

Kroger understands that it is important for blood glucose meters to be *convenient and accurate*. This is why Kroger has recently upgraded the Kroger private label blood glucose meter to a *new NO CODE meter* manufactured by AgaMatrix.

Powered by AgaMatrix's WaveSense Dynamic Electrochemistry™ to accurately measure blood glucose levels, the meter offers *NO CODING ease of use, fast test time, small sample size, and affordability*, making it the ideal meter for everyone.

The Kroger meter and test strips are *tier 1 on the KPP Plan*, with 50% savings over tier 2 meters and strips. The meter and strips are affordable for everyone, even those without insurance coverage.

AgaMatrix also offers a *FREE Diabetes Manager iPhone app* to use in conjunction with your meter.
