in which mastery of coursework receives primary emphasis. Thus, even in the brief two years of the M.A. program, the Graduate School of Economics requires its students to think like economists and to produce a scholarly paper of publishable value. For students who proceed to the Ph.D. program, even more significant research results are required in order to complete their degree. They are required to produce research that will increase the store of knowledge in the field of economics. Their research should be of sufficient merit for publication in refereed academic or professional journals. In a time when economics is being studied so enthusiastically by so many people, it is valuable to produce research that truly contributes to scholarship in the field. On the other hand, for students who enter the workplace after the completion of their Master's degree, the experience of having studied economics intensively for two years will no doubt influence them throughout their lives. In our society, knowledge of law or politics is also valuable, but for practical business and the formulation of economic policies, knowledge of economics becomes an indispensable guide to action. No matter what road they may travel after degree completion, what we are looking for in prospective students is the lofty aspiration to work towards a mastery of the discipline of economics.

## **GENERAL DESCRIPTION OF THE GRADUATE SCHOOL OF LAW**

### **Overview**

The Graduate School of Law was established as one of the new graduate schools created by the academic reform of 1951, with majors in civil law and political science. A major in public law was created in 1962, giving us the three majors we offer today.

We have a full-time faculty of 60 distributed across these three fields, offering a wide variety of specialized courses.

The major in civil law involves the study of basic theories of private law, the civil code, the commercial code, civil procedure, private international law, and other areas. The major in public law covers such areas as constitutional law, administrative law, international law, criminal law, and criminal procedure. Both majors share a common core of courses, including U.S., British, French, and German law, legal philosophy, theories of judicial systems, and legal history.

The political science major covers political thought, political and social theory, Japanese politics, regional studies, and international politics. Faculty members are normally affiliated with one of these five areas of concentration, offering specialized research guidance and practical seminars based in their own particular field of interest.

In addition to these specialized course offerings, a special feature of all three majors has been the establishment of joint seminars under the supervision of a team of faculty members as well as project-based coursework featuring a variety of outside lecturers. The role of outside lecturers is to anticipate significant changes taking place in our society and deepen knowledge of research themes that reflect contemporary needs.

## **Our Vision for Our Students**

The primary goal of our majors in civil and public law, in addition to providing a firm foundation in the basics of legal philosophy, jurisprudence, and legal thought, is to produce legal professionals with practical analytical and problem-solving skills, along with those who choose to specialize in law as an academic discipline. Graduates of our Program who seek employment in the business world will enter it equipped not only with a legal mind capable of grasping the practical problems of contemporary society from the perspective of law, but also with the skills necessary to play an active role in the legal departments of today's corporations.

To this end, both the civil law and public law majors offer joint seminars and project-based coursework in addition to supervision in a specialized field by a faculty advisor, with the aim of fostering the ability to think multilaterally, from both theoretical and practical perspectives, about a wide range of multidisciplinary or interdisciplinary problems.

The major in political science trains scholars and researchers in a variety of specific fields, while at the same time producing talented individuals capable of identifying and solving problems in the world. For both, a solid foundation in political theory, thought, and history is of great importance. Students are also encouraged to study the methodologies of policy research while always being aware of the tension between theory and the ever-changing nature of contemporary reality.

Research is often viewed as the accumulation of individual analysis, but today, as the objects of research grow ever more complex and the flow of information ever more massive, collaborative efforts among political science researchers have become indispensable. The 21st Century Centers of Excellence Project, organized around our major in political science, takes as one of its primary objectives the participation and training of graduate students, and has become a Center for the pursuit of this new collegiality in political science research.

## **GENERAL DESCRIPTION OF THE GRADUATE SCHOOL OF HUMAN RELATIONS**

### **History**

The Graduate School of Human Relations was established in 1951 by professors from the Faculties of Literature, Economics, and Law who were engaged in sociological research. Its goal was to create a graduate program of interdisciplinary research and education that transcended the boundaries of the existing faculties. It was a radical step for the times. Later psychology and education were included in the faculty. While it began with only sociology as a major, the number of majors has steadily increased - At this time the faculty focuses on human beings and their overall relation to society. Current faculty members are not only drawn from the three Faculties mentioned above, but also from the Institute for Media and Communication Research, the Institute of Cultural and Linguistic Studies, and the Teacher Training Center.

### **Why Human Relations?**

The academic fields covered in the Graduate School of Human Relations include: 1) Sociology, social psychology, communications theory, cultural anthropology, and ethnography 2) Psychology, and 3) Education, including developmental and educational psychology. All of these fields are concerned with psychology and human groups. And, while there are three main research fields in the Faculty, their many interests frequently overlap.

Our present academic disciplines and system gradually took shape in the course of the nineteenth century. This reflected an earlier period when topics broadly considered as philosophy branched off and became established as independent academic disciplines. These now include a range of efforts to explore the nature of human beings and society, which can be categorized into sociology, psychology, and education. Nevertheless, the high degree of academic specialization prevalent today can make it difficult to see the deep mutual

relationships among these different academic lineages. When human beings and their societies confront major change, the “fundamental questions” which cut across these disciplines become ever more important. Accordingly, we use the term “human relations” to indicate the nature of these fundamental questions.

### **System of Research and Education**

Created from the beginning as an interdisciplinary institution, the structure of research and education in the Graduate School of Human Relations is one that cuts across disciplinary boundaries. Credits for coursework are interchangeable in the three major fields of sociology, psychology and education. Collaborative research flourishes well beyond these three majors. Students, staff and faculty of the School are actively involved in two of the 21st Century Centers of Excellence projects, and we have reciprocal credit arrangements with several other major universities.

### **Our Vision for Our Students**

More than a century ago, the famous sociologist Max Weber warned that “specialists without spirit” would dominate the twentieth century. Sadly, there is serious debate regarding the accuracy of this prediction. Certainly legitimate expectations continue for the development of specialists who can manage giant organizations along with highly advanced, complex technology. We also hear calls for ever closer connections between academic research and practical, applied educational outcomes. Yet, we must not forget that there is a great difference between training academics for educationally related research and the training of specialized professionals.

To solve the enormous and complex problems facing contemporary society, we need to establish goals, and then work out a strategy to achieve them. Specialists are at their best in this effort - once the goals have been determined. But who shall specify these? The goals in question here involve fundamental questions about the nature of human beings and societies. Answering these questions involve an “insight into human nature” based on a thorough understanding of history and society. The aim of the Graduate School of Human Relations is to produce professionals capable of applying their advanced academic knowledge and judgment to identifying for other experts the goals that society should attain.

## **GENERAL DESCRIPTION OF THE GRADUATE SCHOOL OF BUSINESS AND COMMERCE**

### **Overview**

To commemorate the Centenary in 1957 of the establishment of Keio University, Japan’s oldest modern institution of higher learning, the Faculty of Business and Commerce was split off from the Faculty of Economics. This was followed four years later in 1961 by the establishment of the Graduate School of Business and Commerce. Inheriting the mantle of the “spirit of practical knowledge” espoused by Keio’s founder, Yukichi Fukuzawa, the school’s guiding principle is to apply both theoretical and practical approaches to understanding today’s global industrial society and rapidly changing social structure, and to gain insights into directions in progress and change.

Situated within this tradition of practical learning, the Major in commerce is not about studying the learning and application of knowledge of use in actual commerce. Rather, it consists of interpreting the problems presented by contemporary industrial society from both macro- and micro-perspectives. For students, it offers an opportunity to explore theory-led solutions and the accumulation of knowledge, while recognizing the constraints of both theoretical and empirical approaches. The course invites students to probe into causes, and explaining the mechanisms that give rise to them. Through this, we can hope to forecast the direction of future developments.

Our graduate program covers the fields of economics (finance and securities, insurance, transport and public policy, industrial organization, econometrics, international economics, industrial history, business history, and industrial relations), marketing, business administration, and accounting. Faculty members have extensive research backgrounds in a diversity of fields. This strength enables students to acquire perspectives, knowledge, and methodologies from a variety of academic fields without concentrating excessively on one narrow perspective.

### **Our vision for our students**

Our aim is to produce top-level managers, specialists, and academicians capable of playing a leading role in society. In line with the basic policy pursued by the Graduate School of Business and Commerce, as the inheritor of the mantle of the “spirit of practical knowledge,” our students acquire a range of knowledge, unique analytical abilities, and communication skills. These enable them to play a role as professionals in all areas of society, such as researchers and educators, both at businesses and universities. Others go on to serve as top managers at firms and non-profit organizations, while others pursue successful careers in accounting.

### **The Master’s program**

From 2007, the major in commerce in the Graduate School of Business and Commerce has been divided into two courses: the Academic Research course and the Accounting for Professionals course. The former provides a systematic curriculum consisting of basic application, practice, and thesis supervision for students intending to become professional researchers. In addition to the courses in each specialist field, a variety of interdisciplinary courses have been established in economics and legal systems, strategic management and accounting, innovation management and commerce, the environment and economic policy. Classes are taught by faculty members from differing specialties, giving students the opportunity to deepen their understanding through analysis and discussion from different angles of themes and issues located on the boundaries between disciplines.

The Accounting for Professionals course equips students with wide-ranging specialist knowledge, outstanding IT and communication abilities, sound judgment and applied skills. All of this is backed by theory through classes in advanced accounting theory and practice, and education in specific and specialized fields of accounting. These fields include IT auditing, international accounting, international taxation, environmental accounting, and NPO accounting. At the same time, students learn in detail about accounting, taxation, corporate law, finance, and governance and corporate ethics. The overall course produces experts capable of making decisions from long-term, integrated perspectives in a variety of professional settings, such as finance and business planning, the public sector, research institutes, and consulting companies.

The Graduate School of Business and Commerce’s diverse student body includes foreign students from different countries. Many are tax and finance officials from developing countries who study at Keio University as part of a World Bank program. Around 10 courses are taught in English, and these are open to Japanese as well as foreign students.

### **Doctoral program**

The principal purpose of the doctoral program is to prepare students for a career in academia, and the curriculum is therefore designed to provide students with the abilities and insight that they will need as independent researchers and educators. Presently, the program is divided between a Commerce major and a Business Management and Accounting major, in each of which there are specific research courses including joint seminar. From April 2009, these two majors are scheduled to be combined into one, in line with the Master’s program.

## **HEALTH INSURANCE & MEDICAL ASSISTANCE**

Medical costs in Japan are very high without health insurance. When staying in Japan as a student for more than one year, you must join National Health Insurance unless covered by a family members' insurance. Payment of a premium is required. International students with college student visas can also apply for Medical Fee Reimbursement (provided by the Japan Student Services Organization (JASSO)).

Keio undergraduate and graduate full-time regular international students are also eligible for Keio Students' Health Insurance. Taking advantage of all three insurance systems, 100% of medical expenditures can be covered, except in special cases.

## **WORKING PART TIME IN JAPAN**

As a student visa holder, you are expected to engage only in activities related to your student status. If you wish to engage in secondary activities aside from your study, such as working part time, you must obtain permission from the Immigration Bureau before you start such activities. Under the immigration law, foreign students must apply first for permission from the Regional Immigration Bureau before engaging in part-time jobs.

With this permit, a full-time student is allowed to work up to 28 hours a week (8 hours a day during vacation periods in summer, winter and spring) as long as the work is not illegal or obstructive to public order and morality.

Please be aware that studying in Japan can be very expensive. Under the present immigration regulations, it is not realistic to expect that you can depend on part-time jobs as the main source of income to finance your study in Japan. Financial security is one of the most important factors for the success of your study in Japan. Please make sure to prepare a realistic plan to finance your education before you leave your country.

## **HOUSING**

Keio University has one off-campus dormitory for privately-financed international students in Yokohama city (About 65 minutes to Mita campus). The rent charged international students is ¥49,000, in addition to the non-refundable move-in fee (utility charges not included). Be aware that we cannot accept all room applications as this is a competitive procedure. Accordingly, privately-financed international students are expected to find housing on their own, in the event they cannot live in Keio University accommodations. Such students may need to ask for help from their guarantors, friends, or acquaintances living in Japan.

Housing costs vary greatly depending on the location, quality, and on many other factors. You may have to be prepared to pay about ¥45,000~80,000 or more per month. When renting a house or apartment, it is customary to pay, in addition to the first month's rent, 'key money' (amounting to 2-3 months' rent), a deposit (amounting to 2-3 months' rent), and an agent's handling fee. Though the deposit will usually be refunded to the tenant when leaving, the key money will not be returned. So, expect to spend a minimum of 5 months' rent when you first rent an apartment.

## **STUDENT ACTIVITIES**

At Keio, student extra-curricular activities are highly valued. The highlights of these activities are the annual Mita Festival and semi-annual Keio vs. Waseda University baseball games.

There are now many student organizations recognized by the university. Among these, KOSMIC (Keio Organization of the Student Members of the International Center) promotes friendship among Japanese students and international students. The Japanese members act as peer guides and resource persons for international students. It also organizes various social activities, such as parties, trips and a speech contest. Another international activities related student group is the I.I.R.(Institute of International Relations) which independently administers student exchange programs.

## **OTHER INTERNATIONAL ACTIVITIES**

In association with the International Center, Keio Fujin Mitakai supports international students and scholars organizing various activities. Its members are female graduates of Keio University. As a volunteer organization, it organizes free and informal Japanese language practice sessions and other activities for international students, scholars, and their family members. Some examples include calligraphy & flower arrangement, invitations to tea ceremonies, and an annual bazaar.

Another volunteer organization is Keio Welcome Net which helps international students purchase daily needs, go to hospitals, and settle into their lives in Japan.

## **JAPANESE LANGUAGE PROGRAM**

Keio University also offers a one-year intensive Japanese Language Program for non-Japanese speakers. It is a non-degree program administered independently from regular degree programs.

The curriculum is designed to assist students in attaining the high level of proficiency in Japanese necessary to carry out research and other academic activities in a specialized discipline. Teaching materials in the program have been developed in collaboration with faculty members in undergraduate and graduate programs of Keio University.

For application guidebook about the Japanese Language Program write to:

Center for Japanese Studies

#### **4. KEIO HISTORY AT A GLANCE**

---

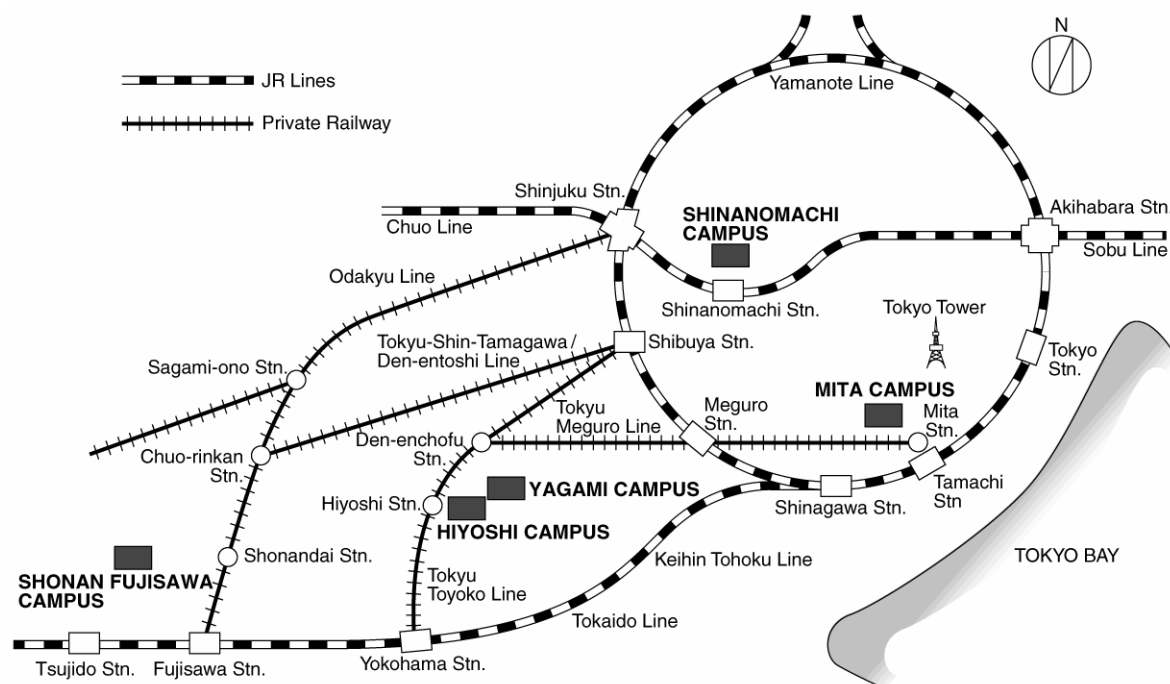

- 1858 Establishment of Fukuzawa's private Dutch studies school in Teppozu, Edo (present-day Tokyo); this is the origin of present-day Keio.
- 1863 The school transformed into an English studies school.
- 1868 The school moved to a new site, adopting "Keio" from the name of the era.
- 1871 Keio moved to Mita (now the main campus).
- 1890 Keio was inaugurated as the first private university in Japan with three departments: Literature, Economics, and Law.
- 1898 Keio as an integrated educational corporation with elementary and secondary schools started.
- 1906 Graduate Schools were added to Keio University.
- 1917 School of Medicine was founded.
- 1920 Under new educational provisions, Keio became a general university with the Faculty of Letters, Faculty of Economics, Faculty of Law, and School of Medicine.
- 1944 Fujiwara Institute of Technology was donated to Keio to become the Faculty of Engineering.
- 1948 University Correspondence Courses began.
- 1957 The Faculty of Business & Commerce was inaugurated.
- 1978 The Graduate School of Business Administration was newly established.
- 1981 The Faculty of Engineering was reorganized and further expanded; as a result, it was given a new name, the Faculty of Science & Technology.
- 1985 The Graduate School of Engineering was renamed to become the Graduate School of Science and Technology.
- 1990 The Faculty of Policy Management and the Faculty of Environmental Information were newly established; Keio Academy of New York (U.S.A.) opened in September.
- 1994 In the Graduate School of Medicine, the Master Course (major: Medical Science) was opened; the Graduate School of Media and Governance was founded at the Shonan Fujisawa Campus.
- 2001 The Faculty of Nursing and Medical Care was newly established.
- 2004 Law School was newly established.
- 2005 The Graduate School of Health Management was newly established.
- 2007 The Faculty of Environmental Information was renamed to become the Faculty of Environment and Information Studies.
