Source: Survey of Personal Incomes 2007-08 (see paragraph 2)

Table updated February 2010

Notes on the Table

Income and tax, by gender, region and country, 2007-08

- Estimates for sub-UK geographical areas (eg by country, Government Office Region, county etc) should be treated with particular caution (see paragraphs 11 & 13-17 of notes on Personal Incomes)
- This table gives distributions of total income and tax for United Kingdom, England, Wales, Scotland and Northern Ireland. The information is presented on a Government Office Region basis for England. The numbers of individuals with self employment income are consistent with the definition used for Table 3.6 and only include people who are liable to tax in 2007-08.
- Self employment income is profit chargeable under the Income Tax (Trading and Other income) Act 2005 less losses brought forward and capital allowances allowed. The number of individuals with self employment income shown in this table is lower than that shown in Table 3.10. In this table only individuals who are liable to tax in 2007-08 are included, whereas Table 3.10 includes all people with a self employment source in 2007-08. Employment income includes all pay from employment, from taxable benefits and from unemployment benefit, income support or Jobseeker's Allowance. In previous years we have used as our definition of self-employed, those who have non-zero profits, capital allowances or losses brought forwards. From 2003/04 we changed the definition to encompass all taxpayers who have a self-employment source.
