<u>in the</u> <u>Gospel of John</u>

- Note that 01 is Western from 1:1 to 8:38!
- 565 is f1 in John!
- According to Fee and my own studies, P66 has distinct Western properties from ch. 6 on to the end. Fee notes a strong Western element in ch. 6-7 and scattered Western readings throughout ch. 8-21.

Results from the variant evaluation:

The best manuscripts of Jo:

- 1. Primary (=best) witnesses for Jo are: P661-5, P75, B, C, L, W, T, 083
- 2. Secondary (= good) witnesses for Jo are: P5, $P66^{6-21}$, 01, D^{Byz} , [X, 213, 865], O70, O86, 33, 849, C0, $Sy-C^{Byz}$
- 3. Tertiary, mixed Byzantine: Ψ, [0141/821], 397, 579, 597, 1241, 2786 ← all weak 579 has a Byz block from about 6:52 9:4
 1241 is Byz from ch. 16-21, somewhat better in ch. 1-15 (62% Byz). My data are limited, probably it's even better. T&T get 50% Byzantinity for Jo 1-10 based on 153 readings.

"Western": $(P66^{6-21})$, $O1^{1-8}$, D, Lat/it, Sy-S, Sy-C Byzantine: A, N, Θ , (f1), f13, 28, 157, 565, 700, 892, (1071), 1424, vg, Sy^{P,H}

Detailed Analysis of Jo 1-5:

A more detailed analysis of Jo ch. 1-5 which took into account all variants from Swanson gave the following results:

Prime Alexandrian: P66, P75, B
 Secondary Alexandrians: C, L, W^{sub}
 Tertiary Alexandrians: Ψ, 33, 579

4. Western: 01, D

5. Caesarean: (distinguishable, but basically Byzantine)

group 1: Θ , f13, 1071 group 2: f1, 565

Results from Text & Textwert John 1-10

The analyses of the T&T collations (based on 153 readings in John 1-10) confirm the above results. The (comparatively) good quality of X/033 in John might be worth mentioning, because it is not very widely known. T&T also confirm that 565 is a member of f1 in John, it is very close to 1/1582 (95%).

The almost complete analysis of the minuscules by T&T revealed the following interesting minuscules with good text: "2" readings are txt readings against Byz.

	"2"	"Special"	
849	58%	20%	(excellent, but fragmentary)
<u> 397</u>	41%	16%	(similar to 33 in quality)
<u>597</u>	31%	12%	(slightly worse than 33 in quality)
<u> Pair 01</u>	41/821:		
0141	30%	13%	
821	33%	13%	(95% agreement, very close!)
Group X/033:			
033	35%	18%	(similar to 33 in quality)
865	31%	18%	
213	29%	15%	
(799	25%	8%)	
	•		•

These four manuscripts form a group:

Agreement:

· · · · · · · · · · · · · · · · · · ·				
	033	865	213	799
033		93%	89%	81%
865	93%		82%	79%
213	89%	82%		82%
799	81%	79%	82%	

N/Ψ:

Additionally T&T found that N and Ψ are quite close in John: They agree 81%.

1241:

The only manuscript for which the evaluation in T&T gave significantly different results compared to mine, was 1241. In my analysis it was about 62% Byz in Jo 1-15 (afterwards it is pure Byz). In T&T it is only about 50% Byz. This is probably due to the fact that my data for 1241 are incomplete. I do not have the complete text of 1241, but only the Lake collation and the notations from NA.

So, whenever 1241 does not show up, it is counted as Byz in my commentary, which is probably not correct in every case. I think T&T is therefore probably nearer to the truth here.

Some information on the above manuscripts:

<u>849</u> is a 17th CE manuscript written on paper! It rests in the Vatican library (Barb. gr. 495) and contains John only. It is fragmentary (Jo 7:25 - 10:18) and extant only for 45 out of 153 Teststellen. It omits the PA. The manuscript has the commentary from Cyril Alex. added (book 5 and 6). Scrivener: 730, Soden: Ki60

Gregory notes: "copied from 850?" Unfortunately 850 has not been collated for T&T (due to a misinterpretation of the manuscript), but it will be given as an addendum in the next volume. Should be interesting. Textually 849 is closest to L (80% agreement, only 60% with B).

<u>850</u> is a 12th CE manuscript, parchment, also in the Vatican (Barb. gr. 504). It contains Jo 1:1 - 10:17. Also with Cyril commentary (Book 1-6). Scrivener 729, Soden: Ki20

397 is a 10/11th manuscript in Rome (Bibl. Vallicell. E40). Contains John only. Text with catena. Scrivener 397, Soden Ci10. It omits the PA.

 $\underline{597}$ is a 13th CE manuscript in Venice (Bibl. Naz. Marc., Gr. I, 59, 1277). It's written on parchment and contains the Gospels. Gregory: "has good readings". Scrivener 464, Soden: ϵ 340. It's rather close to group X, (73% agreement with X).

<u>0141</u> is a 10th CE codex in Paris (Bib. Nat. Gr 209), Contains John only. Text with catena. Gregory 314 (p. 178, he notes: "compare with X") Soden Ci13 (I-text, p. 1506)

<u>821</u> is a 16th CE manuscript again written on paper! Contains John only. Text with catena, at the beginning a catena on Genesis. It rests in the National Library of Madrid (4673, fol. 262-542). Soden Ci60 (I-text). It omits the PA. Is it a direct copy?

Group X: All four manuscripts omit the PA.

 $\underline{X/033}$: Codex Monacensis, $9/10^{th}$ CE, Munich, Univ. lib. (2° Cod. ms. 30), came in the 16^{th} CE from Rome, text in uncials, commentary in early minuscule, chiefly Chrysostom. Extant in John: 1:1-3:8, 7:1-13:5, 13:20-15:25, 16:23-fin., Jo 4:6-5:42 is supplied on paper, 12^{th} CE. Soden: A3 (p. 249, 564ff., 1506)

865: 15th CE codex on paper! Vatican library (Vat. gr. 1472), Contains John only. Text with Chrysostom commentary. Soden: A502 (von Soden already notes that 865 is a "dublette" or copy of 033, p. 565). 865 is very close to X. Is it possible that the Gospel of John has been copied from 033, before the manuscripts left Rome?

213: 11th CE codex, parchment, Venice, Bib. Naz. Marc. (Gr. Z. 542, 409), Jo 19:6-fin. is a $14/15^{th}$ CE suppl., 213 is Byz in Mt and Mk and has 13% "2" readings in Lk. Soden: ϵ 129

<u>799:</u> 11th CE (Gregory: 12^{th}) codex, parchment, Athen, Nat. Lib. (no. 117), the manuscript is Byz in Mt-Lk, Soden: ϵ 196. 799 is only a loose member of this group.

It shows von Soden's failure that he assigned the four codices different groups: 033: none, 865: A^{C} , 213: I^{O} , 799: K^{X} (Soden found it irrelevant to analyze 033 more closely, but he notes that 033 is closer to 01/B in John, p. 565)

The basically completely unknown manuscripts 397 and 849/850 deserve a detailed study.

124 of the 273 variants (45%) are difficult to evaluate (Rating either "-" or "1?").

Jo has 878 verses. This means that we have

- one significant variant every 3rd verse, and
- one difficult variant every 9th verse.

About 28 variants (10%) should be reconsidered in NA (Mt: 20, Mk: 13, Lk: 20).

Of the variants noted only 22 (8%) have an umlaut in B. There are 49 umlauts overall in Jo. This means that 27 of the 49 umlauts indicate rather minor (or unknown!) stuff.

- 4 In him was life, and the life was the light of all people.
- 3 All things came into being through him, and without him happened not even one thing. What has happened 4 in him was life, and the life was the light of all people. That which has come into being 4 in him was life ...

Augustine (early 5th CE):

Non ergo ita pronuntiari oportet *quod factum est in illo vita est* ut subdistinguamus *quod factum est in illo* et deinde inferamus *vita est* ... distinguit de quali *vita* loquatur cum addit *et vita erat lux hominum*. Sic ergo distinguendum est ut cum dixerimus *quod factum est* deinde inferamus *in illo vita est* ... nec praetermittendum est quod emendatiores codices habent *quod factum est in illo vita erat* ut sic intellegatur *vita erat*. (De Genesi ad litteram libri 5.14/157.3, from Houghton)

Metzger notes that there is a "consensus of ante-Nicene writers (orthodox and heretical alike) who took $\delta \gamma \in \gamma 0 \nu \in \nu$ with what follows."

But Metzger argues in a minority vote, that the Byzantine form is more consistent with Johannine repetitive style. He also writes: "Despite valiant attempts of commentators to bring sense out of taking \eth $\gamma\acute{\epsilon}\gamma ο\nu \epsilon\nu$ with what follows, the passage remains intolerably clumsy and opaque. On the difficulties that stands in the way of ranging the clause with $\acute{\epsilon}\nu$ αὐτ \eth ζω \eth \eth ν is that the perfect tense of \eth γ $\acute{\epsilon}\gamma ο\nu \epsilon\nu$ would require $\acute{\epsilon}\sigma \tau \iota \nu$ instead of $\eth \nu$."

This $\dot{\epsilon}\sigma\tau\iota\nu$ has actually been replaced here by 01 and D. See next variant.

The Byzantine punctuation is called by Ps. Ambrosius $(4^{th} CE)$ "that by the Alexandrians and Egyptians". Hort: "[the Byz punctuation] has high claims to acceptance on internal grounds."

Note also the reading $0\mathring{v}\delta\grave{\epsilon}\nu$ for $0\mathring{v}\delta\grave{\epsilon}$ $\check{\epsilon}\nu$.

Normally Origen uses $\mathring{\eta}\nu$ (13 times), but twice he uses $\check{\epsilon}\sigma\tau\iota\nu$ in his commentary on John (labeled "adaptions" in Ehrman, which means "a quotation that has been somewhat modified"):

- 1. $\epsilon \iota \gamma \epsilon \zeta \omega \eta \epsilon \sigma \iota \iota \tau \sigma \phi \omega \zeta \tau \omega \nu \alpha \nu \theta \rho \omega \pi \omega \nu$ (Com. Jo 2, 19, 130)
- 2. τινα μεντοι γε των αντιγραφων εχει, και ταχα ουκ απιθανως ο γεγονεν εν αυτω ζωη εστιν (Com. Jo 2, 19, 132)

Clement uses twice $\dot{\epsilon}\sigma\tau\iota\nu$ (Paed. 1.27.1, Exc. 19.2) and once $\dot{\eta}\nu$ (Paed. 2.79.3). B: no umlaut

Compare:

NA^{2 $\dot{7}$} John 1:1 Ἐν ἀρχῆ <u>ἦν</u> ὁ λόγος, καὶ ὁ λόγος <u>ἦν</u> πρὸς τὸν θεόν, καὶ θεὸς ἦν ὁ λόγος. 2 οὖτος ἦν ἐν ἀρχῆ πρὸς τὸν θεόν.

Probably a correction to express clearly, that there still IS life in him. If the preceding \mathring{o} $\gamma \acute{\epsilon} \gamma o \nu \epsilon \nu$ is taken with the following, $\mathring{\epsilon} \sigma \tau \iota \nu$ is required here. But the second $\mathring{\eta} \nu$ in the $\kappa \alpha \grave{\iota}$ $\mathring{\eta}$ $\zeta \omega \mathring{\eta}$ $\mathring{\eta} \nu$ $\tau \grave{o}$ $\varphi \hat{\omega} \zeta$ seems to require the first.

Origen regarded it with some favor: τάχα οὖκ ἀπιθάνως = "perhaps not implausible".

It is possible that the $\dot{\epsilon}\sigma\tau\iota\nu$ has been conformed to immediate context: the directly following $\dot{\eta}\nu$ and 4 times in verses 1-2.

"Non ex carne, non ex sanguine, non ex voluntate, viri neque ex voluntate carnis sed ex deo <u>natus est.</u>" (Confessionum libri 7.9.20 and Contra Secundinum Manichaeum 5) But elsewhere Augustine also is citing the plural. Compare Houghton.

Compare previous verse:

 NA^{27} John 1:12 <u>όσοι</u> δὲ ἔλαβον αὐτόν, ἔδωκεν αὐτοῖς ἐξουσίαν τέκνα θεοῦ γενέσθαι, τοῖς πιστεύουσιν εἰς τὸ ὄνομα αὐτοῦ,

In this reading the $\delta \zeta$ is not referring to $\delta \sigma o \iota \delta \epsilon \ \epsilon \lambda \alpha \beta o \nu \ \alpha \dot{\upsilon} \tau \dot{o} \nu$ as does oì, but to Jesus.

Tertullian, who has this reading, wrote that the Valentinians have made the change (de carne Christi, 19 + 24). Irenaeus: Adv. Haer. III, 16:2, 19:2

B. Ehrman: "what we have here is not a heretical tampering with the text, but an orthodox one. The corruption serves to locate the orthodox notion of Jesus' birth in a passage that otherwise lacked it."

The following eminent scholars have argued for the singular: Blass, Boismard, Burney, (Harnack), Loisy, Menge^{1st ed.}, Resch, Zahn and others.

It is also possible that the singular arose from the influence of the immediately preceding $\alpha \dot{\upsilon} \tau o \hat{\upsilon}$. There is no real explanation as to why somebody should have changed the singular to the plural.

Harnack thinks that the complete verse 13 is secondary, probably an early gloss on $\kappa\alpha$ $\dot{\delta}$ $\delta\gamma\delta$ $\delta\gamma\delta$ $\delta\gamma\delta$ $\delta\gamma\delta$ from the Johannine community. He notes:

- 1. The otherwise rather succinct prolog is here quite detailed. There is no real need to elaborate any further about the $\delta\sigma\sigma\iota$ $\delta\dot{\epsilon}$ $\tilde{\epsilon}\lambda\alpha\beta\sigma\nu$ $\alpha\dot{\nu}\tau\dot{\sigma}\nu$.
- 3. the Aorist $\dot{\epsilon}\gamma\epsilon\nu\nu\dot{\eta}\theta\eta\sigma\alpha\nu$ is problematic. Expected is either Present or Perfect. Isn't the sentence almost without sense: "he gave them power to become children of God, who were born not of blood but of God."
- 4. The meaning is unclear (Harnack: "dark"). Why the polemics? Who pretends that children of God are born of blood and flesh? There is even a tautology here: "Children of God are born of God."
- 5. the following $\kappa\alpha$ ($\kappa\alpha$) δ $\delta\gamma$ 0 ζ $\delta\gamma$ 0 ζ $\delta\gamma$ 6 ζ 6 ζ 6 ζ 6 ζ 6 ζ 0 ζ 1. is strange, because is takes for granted that immediately before the $\delta\gamma$ 0 ζ 1 has been mentioned.
- 6. A peculiar problem arises from the contrast in verse 13 of those $\dot{\epsilon}$ Κ θ εοῦ $\dot{\epsilon}$ γεννήθησαν and in verse 14 of the one μονογενοῦς παρὰ πατρός.

Harnack thinks that all the problems with this sentence can only be solved by declaring it secondary. It has a Johannine flavor, but it does not fit into the text. Thus it must have come into existence in the Johannine circle, probably as an early marginal gloss, either to create conformity with Mt/Lk or to explain the short term $\sigma \grave{\alpha} \rho \xi \ \grave{\epsilon} \gamma \acute{\epsilon} \nu \epsilon \tau o$. Harnack thinks that this original gloss was without relativum (see D* and b) and with the Singular.

J. Schmid agrees with Harnack that the words are a secondary insertion by the author into an original early Hymn.

A. Pallis (Notes, 1926) writes: "The true position is represented by $\mathring{\delta}\zeta$... $\mathring{\epsilon}\gamma \in \nu \nu \mathring{\eta}\theta \eta$, by which in accordance with sense it is to Jesus alone that an immaculate birth is attributed. The relative $\mathring{\delta}\zeta$ refers to $\mathring{\tau}\delta$ $\mathring{\delta}\nu \circ \mu \alpha$ $\mathring{\alpha}\mathring{\upsilon}\tau \circ \mathring{\upsilon}$, which is a periphrastic equivalent of $\mathring{\alpha}\mathring{\upsilon}\tau \mathring{\delta}\nu$; cf. 2:23 $\mathring{\epsilon}\pi \mathring{\iota}\sigma \tau \in \mathring{\iota}\sigma \alpha \nu$ $\mathring{\epsilon}\mathring{\iota}\zeta$ $\mathring{\tau}\delta$ $\mathring{\delta}\nu \circ \mu \alpha$ $\mathring{\alpha}\mathring{\upsilon}\tau \circ \mathring{\upsilon} = \mathring{\epsilon}\mathring{\iota}\zeta$ $\mathring{\alpha}\mathring{\upsilon}\tau \mathring{\delta}\nu$, etc."

B: p. 1350 A 7: A very small \cap is written above the $\bigcirc\bigcirc$. An \bigcirc is written above the unenhanced \bigvee with a bar (Nu ephelkustikon).

An interesting variant.

The B* reading is the more difficult reading, a parenthetical explanation about the Baptist, not the words of the Baptist about Christ.

On the other hand it is possible that the rather unusual $\delta\nu$ $\epsilon \tilde{\iota}\pi o\nu$ caused confusion (one would have expected $\tilde{\upsilon}\pi \tilde{\epsilon}\rho$ $o\tilde{\upsilon}$ $\tilde{\epsilon}\gamma \tilde{\omega}$ $\epsilon \tilde{\iota}\pi o\nu$). This is supported by the fact that some witnesses added a $\tilde{\upsilon}\mu \tilde{\iota}\nu$ for clarity.

So argues also Metzger in his commentary: "The awkwardness of the reading ... as well as the absence of a previous mention of John's testimony, prompted more than one copyist to make adjustments in the text. ... Several other witnesses (01^{C1} , B^* , C^* , Or) [were] less successful in their adjustment of the text."

The idea that the extremely curious B* reading caused the confusion is not noted or considered by Metzger.

Zahn (Comm. Jo): "[the B reading] makes no sense".

μονογενής θεὸς is a unique phrase, certainly the harder reading. It is more difficult to understand in context. υἱος conforms to Johannine usage and fits perfectly. It is possible that it originates from the Latin.

The words could easily be mixed up because they are both nomina sacra: QS or US. This is what A. Wikgren argues in a minority vote. $\theta \in \delta \zeta$ appears 7 times before in the passage. But this cannot be the (full) explanation since besides the QS/US variation also an article has been added to $\mu 0 \nu 0 \gamma \in \nu \dot{\eta} \zeta$.

The combination $\mu o \nu o \gamma \in \nu \eta \zeta$ with $\upsilon i \acute{o} \zeta$ appears two more times in John (both are safe). $\upsilon i \acute{o} \zeta$ also contrasts well with $\pi \alpha \tau \rho \grave{o} \zeta$ later in the verse.

It is interesting that the quite obvious conjecture by Charles F. Burney $(\mu o \nu o \gamma \in \nu \dot{\eta} \varsigma \theta \in o \hat{\upsilon})$ never appeared as a correction in a manuscript.

Note that N and 1071 read $\mu o \nu o \gamma \in \nu o \hat{\upsilon} \zeta$ $\theta \in o \hat{\upsilon}$ in John 5:44. N has a lacuna here at 1:18, but 1071 reads $\upsilon \hat{\iota} \acute{o} \zeta$.

Hort: " $\mu o \nu o \gamma \in \nu \dot{\eta} \zeta$ by its own primary meaning directly suggested $\upsilon \dot{\iota} \dot{o} \zeta$. The converse substitution is inexplicable by any ordinary motive likely to affect transcribers."

Ehrman argues in his "Orthodox Corruption" (1993, p. 78-82) that "the variant reading of the Alexandrian tradition, which substitutes 'God' for 'Son', represents an orthodox corruption of the text in which the complete deity of Christ is affirmed" (so also Boismard). Ehrman argues further that the main interest in creating the $\theta \in \grave{o}_{\zeta}$ variant was to create a "high Christology" against the adoptionists.

Note also the curious reading of Sy-S in 3:18 of which Burkitt comments (Evangelion Intro, p. 311): "not improbable that Sy-S has preserved the true reading of this passage". But Pete Williams notes (private communication): "This could be a case of inner-Syriac corruption: 'one and only' yHyd'; 'approved' 'bHyr': d and r are only distinguished by a dot (and this is not used consistently in the earliest writing, which leaves only a b and y to be confused (H = heth)."

Normally $\theta \in \delta \zeta$ is said to be an apposition to $\mu o \nu o \gamma \in \nu \eta \zeta$: "an only-begotten one, God". B. Weiss writes that one should understand $\mu o \nu o \gamma \in \nu \eta \zeta$ $\theta \in \delta \zeta$ as "an only begotten one of godly character/nature" (ein eingeborener göttlichen Wesens). Some prefer to regard $\mu o \nu o \gamma \in \nu \eta \zeta$ as somewhat heightened in meaning in Jo and 1.Jo to only-begotten or begotten of the Only One, in view of the emphasis on $\gamma \in \nu \nu \hat{\alpha} \sigma \theta \alpha \iota$ $\hat{\epsilon} \kappa$ $\theta \in o \hat{\iota}$ (Jo 1:13 al.); in this case it would be analogous to $\pi \rho \omega \tau \delta \tau o \kappa o \zeta$ (Ro 8:29; Col 1:15 al.).

Metzger notes that some commentators punctuate as follows: μονογενης, θεὸς, δι ανείς κόλπον ...

It is also clear that the missing article was a problem. The Byzantine tradition added it unanimously. In the txt reading P75, 01^{C1} , 33 added it, too.

Addition at various places is generally an indication of a secondary addition. Why should it have been omitted? As John 7:32 indicates, $\mathring{\alpha}\pi \acute{\epsilon}\sigma\tau \epsilon\iota\lambda\alpha\nu$ is not always followed by $\pi\rho\grave{o}\varsigma$. There the text is safe.

Weiss (Textkritik, p. 177) notes that the words have been omitted, because they so inconveniently separate the verb from the subject. This also explains the move to other positions.

The question here is if those sent <u>are themselves</u> Pharisees or if they are only <u>sent by</u> the Pharisees. The txt reading is more equivocal in this respect. It could mean: "And they were sent by the Pharisees."

The Johannine usage is clear: ἐκ τῶν Φαρισαίων means "a Pharisee".

It is possible that the Byzantine reading is a correction to make this explicit: "And those sent where Pharisees."

The versional evidence is not of much value here, because the translation depends on the interpretation.

Weiss in his Jo Com. thinks that the $0\hat{\iota}$ has probably been omitted accidentally. He notes the possibility that it could have been omitted because scribes assumed a second legation, different from that mentioned in 1:19.

Carl Conrad commented on B-greek (08. Dec. 2003):

"EK TWN FARISAIWN as partitive subject of APESTALMENOI HSAN"

[The addition of $0\dot{i}$] "means no more, I think, than that later scribes failed to understand the partitive usage in the construction and so altered the text so that it would suit their grammatical expectations."

A present tense form appears only twice in the Gospels, both in Mark. In both cases there is a variation to the perfect tense. Is it thus possible that the unusual present form is original and has been changed to the more commonly used perfect tense.

It is possible that the variation is in part accidental. For example the reading of 01 $\cot \eta \kappa \in \iota$ could be interpreted by changing one letter as $\cot \eta \kappa \in \iota$ or $\cot \eta \kappa \in \iota$. It is also possible that $\cot \eta \kappa \in \iota$ (P75) has been accidentally changed into $\cot \eta \kappa \in \iota$ (B).

The incoherent support by f1 is strange.

Metzger: "The perfect tense, so frequently employed with theological overtones by the Fourth Evangelist, conveys a special force here (something like 'there is One who has taken his stand in your midst'), a force that was unappreciated by several Greek witnesses, as well as by a variety of Latin, Syriac and Coptic witnesses, all of which preferred the more syntactically appropriate present tense."

B: umlaut! (1350 B 18 R)

27 ... τοῦ ὑποδήματος. 28 ταῦτα ἐν Βηθανία

It is not clear if this umlaut indicates this variant or the previous one (insertion after ὑποδήματος).

 $Bηθαβαρ\^α$ appears on the Madaba mosaic map (ca. 560 CE), which is located on the floor of the Greek Orthodox church in Madaba near Amman. It mentions the St. John monastery τὸ τοῦ ἀγίου Ἰωάννου τοῦ βαπτίσματος and above it (next to the Western bank of the Jordan) in smaller letters: $B\eta\theta\alpha\beta\alpha\rho\hat{\alpha}$.

It is noteworthy that the excellent manuscripts 029 and 083 support Βηθαβαρᾶ.

Eusebius writes in his Onomastikon (58:18):

Βηθααβαρά (sic!): "ὅπου ἦν Ἰωάννης βαπτίζων", "πέραν τοῦ Ἰορδάνου". Καὶ δείκνυται ὁ τόπος, ἐν ὧ καὶ πλείους τῶν ἀδελφῶν εἰς ἔτι νῦν τὸ λουτρὸν φιλοτιμοῦνται λαμβάν ϵ ιν. (possibly the double α represents the semitic cayin, 3.)

Jerome repeats this with the following words:

"Bethabara trans Iordanem, ubi Ioannis in paenitentiam baptizabat, unde et usque hodie plurimi de fratribus, hoc est de numero credentium, ibi renasci cupientes vitali gurgite baptizantur." (De situ et nominibus), but Jerome leaves $B\eta\theta\alpha\nu\dot{\iota}\alpha$ in his Vulgate.

Chrysostom notes that $B\eta\theta\alpha\beta\alpha\rho\hat{\alpha}$ is found in "the more accurate of the copies" (in Ioann Hom XVIII, 1).

Origen (Jo Comm. book 6), who was under the probably mistaken notion that the only Bethany was that near Jerusalem (he couldn't find a Bethany near the Jordan in his travels), opted for $B\eta\theta\alpha\beta\alpha\rho\hat{\alpha}$ which he apparently found in some

copies $(B\eta\theta\alpha\nu i\alpha$ is found in "nearly all the manuscripts"). He explained it (wrongly) allegorically as $0i\kappa o \kappa \kappa \alpha \tau \alpha \sigma \kappa \in 0 \eta c$ ("house of the preparation"), but it actually means "house of passing over". It has been suggested that Origen actually created this reading, but this is not clear. Note that Origen once writes the curious $\tau \alpha B\eta \theta \alpha \beta \alpha \rho \alpha$. He writes:

"These things were done in Bethabara, beyond Jordan, where John was baptizing." We are aware of the reading which is found in almost all the copies, "These things were done in Bethany." This appears, moreover, to have been the reading at an earlier time; and in Heracleon we read "Bethany." We are convinced, however, that we should not read "Bethany," but "Bethabara." We have visited the places to enquire as to the footsteps of Jesus and His disciples, and of the prophets. Now, Bethany, as the same evangelist tells us, was the town of Lazarus, and of Martha and Mary; it is fifteen stadia from Jerusalem, anti the river Jordan is about a hundred and eighty stadia distant from it. Nor is there any other place of the same name in the neighborhood of the Jordan, but they say that Bethabara $(\tau\grave{\alpha}\ B\eta\theta\alpha\beta\alpha\rho\hat{\alpha})$ is pointed out on the banks of the Jordan, and that John is said to have baptized there.

The etymology of the name, too, corresponds with the baptism of him who made ready for the Lord a people prepared for Him; for it yields the meaning "House of preparation," $(O\hat{l}KO\zeta)$ κατασκευής) while Bethany means "House of obedience" $(O\hat{l}KO\zeta)$ ὑπακοής). Where else was it fitting that he should baptize, who was sent as a messenger before the face of the Christ, to pre pare His way before Him, but at the House of preparation $(K\alpha\tau\alpha\sigma\kappa\epsilon\upsilon\alpha\sigma\iota)$? And what more fitting home for Mary, who chose the good part, which was not taken away from her, and for Martha, who was cumbered for the reception of Jesus, and for their brother, who is called the friend of the Saviour, than Bethany, the House of obedience? Thus we see that he who aims at a complete understanding of the Holy Scriptures must not neglect the careful examination of the proper names in it. In the matter of proper names the Greek copies are often incorrect, and in the Gospels one might be misled by their authority."

It is interesting though that nowhere in the early sources and also not in any of the pilgrims reports a Bethany "beyond the Jordan" is mentioned. On the other hand there is no reason to consider Bethany simply a corruption. It is explicitly labeled as the Bethany "beyond the Jordan", to distinguish it from the Bethany near Jerusalem. John is quite exact regarding John the Baptist's places, compare Jo 3:23 and 10:40.

External arguments: More, more better and more diverse manuscripts support Bethany, Bethabara also has some good and diverse support, but not as much as Bethany.

Internal arguments: Bethany is clearly the harder reading and was a stumbling block, not only for Origen, but also for other church fathers.

If $B\eta\theta\alpha\beta\alpha\rho\hat{\alpha}$ was original, there would have been no reason for a change. It is not clear if Origen made this reading up, it is possible. The "but they say" seems to point to a local tradition, which Origen ascertains.

It should be noted that Origen based his solution to the Bethany problem on hearsay only. It should also be noted that the $B\eta\theta\alpha\beta\alpha\rho\hat{\alpha}$ on the Madaba map is west of the Jordan.

It is also interesting to note that Livias, the place of Herod Antipas' summer residence, which is across the Jordan, has originally been called $B\eta\theta\alpha\rho\alpha\mu\alpha\theta\dot{\alpha}$ (Josephus, Bell II 59, Ant XVII 277, XVIII 27).

Weiss (Lk Com.) suggests Judges 7:24 ($B\alpha\iota\theta\eta\rho\alpha$) as a possible reference, but marks it with a question-mark. Note that in the manuscripts of Origen's commentary the spelling varies and $B\eta\theta\alpha\rho\hat{\alpha}$ and $B\alpha\theta\alpha\rho\hat{\alpha}$ are also found.

Burkitt thinks that because both Sy-S and Origen have $B\eta\theta\alpha\beta\alpha\rho\hat{\alpha}$, this indicates a common source: "This source seems to have been not documentary evidence, but local identification. [...] We cannot doubt that the author of the Fourth Gospel wrote 'Bethany beyond Jordan.' On the other hand we have the cult of 'Bethabara', developed before the time of Origen, perhaps at a pre-Christian holy place. The cult led to the identification of 'Bethany' with 'Bethabara' and finally it influenced some texts of the Gospels." (Evangelion Intro, p. 308-9).

Pierson Parker suggests that $\pi \in \rho \alpha \nu$ $\tau \circ \hat{\nu}$ ' $Io\rho \delta \hat{\alpha} \nu \circ \nu$ does not refer to $B\eta\theta\alpha\nu i\alpha$, but to $\delta \pi \circ \nu$ δ ' $I\omega \hat{\alpha} \nu \nu \eta \varsigma$ $\beta \alpha \pi \tau i \zeta \omega \nu$ and gives the translation: "These things took place in Bethany, which is across from the point of the Jordan where John had been baptizing." (This has already been suggested by E.G. Paulus in 1828!) It is quite unlikely that John would have described Bethany this way though.

R. Riesner suggests that the place "beyt abarah" originally indicated the crossing of the Jordan by the Israelites and also the crossing of the Jordan by Eliah and Elisah, so two crossings have been remembered here. This could explain Origen's plural $\tau\grave{\alpha}\ B\eta\theta\alpha\beta\alpha\rho\alpha$, a place of several fords.

Rainer Riesner argues for $B\eta\theta\alpha\nu\acute{\iota}\alpha$ = $B\alpha\tau\alpha\nu\acute{\epsilon}\alpha$, $B\alpha\tau\alpha\nu\alpha\acute{\iota}\alpha$ (the region Batanaea). This identification is as early as J. Lightfoot (1658). There are two places that are relevant. One, called $B\eta\theta\alpha\beta\alpha\rho\^{\alpha}$, is the place of Jesus' baptism, which is at the traditional place. The other is the place where John is questioned by the Pharisees in Jo 1:19-28. This is the Batanaea in the north. Here John worked, too. The problem arose (according to Riesner) due to the misunderstanding that in the following verses Jesus' baptism is reported. This is not the case, John only gives an account of what happened at an unknown time earlier. The time table and circumstances in Jo 1 fit much better if everything happens in the north (compare Riesner, Bethanien, p. 73ff.). It also fits good to the time table of Jo 11 (p. 71 ff.).

Furthermore the region of Batanaea is known in Arabic as *el-Betheneyeh*, which comes nearest to the Evangelist's Bethania (compare Brownlee).

Against this view is the fact that representatives of the Pharisees and others from Jerusalem came to investigate John's baptizing, apparently in great numbers. Although it would have been possible for them to find John in Batanaea in the north, a location closer to Jerusalem seems more likely.

S.G. Brown notes that the most common position today is Wadi Kharrar/Gharrar (Tell el-Kharrar), "a site in Jordan across from Jericho, where four springs merge into a stream that flows into the Jordan river." [...] "a site opposite (and just over 1 km south of) Jericho, 7.3 km north of the Dead Sea and 1.5 km east of the river. It is between the two fords across from Jericho, a little closer to the Makhadat Hajla ford. The ongoing excavation of the site has 'uncovered a $1^{\rm st}$ CE settlement with plastered pools and water systems that were used almost certainly for baptism, and a $5^{\rm th}$ - $6^{\rm th}$ CE late Byzantine settlement with churches, a monastery, and other structures probably catering to religious pilgrims.' This site has been the traditional location of Jesus' baptism since at least the early $4^{\rm th}$ CE (the pilgrim of Bordeaux, 333 CE)."

Starting 1997, excavations took place for several years in the region of the Jordan north of the Dead Sea. The Jordanian team has identified nearly 20 related sites within an area stretching some four kilometers east of the Jordan River, mostly along the south bank of Wadi el-Kharrar, including the above mentioned 1st CE settlement. More sites remain to be discovered through systematic surveying. The excavators believe that the village of Bethany beyond the Jordan was located at or around the natural hill at Tell el-Kharrar. The main complex, still being excavated and investigated, comprises structures on and around a small natural hill located two kilometers east of the Jordan River, adjacent to the spring and small oasis at the head of the Wadi Kharrar. The recent excavations have identified a settlement that was inhabited from the time of Christ and John the Baptist (early Roman era), throughout most of the Byzantine period, into the early Islamic era, and again in Ottoman centuries.

"Bethany/Bethabara may also have referred to a region, rather than only a specific settlement. Western travelers to the region at the turn of the century reported that the Greek Orthodox clerics and monks who lived in the south Jordan Valley, and the native valley residents themselves, referred to the whole area around the river and east along the Wadi el-Kharrar as Bethabara. Thus the original settlement was known as Bethany beyond the Jordan during and immediately following the days of Jesus and John the Baptist in the 1st Century AD; after the 3rd Century AD it was more commonly known as Bethabara, and by the 6th Century AD it had become known as Aenon and Safsafa. The general area from the river eastwards associated with the ministry of John the Baptist and the baptism of Jesus is known as el-Maghtas today in Arabic." (Jordanian Department of Antiquities)

In the end there are several good arguments, but none is so far completely convincing. A settlement and baptism site has been found beyond the Jordan, and it makes perfectly good sense that this was the main area where John was baptizing, but we don't know (from external sources) if this site was named "Bethany".

Wherever Bethany was located, both external arguments and internal arguments favor the reading Bethany at Jo 1:28.

Compare also Jo 5:2, where a similar confusion occurred over a place name.

P106 (POxy 4445) has more value. The editor W.E.H. Cockle reconstructs:

The (online) image is not very good. Nevertheless one can say that the above reconstruction is probably correct, but rather optimistic. Whenever there are the slightest remains of ink, they are given as letters (with a dot). Judging from the image alone, only the following can be made out:

```

Of $\check{\epsilon}\kappa\lambda\check{\epsilon}\kappa\tau\acute{o}\zeta$ in the second last line only an ϵ can be seen. It is pretty clearly visible, but I have placed a dot under it, because it could be a θ also (of QU). But it looks more like an ϵ . Compare with the θ 10 lines above. With a θ , theoretically the line could also be reconstructed as:

```
I it osest inousit ouqui
```

But, clearly, this line is too short, and usit ou is slightly too long to fit the space. So, the reconstruction with $\tilde{\epsilon}\kappa\lambda\tilde{\epsilon}\kappa\tau\delta\zeta$ fits best. It is not completely sure though. It could be possible that the line ended short, because a new pericope begins. B. Aland accepts the $\tilde{\epsilon}\kappa\lambda\tilde{\epsilon}\kappa\tau\delta\zeta$ reading.

P75: An unidentifiable correction appears here. The reading was first noted in the online "NT transcripts" from Münster (Nov. 2008). They note that P75* had \dot{o} $\upsilon\dot{\iota}\dot{o}\zeta$ \dot{o} $\dot{\epsilon}\kappa\lambda\epsilon\kappa\tau\dot{o}\zeta$ for \dot{o} $\upsilon\dot{\iota}\dot{o}\zeta$ $\tau\sigma\dot{\upsilon}$ $\theta\epsilon\sigma\dot{\upsilon}$. Timo Flink mentions it in his article (see below). This is very doubtful though. After discussion, Klaus Wachtel confirmed that it is too unsecure and that they will simply indicate the number of letters [4-5] for P75*.

The support is rather diverse, but limited. The reading is certainly the more difficult reading. It is possible that it has been changed to standard Johannine usage to avoid adoptionistic thoughts. Blass and Boismard have $\grave{\delta}$ $\check{\epsilon} \kappa \lambda \epsilon \kappa \tau \acute{\delta} \zeta$ in their texts! Barrett, Boismard, R. Brown, Fee, Harnack, Lagrange, Nestle, D. Wallace and Zahn argue in favor of it. The NET Bible and TNIV have the variant in their English translations.

 \dot{o} ἐκλεκτός appears nowhere else in the NT, except in Lk 9:35 and 23:35.

Overall it is difficult to imagine that someone changed δ $\upsilon i \delta \zeta$ into δ $\dot{\epsilon} \kappa \lambda \epsilon \kappa \tau \delta \zeta$. Why? In an adoptionistic climate? The only reason could be that it is a conformation to Lk 23:35. Especially if Jo was copied after Lk.

It is interesting to note that the Latin e omits omit $\dot{\delta}$ $\dot{\epsilon}$ k $\lambda \epsilon$ k $\tau \dot{\delta} \zeta$ in Lk 23:35.

Harnack thinks that the reading $\dot{\delta}$ $\upsilon\dot{t}\dot{\delta}\varsigma$ arose as a harmonization to the Synoptics:

 NA^{27} Matthew 3:17 οὖτός ἐστιν ὁ υἱός μου ὁ ἀγαπητός,

 NA^{27} Mark 1:11 σὺ ϵ ἶ δ υἱός μου δ ἀγαπητός

 NA^{27} Luke 3:22 σὺ ϵ ἶ δ υἱός μου δ ἀγαπητός, ϵν σοὶ ϵὐδόκησα.

Later in anti-adoptionistic struggles it became widely accepted.

The expression δ ἐκλεκτός for Christ is very rare in the earliest literature. It can be found with Clement I, 64: δ ἐκλεξάμενος τόν κύριον Ἰησοῦν Χριστόν καὶ ἡμᾶς δι' αὐτοῦ·

Also with Hermas, Sim. V, 2,2: ἐκλεξάμενος δοῦλόν τινα πιστὸν καὶ εὐάρεστον, ἔντιμον προσεκαλέσατο αὐτὸν ...

Another suggestion is that John is alluding to Isaiah:

LXX Isaiah 42:1 Ιακωβ ὁ παῖς μου ἀντιλήμψομαι αὐτοῦ <u>Ισραηλ ὁ</u> ἐκλεκτός μου προσεδέξατο αὐτὸν ἡ ψυχή μου ἔδωκα τὸ πνεῦμά μου ἐπ' αὐτόν κρίσιν τοῖς ἔθνεσιν ἐξοίσει

"Jacob is my servant, I will help him: Israel is my chosen, my soul has accepted him; I have put my Spirit upon him; he shall bring forth judgement to the Gentiles."

This parallels guite closely the Spirit descending on Jesus.

It is interesting that the T&T analyses found four Byzantine minuscules ($187^{91\%}$, $218^{92\%}$, $228^{87\%}$, $1784^{87\%}$), which read δ $\tilde{\epsilon}$ $\kappa\lambda\epsilon$ κ t δ t δ

187 is a 12th CE manuscript in Florence, 218 is a 13th CE manuscript in Vienna, Gregory notes: "unusual readings, probably written in Italy".

Perhaps some Byzantine scribes, through a subconscious slip, changed the word. The combination of (P106, 01) and (187, 218, 228, 1784) is incoherent support.

There is no clear preference in the usage with or without the article in John. P75, B are known to omit articles and pronouns at times.

The support is divided in all three cases. The strong support for the omission of the article in 3:23 is noteworthy, especially the support from the Byzantine text.

GcP = Genitivus cum Participio

"and the two disciples heard him speaking"

Interesting variation of the $\alpha \mathring{\upsilon} \tau o \widehat{\upsilon}$. The txt reading is equivocal. It could be interpreted as "his disciples" (which is the normal understanding in the Gospels), but in this case it is different, as GcP. The ambiguity is removed in the Byzantine version.

The P66, P75 version actually fixes the wrong understanding, probably inspired from the previous verse 35, where $\mu\alpha\theta\eta\tau\hat{\omega}\nu$ $\alpha\hat{\upsilon}\tau\hat{\upsilon}\hat{\upsilon}$ appears. In this reading the $\alpha\hat{\upsilon}\tau\hat{\upsilon}\hat{\upsilon}$ refers back to John ("his disciples" = John's), who speaks in the previous verse 36. This construction is grammatically very awkward, because now $\lambda\alpha\lambda\hat{\upsilon}\hat{\upsilon}\tau\hat{\upsilon}\zeta$ has no explicit subject anymore, which is unusual. Why have so many good witnesses such a peculiar text?

One could argue that this is certainly the harder reading and that it has been changed in various ways.

Zahn (Comm. Jo) even thinks that perhaps the reading without $\alpha \dot{\upsilon} \tau o \hat{\upsilon}$ is original.

The $\pi\rho\hat{\omega}\tau o\nu$ makes good sense with respect to verse 43. First he finds Simon, the other day Philip.

On the other hand the Byzantine reading "this, the first (nominated apostle)" also makes sense and could be seen as the harder reading (so Zahn). But it is also quite probable that the $\pi\rho\hat{\omega}\tau\sigma\zeta$ has been adjusted to the case of the $\sigma\hat{\upsilon}\tau\sigma\zeta$ (so Weiss).

πρωΐ is probably a misreading of πρῶτον or πρῶτος. Note that we have a possible h.t. case here: πρῶ**τον τὸν**. If one τον has been omitted, πρωΐ would be a possible reconstruction. It makes very good sense.

The Byzantine reading is possibly a harmonization to Mt ($\underline{B\alpha\rho\iota\omega\nu\hat{\alpha}}$). On the other hand ${}^{\prime}I\omega\nu\hat{\alpha}$ is the more rare word and it is possible that scribes erroneously took it as ${}^{\prime}I\omega\acute{\alpha}\nu\nu\sigma\upsilon$.

The reading ${}^{\prime}I\omega\acute{\alpha}\nu\nu\alpha$ is interesting. Note that it's also the reading of the Vulgate! ${}^{\prime}I\omega\acute{\alpha}\nu\nu\alpha$ appears only twice in Lk:

NA²⁷ Luke 8:3 καὶ Ἰωάννα γυνὴ Χουζᾶ

In the NA²⁷ text of John the phrase δ 'I $\eta\sigma$ 0 $\hat{\upsilon}\zeta$ appears 115 times, whereas it appears in Robinson's Majority text 153 times!

'Iησοῦς without the article appears 76 times in NA²⁷ (= 40%), but only 44 times in the Majority text (= 22%).

In 01 \dot{o} 'Ihooûs appears 109 times and 'Ihooûs without the article 74 times (40%).

In B $\dot{\delta}$ 'Insoûs appears 80 times and 'Insoûs without the article 106 times (57%).

In the Synoptics the ratio is only about 27% ('Insoûs without the article).

On the one hand it is a well known phenomenon that the article is easily left out. It is well known that B is rather unreliable with regard to articles and pronouns. On the other hand it is also a well known phenomenon that the article has been added to indicate the special importance of a person, i.e. it would be only natural to add an article to $I\eta\sigma o\hat{\upsilon}\varsigma$.

There are no clear internal rules to follow, except that later scribes probably rather added the article.

 $\mu \in i\zeta\omega\nu$ is singular and does not agree with the plural $\tau o \dot{\upsilon} \tau \omega \nu$, but it agrees in the ending $-\omega\nu$ and it is thus probably a conformation error. Metzger suggests (at 5:36) that $\mu \in i\zeta\omega\nu$ might be an incorrect form of the accusative.

 $\mu \in i\zeta o \nu \alpha$ appears several times without variants. It is thus the normal accusative neuter plural and there would be no reason to change it.

μείζω appears only here and in Jo 5:36 in the NT. It is a rarer form derived by contraction from μείζοσ-α = μείζω (comparative infix -ιοσ-).

In Jo 5:36 (and 1 Ki. 11:19; 4 Ma. 15:9) $\mu \in \iota \zeta \omega$ is also derived from $\mu \in \iota \zeta o$ - $\sigma \alpha$ but here as masc/fem. singular.

It is quite probable that the rare form $\mu \epsilon i \zeta \omega$ has been changed in various ways.

A very strong group of witnesses omits the $\alpha \mathring{\upsilon} \tau o \widehat{\upsilon}$ after $\mathring{\alpha} \delta \epsilon \lambda \varphi o \widehat{\iota}$. The idea of Jesus having brothers cannot be the problem really, it is clearly accepted with James the Just. It is possible though that by omitting $\alpha \mathring{\upsilon} \tau o \widehat{\upsilon}$, the $\mathring{\alpha} \delta \epsilon \lambda \varphi o \widehat{\iota}$ becomes a more general term, including various followers.

Weiss (Jo Com.) thinks that the $\alpha \mathring{\upsilon} \tau o \widehat{\upsilon}$ has been added to conform it to the other terms.

φραγέλλιον lat. "flagellum", a whip

Metzger argues that some scribes would consider it inappropriate for Jesus to use a real whip, thus "like a whip". It is on the other hand also possible that it is an idiom.

An interesting mixture of witnesses.

The "de sparto" reading is interesting. Where did this originate? Bishop Chromatius notes it in one of his sermons:

"Cum ingressus fuisset in templo Iudaeorum Dominus et Salvator noster ut uidisset negotiationem illicitam exerceri, id est uendentes oues et boues et columbas et nummularios sedentes, ut audiuit in praesenti lectione dilectio uestra, <u>flagellum fecit quasi de sparto</u> et eiecit eos omnes, et cathedras uendentium euertit, dicens as eos: Domus mea domus orationis uocabitur; uos autem fecistis illam domum negotiationis. Iudaei immemores ..." (IV, 1-9)

Compare:

N. Clayton Croy, "The Messianic Whippersnapper: Did Jesus Use a Whip on People in the Temple (John 2:15)?", JBL 128 (2009) 555-68 (He is not discussing the textcritical question, but the general one, if Jesus used a whip and for what.)

If Jesus is still speaking, the addition is difficult: how can he be in heaven? The whole section Jo 3:11 ff. looks strange, because in verse 11 there is a change from "I" to "we": δ o $\delta \alpha \mu \in \nu$ $\delta \alpha \lambda \delta \mu \in \nu$...

It appears that now not Jesus is speaking anymore but the church (or the Johannine community) after the resurrection. Then the longer reading makes good sense and is not problematic at all.

Zahn, on the other hand thinks (Comm. Jo), that the "we" refers to Jesus and John the baptist.

What we have here is a clear case of external against internal evidence. Internally the longer reading is clearly the harder reading and there is no reason why the words should have been added. Metzger says it could be an "interpretative gloss, reflecting later Christological development", but is this probable? It seems more probable that scribes omitted the difficult words or changed them as 0141, Sy-S and e, Sy-C did. The $\rm \acute{e}\kappa$ in 0141 et al. probably comes from the previous $\rm \acute{e}\kappa$ in the verse.

Hort writes: "it may have been inserted to correct any misunderstanding arising out of the position of $\alpha\nu\alpha\beta\epsilon\beta\eta\kappa\epsilon\nu$, as coming before $\kappa\alpha\tau\alpha\beta\alpha\varsigma$."

Weiss (Textkritik, p. 131) notes that the words have been added to emphasize the having-been-in-heaven of Jesus in contrast to the $\kappa\alpha\tau\alpha\beta\acute{\alpha}\varsigma$.

This verse is comparable to Jo 1:15, somewhat contradictory:

"This was he of whom I said, He who comes after me ranks ahead of me because he was before me."

Jo 3:13

No one has ascended into heaven except the one who descended from heaven, the Son of Man, who is in the heaven.

What we have here is a typical Johannine Oxymoron.

It is probable that the text has been changed to conform it to the next verse (so also Weiss).

John uses $\pi\iota\sigma\tau\in\dot{\upsilon}\omega$ + $\in\dot{\iota}\zeta$ 34 times, but never $\in\dot{\upsilon}$ elsewhere. In the Gospels it only appears in Mk 1:15:

 NA^{27} Mark 1:15 καὶ λέγων ὅτι πεπλήρωται ὁ καιρὸς καὶ ἤγγικεν ἡ βασιλεία τοῦ θεοῦ μετανοεῖτε καὶ πιστεύετε ἐν τῷ εὐαγγελίῳ.

There is no reason for an omission. The addition is only natural from the previous verse.

The whole sentence is not really connected with the preceding or the following. Possibly a left-over from a source? One should note that after the speech of John (3:27-36), the narrative continuous equally awkward with 4:1 ($\Pi \sigma o \hat{\nu} \zeta / K \acute{\nu} \rho \iota o \zeta$).

The singular $Iov\delta\alpha\acute{\iota}ov$ is very unusual and does not appear in the other Gospels. It would be only natural to change it to the plural. Weiss thinks that $Iov\delta\alpha\acute{\iota}\omega\nu$ is a conformation to the plural of $\tau\acute{\omega}\nu$ $\mu\alpha\theta\eta\tau\acute{\omega}\nu$.

The conjectures make good sense. That an error arose accidentally is very unlikely. The explanation goes like this:

- 1. original reading: Met aiou (problem: this nomen sacrum is unknown)
- 2. dittography: met aiouiou
- 3. correction: met aioudaiou

This scenario is quite improbable.

As already pointed out by Markland, the conjecture $I\eta\sigma o\hat{v}$ (without article) is equivocal. $\tau o\hat{v}/\tau \hat{\omega} \nu$ $I\eta\sigma o\hat{v}$ means "a discussion arose between the disciples of John and those of Jesus." $I\eta\sigma o\hat{v}$ without the article can mean the same, but could also mean: "a discussion arose between the disciples of John and Jesus (himself)."

It has been suggested by the commentators that $I\eta\sigma\sigma\hat{\upsilon}$ was the original reading, but that its intended meaning (= $\tau\hat{\omega}\nu$ $I\eta\sigma\sigma\hat{\upsilon}$) was not understood. A dispute between the disciples of John and Jesus was considered 'insolent' and the change has been made to $I\sigma\upsilon\delta\alpha\acute{\iota}\sigma\upsilon$ or $I\sigma\upsilon\delta\alpha\acute{\iota}\omega\nu$.

Pryor suggests that the sources of the evangelist "did refer to Jesus, and that for his own theological reasons he decided to change ${\rm injoo}$ to ${\rm injoo}$ the evangelist wanted to avoid the merest hint of controversy between even the disciples of John and (disciples) of Jesus. [... There is] similarity between our verse and the synoptic tradition found in Mk 2:18 and Mt 9:14 [the question about fasting]. Lindlars drew our attention to the fact that in both the synoptic (Mk 2:19/Mt 9:15) and the Johannine narratives (3:29) the answer includes the bridal imagery. All of this makes it tempting to believe that we are dealing here with some common tradition."

T. Nicklas asks the interesting question, why, if $\tau o \hat{\upsilon}/\tau \hat{\omega} \nu$ 'I $\eta \sigma o \hat{\upsilon}$ was original, the article has been omitted in the modification (= txt). He has no explanation. In John "the Jews" is the normal term and appears 65 times, always with the article! Pryor writes: "Returning to the question of whether the evangelist had before him 'I $\eta \sigma o \hat{\upsilon}$ or $\tau \hat{\omega} \nu$ 'I $\eta \sigma o \hat{\upsilon}$, what possibly tips the balance in favor of 'I $\eta \sigma o \hat{\upsilon}$ is the likelihood that if he had found $\tau \hat{\omega} \nu$ 'I $\eta \sigma o \hat{\upsilon}$ in the inherited tradition, the evangelist would have inserted his favorite $\tau \hat{\omega} \nu$ 'I $\sigma o \hat{\upsilon} \hat{\omega} \hat{\upsilon} \hat{\omega} \nu$ in its place."

It is possible that the word has been added to make the sentence structure more clear. The combination of very good (P66, P75, B) with almost Byzantine witnesses (f13, 700) is strange.

The B reading arose probably from an attempt to move the $\dot{\epsilon}\gamma\dot{\omega}$ directly after $\dot{\epsilon}\dot{\imath}\pi\sigma\nu$ but then the scribe forgot to delete it after $\dot{\epsilon}\dot{\imath}\mu\dot{\imath}$ (so Weiss).

Royse (Scribal Habits, 2008, p. 506) sees the addition of $\delta \tau \iota$ "as an example of the scribal avoidance of asyndeton". P66 similarly adds $\delta \tau \iota$ after $\epsilon \tilde{\iota} \pi \epsilon \nu$ at Jo 7:36. 700 adds $\delta \tau \iota$ after $\gamma \epsilon \gamma \rho \alpha \pi \tau \alpha \iota$ in Mt 4:4 and after $\lambda \epsilon \gamma o \nu \tau \epsilon \zeta$ in Mk 5:12. So this may be a scribal tendency.

On the one hand the words could be either mechanically or deliberately repeated from the beginning of the verse, possibly to make the saying more symmetrical.

On the other hand it is equally possible that the words have been deleted to avoid repetition (so Aland). Since a repetitive style is typical for John, the txt reading is slightly more probable.

Weiss (Textkritik, p. 185) thinks that the words have been omitted to create with the remaining words a subject for the next verse. Note that the Byzantine text adds a $\kappa\alpha$ i then in verse 32! This has already noted by Tischendorf. Only with a $\kappa\alpha$ i the longer reading is tolerable (so Zahn).

Normally $t\grave{o}$ $\pi\nu\in\hat{\upsilon}\mu\alpha$ is taken here as accusative object, given by God. It has also been argued that it is Jesus who gives the Spirit. On the other hand Zahn thinks (Einfuehrung II, 1907, p. 567) that the main reason for a change here was that the scribes did not recognize $t\grave{o}$ $\pi\nu\in\hat{\upsilon}\mu\alpha$ as subject.

τὸ πνεῦμα as subject appears several times in John, but always in the first position of a sentence or phrase. On the other hand forms of δίδωμι are followed by the subject in John (4:5, 5:36, 6:37, 11:22, 11:57, 13:3, 18:11).

It is also possible to think of $0\mathring{\upsilon}$ as $0\mathring{\upsilon}$: "whose spirit gives by measure" ($t\grave{\upsilon}$ $\pi\nu\in\hat{\upsilon}\mu\alpha$ = nominative). But from context one should prefer the negation:

34 "for he gives the Spirit without measure.

35 ... and has placed all things in his hands."

This is more an exegetical question, because the early copies didn't have accents.

When one comes to $\lambda\alpha\lambda\hat{\epsilon}\hat{\iota}$ one would expect $\lambda\alpha\lambda\hat{\epsilon}\hat{\iota}\nu$ at first, but no such variant is recorded:

 $\ddot{\delta}\nu$ γὰρ ἀπέστειλεν $\dot{\delta}$ θε $\dot{\delta}$ ς τὰ ῥήματα τοῦ θεοῦ λαλε $\hat{\iota}\nu$ "for whom God has sent to speak the words of God"

Carl W. Conrad on the b-greek mailing list translates (Dec 29, 1999): "The One whom God has sent speaks God's words, since he does not give the Spirit in measured amounts."

Preliminary remark: The verses 1-3 look awkward. Many commentators see here an unskillful editing of a source text. JH Bernhard (1928): "on purely linguistic grounds verses 1-3 are a monstrosity."

It is possible that "Jesus" has been changed to "Lord" to avoid a repetition of "Jesus". But in that case one would have expected the corrector to have changed the second occurrence of "Jesus" and not the first one.

On the other hand "Lord" could have been changed to "Jesus" to avoid two different subjects. It is also possible that the more unusual term "Lord" has been changed into the common "Jesus".

D, f1, 124, pc

The designation of Jesus as δ $K \acute{\nu} \rho \iota \sigma \zeta$ is rare in Mt and Mk. In Mt it appears only in 21:3 and in Mk only in the parallel 11:3 (also in 16:20). In Lk 1-2 the term is used for God. For Jesus it appears first in 7:13 and then several times. In almost all cases a significant number of witnesses changed δ $\kappa \acute{\nu} \rho \iota \sigma \zeta$ to δ $\acute{\nu} \eta \sigma \sigma \acute{\nu} \zeta$. In none of these cases the committee decided against $\kappa \acute{\nu} \rho \iota \sigma \zeta$.

In John the term is also rare:

 NA^{27} John 6:23 $\dot{\epsilon}$ $\dot{\nu}$ χαριστήσαντος το $\hat{\nu}$ κυρίου.

 $\frac{\tau o \hat{\upsilon} \ 'I\eta \sigma o \hat{\upsilon}}{\text{omit phrase } \epsilon \dot{\upsilon} \chi. \text{ ... } \kappa \upsilon \rho \acute{\iota} o \upsilon: D, f13-part, Sy-S, Sy-C}$

NA 27 John 11:2 ἦν δὲ Μαριὰμ ἡ ἀλείψασα τὸν κύριον

I has been suggested that $\kappa \acute{\nu} \rho \iota o \varsigma$ (besides the vocative) appears only in the passion narrative of John and that the other three occurrences (4:1, 6:23, 11:2) are all editorial glosses (note that D et al. omit the phrase in 6:23!).

WH: "The Western change is doubtless due to the apparent awkwardness of the combination of δ $\kappa \dot{\nu} \rho \iota \sigma \zeta$... δ ' $I\eta \sigma o \hat{\nu} \zeta$: but the difficulty lies rather in the absence of any perceptible force in the double naming; the most probable explanation being that $\delta \tau \iota$ is 'recitative' and that $I\eta \sigma o \hat{\nu} \zeta$... $I\omega \dot{\alpha} \nu \nu \eta \zeta$ are in oratio recta as the very words of the report." - "On the whole the text of the verse cannot be accepted as certainly free from doubt."

The awkwardness of the double subject is removed if one considers the \Ho transphrase as direct speech, as WH suggest:

"Now when Jesus learned that the Pharisees had heard, 'Jesus is making and baptizing more disciples than John' ..."

It has been also conjectured that originally no direct subject was expressed and that scribes subsequently added either "Jesus" or "Lord". The last speaker from 3:27-36 was John. It is also possible that some early editor inserted or changed something in verses 1-3 and this resulted in the clumsy style.

Compare:

G. van Belle " $K\acute{\upsilon}\rho\iota ο\varsigma$ or ' $I\eta σο \^{\upsilon}\varsigma$ in John 4:1?" in Festschrift Delobel, 2002, p. 159 – 174 [who argues for $κ\acute{\upsilon}\rho\iota ο\varsigma$ on contextual, stylistic and theological grounds.]

The variant is difficult to explain. There is no reason for an omission. The word could have been added, because in ch. 1-2 Jesus was already in Galilea (so Weiss).

According to Greek and Latin usage, [the noun] Sicima is declined. But in Hebrew it is pronounced Sichem, as also the Evangelist John bears witness, although an error has grown up and it is read in a defective manner as Sichar. And today it is Neapolis, the city of the Samaritans.

It is not clear if Jerome actually knew manuscripts with this reading or if he was just conjecturing it.

Robertson (Wordpictures): "There is a dispute whether this is just a variation of Shechem as meaning 'drunken-town' (Isa 28:1) or 'lying-town' (Hab 2:18) or is a separate village near Shechem (Neapolis, Nablous) as the Talmud and Eusebius indicate. Apparently the present village Askar corresponds well with the site. The use of $\pi \acute{o} \lambda \iota \nu$ (city) does not mean that it was a large town. The normal Johannine usage clearly seems to be $\ddot{\alpha}$.

John elsewhere uses $\delta\sigma\alpha$ only at 10:41, 11:22, 16:13, 16:15 safe, and 17:17 (here only 579 reads $\hat{\alpha}$).

It is curious why at this block of three verses 4:29, 39, 45 such a strong variation occurs, since the first two occurrences of $\hat{\alpha}$ and the following 13 occurrences are safe! Besides this block of three verses John uses $\hat{\alpha}$ 29 times, 22 times this reading is safe.

It is possible that $\hat{\alpha}$ has been changed into $\delta\sigma\alpha$ to avoid the double α : $\pi\acute{\alpha}\nu\tau\alpha$ $\hat{\alpha}$. It can cause confusion in copying and in reading out. But in several of the examples above a double α appears without variation.

Perhaps the ὅσα is a conformation to the immediately preceding ος: ος εἶπέν μοι πάντα ὅσα ἐποίησα

Strange.

Difficult.

The support for the omission is not coherent. It appears probable that the omission is an attempt to avoid the awkward \Ho tı \He tı.

A. Pallis (Notes, 1926) writes: "Read $\H{\alpha}\rho\tau\iota$ for $\H{\epsilon}\tau\iota$. Now is the fourth month of the year (counting from springtime), and the harvest therefore is at hand. No satisfactory sense can be elicited with $\H{\epsilon}\tau\iota$."

A question of punctuation:

"look around you, and see how the fields are ripe for harvesting.

"look around you, and see how the fields are ripe for harvesting already.

36 The reaper is receiving wages ..."

The addition of $\kappa\alpha$ i makes the second interpretation explicit. According to Metzger it is more in accord with John's style for $\eta\delta\eta$ to begin a sentence (4 times at the beginning, 12 times in the middle of a sentence, none at the end). Schnackenburg (Joh Commentary) notes that with one or the other punctuation it is either an actual date or a general proverb.

Just so it is with the emotions that hinder one from justice.

Interesting variation.

The text reading is a progression from verse 39. "Many" believed the woman, but "many more" believed Jesus. The Latin readings may be best explained as mistranslations of the complex $\pi o \lambda \lambda \hat{\omega}$ $\pi \lambda \epsilon i o \nu \zeta$. The P75 reading can be either a subconscious slip or a deliberate change. There is no reason why the whole tradition should have changed this reading.

A very difficult question. $\pi\alpha\iota\delta\acute{\iota}o\nu$ appears twice elsewhere in John (16:21, 21:5). $\pi\alpha\ilitilde{\iota}c$ appears nowhere else in Jo.

Basically it could be a harmonization to immediate context ($\upsilon \dot{\iota} \dot{\varrho} \dot{\varsigma}$) or to the parallels ($\pi \alpha \hat{\iota} \dot{\varsigma}$).

Note the interesting conflation in f13.

Weiss (Jo Com.) thinks that the $\sigma o \upsilon$ comes from verse 50.

Regarding the $\alpha \mathring{\upsilon} \tau o \mathring{\upsilon}$ it is also possible that \mathring{o} $\pi \alpha \mathring{\iota} \zeta$ $\alpha \mathring{\upsilon} \tau o \mathring{\upsilon}$ is a conformation to $o \mathring{\iota}$ $\delta o \mathring{\upsilon} \lambda o \iota$ $\alpha \mathring{\upsilon} \tau o \mathring{\upsilon}$ earlier in the verse.

It is possible that there was a tendency of the scribes to identify the otherwise indeterminate feast. The addition of $\mathring{\eta}$ probably means then the Passover. Although Hort writes: "If it $[\mathring{\eta}]$ were genuine, the reference would be to the Feast of Tabernacles ($\mathring{\eta}$ $\sigma\kappa\eta\nu o\pi\eta\gamma \acute{\iota}\alpha$), emphatically 'the Feast of the Jews' and not to the Passover." - This is also the view of Zahn.

It is also possible that some kind of accidental error is involved: $\H{\eta} \ \ \ \ \ \ldots$

It has often been suggested that the order of chapters 5 and 6 should be interchanged. In that case $5{:}1$ stands after $6{:}4$ "Now the Passover, the festival of the Jews, was near."

Eusebius writes in his Onomastikon (ca. 324-330 CE):

<u>Βηζαθά.</u> Κολυμβήθρα ἐν Ἱερουσαλήμ, ἥτις ἐστὶν "ἡ προβατική", τὸ παλαιὸν Ε' στοὰς ἔχουσα. Καὶ νῦν δείκνυται ἐν ταῖς αὐτόθι λίμναις διδύμοις, ὧν ἑκατέρα μὲν ἐκ τῶν κατ' ἔτος ὑετῶν πληροῦται, θατέρα δὲ παραδόξως πεφοινιγμένον δείκνυσι τὸ ὕδωρ, ἴχνος, ὡς φασι, φέρουσα τῶν πάλαι καθαιρουμένων ἐν αὐτῇ ἱερείων. Παρ' ὃ καὶ προβατικὴ καλεῖται, διὰ τὰ θύματα.

"Bezatha, a pool in Jerusalem, which is the sheep [pool] formerly having five porches. It is now identified with the twin pools, both are supplied by the periodic rains, but the water of one is unexpectedly of a reddish color, a trace, they say, of the carcasses of the sacrifices which were formerly cleansed in it before offering, whence also it was called sheep [pool]."

The Pilgrim of Bordeaux writes (333 CE):

"Within the city are the twin pools [piscinae gemellares], with 5 porticoes, called <u>Betsaida</u>. There persons who have been sick for many years are cured. The pools contain water which is red when it is disturbed [in modum coccini turbatam]."

Cyrill of Jerusalem writes (Hom. in Paralyt. ca. 348-386):

Εν γαρ τοις Ιεροσολυμοις ην προβατικη κολυμβηθρα, πεντε στοας εχουσα, τεσσαρας μεν περιτρεχουσας, μεσην δε την πεμπτην, εν η κατεκειτο πληθος ασθενουντων.

"In Jerusalem there was a sheep pool with five porticoes, four running around it, but the fifth being in the middle of it. In it were lying a lot of sick."

Jerome's translation of Eusebius' Onomasticon (ca. 390 CE):

"Bethsaida piscina in Ierusalem quae uocobatur $\pi\rho\sigma\beta\alpha\tau\iota\kappa\dot{\eta}$. haec quinque quondam porticus habuit, ostendunturque gemini lacus, quorum unus hibernis pluuiis adimpleri solet, alter mirum in modum rubens quasi cruentis aquis antiqui in se operis signa testatur. nam hostias in eo lauari a sacerdotibus solitas ferunt, unde et nomen acceperit."

(Jerome accepts Bethsaida in his Vulgata.)

Theodor of Mopsuestia († 428) writes regarding the pool (Comm. in Evang. Johannis, Catena, see Jeremias, p. 13-14):

μετα γαρ τας εν κυκλω τεσσαρας, μεσην ειχεν ετεραν.

"Because besides the four running around, it had another in the middle."

<u>Bethsaida</u> ("House of Fish") is a city on the Sea of Galilee. Probably an early error. But Hort thinks "a tank hewn in the rock might naturally bear the name." The support for Bethsaida is surprisingly strong. That such an error can occur can be seen in the Byzantine minuscule 2737, which also reads thus. Also possibly E*.

<u>Bethesda</u> means in Hebrew "House of Mercy". Though widely supported, it is also suspect as a scribal alteration, because of its "edifying etymology" (Metzger).

Alleged support got Bethesda from the Copper Scroll from Qumran, which in the ed. pr. contains a reference to a pool at "bebeyt 'eschdatayin" ("place of poured out [water]") or "bebeyt ha'aschuchiyn" ("place of the (two) pools"). The NET Bible comments:

There is some new archeological evidence (published by M. Baillet, J. T. Milik, and R. de Vaux in Les "petites grottes" de Qumran): Copper scroll 3Q15 from Qumran seems to indicate that in the general area of the temple, on the eastern hill of Jerusalem, a treasure was buried in Bet *Esdatayin, in the pool at the entrance to the smaller basin. The name of the region or pool itself seems then to have been Bet *Esda, "house of the flowing." It appears with the dual ending in the scroll because there were 2 basins. $B\eta\theta\varepsilon\sigma\delta\dot{\alpha}$ seems to be an accurate Greek rendition of the name, while Milik suggests $B\eta\theta\zeta\alpha\theta\dot{\alpha}$ is a rendition of the Aramaic intensive plural Bet *Esdata. All of this is not entirely certain, but is certainly plausible; if Milik is correct, both the textual variants would refer to the same location, one a Greek rendering of the Hebrew name, the other a Greek rendering of the Aramaic. This would be an unusual instance where two textual traditions which appear to be in conflict would both be correct."

But according to a new reconstruction of the Copper Scroll published in 2006 (ref. below), the line in question only mentions some sort of installation (building) with two reservoirs, but contains no proper name.

<u>Bezetha</u> is attested by Josephus as the name of a quarter of the city near the northeast corner of the temple area. He reports that the Syrian Legate Cestius burned this suburb in his attack on Jerusalem in October A.D. 68.

He mentions the name $B \in \zeta \in \theta \acute{\alpha}$ 5 times in his History of the Jewish War (2:328 = II 15:5, 2:530 = II 19:4, 5:149 = V 4:2, 5:151 = V 4:2, 5:246 = V 5:8). The name occurs in several spellings ($B \in \zeta \in \theta \acute{\alpha}$, $B \in \zeta \alpha \theta \grave{\alpha}$). He explains the name in 5:151: "This newly built part of the city was called 'Bezetha' in our language, which, if interpreted in the Greek language, may be called 'the New City'." This area is north of the tower Antonia.

The external evidence is curiously divided. Unfortunately the most suspect reading is supported by the best witnesses.

An interesting fact is that if one changes two letters in $B \in \theta \underline{\epsilon} \underline{\sigma} \delta \alpha$, one is getting $B \in \theta \underline{\sigma} \underline{\epsilon} \delta \alpha$, which sounds the same as $B \in \theta \underline{\sigma} \underline{\alpha} \underline{\iota} \delta \alpha$ in Koine pronunciation (if one does not know the correct diaeresis pronunciation). $B \in \theta \underline{\sigma} \underline{\epsilon} \delta \alpha$ is actually supported by the (Byz) manuscript 582. Perhaps this contributes to the origin of $B \in \theta \underline{\sigma} \underline{\iota} \delta \alpha$?

I don't see that the etymology is a strong argument against Bethesda. It could very well be that the pool or place had that name.

For the UBS committee the reading $B\eta\theta\zeta\alpha\theta\grave{\alpha}$ was the least unsatisfactory reading.

In view of the many hospitals and sanatoria bearing the name Bethesda I think the place and the incident will always be remembered as Bethesda, whatever else the critical editions print.

The location of the pool was for a long time not clear:

- 1. Prior to archeological digs, the pool of Bethesda was identified with the Pool of Israel, close to the northern temple wall. This was the dominant tradition of the late middle ages.
- 2. Others identified it with the Siloah spring, which is the one true spring in Jerusalem. It seems to be an intermittend spring, which could explain the moving water. But compare Jo 9:7, where John explicitly mentions the Siloah pool, why then not in 5:2 also?
- 3. In digs conducted in the late 19th century, a large cistern situated about 100 feet north-west of St. Anne's church was discovered (between the Pool of Israel and the northern wall, in the Bezetha valley). Most of the associated building has disappeared, but it would seem to have been a church of perhaps the fourth or fifth century. In addition to the testimony of the ruins to the sacredness of the site, various objects were found among the rubbish, indicating that this was a place where cures had been supposed to occur. Especially noticeable was the marble model of a foot with a Greek inscription which had been placed there by one Pompeia Lucilia in thankfulness for the cure of some disease (ca. 120-140 CE!). In later digs (ca. 1914-38), archaeologists unearthed a rectangular pool with a portico on each side and a fifth one dividing the pool into 2 separate compartments. The pool was about 90 m long and 50/65 m wide. The dividing portico was about 6,5 m wide. The pillars were about 7 m high and the complete building about 8.5 m. The above mentioned cistern was located next to this portico and was probably part of a church. Also found were faded frescoes of the miracle of Christ's healing. This pool is matching Cyrill's description. Lying in the Bezetha valley, it was well suited to collect the rainwater. Its position next to the temple suggests a cultic function. It is possible that it had been built under Herod the Great during the temple expansion. Perhaps at the position of an earlier pool, which was called sheep-pool?

Problematic is the fact that a "sheep-pool" is nowhere mentioned in the non-Christian literature. It has been suggested that sheep-pool meant that the pool was close to the Sheep Gate or Market. The Sheep Gate is not exactly located, but was in the north-eastern corner of the wall (Neh 3:1, 3:32, 12:39). It was called the Sheep Gate because it led out to the sheep markets, where lambs were sold for sacrifice in the Temple.

Note the minor variant

"Εστιν δε ... $\underline{\epsilon}\nu$ τῆ προβατικῆ κολυμβήθρα by 01^{c2} , A, D, G, L, Θ , a, r^1 Jeremias suggests that this perhaps points to the fact that the place "Bethesda" was in the pool, namely the dividing portico.

Regarding the grammatical construction of:

"Εστιν δὲ ἐν τοῖς Ἱεροσολύμοις ἐπὶ τῆ προβατικῆ κολυμβήθρα ...

It might be noted that there are two possibilities to accent the word κολυμβηθρα, either as nominative κολυμβήθρα, or as dative κολυμβήθρα.

- 1. Nominative: In this case one has to add a noun in the dative to $\tilde{\epsilon}\pi \tilde{\iota} \ \tau \hat{\eta} \ \pi \rho o \beta \alpha \tau \iota \kappa \hat{\eta}$. Normally one adds $\pi \acute{\upsilon} \lambda \eta$ and gets sheep-gate: "There is in Jerusalem by the sheep gate a pool, called ..." In that case Bethesda is the name of the pool.
- 2. Dative: In this case one gets: "There is in Jerusalem by the sheep-pool, a place called ..."

Against the nominative can be argued that

- no father or pilgrim mentions the addition of $\pi ύλη$. All fathers take προβατικῆ κολυμβήθρα together.
- Some witnesses omit the $\hat{\epsilon}\pi\hat{\iota}$ $\tau\hat{\eta}$, which removes the difficulty of the construction.
- a pool cannot adequately be called a "house".
- since κολυμβηθρα has no article, there shouldn't be one in front of ἐπιλεγομένη.

Against the dative can only be said that one is missing the explicite "a place". But this is not unusual (compare Mk 15:7 or Lk 22:47).

If one accepts the dative one should speak of a place called Bethesda near the sheep-pool and not of a pool called Bethesda.

- 4 for an angel of the Lord went down at certain seasons into the pool, and stirred up the water; whoever stepped in first after the stirring of the water was made well from whatever disease that person had.

Tertullian (De Baptismo 5):

"Angelum aquis intervenire si novum videtur, exemplum futuri praecucurrit. Piscinam Bethsaidam angelus interveniens commovebat. Observabant qui valetudinem querebantur, nam si quis praevenerat descendere illuc, queri post lavacrum desinebat."

"If it is thought strange that an angel should do things to waters, there has already occurred a precedent of that which was to be. An angel used to do things when he moved the Pool of Bethsaida. Those who complained of ill-health used to watch out for him, for anyone who got down there before the others, after washing had no further reason to complain."

Didymus (De Trinitate Libri Tres 2:14):

ευροιμεν δε αν - και την κολυμβηθραν - ομολογουμενως εικονα του βαπτισματος, αλλ ουκ αυτην τυγχανουσαν την αληθειαν. η γαρ εικων προς καιρον - διο και απαξ του ενιαυτου υπο αγγελου κινηθεν το εν αυτη υδωρ και ενα μονον τον πρωτον κατιοντα.

G. Fee writes: "It is often asserted that Didymus (d. 398) also knew the reading, but this is not quite accurate. It is clear from *de Trinitate* 2.14 that Didymus knew the *tradition* about the angel. But it seems equally clear that he was not acquainted with the actual text of the tradition, for there is not a single verbal correspondence to John 5:4 in his sentence. Furthermore, he says the water was stirred by the angel *once* a year! That is a far cry from the $\kappa\alpha\tau\dot{\alpha}$ $\kappa\alpha\iota\rho\dot{o}\nu$ of the text." (Evangelical Quarterly 54 (1982) 207-218)

It should further be noted that some have doubted the genuineness of De Trinitate (i.e. that it really is from Didymus). There is only one manuscript from the 11^{th} CE of which the title is missing. The work consists of three books. The main argument for Didymus is that the church historian Sokrates mentions ca. 440 CE a work $\tau\alpha$ $\pi\epsilon\rho\iota$ $\tau\rho\iota\alpha\delta\sigma\varsigma$ $\tau\rho\iota\alpha$ $\beta\iota\beta\lambda\iota\alpha$ by Didymus.

Very certainly this is not an original part of John's Gospel.

It is interesting that the two parts 3b and 4 don't have identical support. This might simply be some copying error, but it is also possible that it indicates independent origin. So actually Tregelles (Account.., 1854, p. 245): "the words added to verse 3 seem to have been one scholion, and verse 4 another. [...] These scholia belonged at first to different manuscripts (whether in margin or text);"

According to Zahn this might be an interpretation by Papias. It was probably stimulated to explain verse 7:

NA²⁷ John 5:7 ἄνθρωπον οὐκ ἔχω ἵνα ὅταν $\frac{ταραχθη}{to ὕδωρ}$ βάλη με εἰς τὴν κολυμβήθραν ἐν ὧ δὲ ἔρχομαι ἐγώ, ἄλλος πρὸ ἐμοῦ καταβαίνει.

This is important to keep in mind. A complete explanation must also explain and take into account verse 7!

It is generally held that it probably was an early marginal comment which made it into the text.

The passage contains several un-Johannine expressions:

 $\dot{\epsilon}$ κδ $\dot{\epsilon}$ χομαι "wait for", only here in the Gospels

κίνησις "movement, motion", only here in the NT

κατὰ καιρὸν only here in the Gospels (Rom 5:6)

 $au lpha
ho lpha \chi \dot{\eta}$ "stirring up", only here in John, once in Mk 13:8

 $\delta\acute{\eta}\pi o\tau\varepsilon$ with a relative "whatever time", only here in the NT

κατέχω "hold fast, keep", only here in John νόσημα "disease, illness", only here in the NT

τὴν τοῦ ὕδατος κίνησιν: enclosed genitive, very un-Johannine style. John would probably have written τὴν ταραχὴν τοῦ ὕδατος.

κατέβαινεν έν: the use of έν with forms of βαινω is un-Johannine. John uses εἴς nowhere έν.

 $\dot{\epsilon}$ μβάς: is reserved for getting into boats. For people entering water καταβαίνουσιν and ἀναβαίνουσιν is used, also in Jo 5:7!

Already Tertullian (de bapt. 5) knew verse 4 and interpreted $\kappa\alpha\tau\dot{\alpha}$ $\kappa\alpha\iota\rho\dot{o}\nu$ = "once per year".

The words also probably stood in the Diatessaron, because Ephrem writes: "If they believe that the Angel by the water of Shiloah was healing the sick, how much rather should they believe that the Lord of the Angels purifies by baptism

from all stain?" - Only in the interpolated version there is any mention of an angel. The words are also in the Arabic Diatessaron.

A. Pallis (Notes, 1926) writes: "In this passage we have to deal with two corruptions. The first corruption is $\kappa'i\nu\eta\sigma i\nu$, a misreading of $\kappa'\epsilon\nu\omega\sigma i\nu$, pouring out. The afflicted were lying about in the shed waiting for fresh water to be poured out into the bath, for the water of the previous day, being contaminated by leprous and other diseased bathers, would be renewed every morning. ... The second corruption is $\tau \alpha \rho \alpha \chi \theta \hat{\eta}$, a misreading of $\pi \alpha \rho \alpha \xi \nu \theta \hat{\eta}$ So that $\delta \tau \alpha \nu$ $\pi\alpha\rho\alpha\xi\nu\theta\hat{\eta}$ tò $\delta\omega\rho$ means when the water is poured out into the bath, $\pi\alpha\rho\alpha\xi\nu\theta\hat{\eta}$ being thus a synonym of $\kappa\in\nu\omega\theta\hat{\eta}$. Now, when these two corruptions were committed, a miracle was imagined, and so the legend about an angel agitating the water was formed and interpolated into the text. ... Some manuscripts omit also the words $\dot{\epsilon}$ k $\delta \dot{\epsilon}$ $\chi o \mu \dot{\epsilon} \nu \omega \nu$ $\tau \dot{\eta} \nu$ $\tau o \hat{\nu}$ $\dot{\nu} \delta \alpha \tau o \zeta$ $\kappa \dot{\nu} \eta \sigma \iota \nu$, but these are indispensable, first because some reason had to be assigned for the presence of the diseased crowd at the bath and secondly because the word κίνησιν formed the foundation of the legend. On the other hand, the clause $\dot{\epsilon}\nu$ ὧ δὲ ἔρχομαι ἐγώ, ἄλλος πρὸ ἐμοῦ καταβαίνει evidently belongs to the legend."

Maurice Robinson suggests the following (tc-list 16 June 1997):

"My own viewpoint is that the omission of vv.3b-4 reflects deliberate recensional activity, performed primarily by the orthodox (thank you, Bart!) in order to remove a passage which superstitiously might have encouraged a false worship of angels, exaggerated claims regarding "healing spas" or the like in the early centuries, particularly in Egypt and the Western regions of the Empire. Accidental omission hardly seems likely in regard to such a variant, especially when some witnesses only omit verse 4 while others omit 3b and 4, and still others include 3b and omit 4. Such "mixed" recensional activity was faulty, however, in that none of it addressed (for whatever reason) the problem of the wording of verse 7; yet that easily could have been recensionally altered by a similar curtailing and replacement of the text into something like "Do you want to become whole?" "Sir, I have no man, in order that he should assist me". Yet recensional activity, even when clearly evidenced, is not always wholly rational, so this fact occasions me no major difficulty, even when charging recensional activity in those early witnesses in regard to vv.3b-4."

This suggestion appears not very probable to me.

The added explanation is very catchy. Once heard you will never forget it. It appears very improbable that it was omitted deliberately. I think that what we have here are "remains of this evangelic tradition which were rescued from oblivion by the scribes of the second century" (WH).

It has been suggested that 5:3b-4 have been added together with the PA to John. Both stories are catchy and make the impression of oral tradition.

The remaining problems are:

- 1. It has to be explained why some witnesses have 3b, but not 4 and vice versa. I personally think that the suggestion by Tregelles of two independent scholions which have finally been combined appears quite possible.
- 2. Verse 7: Either verse 7 assumes knowledge of 3b-4 or 3b-4 have been added as an explanation of verse 7. Since no convincing explanation for an omission exists, one has to conclude that 3b-4 have been added as an explanation of verse 7.

This could either be the end of verse 11 or the end of the Byzantine text of verse 12. Since W is not Byzantine, it appears more probable that we have here the end of verse 11. Then verse 12 has been omitted due to parablepsis in W proper.

Both $0\tilde{i}\delta\alpha$ and $0\tilde{i}\delta\alpha\tau\epsilon$ make good sense. $0\tilde{i}\delta\alpha$ is more normal, because it is clear that Jesus knows the truth. $0\tilde{i}\delta\alpha\tau\epsilon$ is the more dramatic reading, because if the Jews know the truth about Jesus' testimony, they are even more guilty. It could be argued that this is contradicted by verse 5:37, but the meaning is not exactly the same. Generally in the Gospel of John the Jews do not know who Jesus is and always wrongly interpret the Biblical evidence.

The οἶδατε fits good to the ὑμεῖς ἀπεστάλκατε πρὸς Ἰωάννην in verse 33. The Jews should know the truth from the testimony of John.

This is not clear though. Both readings make good sense, but $\mu \in i\zeta\omega\nu$ is clearly the harder reading.

Metzger also notes that it is possible that $\mu \in \mathcal{L}(\omega \nu)$ is just an incorrect form of the accusative. This is supported by the following variant:

 NA^{27} John 1:50 ἀπεκρίθη Ἰησοῦς καὶ εἶπεν αὐτῷ· ὅτι εἶπόν σοι ὅτι εἶδόν σε ὑποκάτω τῆς συκῆς, πιστεύεις; μείζω τούτων ὄψη.

μείζω is accusative masc/fem. singular and is derived from μείζοσ-α (normally the forms are based on the comparative infix -ιον-, but there is a second comparative infix -ιοσ-. μείζω uses both forms).

One question that arises with this variant is one of punctuation. Is it:

- a) "You search the scriptures, in which you think that you have life; they are they which bear witness of me."
- b) "Search the scriptures: Those (scriptures) in which you think that you have life, they it is that bear witness of me"

Is it an assertion (a) or a command (b)? In Egerton we have a command. In Egerton there is a point after $\gamma\rho\alpha\phi\alpha\zeta$, but also a free space after $\xi\chi\in\iota\nu$.

Curiously one Byzantine witness, manuscript 27, supports the Egerton reading (T&T).

Some Western witnesses combine both forms! The T&T analyses found no Greek support for this combination.

It is possible that some scribes got confused by the similar looking letters:

monouquouzht eit e

Perhaps the overbar of the nomen sacrum has been interpreted as a deletion label? On the other hand one could argue that scribes would not have easily misinterpreted or overlooked such a NS bar.

The object $\theta \in \delta \zeta$ seems to be required, except one takes $\mu \delta \nu o \zeta$ as a noun. E.A. Abbott in his "Johannine Grammar" notes that $\tau o \hat{\upsilon} \ \mu \delta \nu o \upsilon$ could be written as a title $\tau o \hat{\upsilon} \ M \delta \nu o \upsilon$ = "the only One".

The support for the short reading is strong.

Zahn (Comm. Jo) notes that $\pi\alpha\rho\grave{\alpha}$ $\tauo\hat{\upsilon}$ $\mu\acute{o}\nuo\upsilon$ $\theta\ino\hat{\upsilon}$ does not mean "from God alone", but "from the one who alone is God", which, in context, is not very fitting. Perhaps one can punctuate: "from the only one, (from) God, ..."?

The second variant by N, 1071 is even more interesting, because it seems to be a relict of the $\mu o \nu o \gamma \epsilon \nu \dot{\eta} \zeta$ $\theta \epsilon \dot{o} \zeta$ reading in 1:18! N has a lacuna at 1:18, but 1071 reads $\nu \dot{\iota} \dot{o} \zeta$ there.

Unfortunately T&T only lists the first variant and not the second ($\mu o \nu o \gamma \in \nu o \hat{\upsilon} \varsigma$).

This reading is not in NA and SQE. It is probably just a conjecture by Swanson. \mathbf{L}^{c} reads txt.

Tischendorf writes: "post oum quae primitus scripta fuerant, erasa sunt corumque loco ab ipsa prima manu $\kappa\alpha$ ì legitur; id quod edidimus." (folio 213) So, after $K\alpha\phi\alpha\rho\nu\alpha\sigma\dot{\nu}\mu$ one and a half line have been erased. Over the erasure of the first line a $\kappa\alpha$ ì has been written:

pl oionhrcont o skot iahdhegego perant hsqal as neikaioupwel h shseiskaf arna ... oumkai ------

This means that originally after the Our no $\kappa\alpha i$ appeared, otherwise it would not have been written over the erasure. It is interesting that the scribe did not continue after the $\kappa\alpha i$, but left the lines blank. This could mean that he noted the error only later.

The proposed reconstruction by Swanson would look like this:

pl oionhrcont o skot iahdhegego perant hsqal as neikaioupwel h shseiskaf arna ... oumkat el aben deaut oush----- The reading by Swanson makes no real sense. It also does not fit good into the two lines. It is also strange why L, which is not Western, should adopt this curious reading here.

Compare also:

Protogospel of James 14:1 καὶ κατέλαβεν αὐτὸν νὺξ

Interesting variation, possibly idiomatic. It is noteworthy that this usage only appears twice in John and not in the Synoptics.

Weiss (Textkritik, p. 47) thinks that the words should emphasize the unexpected beginning of the darkness.

Zahn (Comm. Jo) thinks that the txt reading with $\dot{\epsilon}\gamma\epsilon\gamma\acute{o}\nu\epsilon\iota$ is an assimilation to the following pluperfect $\dot{\epsilon}\lambda\eta\lambda\acute{\upsilon}\theta\epsilon\iota$.

The next day the crowd that had stayed on the other side of the sea saw that there had been only one boat there -- <u>that into which his disciples entered</u> --. They also saw that Jesus had not got into the boat with his disciples, but that his disciples had gone away alone.

Compare:

6:16 When evening came, his disciples went down to the sea, 17 got into a boat, and started across the sea to Capernaum. It was now dark, and Jesus had not yet come to them.

Probably a clarification what boat is meant and that it is strange for Jesus being there without another boat.

There is no reason for an omission.

A. Pallis (Notes, 1926) writes: "The difficulty of the passage is increased by the article 0i having dropped out before $\in \hat{l}\delta 0\nu$; without its addition the text reads as if it were on the morrow that the disciples saw that there had not been another boat."

A curious nest of readings.

There are several problems here:

1. The addition of $\delta \hat{\epsilon}$ and $\kappa \alpha \hat{\iota}$:

These conjunctions have probably been added to make clear the meaning of $\mathring{\alpha}\lambda\lambda\alpha$ = "other" and to distinguish it from the conjunction $\mathring{\alpha}\lambda\lambda\dot{\alpha}$ = "but".

2. Singular versus plural $\mathring{\eta}\lambda\theta\in\nu$ / $\mathring{\eta}\lambda\theta$ o ν :

The singular is the more unusual usage with a neuter plural. The plural may come from the $\mathring{\alpha}\pi\mathring{\eta}\lambda\theta o\nu$ in 6:22.

3. the diminutive form: $\pi\lambda o \hat{\iota} \alpha / \pi\lambda o \hat{\iota} \acute{\alpha} \rho \iota \alpha$

 $\pi\lambda o\hat{\iota}\alpha$ is read by: P75, (01), B, W, Ψ , 157, pc, Lat

This is the most difficult point.

Blass notes that diminutives are not accepted in "good Greek", so it is possible that scribes changed $\pi\lambda o\iota \acute{\alpha}\rho\iota \alpha$ into $\pi\lambda o\hat{\iota}\alpha$. But note Lk 5:2 where A, C*, L et al. changed $\pi\lambda o\hat{\iota}\alpha$ into $\pi\lambda o\iota \acute{\alpha}\rho\iota \alpha$, probably secondary.

4. ἐκ / ἐκ τῆς:

τῆς is read by: B, N, W, 1071, pc

Compare:

NA²⁷ John 6:1 πέραν τῆς θαλάσσης τῆς Γαλιλαίας τῆς Τιβεριάδος. NA²⁷ John 21:1 ἐπὶ τῆς θαλάσσης τῆς Τιβεριάδος:

Probably added from verse 6:1 where the lake is meant.

Now putting all these arguments together we get the txt reading. If one values the external evidence higher, then the P75 reading $\mathring{\alpha}\lambda\lambda\alpha$ $\mathring{\eta}\lambda\theta\epsilon\nu$ $\pi\lambda\sigma\hat{\iota}\alpha$ $\dot{\epsilon}\kappa$ should be taken. The bracketing is, although very unusual, ok therefore.

The words are not really needed. If it is a secondary addition it would be a very strange one. Possibly added to make clear what eating is meant (6:11)? It is more probable that the words have been omitted as unnecessary. Note the even further omission by Sy-S.

A typical variation.

δέδωκεν / ἔδωκεν in John = 10 : 11.

Of the Gospels it is only in John, that $\delta \acute{\epsilon} \delta \omega \kappa \epsilon \nu$ appears. The perfective usage of $\delta \acute{\iota} \delta \omega \mu \iota$ is typically Johannine. He uses it 23 times. A change from $\delta \acute{\epsilon} \delta \omega \kappa \epsilon \nu$ to $\acute{\epsilon} \delta \omega \kappa \epsilon \nu$ is thus more probable. This can be also seen from the examples above which show 9 changes from $\delta \acute{\epsilon} \delta \omega \kappa \epsilon \nu$ to $\acute{\epsilon} \delta \omega \kappa \epsilon \nu$, but only 2 the other way round. And it is not at all clear, if these 2 examples are really valid, because it is possible that here the txt reading is wrong.

Possibly $\xi\delta\omega\kappa\epsilon\nu$ is a conformation to immediate context, verse 31 (so already Weiss).

"you are looking for me, not because you saw signs, but because you ate your fill of the loaves."

John 5:37-40 And the Father who sent me has himself testified on my behalf. You have never heard his voice or seen his form, 38 and you do not have his word abiding in you, because you do not believe him whom he has sent. 39 "You search the scriptures because you think that in them you have eternal life; and it is they that testify on my behalf. 40 Yet you refuse to come to me to have life.

It is not clear what Jesus meant with the "But I said to you..." (' $A\lambda\lambda$ ' $\in \hat{l}\pi o\nu$...). If the $\mu\epsilon$ is not genuine, then the words may refer back to verse 26 and the feeding and other signs (so many commentators). Zahn (Comm. Jo) thinks that this back reference is "unquestionable".

It is possible that the $\mu\epsilon$ and $\mu\epsilon$ have been added to provide an object. The different additions by txt ($\mu\epsilon$), A ($\mu\epsilon$) and W($\mu\epsilon$ + $\mu\epsilon$) may indicate a secondary cause.

If the $\mu\epsilon$ is genuine, the saying to which Jesus refers has not been explicitly reported before. 5:37-40 have been suggested, but are not fitting perfectly. It is therefore possible that the $\mu\epsilon$ has been omitted to avoid this difficulty.

It is probable also that the $\mu\epsilon$ has been omitted to improve style: $\kappa\alpha$ $\dot{\epsilon}\omega\rho\dot{\alpha}\kappa\alpha\tau\epsilon$ $\kappa\alpha$ où π $\iota\sigma\tau\epsilon\dot{\nu}\epsilon\tau\epsilon$.

It is also possible that $\mu\epsilon$ fell out accidentally: $\epsilon\omega\rho\acute{\alpha}\kappa\alpha\tau\acute{\epsilon}$ $\mu\epsilon$

Note the $\kappa\alpha$ ì that can either mean "also, even" or with the following $\kappa\alpha$ ì: $\kappa\alpha$ ì ... $\kappa\alpha$ í "both ... and" or "not only ... but also". K, Λ omit the first $\kappa\alpha$ ì.

01: The scribe omits 39a due to parablepsis. The words have been added at the bottom of the page, but then, strangely, have subsequently been deleted again! For this text the online IGNTP majuscule edition and Swanson have $\pi\alpha\tau\rho\acute{o}\varsigma$, Tischendorf, NA and the online Sinaiticus transcription have not.

From the images a clear decision is not possible, though there is a slight preference for the text without $\pi\alpha\tau\rho\acute{o}\varsigma$.

At first this looks like an example of the rule that when a certain wording appears several times and the scribe changes it at first, he finally gives in. This means that the support for the wrong reading gets weaker in succession.

This is true for the first three verses, but is turned upside down in verse 6:54, where an overwhelming number of MSS supports the short reading. This is then once again followed later by two almost safe long readings.

It is comparatively improbable that John used both wordings. Curious!

txt "and the bread that I will give is my flesh for the life of the world."

Byz "and the bread that I will give is my flesh that I will give for the life of the world."

The question is if there is a real difference in meaning. Bousset (Studien NT, p. 102) even calls the txt reading "nonsense".

Without the words the saying is (grammatically) more difficult and a deliberate omission is improbable. In the txt reading the words "for the life of the world" appear like an afterthought: "The bread is my flesh, - for the life of the world."

Grammatically the $\dot{\epsilon}\sigma\tau\iota\nu$ connects $\dot{\delta}$ $\ddot{\alpha}\rho\tau\sigma\zeta$ and $\dot{\eta}$ $\sigma\dot{\alpha}\rho\xi$: "The bread is my flesh." So it is not possible to directly connect $\dot{\epsilon}\sigma\tau\iota\nu$ with $\dot{\delta}\eta\dot{\epsilon}\rho$. The $\dot{\delta}\eta\dot{\epsilon}\rho$ must be connected with $\delta\dot{\omega}\sigma\omega$. The stylistically awkward txt construction has been improved in two ways:

- 1. O1, Tert rearrange the words. Now $\mathring{b}\pi\grave{\epsilon}\rho$ directly follows $\delta \acute{\omega}\sigma \omega$. Compare NRS: "and the bread that I will give for the life of the world is my flesh."
- 2. In the Byzantine text $\mathring{\eta}\nu \not\in \gamma\omega$ $\delta\omega\sigma\omega$ has been added, a repetition of the $\delta\omega\sigma\omega$ to directly connect it with $\mathring{\upsilon}\pi\grave{\epsilon}\rho$.

WH suggest that the Byzantine reading is perhaps a conflation of 01 and txt.

 NA^{27} Luke 22:19 τοῦτό ἐστιν τὸ σῶμά μου τὸ ὑπὲρ ὑμῶν διδόμενον·

The words look like a combination of 10:38 and 6:53 (where D also reads $\lambda \acute{\alpha} \beta \epsilon \tau \epsilon$).

Metzger calls it "a homiletic expansion". We know that D is fond of such additions. It possibly also a reflection of Mk 14:22 and parallels.

Note that both, the end of verse 56 + addition by D and the addition by D + beginning of verse 57 are the same: $\dot{\epsilon}\nu$ $\alpha\dot{\upsilon}\tau\dot{\omega}$. $\kappa\alpha\theta\dot{\omega}\varsigma$

57 καθώς ἀπέστειλέν με ὁ ζῶν πατὴρ κἀγὼ ζῶ διὰ τὸν πατέρα, καὶ ὁ τρώγων με κἀκεῖνος ζήσει δι' ἐμέ.

Thus in principle the words could have fallen out due to haplography.

W has a long dittography here: He repeats 54 $\xi \chi \in \iota$... 56 $\alpha \hat{\iota} \mu \alpha$. To the contrary 33 omits that part!

D and 01 (which is Western in this part!) omit the final clause of verse 55, but 01 is not following D in the long addition in verse 65.

It should be noted that the word $\sigma\hat{\omega}\mu\alpha$ is suspicious here. It appears nowhere else in these chapters, but only $\sigma\hat{\alpha}\rho\xi$ is used 7 times within 6:51 and 6:63!

"But among you there are some who do not believe." For Jesus knew from the first who were the ones that did **not** believe, and who was the one that would betray him.

Compare:

 NA^{27} John 16:1 Tαῦτα λελάληκα ὑμῖν ἵνα μὴ σκανδαλισθῆτε.

omit: 01*, 1424* 01* corrected by 01^{c2}.

The omission by P66 et al. is probably due to homoioarcton ($\tau\iota$ - $\tau\iota$).

On the other hand, then, one must assume that the Greek exemplars of the Latin e and $Sy^{S,C}$ were all erroneous here due to parablepsis. This is comparatively improbable.

The omission of $\mu \hat{\eta}$ is not easy to explain. The negation is clearly paralleled in the $0\mathring{\upsilon}$ $\pi \iota \sigma \tau \in \acute{\upsilon} 0 \upsilon \sigma \iota \nu$ earlier in the verse.

Metzger notes that the omission "may be the result of a desire to indicate that Jesus knew his own, rather than those who were not his own. The parallelism, however, with the first part of the verse seems to require the presence of the negative."

The support for the omission is not coherent.

In the following cases the $\tau o \hat{\upsilon}$ $\pi \alpha \tau \rho \acute{o} \varsigma$ $\mu o \upsilon$ is safe: Jo 2:16; 5:17; 5:36; 5:43; 6:32; (6:40); 8:49; 10:25; 10:37; 14:2; 14:7; 14:21; 15:1; 15:23; 15:24; 20:17².

There are also several cases where δ $\pi\alpha\tau\eta\rho$ without $\mu\sigma\upsilon$ is safe.

Especially inconsistent is manuscript 1424 (omits 3 times, adds 6 times), 579 omits twice and adds twice, D adds 4 times and omits once, 69/f13 adds 5 times and omits once, 700 adds three times.

The Minority variants where $\mu o \upsilon$ has been added are more in number than those where it has been omitted (21 : 8). It is of course a natural addition. In all Majority cases Byz has the added $\mu o \upsilon$.

That the additions are secondary is probable for several reasons:

- a) they represent a slightly higher Christology
- b) there is no reason for an omission, except accidental.
- c) the $\mu o \upsilon$ is well known from the Synoptics where it appears often. There it is the rule to have $\pi \alpha \tau \dot{\eta} \rho$ be followed by a personal pronoun.

In the instances of 8:38; 10:29; 10:32 and $20:17^1$ the support for the addition is quite good.

On the other hand at 15:10 the support for the omission is also quite good. These cases should be reconsidered.

It is interesting that this variation is so prominent in John.

"...they are able to harm people for five months."

οὐ γὰρ εἶχεν ἐξουσίαν does probably not mean "not having authority/right" (which makes no sense with the following clause), but simply "not being able to".

But Chrysostom shows that the understanding of "not having authority" was common. He writes in his 48^{th} homily on the Gospel of John:

"What sayest thou, O blessed John? Had not He 'power', who was able to do all that He would? ... The Evangelist spake not so that he might be supposed to utter riddles, but to make it plain that He showeth proofs both of His Godhead and His Manhood. For when he saith, that "He had not power," he speaketh of Him as a man, doing many things after the manner of men; but when he saith, that He stood in the midst of them, and they seized Him not, he showeth to us the power of the Godhead, (as man He fled, as God He appeared,) and in both cases he speaks truly."

So, the W reading is clearly the more difficult one. Possibly from the Latin? "potestatem" has a broad range of meanings: "power, strength" but also "chance, opportunity". The latter is more probable.

Compare below Jo 7:52 for another agreement of W with the Latin.

It is possible that the text originally lacked a pronoun, which has been supplied later at various places and in different forms. But the support for this is only versional and may simply be translational inaccuracy.

The neuter form might have been suggested from Mt 10:26 (Lk 12:2) where also a neuter follows a masculine form. Weiss (Textkritik, p. 41) notes that possibly the $\alpha \dot{\upsilon} \tau \dot{\upsilon}$ is a conformation to the neuter $\tau\iota$. The B reading is more difficult (almost nonsensical), the txt reading makes better sense in context.

The variation is strange and difficult to decide. The support for $\alpha \mathring{\upsilon} \tau \grave{o}$ is quite good.

It is possible that scribes changed $0\mathring{\upsilon}\kappa$ into $0\mathring{\upsilon}\pi\omega$ to remove the inconsistency between verse 8 and verse 10.

On the other hand $0\rlap{\rlap/}0\pi\omega$ could have been changed into $0\rlap{\rlap/}0\kappa$ to improve style, because there is one more $0\rlap{\rlap/}0\pi\omega$ later in the verse. It is also possible that $0\rlap{\rlap/}0\kappa$ is at least in part just an accidental error (several $0\rlap{\rlap/}0\pi\omega/0\rlap{\rlap/}0\kappa$ variations appear, see examples above). $0\rlap{\rlap/}0\kappa$ is basically a Western reading (01, D, it, vg, Sy-S, Sy-C), joined by a few Byzantine manuscripts. Both 01 and D change one other $0\rlap{\rlap/}0\pi\omega$ to $0\rlap{\rlap/}0\kappa$.

The external support for $o\H{\upsilon}\pi\omega$ is very strong.

Difficult.

Already Porphyry the philosopher (3rd CE) notes that with the $0\dot{U}K$ we would have a "changeable" Jesus. Jerome's Against the Pelagians 2:17 writes:

"Ut autem ascenderunt fratres ejus, tunc et ipse ascendit ad solemnitatem, non manifeste, sed quasi in abscondito (Joan. VII, 10). Iturum se negavit, et fecit quod prius negaverat. Latrat Porphyrius, <u>inconstantiae ac mutationis</u> accusat, nesciens omnia scandala ad carnem esse referenda. Moyses, inquit, dedit vobis legem, et nemo ex vobis facit legem, utique possibilem, et tamen quod erat possibile, nemo impleverat, neque enim culpa imperantis est, sed fragilitas audientis, ut omnis mundus subditus fiat Deo."

Pseudo-Ambrosius (4^{th} CE, Latin) preserved a similar objection to Jesus' change of intention (Quaestiones Vet. et N. Test. 74).

Weiss (Jo Com.) suggests that the $0\rlap.0000\pi\omega$ indicates that Jesus did not want to go to THIS festival ($\tau\alpha\rlap.0000\pi\nu$!), but only to a later one. This, he thinks, is also required from context (thus there is no real difference here between $0\rlap.0000\kappa$ and $0\rlap.00000\pi\omega$). Weiss thinks that Jesus changed his mind due to a hint from God or what ever. We will never know.

The Latin (Old Latin and Vulgate) could be interpreted as if Jesus would not go up on that special day only. Compare Augustine: (Sermon LXXXIII. = CXXXIII. Benedictine Edition)

"Ipsa verba solvunt quaestionem. Multis diebus agebatur ille dies festus. 'Ad istum', utique hodiernum 'diem', inquit, 'festum', istum utique hodiernum quando illi sperabant, non ascendit; sed quando ipse disponebat. Denique attende quod sequitur: 'Haec cum dixisset, ipse mansit in Galilaea.' Ergo non ascendit 'ad istum diem festum.' ...

... Non ascendo, inquit, ad diem festum. Dixit: Non ascendo, ut occultaretur; addidit: istum, ne mentiretur. Aliquid intulit, aliquid abstulit, aliquid distulit; nihil tamen falsi dixit, quia nihil falsi de eius ore procedit."

"The words themselves solve the difficulty. That feast was kept for many days. 'On this', that is, this present 'feast day', saith He, this day, that is, when they hoped, He went not up; but when He Himself resolved to go. Now mark what follows, 'When He had said these words, He Himself stayed in Galilee.' So then He did not go up 'on that feast day'. ...

... He said, 'I go not up,' that He might be hid; He added 'this,' that He might not lie. Something He expressed, something He suppressed, something He repressed; yet said He nothing false, for 'nothing false proceedeth out of His Mouth.' "

But on the other hand "diem festum" could be simply a translation of $\dot{\epsilon}o\rho\tau\dot{\eta}\nu$ $\tau\alpha\dot{\nu}\tau\eta\nu$.

Very evenly divided support.

The change is probably accidental, because it involves only one Iota. Both readings make good sense. $\alpha \dot{\upsilon} \tau \dot{o} \zeta$ might have been suggested from the next verse 10 (so also Weiss).

αὐτοῖς appears to be the easier reading, because with $\epsilon i\pi \dot{\omega} \nu$ it suggests itself. It is interesting that no $\epsilon i\pi \dot{\omega} \nu$ αὐτοῖς αὐτὸς ἔμεινεν appears. One also wonders why no αὐτὸς δὲ appears.

No parallel for this construction in the Greek Bible. Possibly idiomatic (compare Jo 2:15)?

It is probable that $\dot{\omega}\zeta$ has been omitted as superfluous or awkward. It is also possible that it has been omitted, because in this sentence $\dot{\omega}\zeta$ appears twice with two different meanings. The first is a temporal particle "while, when", the second a particle of comparison "as, like". Weiss (Textkritik, p. 170) thinks that the $\dot{\omega}\zeta$ has probably been omitted, because there was none in front of the parallel $\dot{\phi}\alpha\nu\in\rho\hat{\omega}\zeta$.

Metzger notes that "a copyist may have inserted the word in order to soften the force of the expression $\dot{\epsilon}\nu$ $\kappa\rho\upsilon\pi\tau\hat{\omega}$." (so already Tischendorf) - But is this probable?

Either the $\mu\epsilon$ has been omitted to improve style or it has been added to make the saying more symmetrical (compare the previous $\zeta\eta\tau\dot{\eta}\sigma\epsilon\tau\dot{\epsilon}$ $\mu\epsilon$) and to harmonize it with Jer and other occurrences in John.

Note that the same variation also appears in 8:21! Here N has the $\mu \in \mathbb{R}$

P. Williams comments on the Syriac:

"The general Syriac tendency to put the object later and the particular preference for VOVO and VVO is evident.

John 7:34. Where txt has $\zeta \eta \tau \dot{\eta} \sigma \epsilon \tau \dot{\epsilon}$ $\mu \epsilon \kappa \alpha i$ $0 \dot{0} \chi \epsilon \dot{0} \rho \dot{\eta} \sigma \epsilon \tau \dot{\epsilon}$ $[\mu \epsilon]$ NA27 cites SCP with the VOVO structure in its support against the variant VOV without the second $\mu \epsilon$. The support of SCP has to be dropped, but without this support the balance of external evidence shifts yet further away from txt, which, on the principles on which the edition was compiled, had only a marginal lead over the variant.

John 7:36. Not only is txt and the variant and NA27's citation of Sy exactly the same as in John 7:34, but the evidence for both is remarkably similar. The citation of Sy is slightly misleading since S goes its own direction and does not have a straightforward correspondence with txt or the variant. CP, however, have the expected VOVO structure. Again, without their support, txt loses any slender lead it had over the variant."

Kilpatrick notes: "When $\kappa\alpha\theta\dot{\omega}\varsigma$ introduces a following quotation in the NT it invariably follows its main clause." He translates:

"If any man thirst, let him who believes in me come to me and drink."

It is interesting to note that there is no scripture passage known to which verse 38 refers.

Robertson (Wordpictures) notes:

"Which $(o\tilde{\upsilon})$. Genitive by attraction of the relative \tilde{o} (accusative singular object of $\lambda\alpha\mu\beta\dot{\alpha}\nu\in\iota\nu$) to the case of $\tau o\hat{\upsilon}$ $\pi\nu\in\dot{\upsilon}\mu\alpha\tau o\varsigma$ (the Spirit) the antecedent. But it is purely grammatical gender (neuter \tilde{o} because of $\pi\nu\in\dot{\upsilon}\mu\alpha$) which we do not have in English. Even here one should say "whom," not which, of the Spirit of God."

The three other examples of attraction in John (see above) are safe. To the contrary the only other example without attraction in John (4:5) shows the same variation.

The conclusion would be that it was the δ that initiated the change.

The change emerged independently several times, because the support is not coherent.

Natural additions. There is no reason for an omission.

This is one of the cases suggested by Metzger ("Lucianic recension", 1959) where one could have an old relict of the earliest Antiochian text. Not necessarily correct, but at least older than any possible recension.

Weiss (Textkritik, p. 131) thinks that the B reading is rather difficult, because it seems to exclude the communication of the Spirit to Jesus and the prophets. Hoskier (Codex B, I, 373) sees the B reading as a conflation.

It is possible that the $\mathring{\eta}\nu$ refers to Jesus and not to the Spirit: "and not yet was <u>he</u> Spirit" against: "for not yet was the Spirit". To avoid this view $\delta \in \delta \acute{o}\mu \in \nu \circ \nu$ might have been added.

 $\underline{13:}$ T&T note 13* for txt, but this is not correct. The evidence acc. to Swanson (and Geerlings) is given above. It is clear that 13* is an accidental omission due to homoioarcton $0 \tilde{\upsilon} \tau \omega \varsigma$ - $0 \tilde{\upsilon} \tau o \varsigma$. This has been confirmed by Klaus Witte from Münster from the film. The corrector adds the missing words. Swanson interprets this wrongly by inserting them after $\tilde{\delta}$ $\tilde{\alpha} \nu \theta \rho \omega \pi o \varsigma$ and not before.

As in the previous 7:40 variant ($\alpha \dot{v} t o \hat{v} t \hat{\omega} \nu \lambda \acute{o} \gamma \omega \nu t o \acute{v} t \omega \nu$), the P66*, 01* reading looks like a conflation.

It is possible that the words fell out due to h.t. ($\alpha\nu\theta\rho\omega\pi\sigma\zeta$ - $\alpha\nu\theta\rho\omega\pi\sigma\zeta$, so Weiss). Some Byzantine minuscules omit, too (e.g. 225, 229 acc. to Tis). h.t. is at least in part responsible for the omission.

Interestingly the longest reading is also the earliest (P66).

It has been suggested that this is the result of a conflation of the D and the Θ reading.

On the other hand it is also possible that the shorter readings are attempts to straighten the rather clumsy style. This repetitive style is typically Johannine.

The txt reading is unusual Greek. Normally $o \mathring{v} \tau \omega \zeta$ comes in front of the verb.

The N, Ψ et al. readings can be seen as remnants of the txt reading.

νυκτὸς is the more clear reference to the previous (πρότερον) mentioning of Nicodemus. Note the clear conflation in the Western and Caesarean witnesses. There is no reason for a change if νυκτὸς was originally present.

The phrase $t\grave{o}$ $\pi\rho\acute{o}t\epsilon\rhoo\nu/t\grave{o}$ $\pi\rho\acute{\omega}to\nu$ appears only in John (5 times).

Note Jo 19:39, where the reading is basically safe and is identical with the D reading!

Zahn (Comm. Jo) thinks that the 01 reading is correct and considers the words to be an interpolation from 19:39. On the other hand it is possible that the words have been omitted to improve style. Note that 7 Byzantine minuscules omit the words, too.

The change from $[\tau \grave{o}]$ $\pi p \acute{o} \tau \epsilon p o \nu$ to $\nu \acute{u} \kappa \tau o \zeta$ has already been discussed in the main commentary with rating 2 (NA clearly original).

The phrase $t\grave{o}$ $\pi\rho\acute{o}t\epsilon\rhoo\nu/t\grave{o}$ $\pi\rho\acute{\omega}to\nu$ appears in the Gospels only in John (5 times). It appears also in Gal 4:13 and 1.Tim 1:13. In three of the cases there exists a singular omission of $t\grave{o}$.

It is possible that the addition of $\tau \grave{o}$ is a conformation to 6:62.

<u>δ προφήτης</u> P66*, sa, <u>Bois</u> cj. (Henry Owen, 1716-1795)

E.R. Smothers notes a letter of Prof. Martin, the editor of P66, to him. Martin writes: "On p. 52, line 2, the article \dot{o} with $\pi\rho o \dot{\phi} \dot{\eta} \tau \eta \varsigma$, as finally written, is paler and, on close inspection, seems to have been imperfectly scratched. If so, the corrector, whoever he was, wished to remove it." G. Fee agrees with this view (P66, S&D, 1968, p. 70).

There is an extra file with images on this paleographic problem, click here.

That the Sahidic reads the article, is noted in Horner (1910) and in Hans Quecke "Das Joh.ev. in Saidisch", Rome, 1984.

Boismard additionally adds: P75vid

In P75 there is quite a large lacuna: $\gamma \alpha \lambda \iota \lambda \alpha [... c. 6 ...] \varphi[\eta] \tau \eta[\zeta]$.

It is not possible, unfortunately, to decide if $\dot{\boldsymbol{o}}$ was present or not.

NA²⁷ John 7:40 Ἐκ τοῦ ὄχλου οὖν ἀκούσαντες τῶν λόγων τούτων ἔλεγον· οὖτός ἐστιν ἀληθῶς ὁ προφήτης·

Several commentators think that this is the correct reading, at least the intended reading.

Smothers notes that there actually was a prophet from Galilee, Jonas:

LXX 2 Kings 14:25 ο ἐλάλησεν ἐν χειρὶ δούλου αὐτοῦ <u>Ιωνα</u> υἱοῦ Αμαθι τοῦ προφήτου τοῦ ἐκ Γεθγοβερ

"which he spoke by his servant <u>Jonah</u> son of Amittai, the prophet, who was from <u>Gath-hepher</u>."

The reading of P66* makes perfect sense and fits good into the Fourth Gospel.

G. Fee (P66, S&D, 1968, p. 79) writes: "it has been pointed out that the singular readings of P66* are ALL of dubious quality and most likely the product of the scribe himself, not his exemplar. The reading of δ $\pi\rho\sigma\phi\eta\tau\eta\varsigma$ in P66* therefore has as little textual value as the 19th CE conjectures; and even though this reading is contextually to be preferred, and perhaps even what the author intended in terms of meaning, there can be little question that he in fact wrote $\pi\rho\sigma\phi\eta\tau\eta\varsigma$ without the article. Even if a GOOD early manuscript were found which had the article, it must continue to be rejected as secondary on the basis of ardua lectio potior."

The reading could be a harmonization to context, verse 40: $0\tilde{b}$ τός $\tilde{\epsilon}$ στιν $\tilde{\alpha}\lambda\eta\theta\hat{\omega}$ ς \tilde{b} προφήτης and verse 41: $0\tilde{b}$ τός $\tilde{\epsilon}$ στιν \tilde{b} χριστός. B: umlaut! (1362 A 31 L) αὐτοῖς ὁ Ἰησοῦς· τὴν ἀρχὴν ὅ τι καὶ λαλῶ ὑμῖν;

An obscure, difficult to interpret sentence.

Also a question of punctuation, resulting in different meanings:

- 1. As a question, with $\delta \tau \iota$: "Why do I speak to you at all?"
- 2. As an exclamation, with $\rm \ddot{o}~\tau\iota\colon$ "That I speak to you at all!"
- 3. As an affirmation, with ${\rm \acute{o}}~\tau\iota\colon$ "[I am], what I told you from the beginning."

or: "Primarily I am what I am telling you."

Chrysostom:

τὴν ἀρχὴν ὅτι καὶ λαλῶ ὑμῖν; Ὁ δὲ λέγει τοιοῦτὸν ἐστι· τοῦ ὅλως ἀκούειν τῶν λόγων τῶν παρ' ἐμοῦ ἀνάξιοί ἐστε, μήτι γε καὶ μαθεῖν ὅστις ἐγώ εἰμι.

Chrysostom takes it as: "That I even speak to you at all!"

Cyril of Alexandria:

ότι καὶ λόγου παρ' ὑμῖν ἐποιησάμην ἀρχήν.

"That I even began to speak to you!"

A.T. Robertson in his Wordpictures:

"Even that which I have also spoken unto you from the beginning."

A difficult sentence. It is not clear whether it is an affirmation or a question. The Latin and Syriac versions treat it as affirmative. Westcott and Hort follow Meyer and take it as interrogative. The Greek fathers take it as an exclamation. It seems clear that the adverbial accusative $\tau\dot{\eta}\nu$ $\dot{\alpha}\rho\chi\dot{\eta}\nu$ cannot mean "from the beginning" like $\dot{\alpha}\pi'$ $\dot{\alpha}\rho\chi\dot{\eta}\varsigma$ (15:27) or $\dot{\epsilon}\xi$ $\dot{\alpha}\rho\chi\dot{\eta}\varsigma$ (16:4). The LXX has $\tau\dot{\eta}\nu$ $\dot{\alpha}\rho\chi\dot{\eta}\nu$ for "at the beginning" or "at the first" (Ge 43:20). There are examples in Greek, chiefly negative, where $\tau\dot{\eta}\nu$ $\dot{\alpha}\rho\chi\dot{\eta}\nu$ means "at all," "essentially," "primarily." Vincent and Bernard so take it here, "Primarily what I am telling you." Jesus avoids the term Messiah with its political connotations. He stands by his high claims already made.

BDAG 3rd ed.:

τὴν ἀ. ὅτι καὶ λαλῶ ὑμῖν (how is it) that I even speak to you at all? More prob. the meaning is somewhat as follows: What I said to you from the first (so NT in Basic English; sim. REB et al.; cp. τὴν ἀρχήν 'at the beginning' Thu, 74, 2; s. also RFunk, HTR 51, '58, 95-100; B-D-F §300, 2, but appeal to P66 is specious, s. EMiller, TZ 36, '80, 261).

R. Bultmann: "the text must me corrupt."

Funk: "It is improbable that John would have used this phrase $[\tau \dot{\eta} \nu \ \dot{\alpha} \rho \chi \dot{\eta} \nu]$ in a way foreign to his usual understanding of $\dot{\alpha} \rho \chi \dot{\eta}$. $\tau \dot{\eta} \nu \ \dot{\alpha} \rho \chi \dot{\eta} \nu = \delta \lambda \omega \zeta$ does not suit either the context or the grammatical structure ... It should, therefore, be assigned a temporal meaning."

Smothers: "The ancient versions are an important indication that to the earliest translators the original afforded no evident meaning."

"Every attempt to find a meaning for our text that will meet all requirements labors under the inexorable difficulty that, as it stands, it is an ellipse the resolution of which is not self-evident. Hence it is that the best of scholars fail of a definitive solution, and differ widely in their selection of a provisional one." "If this [the P66^C reading] were the common tradition of the text, it is safe to surmise that the main body of Johannine scholars would be content with it."

If the reading of P66^c is correct, the error must be an extremely early one. It is possible that the words fell out due to a scribal oversight of the two $\ominus i \bigcirc$:

eipenaut oisoiseiponumint hnarchn eipenaut oisoist hnarchn

Funk has an interesting observation:

He notes that the addition of $\epsilon \tilde{l}\pi o\nu$ $\dot{\nu}\mu \hat{\iota}\nu$ is made in the margin with a mark "./." in the text to show the place of insertion. In all other places where the scribe uses this symbol, "the correction has some support in the tradition. In the majority of examples, the reading supplied in the margin is universally attested, and in some places the text is meaningless without the addition. Only in 8:28 is there no trace in the tradition. The probability is strong, then, that these two words ($\epsilon \hat{l}\pi o\nu$ $\dot{\nu}\mu \hat{\iota}\nu$) stood in the text from which P66 was copied." This is not imperative though. I am not sure if this means anything.

A. Pallis (Notes, 1926) writes: "The meaning of $\tau \dot{\eta} \nu$ $\dot{\alpha} \rho \chi \dot{\eta} \nu$ is still a puzzle; the interpretations so far given are unconvincing. The next words $\ddot{\delta}$ $\tau \iota$ $\kappa \alpha \dot{\iota}$ $\lambda \alpha \lambda \dot{\omega}$ $\dot{\nu} \mu \dot{\iota} \nu$ are probably the prototype of the MGk current phrase $\alpha \dot{\upsilon} \tau \dot{\delta}$ $\tau \dot{\delta$

Zahn notes (Comm. Jo) that the early Greek commentators agreed on the meaning "that I read to you at all". There was no question about that and no indication of any difficulty in the understanding of the words. Zahn also thinks that we should take Oti as simple $\delta\tau\iota$ and not δ

After a detailed check of the thousands of occurrences in the Greek literature Chrys Caragounis (2007) comes to the conclusion that $\tau\dot{\eta}\nu~\dot{\alpha}\rho\chi\dot{\eta}\nu$ is used as an adverb without accusative force. The meaning as such is then "the beginning".

The preposition must be deduced from the context. The position of $\tau \dot{\eta} \nu \ \dot{\alpha} \rho \chi \dot{\eta} \nu$ at the beginning is for emphasis.

He further concludes that δ $\tau\iota$ should be taken as "that which/what" and the $\kappa\alpha\iota$ as "precisely" (Caragounis: "Needless to say $\kappa\alpha\iota$ does not mean 'precisely'. This is only the force it assumes in the present context"). His final translation of the sentence is:

"[I am] From the beginning! - precisely what I have been saying (speaking) to you."

with the comment: "The English may translate it with '[I am] what I have been saying to you from the beginning', but this is only a functional reading deprived of the literary effect of the original."

The $\delta \tau \iota$ is clearly secondary, because there is no reason for an omission. It has been inserted as a separator for the direct speech.

The omission of $\alpha \mathring{\upsilon} \tau \circ \widehat{\iota} \zeta$ is more difficult to account for. The phrase is typical for John and the other 5 instances are safe! It is the exception that John does not specify to whom Jesus is talking. In these instances (7:33 and 12:7) some witnesses added a pronoun! It is thus more probable that the addition is secondary here too.

It is very probable that $\dot{\epsilon}\omega\rho\dot{\alpha}\kappa\alpha\tau\epsilon$ is a secondary harmonization to the preceding $\dot{\epsilon}\dot{\omega}\rho\alpha\kappa\alpha$ (so also Weiss and Fee). If originally present there would have been no reason to change it to $\dot{\eta}\kappa\sigma\dot{\upsilon}\sigma\alpha\tau\epsilon$.

It is also possible that an original $\dot{\varepsilon}\omega\rho\acute{\alpha}\kappa\alpha\tau\varepsilon$ has been changed to improve style?

Note also that $\hat{\alpha}$ is substituted twice by \hat{o} .

Fee writes (P66, S&D, 1968, p. 55): "One must ultimately ask at a point like this, to whom is one to attribute the greater insight, to the author or to the subsequent scribe? Distinctions are probably to be made between the two verbs and such distinctions probably belong to the author, not to a second century reviser."

"You are from your father the devil, and you choose to do your father's desires."

The meaning of this saying at this position is not entirely clear. What father is meant here? We are told only in verse 44 that their father is meant to be the devil.

For this reason the insertion of $\mathring{b}\mu\mathring{\omega}\nu$ clearly contrasts the father of Jesus from the father of the Jews. See also verse 41. In the Byzantine text the emphasis lies on the $\mu\sigma$ 0 and the $\mathring{b}\mu\mathring{\omega}\nu$: "I say what I see from my father and you do what you see from your father."

On the other hand in the txt reading it is possible that both fathers are the same, namely God and that the saying is in the imperative mood: "What I see from the father that am I saying, and what you see from the father, please do it!"

There is no reason why the personal pronouns should have been omitted if originally present. The txt reading is much more difficult.

Robertson (Wordpictures) notes:

"Ye would do ($\epsilon \pi o \iota \epsilon \iota \tau \in \alpha \nu$). Read by C L N and a corrector of Aleph while W omits an. This makes a mixed condition (protasis of the first class, apodosis of the second. See Robertson, Grammar, p. 1022). But B reads $\pi o \iota \epsilon \iota \tau \in \text{like}$ the Sin-Syriac which has to be treated as imperative (so Westcott and Hort)."

From context it is only possible to take $\pi ole \hat{\iota} t \epsilon$ as an imperative.

 $\pi olelele$ is possible, but the support is just too slim. Probably $\pi olelele$ is a conformation to $\pi olelele$ of verse 38, where it is safe. An accidental error is also possible, it is only an omission of an Θ .

Another question is the omission/addition of $\ddot{\alpha}\nu$. John uses this construction several times. Compare:

(+ word order variation by other witnesses)

At some points several witnesses omit $\tilde{\alpha}\nu$. Note the characteristic variation at John 14:7 (see discussion of this variant in the main John commentary!).

Metzger explains: "It appears that the original text of this verse involved a mixed conditional sentence, with $\in \hat{\iota}$... $\hat{\epsilon}\sigma\tau\epsilon$ in the protasis, and $\hat{\epsilon}\pi\sigma\iota\epsilon\hat{\iota}\tau\epsilon$ in the apodosis ('If you are really Abraham's children, you would be doing the works of Abraham'). The variant readings arose in an effort to make a more grammatically 'correct' condition; thus, instead of $\hat{\epsilon}\sigma\tau\epsilon$, the later text reads

 $\mathring{\eta}\tau\varepsilon$, which, with $\mathring{\epsilon}\pi\sigma\iota\varepsilon\widehat{\iota}\tau\varepsilon$, makes a condition contrary to fact. Other witnesses add $\mathring{\alpha}\nu$, even though in Koine Greek 'the addition of $\mathring{\alpha}\nu$ to the apodosis is no longer obligatory (BDF §360,1)."

Compare also the addition/omission of $0 \hat{v} \nu$ at Jo 13:25-26 and 16:19 below.

 $0 \mathring{\upsilon} \nu$ is a typical John word. It appears more often in John than in the Synoptics together:

	normalized		
	total	(per 1000 words)	
Μt	56	3.1	
Mk	6	0.5	
Lk	33	1.7	
Jo	200	12.8 (= every 4 th verse!)	

The Byzantine text has 201 times $0\mathring{\vartheta}\nu$ (01: 188, B: 194)

Interestingly the Byzantine text adds $0\tilde{\vartheta}\nu$ 13 times in the Synoptics: Whereas there are 95 occurrences of $0\tilde{\vartheta}\nu$ in NA²⁷ (Mt-Lk), there are 108 in Robinson's Byzantine text.

The addition of $0\mathring{\vartheta}\nu$ is either a conformation to Johannine usage or it is an omission of an unnecessary word.

Overall it appears slightly more probable that $0 \mathring{\vartheta} \nu$ has been added.

It is possible that this reading is an assimilation to the previous verse 56 (so Weiss). The meaning is basically the same. Metzger thinks that there may be a subtle difference in whom the Jews consider superior (Abraham) and who is thus be seen.

The quality of the witnesses shows that the reading must be very early. If original it is possible that the txt reading is a conformation to the preceding verb $\xi \chi \in L\zeta$ which is also second person.

Usual idiom with prin in positive sentence with infinitive (second aorist middle of ginomai) and the accusative of general reference, "before coming as to Abraham," "before Abraham came into existence or was born." I am (egô eimi). Undoubtedly here Jesus claims eternal existence with the absolute phrase used of God. The words have probably been added from Lk 4:30 "to give the impression that Jesus escaped by miraculous power" (Metzger, so also Weiss).

There is no reason for an omission. In Lk the words are safe.

πέμψαντός με appears 7 times in John, but never πέμψαντός ἡμᾶς which is alien to John. The second $\eta \mu \hat{\alpha} \zeta$ is possibly a harmonization to the first. On the other hand it is also possible that it has been changed just for that reason, because it is unjohannine?

In this verse there is no need to use a plural. The preceding and the following verses would fit perfectly well with the singular. The Byzantine text is the most straightforward, normal and pro-johannine text. There would have been no need to change it. Thus only the second or the third reading would cause any trouble. In the third reading the second $\dot{\eta}\mu\hat{\alpha}\zeta$ is probably a conformation to the preceding $\eta \mu \hat{\alpha} \zeta$. It makes no sense.

According to Swanson and Tischendorf C^{*vid} reads $\tilde{\epsilon}\pi\tilde{\epsilon}\theta\eta\kappa\tilde{\epsilon}\nu$. This is not in NA and not in SQE. C^* also omits $\alpha\tilde{\upsilon}\tau\sigma\tilde{\upsilon}$. In Tischendorf's C-edition only C^{c2} is given with the txt reading in smaller letters indicating a correction. Tischendorf writes: "Crisen aut ou scripsit B. Videtur antea defuisse aut ou, idque rursus improbavit C, toutuf louetiam B intactum reliquit."

IGNTP (majuscule) notes: $C^* \in \pi \in \text{and } C1$: $(\in \pi \in) \chi \rho \iota \sigma \in \nu$ for $\alpha \dot{\upsilon} \tau \circ 0$: * om., $C1 \alpha \dot{\upsilon} \tau \circ 0$, C2 om.

Swanson also notes Ω for $\dot{\epsilon}\pi\dot{\epsilon}\theta\eta\kappa\epsilon\nu$, but in error. Lake in his Ω collation has: $\dot{\epsilon}\pi\dot{\epsilon}\chi\rho\eta\sigma\epsilon\nu$. So also IGNTP.

In context both words appear. In verse 11 and 15 the words are safe. $\tilde{\epsilon}\pi\iota\chi\rho\dot{\iota}\omega$ is a rare word. It appears only here in the Gospels.

Since the support is so weak, it is more probable that we have a change to the more common word here. Note that in verse 15 also $\epsilon \pi \epsilon \theta \eta \kappa \epsilon \nu$ is used.

Metzger: "Perhaps because the verb 'anoint' seemed inappropriate to describe the application of clay, a few copyists substituted a more general term."

A. Pallis (Notes, 1926) writes: "Respecting $\alpha \mathring{\upsilon} \tau o \widehat{\upsilon}$ Bloomfield remarks with reason that it is in opposition to usus linguae, since $\mathring{\epsilon}\pi\iota\chi\rho \iota\omega$ is never construed with the genitive. Nor can it be construed with $\mathring{o}\varphi\theta\alpha\lambda\muo\mathring{\upsilon}\varsigma$; where it stands it must be construed either with $\mathring{\epsilon}\pi\acute{\epsilon}\chi\rho\iota\sigma\epsilon\nu$ or with $\pi\eta\lambda\acute{o}\nu$. D gives $\alpha\mathring{\upsilon}\tau\mathring{\varphi}$, which makes the syntax unobjectionable. But in some old Latins we have superunxit eum luto, $\mathring{\epsilon}\pi\acute{\epsilon}\chi\rho\iota\sigma\epsilon\nu$ $\alpha\mathring{\upsilon}\tau\grave{o}\nu$ $\tau\mathring{\varphi}$ $\pi\eta\lambda\mathring{\omega}$, and this is probably the original reading."

Pallis seems to be unaware of the B reading.

Metzger, in his commentary (first edition only!), gives the following citiation from Ephrem's commentary on the Diatessaron: "he made eyes from the clay". McCarthy gives (p. 258): "When he said this, he spat on the ground, and made clay from his spittle, and <u>fashioned</u> the eyes with the clay." McCarthy has the following footnote on the word "fashioned": "The Syriac verb to make/to do, which is used here alludes to the idea of re-creation in Jesus' action."

That the person is a beggar has not been mentioned before. The term follows also later in the verse. Everything in the story concentrates on the blindness, this is the issue. That he was a beggar is only of marginal relevance. It is therefore more probable that the change went from beggar to blind.

One could of course also argue that beggar is a conformation to the same word later in the verse, but this is not very probable in so large a group of diverse witnesses.

Weiss (Jo Com.) notes that he was probably known to the others more as a beggar than as a blind.

It is clear that $\mathring{\upsilon}\pi\alpha\gamma\in\mathring{\epsilon \iota}\zeta$ $\tau\grave{o}\nu$ $\Sigma\iota\lambda\omega\grave{\alpha}\mu$ sounds awkward, especially in view of the preceding longer form. It is of course basically possible that $\kappao\lambda\upsilon\mu\beta\mathring{\eta}\theta\rho\alpha\nu$ $\tauo\mathring{\upsilon}$ fell out at a very early date, but this is not very probable, because there is no apparent reason for this.

The pool of Siloam has been uncovered in 2004:

Jun. 9, 2004 22:48 Jerusalem Post 2nd Temple pool found by ETGAR LEFKOVITS

"A pool that served as a main water reservoir for Jerusalem residents 2,000 years ago has been uncovered, the Antiquities Authority announced Wednesday. The Pool of Siloam was uncovered last week by chance at the southern end of the City of David - in what today is Silwan - while the city was carrying out infrastructure work for a new sewage pipe. Archeologist Eli Shukrun said that two millennia ago, Jewish residents would use the pool to gather water for their homes, as a meeting place, and also possibly as a mikve. After lying untouched for 2,000 years, archeologists first uncovered one step, and then several more leading down to the pool, whose water came from the nearby Gihon spring. "This find is of major importance to the archeological world," Antiquities Authority director Shuka Dorfman said Wednesday at a short ceremony at the site, where excavations are ongoing."

So, unfortunately one cannot read the last 2-3 letters on the right margin. Both the ed. pr and Comfort were able to read what was below this part and give the complete text without reservation. They note certain things that are only possible if they really were able to read this text. For the right margin we have to rely on their word therefore. The $0\mathring{\upsilon}\kappa$ is problematical here. The text is easier and more logical without it: "I told you already, and you've heard it! Why again do you wish to hear?". There is no reason for a secondary insertion of $0\mathring{\upsilon}\kappa$.

It is possible to take it as a question (e.g. Luther did so):

It is possible that the P75, B reading with $\xi \phi \eta$ is original, because it is awkward stylistically. In the previous verse Jesus is speaking. Then it follows without break $\kappa \alpha i \tau i \zeta \ \dot{\epsilon} \sigma \tau \iota \nu$. The short $\xi \phi \eta$ may easily be overlooked. The simplest correction would be the one by 070.

The txt reading is the much more normal form. There would have been no reason to change it. The correction in P66 shows how the change probably worked. First inserting something before $\kappa\alpha$ tis $\xi\sigma\iota\nu$, to separate the different speakers and then eliminating the $\xi\phi\eta$.

In a later step the style is further improved by omitting the $\kappa\alpha$ before τ iς $\dot{\epsilon}\sigma\tau\iota\nu$.

It is basically possible that the omission by P75, B, W, 070 is accidental, but the various other changes indicate that there apparently was some stumbling block here for the scribes, most probably a missing introductory formula.

Compare the discussion of the previous variant (verse 36) for the addition of $\xi \phi \eta$, which might very well be original. With $\xi \phi \eta$ we have a difficult, redundant style. Note Θ .

There is no convincing argument, why the words could have been omitted. It is basically possible that the words 38-39a have also been omitted as not really needed to combine the saying in verse 39 directly with Jesus' words in verse 37. So also B. Aland who suggests that the belief of the blind born is only natural after Jesus' disclosure.

But that is not really convincing.

It is possible that the words have been added to fulfill verse 36. The support for the omission is strong and diverse. If it has been added secondarily, $\xi \phi \eta$ might have been borrowed from verse 36.

The Tuscan Diatessaron (Vaccari) omits verses 38 and 39 entirely. It has been suggested that the verses fell out due to homoioarcton (37: et dixit ei Iesus ...; 39: dixit ei Iesus ...). But it is not clear how this would result in the complete omission of verse 39.

C.L. Porter suggests that the words have been added because the story was a baptismal lesson. One lectionary lesson runs from 9:1 to 9:38, the other from 9:39 to 10:9. It is thus possible that the words $K\alpha i \in i\pi \in \nu$ δ in incipit to verse 39. Also verse 38 has been added as a conclusion to the story.

R.E. Brown additionally comments (Com. Jo.) that it is possible that the words "were an addition stemming from the association of John 9 with the baptismal liturgy and catechesis. ... When the catechumens passed their examinations and were judged worthy of Baptism, lessons from the OT concerning cleansing water were read to them. Then came the solemn opening of the Gospel book and the reading of John 9, with the confession of the blind man, 'I do believe, God', serving as the climax."

Porter notes a similar addition, Acts 8, verse 37, also clearly a baptismal confession:

Acts 8:37 εἰπε δὲ ὁ Φίλιππος, Εἰ πιστεύεις ἐξ ὅλης τὴς καρδίας, ἔξεστιν. ἀποκριθεὶς δὲ εἶπε, Πιστεύω τὸν ὑιὸν τοῦ Θεοῦ ἐιναι τὸν Ἰησοῦν Χριστόν.

<u>add verse:</u> E, 1739, pc, Lat, Sy-H, arm, mae, Ir, Cyp All other witnesses omit this verse.

Brown further notes that $\varphi\eta\mu\acute\iota$ appears only two (or three? Verse 36?) more times in John and $\pi\rho\sigma\sigma\kappa\nu\nu\acute\epsilon\omega$ is not used in John concerning Jesus, therefore he concludes that 38-39a is a secondary addition.

The reading "I am the gate" is difficult. The change of P75 is only natural and derived from context. Perhaps a local Egyptian reading, known to the scribe of P75? Even though B. Aland thinks this argumentation is "compelling", she writes: "it should be noted though, that similar variants scarcely appear in P75."

On the other hand a change the other way round could be explained as a harmonization to verse 9.

P6:

The Codex named "ac" is also the NT papyrus P6 and is bilingual Greek - Achmimic. Unfortunately the Greek part for verse 7 is lost. About three lines are missing. The text extant is close to P75. So it is possible, though impossible to prove, that P6 also read δ $\pi \omega \mu \dot{\eta} \nu$.

Without the words the sentence is difficult to understand:

"All who came $\underline{\textit{before me}}$ are thieves and bandits; but the sheep did not listen to them."

If not originally present an addition would be natural. Different insertion points are often an indication of a secondary insertion.

It is difficult to account for an omission of the words. Metzger suggests: "... they omitted the words in order to lessen the possibility of taking the passage as a blanket condemnation of all OT worthies."

This explanation is also supported by the omission of $\pi \acute{\alpha} \nu \tau \epsilon \zeta$ by D, pc.

WH suggest: "The omission perhaps seemed to emphasize the sense of $\tilde{\eta}\lambda\theta\sigma\nu$; or to be a natural simplification on the assumption that $\pi\acute{\alpha}\nu\tau\epsilon\varsigma$ means 'they all' $(\tau\acute{\omega}\nu\ \acute{\alpha}\lambda\lambda\sigma\tau\rho\acute{\iota}\omega\nu$, verse 5; cf. verse 1), as $\acute{o}\sigma$ oι $\acute{\epsilon}\lambda\acute{\alpha}\lambda\eta\sigma\alpha\nu$ Act 3:24; or to obviate or lessen risk of reference to the prophets."

Zahn (Comm. Jo): "It remains probable that $\pi\rho\delta$ $\dot{\epsilon}\mu o\hat{\nu}$ facilitated the misinterpretation by Gnostics and Manichaeans and prompted its omission in many catholic manuscripts."

B. Aland notes that the text in P75, which reads δ $\pi o \iota \mu \dot{\eta} \nu$ in verse 7 and omits $\pi \rho \dot{\delta} \epsilon \mu o \hat{\upsilon}$ makes sense. She thinks that we have here an "extremely intelligent, vigorous" intervention, provoked by the offence of the original text, giving:

10:7 I am the shepherd of the sheep.

10:8 All that ever came are thieves and robbers: but the sheep did not hear them.

10:9 I am the door: ...

Aland thinks that the scribe wanted to restore the original sense of a corrupted transmission.

ψυχὴν αὐτοῦ τίθησιν is generally translated as "lay down his life", whereas δοῦναι τὴν ψυχὴν is translated as "give his life".

It seems that the form with $\tau i\theta \eta \mu \iota$ is the special Johannine form, compare: Jo 13:37-38; 15:13.

Probably the scribes where influenced by the Synoptic form (which was possibly the more standard formula?) and changed it therefore in John. In the last two instances of these verses (11, 15, 17+18) finally they "gave in" and took the Johannine form.

Nevertheless Zahn (Comm. Jo) thinks that because $\tau i\theta \eta \mu \iota$ in verses 17-18 is safe, it cannot be correct here.

It is an interesting and strong combination of "Western" (?) witnesses.

It is also possible that the words have been omitted accidentally: δ $\delta \hat{\epsilon}$ - $\delta \tau \iota$. The reading of 579 is due to h.t., skipping $\mu \iota \sigma \theta \omega \tau \delta \zeta$ $\phi \epsilon \dot{\nu} \gamma \epsilon \iota$, $\delta \tau \iota$.

"At that time came the feast of dedication in Jerusalem."

Έγένετο τότε appears only here in the Greek Bible. It is thus very unusual. Έγένετο δὲ appears 97 times (17 times in Lk, none in Mt/Mk).

Both forms are easily confused: egenet ot ot e

egenet ode

John only rarely begins a sentence with 'Eyé $\nu\epsilon\tau o$:

1:6 Ἐγένετο ἄνθρωπος,

3:25 Ἐγένετο οὖν ζήτησις

19:36 ἐγένετο γὰρ ταῦτα ἵνα ἡ γραφὴ πληρωθῆ·

Zahn (Comm. Jo) also correctly notes that John when using $\tau \acute{o} \tau \in$ (9 times), he always puts it at the beginning of the sentence or phrase, never after the verb. In this respect this verse would be unique.

Metzger writes: "the origin of either $[\tau \acute{o} \tau \in or \ \delta \grave{\epsilon}]$ is suspectible of explanation on transcriptional grounds (dittography or haplography), followed by confusion (not infrequent in some Greek manuscripts) of $\delta \epsilon$ and $\tau \epsilon$."

It is also possible that originally nothing was there and the words have been added to smooth the abrupt change. On the other hand it is also possible that the word has been deleted at the beginning of a lection.

Metzger writes: "After considerable debate a majority of the Committee preferred $\tau \acute{o} \tau \in$ as 'too appropriate not to have been included originally'. "

It is possible that the words have been deleted because there has been previously no saying reported explicitly stating that the Jews do not belong to his sheep.

Why should the words have been added? Possibly to point back to verses 3-4 (so Weiss).

It is also possible, and clearly suggested by the P66* reading, that the words are meant to go with what follows:

 $\stackrel{.}{0}$ accusative neuter singular $\mu \varepsilon \widehat{\iota} \zeta o \nu$ nominative neuter singular

Meaning:

Byz "My father, who has given to me, is greater than all ..."

01, L: "My father, in regard to what he has given to me, is greater than all ..."

txt "My father, what he has given me is greater than all ..."

The reading of A et al. is impossible Greek.

C. Conrad wrote on the bgreek list (30th July 2002):

a) regarding the 01 et al. reading:

I don't really think so [that it makes sense], UNLESS one understands hO DEDWKEN MOI as a (rather awkward) substantive clause in the adverbial accusative, adverbially qualifying MEIZWN: "My father is greater than all with respect to what he has given me." The only way it would make sense to me is if hO, which as spelled and accented in our critical text can only be the neuter accusative of the relative pronoun, is intended to be a nominative singular masculine relative pronoun, which is to say, that this is a solecism of the kind somewhat less uncommon in the text of Revelation.

b) regarding the A et al. reading:

This makes no sense at all--or hardly an acceptable sense: "My father, who gave it to me, is a bigger (thing) than all others (things/persons)." This appears to me a copyist's attempt to solve the problem of the neuter accusative relative pronoun where a masculine nominative relative pronoun should be expected--but if that's so, the copyist has formulated a still more intolerable construction wherein the masculine PATHR becomes a thing compared quantitatively with other things.

The Byzantine text is the most simple and straightforward and makes good sense. Everything else is either wrong Greek, or difficult to understand.

Robertson's "wordpictures":

"But the context calls for $\delta \zeta$... $\mu \in \hat{\iota} \zeta \omega \nu$ with δ $\pi \alpha \tau \eta \rho$ as the subject of $\dot{\epsilon} \sigma \tau \iota \nu$. The greatness of the Father, not of the flock, is the ground of the safety of the flock."

It is Johannine usage that the relative pronoun always refers to things given, never to the one who gives.

It is therefore possible that δ is a conformation to common Johannine usage. And following that, $\mu \in \hat{\iota} \zeta \omega \nu$ had to be changed then into $\mu \in \hat{\iota} \zeta \circ \nu$. $\omega \leftarrow 0$ confusion was also introduced.

On the other hand it is possible that the B* reading is original. Because it is difficult to understand and not really suiting the context, it has been changed into the Byzantine form with the same $\omega \leftarrow 0$ confusion.

B. Aland, too, thinks that the B* reading is original and that an early ancestor of P75 changed δ $\delta \epsilon \delta \omega \kappa \epsilon \nu$ into the smoother $\delta \zeta \epsilon \delta \omega \kappa \epsilon \nu$ "in an intelligent manner without changing the letter distance".

Birdsall thinks that the O1, L reading is original:

"if $\Im \zeta$ had stood originally we can conceive no reason for the alteration to \Im ." - "[the reading $\mu \in \widehat{\iota} \zeta \circ \nu$] exegetically is an impossibility; even if the thought of such inherent greatness in the church be conceivably Johannine, it has no place here. Parallelism, a well-known feature of Johannine style, suggests that the Father's power is the subject here as well as in the latter part of the verse. The combination of \Im and $\mu \in \widehat{\iota} \zeta \circ \nu$ fails on any exegesis to provide such parallelism of thought."

The problem with this reading is that it may be acceptable, but nevertheless awkward Greek. On the other hand just that might have been the reason for the changes.

This is one of the cases suggested by Metzger ("Lucianic recension", 1959) where one could have an old relict of the earliest Antiochian text. Not necessarily correct, but at least older than any possible recension.

A. Pallis (Notes, 1926) writes: "the [txt reading] is worthless. But how has so unsuitable a reading as \ddot{o} - $\mu \epsilon \hat{\iota} \zeta o \nu$ arisen? Perhaps we had originally $\breve{o} \tau \iota$ in the sense of $\ddot{o} \zeta$, and its sense being missed, it was disfigured to \ddot{o} , and then the predicate naturally followed in the neuter."

It is possible that some scribes omitted either $\xi \rho \gamma \alpha$ or $\kappa \alpha \lambda \dot{\alpha}$ due to h.t. and added it later at various positions.

It is also possible that either the P75 or the B reading was original and due to the unusual word order it has been changed. The txt reading and the Majority reading are rather straightforward.

"But if I do them, even though you do not believe me, believe the works, so that you may know and <u>understand</u> that the Father is in me and I am in the Father."

The problem here is the repetitive $\pi \iota \sigma \tau \in \acute{U}\omega$.

John sometimes uses $\pi \iota \sigma \tau \in \acute{\upsilon} \omega$ and $\gamma \iota \nu \acute{\omega} \sigma \kappa \omega$ together:

 NA^{27} John 2:24 αὐτὸς δὲ Ἰησοῦς οὐκ <u>ἐπίστευεν</u> αὐτὸν αὐτοῖς διὰ τὸ αὐτὸν <u>γινώσκειν</u> πάντας

It is probable that scribes considered $\gamma \iota \nu \omega \sigma \kappa \eta \tau \epsilon$ after $\gamma \nu \omega \tau \epsilon$ as redundant and therefore either changed it into $\pi \iota \sigma \tau \epsilon \upsilon \sigma \eta \tau \epsilon$ or omitted it entirely. The choice of $\pi \iota \sigma \tau \epsilon \upsilon \sigma \eta \tau \epsilon$ is not very creative, because it already appeared twice before.

That someone changed $\pi \iota \sigma \tau \in \dot{\upsilon} \sigma \eta \tau \in into \gamma \iota \nu \dot{\omega} \sigma \kappa \eta \tau \in is$ even more improbable.

There probably have been different Bethanies (compare Jo 1:28 in the main commentary). It is therefore possible that the article has been added (perhaps by John already) for emphasis: THIS Bethany is near Jerusalem ...

The usage in context is safe without the article.

ἀλλὰ καὶ νῦν ("but even now") is an unusual phrase and appears only here in the Gospels. It nevertheless fits perfectly and an omission is difficult to understand.

The omission is limited to the Alexandrian texttype.

There is no reason for an omission. B. Aland suggests "durch den Kontext bedingte Auslassung?" = "omission stimulated by context?".

It is possible that the word has been omitted, because in the previous verses the resurrection alone was discussed. And then, in this verse, the emphasis is on the I^* : "I am the resurrection!"

A strange diversity of witnesses (Metzger: "puzzling"). Possibly liturgical usage? Note Clement, who omits $\dot{\eta}$ $\dot{\alpha}\nu\dot{\alpha}\sigma\tau\alpha\sigma\iota\varsigma$.

 $\delta o\xi \acute{\alpha}\zeta \, o\nu \tau \epsilon \varsigma$ by P75, 33 is clearly a transcriptional error.

It is possible that $\delta \acute{o} \xi \alpha \nu \tau \epsilon \zeta$ has been changed to $\lambda \acute{\epsilon} \gamma o \nu \tau \epsilon \zeta$ because $\delta \acute{o} \xi \alpha \nu \tau \epsilon \zeta$ reminds one of $\delta o \xi \acute{\alpha} \zeta \omega$ which is clearly inappropriate. That this connection happened can be seen at P75 and that this problem has been felt can be seen as early as P66.

It is also possible, as Metzger suggests, that nobody can know what the Jews thought, only what they said. He notes a similar case where in Jo 11:13 X reads $\tilde{\epsilon}\lambda\epsilon\gamma\sigma\nu$ instead of $\tilde{\epsilon}\delta\sigma\xi\alpha\nu$.

A. Pallis (Notes, 1926) comments: "The variant $\lambda \acute{\epsilon} \gamma o \nu \tau \dot{\epsilon} \zeta$ is rather better attested and perfectly suitable. It means $\delta o \kappa o \hat{\upsilon} \nu \tau \dot{\epsilon} \zeta$, thinking, as it does also in MGk."

Again (as in 10:29) this is one of the cases suggested by Metzger ("Lucianic recension", 1959) where one could have an old relict of the earliest Antiochian text. Not necessarily correct, but at least older than any possible recension.

Carl Conrad wrote on the bgreek mailing list (04. Aug. 2002):

LSJ-Glare indicates a fundamental sense applicable to horses, "snort in" (the citation is from Aristophanes, hIPPOUS EN AMPUKTHRSIN EMBRIMWMENAS with an added rfc. to Lucian in that sense--so that its most common usage would be metaphorical for "express anger or disdain" as indicated by gesture or snorting. The article also cites LXX Lam. 2:6 in the sense "indignation," and EMBRIMHSIS in the same sense from several extra-biblical sources. In John 11:33 my sense of what the text is saying that Jesus saw the women weeping and immediately felt an inner indignation at this reaction to what was not a final death of Lazarus. It's as if, in English at least, we might say, "he saw the women weeping and said to himself (though nobody else heard him), 'Humph!'"

It appears therefore that $\dot{\epsilon}\mu\beta\rho\iota\mu\acute{\alpha}o\mu\alpha\iota$ has always a tone of anger in it and that "being deeply moved" is probably not an entirely correct rendering. Thus the $\dot{\epsilon}\mu\beta\rho\iota\mu\acute{\alpha}o\mu\alpha\iota$, indicating an angry Jesus, caused a problem and has been softened by inserting $\dot{\omega}\varsigma$. Interesting is the combination of witnesses.

Note the similar case at 2:15.

This is one of the cases where the original scribe of P66 changed deliberately one reading into another, very probably from a different manuscript. P75 has the normal reading.

A. Pallis (Notes, 1926) writes: "The words ἐτάραξεν ἑαυτὸν, i.e. ἐταράχθη ἐναὐτῷ, are probably a glossa, for they mean nothing different to ἐνεβριμήσατο τῷ πνεύματι, i.e. ἐνεβριμήσατο ἐν ἑαυτῷ (cf. v. 38), was agitated within himself."

The editors of the Ed. pr. reconstruct: 41 $\mathring{\eta}\rho\alpha\nu$ $o\mathring{b}\nu$ $t\dot{b}\nu$ $\lambda\acute{l}\theta\sigma\nu$. $\mathring{\underline{\eta}}\rho\epsilon\nu$ $\dot{\underline{\delta}}$ $'I\eta\sigmao\hat{b}\zeta$ $to\dot{b}\zeta$ $\dot{\underline{\delta}}\varphi\theta\alpha\lambda\muo\dot{b}\zeta$

This would fit the space. Whatever the exact wording in the lacuna was, it is clear that the words $o\tilde{b}$ $\tilde{\eta}\nu$ \tilde{o} $\tau \epsilon \theta \nu \eta \kappa \hat{\omega} \zeta$ $\kappa \epsilon \iota \mu \acute{\epsilon} \nu o \zeta$ were not included.

John uses $\ddot{\alpha}~$ with $\pi\sigma\iota\acute{\epsilon}\omega$ 6 times elsewhere safe, but only once \ddot{o} (13:27).

Both the singular and the plural refer to the raising of Lazarus. Probably the singular is a correction. Note that \mathcal{C}^{c2} additionally adds $\sigma\eta\mu\in\hat{\iota}o\nu$.

The support for the singular is curiously diverse.

Compare discussion at Jo 4:29 above and 15:14 below. Weiss (Com. John) thinks that $\hat{\alpha}$ is a conformation to verse 46.

Metzger: "the majority of the committee thought it more likely that copyists replaced $\tilde{\alpha}$ with the singular because the context speaks of Jesus' having performed one $\sigma\eta\mu\in \tilde{\iota}o\nu$."

"Caiaphas was the one who had advised the Jews that it was better to have one person die for the people."

The exchange of $\mathring{b}\mu \hat{\imath}\nu$ / $\mathring{\eta}\mu \hat{\imath}\nu$ is a typical and widespread error in Greek manuscripts. Both words make good sense here, although $\mathring{\eta}\mu \hat{\imath}\nu$ makes slightly better sense, because why should Kaiaphas exclude himself from the group? It is possible that $\mathring{b}\mu \hat{\imath}\nu$ is a conformation to the previous verse 49: $\mathring{\underline{b}}\mu \in \hat{\imath}\zeta$ oùk o $\mathring{\imath}\delta\alpha t \in o\mathring{\imath}\delta\acute{\epsilon}\nu$.

The omission is possibly inspired by 18:14, where also no pronoun appears.

Unknown name.

Sepphoris is excluded by its geographical position, but see below.

WH: "perhaps a local tradition".

JR Harris (Codex Bezae, 1891, p. 184) thinks it is possibly a corruption from the Syriac. That the words $\epsilon i \zeta$ ' $E \varphi \rho \alpha i \mu$ $\lambda \epsilon \gamma o \mu \epsilon \nu \eta \nu$ $\pi o \lambda i \nu$ in Syriac could be read as "the city of Samphurim". He notes a similar case where Ephrem in his Diatessaron commentary reads "whose name is Gerizim" as "Samgriazim".

Harris write: "In this last case Mar Ephraem is evidently perplexed about the name which, if his text had been quite clear, would have needed no comment; that is, he found it in the text upon which he had been working, and we have therefore to suggest that Tatian had inserted the name of the mountain in his text. Such a proceeding would be quite in harmony with many of his other expansions and elucidations of the Scripture. But this drives us back to the first case; for the two belong so suspiciously together that we are obliged to ask whether $\Sigma \alpha \mu \phi o \acute{\nu} \rho \in \iota \nu$ is not also a corruption of a Tatian text."

Zahn rejects those speculations and has a more simple explanation:

According to him Sepphoris is meant. This of course does not fit the Judean setting in John, but it is quite possible that a scribe confused the Judean Ephraim with the Galilean one, which is about 10 miles south of Sepphoris.

Is it possible that the scribe remembered "four" from 11:39 and accidentally wrote "five"?

Royse (Scribal Habits, 2008, p. 430) suggests that perhaps the scribe misread the ϵ of $\epsilon\xi$ as numeral ϵ = 5, and wrote $\pi\dot{\epsilon}\nu\tau\epsilon$. Sometimes there is a rough breathing above the ϵ (so. e.g. in P75, Jo 2:6, 20), which may be the cause for this confusion.

Scrivener notes two other cases of $\pi \in \nu \tau \in \{ \text{Heracleon at Jo 2:20 and A in Acts 27:37} \}$.

It is quite probable that the words have been deleted as inappropriate and superfluous. First, he is not dead anymore and second immediately following are the words "whom he had raised from the dead". This is typically repetitive Johannine style.

On the other hand it is possible that the words have been added for some lectionary purposes, although this must have been quite early (P66).

Ross notes a stylistic consideration, namely that John normally inserts the article before the noun, unless the name is followed by other words in apposition (e.g. $\dot{\eta} \ M \dot{\alpha} \rho \theta \alpha$, but $' I \dot{0} \dot{0} \dot{\delta} \alpha \zeta \ \dot{0} \ ' I \sigma \kappa \alpha \rho \iota \dot{\omega} \tau \eta \zeta$). The txt reading is rather difficult to understand. It is probably idiomatic with the meaning:

"Let her alone, it was that she might keep it for the day of my burial."

The Byzantine reading on the other hand is:

"Let her alone, she has kept it for the day of my burial."

The Byzantine reading is what one might have expected. The txt reading is paradoxical: On the one hand Mary has broken the bottle and the oil is gone, on the other hand she should keep it for his burial.

Is it possible that John intended the meaning of Byz, but wrote txt?

W. Kühne suggests the following conjecture: $\underbrace{\text{iva ti}}_{\text{ti}} \in \text{is the highestarm}_{\text{the highestarm}}$ to $\hat{\text{the highestarm}}_{\text{the highestarm}}$ and $\hat{\text{the highestarm}}_{\text{the highestarm}}$ and $\hat{\text{the highestarm}}_{\text{the highestarm}}$ and $\hat{\text{the highestarm}}_{\text{the highestarm}}$

Zahn (Comm. Jo) suggests that the txt reading is difficult, because a) the anointing at Jesus burial did not happen due to his resurrection and b) a Mary of Bethany is not mentioned with the women at the tomb.

Zahn explains the difficult text so that Mary did not use all of the oil but retained some of it.

ὁ ὅχλος πολὺς: This is the right reading with the article ὁ, literally, "the people much or in large numbers." One is reminded of the French idiom. Gildersleeve (Syntax, p. 284) gives a few rare examples of the idiom ὁ ἀνὴρ ἀγατός. Westcott suggests that ὅχλος πολὺς came to be regarded as a compound noun. This is the usual order in the N.T. rather than πολὺς ὅχλος (Robertson, Grammar, p. 774). Mark (Mr 12:37) has ho πολὺς ὅχλος. Moulton (Proleg., p. 84) terms ὁ ὅχλος πολὺς here and in verse 12 "a curious misplacement of the article." John's use of ὅχλος is usually the common crowd as "riff-raff."

The reading of P66 et al. clearly shows that the \dot{o} was originally present. What other reason could there be to explain this variety of readings?

A check of all occurrences of $\mathring{o}\chi\lambda\sigma\zeta$ in John shows that from time to time some manuscripts omit the article before $\mathring{o}\chi\lambda\sigma\zeta$, but never add it, if not originally present.

So, overall and especially in this case a secondary addition of the article is very unlikely.

Metzger argues that the txt reading is more difficult because it could be taken as referring to two crowds: one that had been with him and another that is following him in verse 18.

Weiss (Textkritik, p. 96) thinks that the $\delta \tau \epsilon$ has been changed into $\delta \tau \iota$ because an object was missing for the $\epsilon \mu \alpha \rho \tau \dot{\nu} \rho \epsilon \iota$.

καὶ πάλιν is probably a stylistic improvement to avoid the simple repetitive $\xi \rho \chi \epsilon \tau \alpha \iota$.

καὶ πάλιν ἔρχεται is clearly a conflation of both readings.

The reading with $\kappa\alpha$ ì $\pi\alpha\lambda\iota\nu$ does not need an additional $\kappa\alpha$ ì after Φ ίλι ϵ πος. Nevertheless a ϵ αὶ can be found in 33 and 1071. This indicates a correction in an ancestor of these manuscripts.

It is basically possible also that $\kappa\alpha i$ $\pi \acute{\alpha} \lambda \imath \nu$ has been changed to $\acute{\epsilon} \rho \chi \epsilon \tau \alpha \imath$ to indicate movement.

The readings by P66 are strange. It is a correction from one singular reading to another. Perhaps, as Royse notes (Scribal Habits, 2008, p. 531) "resulting from the scribe's having been confused by some indication of correction in his Vorlage(n)."

The Byzantine perfect reading is clearly an adaption to the preceding $\tau \in \tau \dot{\upsilon} \varphi \lambda \omega \kappa \in \nu$ in tense (so also Weiss).

πηρόω and πωρόω mean essentially the same here. πωρόω appears 5 times in the NT (Mk. 6:52; 8:17; Jn. 12:40; Rom. 11:7; 2 Co. 3:14) plus πώρωσις three times (Mk. 3:5; Rom. 11:25; Eph. 4:18), πηρόω appears not in the Greek Bible (except in 4 Maccabees 18:21).

The external evidence for both forms is very evenly divided.

πιστεύση has very probably been inserted as a conformation to the previous mentioning of $\dot{\delta}$ πιστεύων in verses 44 and 46 (so also Weiss).

With $\lambda \acute{o} \gamma o \varsigma$ John uses $\tau \eta \rho \acute{e} \omega$, which is not used here. $\acute{p} \acute{\eta} \mu \alpha$ and $\pi \iota \sigma \tau \acute{e} \dot{\nu} \omega$ are used twice together (5:47 and 17:8).

φυλάσσω is used with ψυχή once in the previous context (12:25). It also appears in the Lukan "parallel".

The essential meaning is basically the same.

The omission of $\mu \acute{\eta}$ originates probably in a misunderstanding of the words. It is assumed that Jesus does not judge him because he kept the words. This makes sense, but is un-johannine.

 $\kappa\alpha$ í can be translated as "even": "But EVEN if any one may hear my words and does NOT keep them, I do not judge him."

Fee (P66, S&D, 1968, p.74) notes: "the elimination of the negative probably is in the interest of a sharp contrast between verses 47 and 48."

NA^{27} John 13:4 ἐγείρεται ἐκ τοῦ δείπνου καὶ τίθησιν τὰ ἱμάτια καὶ λαβὼν λέντιον διέζωσεν ἑαυτόν:

NA²⁷ John 13:26 ἀποκρίνεται [\dot{o}] Ἰησοῦς· ἐκεῖνός ἐστιν ὧ ἐγὼ <u>βάψω τὸ</u> ψωμίον καὶ δώσω αὐτῷ.

The Byzantine reading is clearly the more difficult, because the following context shows that the supper was still in progress (see verse 26). In verse 13:1 a new story begins, it would be slightly awkward that the supper already ends in verse 2 when in the previous verse it has not yet begun.

On the other hand is the aorist by far the more frequent tense for $\gamma i \nu o \mu \alpha \iota$ (aorist/present = 174/27 in the Gospels). It is possible that scribes simply expected that the supper ended and used the more familiar aorist form.

It has also been suggested (Metzger) that the aorist might be an ingressive aorist (indicating the beginning of an action) with the meaning "supper having been served". Then both readings mean basically the same.

 $\lambda \in \lambda 00 \mu \acute{\epsilon} \nu 0 \zeta \ \lambda 0 \acute{\upsilon} \omega \ \text{"wash, bathe"}$ participle perfect middle/passive nominative masculine singular

νίψασθαι νίπτω midd. "wash oneself, wash for oneself" infinitive agrist middle

According to Robertson ("Wordpictures") $\nu i \pi \tau \omega$ means "to wash part of the body" and $\lambda o i \omega$ means "to bathe the whole body".

Compare previous verse 9:

 NA^{27} John 13:9 λέγει αὐτῷ Σίμων Πέτρος κύριε, μὴ τοὺς πόδας μου μόνον ἀλλὰ καὶ τὰς χεῖρας καὶ τὴν κεφαλήν.

Compare also:

 NA^{27} John 13:29 ἀγόρασον ὧν χρείαν ἔχομεν εἰς τὴν ἑορτήν, ἢ τοῖς πτωχοῖς ἵνα τι δῷ.

The addition of $\mu\acute{o}\nu o\nu$ and the reading of D are clearly conformations to the previous verse.

```
\in \mathring{l} \mu \mathring{\eta} "except, unless" \mathring{\eta} "than"
```

It is possible that $\mathring{\eta}$ is idiomatic and means the same here as $\in \mathring{\iota} \ \mu \mathring{\eta}$, but normally $\mathring{\eta}$ requires something to compare with. Metzger suggests that for $\mathring{\eta}$ John should have written something like:

οὐκ ἄλλου τινὸς χρείαν ἔχει ἢ ... "Of nothing else he has need than ..."

On the other hand the variation at this phrase might be an indication that it was not present at all originally. This is supported by 01 et al. and several church fathers. Against this Robertson argues in his Wordpictures that $\nu i\pi t\omega$ is used normally as "to wash something", often body parts. This is correct except for the Siloam pericope (Joh 9:7, 11, 15), where it is simply used as "to wash".

The guest was supposed to bathe $(\lambda o \acute{\upsilon} \omega)$ before coming to a feast and so only the feet had to be washed $(\nu \acute{\iota} \pi \tau \omega)$ on removing the sandals.

It is possible that $\epsilon i \mu \dot{\eta} \tau o \dot{\upsilon} \zeta \pi \acute{o} \delta \alpha \zeta$ has been omitted because of the difficulty of reconciling it with the following $\dot{\alpha} \lambda \lambda$ ' $\xi \sigma \tau \iota \nu \kappa \alpha \theta \alpha \rho \dot{\upsilon} \zeta \delta \lambda \sigma \zeta$:

"One who has bathed <u>does not need to wash</u>, except for the feet, <u>but is entirely clean.</u>

But then the question arises why does one need the footwashing? The whole construction is awkward and invites variation. Probably the intended meaning was: "The one who has bathed (to be prepared for the feast), has only to have his feet washed again to be completely clean."

Another possible meaning would be:

"The one who has bathed (to be prepared for the feast), is completely clean. He has to wash his feet again, but this has no bearing on being clean (in terms of purity)."

P. F. Beatrice argued for the shortest, the 579 reading. This reading makes good sense, if understood the way Beatrice has it: "The person who is purified by footwashing, does not need it (washing hands and head), but is totally clean." The problem with this is that it does not explain the raise of the other variants.

This is the only instance of the optative in John. $\tilde{\epsilon l} \eta$ is a typical Lukan word and appears there 7 times (Lk. 1:29; 3:15; 8:9; 9:46; 15:26; 18:36; 22:23). In two cases the word $\tilde{\epsilon l} \eta$ comes together with $\pi \upsilon \upsilon \theta \acute{\alpha} \upsilon \upsilon \mu \alpha \iota$!

Note also the Lukan parallel Lk 22:23 with τ i ζ $\alpha \rho \alpha \in 1$.

It thus appears that the phrase is unjohannine and could be a harmonization to Lk. The support for the txt reading is better and quite early though. The reading of P66* is not clear and cannot be taken as evidence for the B et al. reading.

Note also the clear conflation in 01!

Weiss (Jo Com.) thinks that the txt reading is an explanatory gloss conformed to the next verse 25. He further notes that the $\lambda \acute{\epsilon} \gamma \epsilon \iota$ has been felt to be in contradiction with the $\nu \epsilon \acute{\nu} \epsilon \iota$.

B: no umlaut

Compare discussion at Jo 8:41/52. $0\mathring{\upsilon}\nu$ is a typical John word.

This is four or five times $0\mathring{\upsilon}\nu$ in four verses, which points to the estimation that scribes omitted $0\mathring{\upsilon}\nu$ for stylistic reasons. Interestingly in 13:25 B, C omit $0\mathring{\upsilon}\nu$, whereas in 13:26 they add it.

This nest of readings is very difficult to evaluate.

In 13:24 $0\mathring{\upsilon}\nu$ is basically safe. Coming to the second $0\mathring{\upsilon}\nu$, it is possible that scribes tried to avoid it, either by simply omitting it (B, C), or by replacing it with $\delta\grave{\varepsilon}$ which is rather unsuitable (A, Θ , Maj). The addition of $\delta\grave{\varepsilon}$ is typical for the Byzantine text (B: 196, NA: 212, Byz: 231 times $\delta\grave{\varepsilon}$). At 13:26 even more scribes omitted $0\mathring{\upsilon}\nu$, but B, C found it not objectionable anymore, because they already omitted it at 13:25, so they left it.

This explanation is uncertain. It is also possible that there was originally no $0\mathring{\upsilon}\nu$ in verse 25 and that some added $0\mathring{\upsilon}\nu$ from verse 24 and others inserted $\delta\grave{\epsilon}$. The support for $0\mathring{\upsilon}\nu$ is very strong, though.

Metzger suggests that the words have been added "to recall Jesus' deliberate action at the Last Supper in *taking* bread." But this is not very convincing.

The support for the omission is very strong and without 01/B this would certainly be considered a secondary reading, but since it is supported by 01/B AND there is no convincing reason for the secondary addition of the words, brackets are ok.

Hoskier suggests that it may come from the synoptic $\lambda\alpha\beta\dot{\omega}\nu$ (see above).

Western non-interpolation?

On the one hand the words could have been added to make the saying more complete, more symmetrical.

On the other hand it is possible that the words have been omitted due to parablepsis. This is probably correct at least in part, though the diversity of witnesses makes it improbable, that this is the only reason. Also, the following phrase $\kappa\alpha i \ldots \alpha \dot{\upsilon} \tau \dot{\upsilon} \nu \ \dot{\epsilon} \nu \ \alpha \dot{\upsilon} \tau \dot{\bar{\omega}}$ is not omitted by any witness, even though a similar probability for h.t. exists.

It is also possible that the words have been omitted as redundant.

Even if the words are secondary it is possible that they have later been omitted due to h.t. by some witnesses, e.g. Byzantine witnesses Π , 2*.

Metzger calls all this a "dilemma".

The meaning is difficult to get:

When he had gone out, Jesus said,
"Now the Son of Man is glorified,
and God is glorified in him.

If God is glorified in him,
God will also glorify him in himself
and will glorify him at once."

It makes no real difference if the phrase in question is present or not.

Zahn wrote (Comm. Jo): "scarcely determinable but unimportant". He thinks that $\dot{\epsilon}\nu$ $\dot{\epsilon}\alpha\nu\tau\hat{\omega}$ does not refer back to $\dot{\delta}$ $\theta\dot{\epsilon}\dot{\delta}\zeta$ but to $\alpha\dot{\upsilon}\tau\dot{\delta}\nu$ and in that case there is, then, no difference in meaning.

πλην appears nowhere else in John (except in a variant of the PA). πλην and ἄρτι appear elsewhere only once together (Mt 26:64). πλην is a typical Luke word (19 times in Lk-Acts).

The reading is clearly meant as a clarification of the unconnected $\kappa\alpha$ $\hat{\nu}\mu\hat{\nu}\nu$ $\lambda\acute{\epsilon}\gamma\omega$ $\mathring{\alpha}\rho\tau\iota$. The meaning is different depending on the punctuation.

Royse (Scribal Habits, 2008, p. 520) thinks that it "would seem to be an extraordinary coincidence that more than one scribe would independently choose this word as a means of clarifying Jo 13:33-34. Rather, it seems much easier to suppose that the scribe of P66 transposed the reading of 1, 565, pc, perhaps by misunderstanding a marginal notation of $\pi\lambda\dot{\eta}\nu$ in his Vorlage. If I am correct here, then P66 is actually a witness to the existence of the reading of 1, 565, pc

in about the year 200." Footnote: "That there is Sahidic support ... gives further reason to think that the scribe of P66 has not simply added $\pi\lambda\dot{\eta}\nu$ to the majority text."

I don't think that this argumentation is justified. I see the addition of $\pi\lambda\dot{\eta}\nu$ as conformation to standard idiom. The different word-order supports this.

It is possible that $\mathring{\alpha} \kappa o \lambda o \upsilon \theta \mathring{\eta} \sigma \alpha \iota$ is a conformation to immediate context, verse 36. C has $\mathring{\alpha} \kappa o \lambda o \upsilon \theta \in \mathring{\iota} \nu$ also in verse 36. Perhaps it is a conformation to common usage. John uses $\mathring{\alpha} \rho \tau \iota$ only with the present or perfect. The support is very slim.

Rating: - (indecisive)

The phrase $\mathring{\alpha}\pi \in \kappa \rho \acute{\iota}\theta \eta$ 'Insoûs appears 23 times in John and only in one case (18:8) some scribes added a pronoun. This suggests that also here no addition took place but that B, C, L omitted the pronoun. Perhaps this was for stylistic reasons, because $\mathring{\lambda} \acute{\epsilon} \gamma \in \iota \ \alpha \mathring{\upsilon} \tau \hat{\omega}$ appeared earlier in the verse already.

Ellipsis (from $\dot{\epsilon}\lambda\lambda\dot{\epsilon}\dot{\iota}\pi\omega$ = "leave out"): Typical in Greek, the pronoun is omitted where it can be supplied easily from context.

The support is very slim.

Note another B, C^* agreement in 14:5, see above.

Weiss (Textkritik, p. 146) thinks that the $\dot{\epsilon}\omega\rho\dot{\alpha}\kappa\alpha\tau\epsilon$ without the $\alpha\dot{\upsilon}\tau\dot{\delta}\nu$ would have been much too striking to be secondary.

add χρόνον: 01, L, Θ, Ψ, f13, 28, 157, 1071, pc

The phrase appears only two more times in the Greek Bible, both in the accusative.

John uses $\chi\rho\acute{o}\nu o\zeta$ three more times, also always in the accusative (5:6, 7:33, 12:35). Weiss (Com. John) says the accusative was generally the more common. The question therefore is why someone should change the accusative into the dative?

The evidence for the dative is curiously divided. The text of 01 is not Western anymore in this part of the Gospel and comparatively close to W. Q appears to be a mixed text.

Perhaps idiomatic usage.

"If <u>in my name you ask me</u> for anything, I will do it" sounds awkward. Either you "ask me" or you "ask in my name", but both? How could one "ask me in my name"? So $\mu\epsilon$ is certainly the harder reading. The Byzantine omission is either intended to remove this problem or it is a harmonization to the previous verse (so Weiss). As for the complete omission of the verse one could also argue that it has been omitted deliberately to avoid contradiction with 15:16 or 16:23.

On the other hand it is possible that the txt reading is a harmonization to the following verse, but this is not very likely.

It is pretty clear that this is simply the txt reading! This can be tentatively confirmed from the plate in the IGNTP volume, because $\mu \in \nu \eta$ does not fit the space. The parchment suffers from strong bleed- and shine-through. Subtracting everything that comes from the verso, there is nothing before the t O (from verse 17) except for a highpoint, which is closing verse 16. $\alpha \hat{\iota} \hat{\omega} \nu \alpha \hat{\eta}$ is also the text given in the ed. pr. by A.H. The Spirit is not yet there. The future tense is more appropriate therefore. With $\dot{\epsilon}\sigma\tau\dot{\iota}\nu$ being original, $\ddot{\epsilon}\sigma\tau\alpha\iota$ would be a natural conformation to context. On the other hand is possible that the present tense is a conformation to the tense of the previous verbs, especially $\gamma\iota\nu\dot{\omega}\sigma\kappa\epsilon\tau\epsilon$ (so Weiss).

Metzger writes: "A majority of the Committee interpreted the sense of the passage as requiring the future $\xi \sigma \tau \alpha \iota$, which is adequately supported."

 $M \in \nu \in \iota$ can be present $\mu \notin \nu \in \iota$ or future $\mu \in \nu \in \iota$. If scribes interpreted it as future, $\ell \circ \tau \alpha \iota$ would have been a conformation to that tense.

Jo uses three times elsewhere $\dot{\epsilon}\nu$ + dative of a person + $\dot{\epsilon}\sigma\tau$ ίν, but never $\ddot{\epsilon}\sigma\tau$ αι (7:18, 12:35, 14:10).

 NA^{27} John 18:21 τί με ἐρωτᾶς; ἐρώτησον τοὺς ἀκηκοότας τί ἐλάλησα αὐτοῖς ἴδε οὖτοι οἴδασιν ἃ εἶπον ἐγώ.

It is possible that $\dot{\epsilon}\gamma\dot{\omega}$ has been added to make clear that $\dot{\epsilon}\tilde{l}\pi 0\nu$ is 1st person singular and not 3rd person plural. This is supported by the rather unusual support (two Byzantine minuscules) and the differing word order.

This construction with $\dot{\epsilon}\gamma\dot{\omega}$ is not unusual in John.

On the other hand it is possible that $\dot{\epsilon}\gamma\omega$ has been omitted as unnecessary.

It is also possible to take $\dot{\epsilon}\gamma\dot{\omega}$ with the next verse: $\dot{\epsilon}\gamma\dot{\omega}$ 27 $\dot{\epsilon}$ ίρήνην ἀφίημι ὑμῖν, $\dot{\epsilon}$ ἰρήνην τὴν $\dot{\epsilon}$ μὴν δίδωμι ὑμῖν·

Weiss (Textkritik, p. 138) notes that a secondary $\dot{\epsilon}\gamma\omega$ would have been added at the beginning for emphasis (as 33 did) and not at the end where it could have been easily overlooked.

Interesting conjecture. Makes good sense. But the omission is difficult to explain. There is the possibility that the double OU caused confusion in the first place: MOUOUK.

On the other hand the txt reading makes good sense, too: It contrasts those who persecute, with those who keep the word.

A. Pallis writes (Notes, 1926): "for ταῦτα πάντα ποιήσουσιν εἰς ὑμᾶς διὰ τὸ ὄνομά μου, ὅτι οὐκ οἴδασιν τὸν πέμψαντά με [they will do all these things to you on account of my name, because they do not know him who sent me] of the following verse, as well as μ ισεῖ ὑμᾶς ὁ κόσμος of v. 19, assert that this blind and malignant world has ever hated the apostles, and therefore nothing but violence, and not conformity with their teaching, was to be expected therefrom."

It appears that the double $\alpha \mathring{\upsilon} \tau \widehat{\omega} \nu$ was a problem for the scribes. They omitted one or the other or both. Weiss (Jo Com.): "much too difficult to be secondary".

It is not clear what $\mathring{\eta}\ \mathring{\omega}\rho\alpha$ means without $\alpha\mathring{\upsilon}\tau \hat{\omega}\nu.$ Elsewhere in John Jesus' hour is meant. So, it is possible that $\alpha\mathring{\upsilon}\tau \hat{\omega}\nu$ has been added or moved from the later to the earlier position (as in O1!).

The form $\dot{\epsilon}\lambda\dot{\epsilon}\dot{\upsilon}\sigma\dot{\epsilon}\tau\alpha\iota$ appears only here in John (additionally only once in Mk and Lk par.).

It is possible that the rare $\dot{\epsilon}\lambda\dot{\epsilon}\dot{\upsilon}\sigma\dot{\epsilon}\tau\alpha\iota$ has been changed to $\ddot{\epsilon}\lambda\theta\eta$ from context. Weiss (Textkritik, p. 91) thinks that the $0\dot{\upsilon}\kappa$ $\dot{\epsilon}\lambda\dot{\epsilon}\dot{\upsilon}\sigma\dot{\epsilon}\tau\alpha\iota$ fits better to the preceding $\mu\dot{\eta}$ $\dot{\alpha}\pi\dot{\epsilon}\lambda\theta\omega$ and the following $\pi\dot{\epsilon}\mu\psi\omega$.

Probably the two $\in i\zeta$ readings arose independently.

If there is difference in meaning for $\delta\delta\eta\gamma\eta\sigma\epsilon\iota$ $\epsilon\iota\zeta$ ("lead into") and $\delta\delta\eta\gamma\eta\sigma\epsilon\iota$ $\epsilon\nu$ ("lead within") is difficult to say. Probably idiomatic usage (so also Metzger: $\delta\delta\eta\gamma\eta\sigma\epsilon\iota$ $\epsilon\iota\zeta$ = more idiomatic).

Weiss (Com. John) thinks that the $\dot{\epsilon}\nu$ reading has probably been influenced by the LXX, where $\dot{\delta}\delta\eta\gamma\dot{\epsilon}\omega$ often comes with $\dot{\epsilon}\nu$ (esp. in the Psalms).

The words are required to explain the second part of the disciples question in verse 17. But the words already appeared in verse 10! So it is probable that the question in verse 17 refers back to verse 10. Thus, according to Weiss the words have been added (from verse 17) as being indispensable here. Note that possibly also the 00 is a conformation to verse 17.

In the Synaxarion one lection ends with verse 13 and the next goes from verse 14 to 30. So it is possible that the words have been added again in verse 16 due to some such lectionary separation.

In the previous verse 17 the disciples are already talking. Therefore the $\tilde{\epsilon}\lambda\epsilon\gamma\sigma\nu$ $\sigma\tilde{\upsilon}\nu$ at the beginning of verse 18 is not needed and has probably been omitted as redundant.

The same is true for the omission of $\tau i \lambda \alpha \lambda \in \hat{\imath}$ at the end: It has been omitted as redundant.

The omission of δ $\lambda \acute{\epsilon} \gamma \epsilon \iota$ is more difficult to explain. Metzger: "the phrase was deleted either as not absolutely necessary for the sense or was added in order to clarify the sense."

In the case of P66 it is possible that the scribe simply omitted the phrase due to h.t. ($\tau o \hat{\upsilon} \tau o - \tau \hat{o}$). This seems to have happened independently in 124.

NA conflates the two readings.

Regarding $[\grave{o} \ \lambda \acute{\epsilon} \gamma \in \iota]$ and $[\tau \acute{\iota} \ \lambda \alpha \lambda \in \grave{\iota}]$ compare the main commentary. It is possible that the omission of $\tau \grave{o}$ is at least in part accidental. It could be due to h.t. for those MSS (P66, 124) which omit $\grave{o} \ \lambda \acute{\epsilon} \gamma \in \iota$:

t out ot omikron

This means P66 should be counted to the 01* reading.

It is possible that the omission of $\tau\grave{o}$ is a conformation to the immediately preceding context, where no $\tau\grave{o}$ appears. On the other hand the addition of $\tau\grave{o}$ would be only natural. BDF §267-2a note that $\tau\grave{o}$ is set before a cited word.

It is rather improbable that δ $\lambda \acute{\epsilon} \gamma \epsilon \iota$ has been added secondarily. It is stylistically awkward. But it cannot be ruled out that it has been added for clarification.

τί ἐστιν τοῦτο τὸ μικρόν sounds normal and straightforward.

In 10:18; 15:15; 15:26 $\pi\alpha\rho\grave{\alpha}$ $\tauo\^{\upsilon}$ $\pi\alpha\tau\rho\grave{\delta}\varsigma$ appears. It is possible that scribes harmonized here to context.

It is possible that $\pi\alpha\tau\rho\delta\zeta$ is a harmonization to δ $\pi\alpha\tau\eta\rho$ earlier in the verse and to the next verse 28.

There would be no reason to change $\pi\alpha\tau\rho\delta\varsigma$ to $\theta\epsilon\sigma\hat{\upsilon}$ here.

I have checked this at the (online) photo and it is certain. There is no space for a $\sigma\sigma\upsilon$. The only possibility would be that it was added above the line, as a correction. In verse 2 P107 reads $\delta\hat{\omega}\varsigma$ $\alpha\mathring{\upsilon}\tau\hat{\omega}$, with W. P107 is not noted in NA. There is an extra file with images on this paleographic problem, click here.

The addition of $\sigma o \upsilon$ is possibly a conformation to the previous $\sigma o \upsilon$. It makes the saying more symmetrical:

σου τὸν υἱόν - ὁ υἱός σου

Interestingly $\upsilon \dot{\iota} \acute{o} \zeta \ \sigma o \upsilon$ appears nowhere else in John applied to Jesus. There is no reason for an omission if originally present, except for Ellipsis. There is also no reason for an omission of $\kappa \alpha \dot{\iota}$. It has probably been added for stylistic reasons.

And next verse 8:

NA²⁷ John 17:8 ὅτι τὰ ῥήματα ὰ <u>ἔδωκάς</u> μοι δέδωκα αὐτοῖς, καὶ αὐτοὶ ἔλαβον καὶ <u>ἔγνωσαν</u> ἀληθῶς ὅτι παρὰ σοῦ ἐξῆλθον, καὶ ἐπίστευσαν ὅτι σύ με ἀπέστειλας.

6 "I have made your name known <u>to those</u> whom you gave me from the world. <u>They</u> were yours, and you gave <u>them</u> to me, and <u>they</u> have kept your word. 7 Now <u>they know</u> that everything you have given me is from you; 8 for the words that you gave to me I have given to <u>them</u>, and <u>they</u> have received <u>them</u> and know in truth that I came from you; and <u>they</u> have believed that you sent me."

Compare also:

 NA^{27} John 17:25 πάτερ δίκαιε, καὶ ὁ κόσμος σε οὐκ ἔγνω, ἐγὼ δέ σε ἔγνων, καὶ οὖτοι ἔγνωσαν ὅτι σύ με ἀπέστειλας·

The context requires the 3rd person plural.

It is possible that the singular has been inspired from $E\phi\alpha\nu\epsilon\rho\omega\sigma\alpha$ in verse 6. The aorist $\epsilon\gamma\nu\omega\sigma\alpha\nu$ could be a conformation to verses 6 and 8 (so Weiss).

Compare discussion at Jo 6:32 above: $\delta \in \delta \omega \kappa \in V / \delta \omega \kappa \in V$.

The perfective usage of $\delta i\delta \omega \mu \iota$ is typically Johannine. He uses it 23 times. Overall the variation normally goes from the original perfect to a secondary aorist.

There is a complex variation of the 4 times $\delta \acute{\epsilon} \delta \omega \kappa \acute{\alpha} \zeta$ / $\acute{\epsilon} \delta \omega \kappa \alpha \zeta$ in verses 6-8. Interestingly the first occurrence in 17:2 of $\acute{\epsilon} \delta \omega \kappa \alpha \zeta$ is safe! Only A and B have $\acute{\epsilon} \delta \omega \kappa \alpha \zeta$ always, 33 has $\delta \acute{\epsilon} \delta \omega \kappa \acute{\alpha} \zeta$ always.

The support for $\xi\delta\omega\kappa\alpha\zeta$ is very strong in verse 6 (note the decline in the 2nd instance), so possibly correct.

Perhaps there is a slight difference in meaning also, with the perfect having a more permanent notion.

Discussion on B-Greek 28th Nov. 2004:

Carl W. Conrad wrote:

"Well, for what it's worth, my own judgment is that the author of GJn appears sometimes to use the perfect tense deliberately with emphasis upon the stative present, but that on the other hand he perhaps provides more evidence than most GNT authors of the tendency of the aorist to supplant

the perfect in the indicative so that any real distinction between the perfect as stative and the aorist as perfective has become moot. I really don't believe that there's any aspectual difference between EDWKAS and DEDWKAS in 17:2 or in the other aorists and perfects in these verses. I'd convey them all in English with the auxiliary "have" and the participle."

A. Dirkzwager wrote:

"Is it possible that we have to look for a Hebrew/Aramaic background for these changes? There we have an alternation between perfect and imperfect in sentences in parataxis in order to express what we would like to say in hypotaxis. I think it is possible that a Semite continues to use the alternation where he is writing in hypotaxis."

Alexander Loney wrote:

"Some of these examples are more explainable than others in my estimation. The final one, 17:8, seems to use the perfect as a distinctly more marked stative (emphasizing the present and enduring circumstance of J.'s passing to the disciples the earthly ministry while he, who had been given that ministry, will be leaving). That stands in contrast to the less marked aorist EDWKAS that characterizes the "completeness" (not in a theological way... in a grammatical, perspectival way) of J.'s part.

And, I think, Carl, even if it is not clear to us how to distinguish between perfective agrists and seemingly perfective perfects, there must be *some* distinction, else John would have used only one or the other. Perhaps we are seeing a language in transition (aren't we always?), but I see no way to explain the presence of both aspects throughout the passage so easily."

Note that P66 also omitted something here, but it is unclear what exactly it was. Royse (Scribal Habits, 2008, p. 450) suggests that the scribe omitted $\tilde{\epsilon}\delta\omega\kappa\dot{\alpha}\zeta$ $\mu\omega$ $\delta\dot{\epsilon}\delta\omega\kappa\alpha$ $\alpha\dot{\upsilon}\tau\sigma\hat{\iota}\zeta$, $\kappa\alpha\hat{\iota}$ $\alpha\dot{\upsilon}\tau\sigma\hat{\iota}$ $\tilde{\epsilon}\lambda\alpha\beta\sigma\nu$ $\kappa\alpha\hat{\iota}$, due to parablepsis from $\tilde{\epsilon}\delta\omega\kappa\dot{\alpha}\zeta$ to $\tilde{\epsilon}\gamma\nu\omega\sigma\alpha\nu$. Still visible in the upper margin is the correction $\delta\epsilon\delta\omega]\kappa\alpha$ $\alpha\upsilon\tau\sigma\iota\zeta$ $\kappa[\alpha\iota$... (compare also Royse, Scribal Habits, 2008, p. 450).

In the verses 11 and 12 the dative (attracted to the case of the antecedent) is a difficulty. In the previous verses) never Jesus name is meant, but his followers. Thus it is quite probable that scribes stumbled at verses 11 and 12. There is no reason why someone should change the plural $0 \mathring{0} \zeta$ to the dative singular.

Note that the support for $0 \mathring{\upsilon} \zeta$ in verse 12 is much stronger than in verse 11. This is unusual. It is possible that in verse 12 the txt reading $\mathring{\psi}$ is a conformation to the preceding verse.

If one changes to $0 \tilde{\nu} \zeta$ in verse 12 though, the $\tilde{\omega}$ in verse 11 would be even more unusual. Both verses have a very similar wording and it would be only natural if in both verses the same meaning is intended.

In verse 24 the intended meaning is probably the same, but the singular δ is certainly more difficult. There is no reason for a secondary origin of δ .

A. Pallis (Notes, 1926) writes on verse 12: "The sentence $\mathring{\psi}$ $\delta \acute{\epsilon} \delta \omega \kappa \acute{\alpha} \zeta$ $\mu o \iota$ evidently refers to the Apostles. Jesus pleaded for his disciples in v. $9 \, \acute{\epsilon} \rho \omega \tau \mathring{\omega}$ $\pi \epsilon \rho \grave{\iota}$ $\mathring{\omega} \nu$ $\delta \acute{\epsilon} \delta \omega \kappa \acute{\alpha} \zeta$ $\mu o \iota$, and the fact that he did so a second time in this passagewas perceived by that student who substituted the variant $0 \, \mathring{\upsilon} \zeta$ for $\mathring{\psi}$. But a second variant \mathring{o} in the form $\mathring{o} \tau \iota$ is the one probably which represents the true reading; it being the undeclinable relative particle. This remark applies equally to v. 11, where we find the same variations, and to v. 24, where the reading varies between \mathring{o} and $0 \, \mathring{\upsilon} \zeta$."

 $K\epsilon\delta\rho\omega\nu$ is an indeclinable noun, a place name, "Kidron-valley". Scribes probably took this for $\kappa\epsilon\delta\rho\sigma$ "cedar tree" (τὰς $\kappa\epsilon\delta\rho\sigma$ τοῦ Λ ιβάνου) and changed it accordingly, either into $\tau\omega\nu$ $K\epsilon\delta\rho\omega\nu$ or $\tau\sigma$ $K\epsilon\delta\rho\sigma$.

The txt reading is definitely the grammatically correct text, but is it also the original reading? The Greek support for $\tau o \hat{\upsilon} \ K \epsilon \delta \rho \hat{\omega} \nu$ is very bad. Is it possible that this is a secondarily corrected reading? That several scribes corrected it later to conform to the LXX usage?

WH: " $\tau\hat{\omega}\nu$ $K\in\delta\rho\hat{\omega}\nu$, though not found in any version, is amply attested by Greek manuscripts. It cannot be a mere error of scribes of the NT, being already in the LXX."

According to Tischendorf a reads: "Dixit illis 'Ego sum.' Iesus autem stabat et Iudas ... " This punctuation has also Jülicher's "Itala".

From here starts D/d^{sup} . The Greek is still old for this verse, but the next page with the Latin is already the supplement (reading the Byz/vg text).

 NA^{27} John 18:8 ἀπεκρίθη Ἰησοῦς \cdot εἶπον ὑμῖν ὅτι ἐγώ εἰμι.

This is one of the very few NA readings that is supported only by D in the Greek.

The omission could be accidental:

- a) aut oisis, Ἰησοῦς written as nomen sacrum after αὐτοῖς.
- b) aut oisois, δ Ἰησοῦς written as nomen sacrum after αὐτοῖς.
- c) is is the $k \in I$, in the manuscripts, e.g. P66, O1, B*, D. which is often written as $lot \eta k \in I$ in the manuscripts, e.g. P66, O1, B*, D.

On the other hand the different insertion points may indicate a secondary cause.

It is also possible that the 01 reading is original with the meaning: He says to them: "Jesus? I am he."

This then has been changed to the Byzantine reading by inserting the article, by B by shifting "Jesus" to the end to avoid confusion and in D it is an accidental omission.

B and especially 01 are not very reliable regarding the article.

Overall the support for the omission is just to slim and not weighty enough. Unfortunately d is not present anymore.

13a First they took him to Annas,

13b who was the father-in-law of Caiaphas, the high priest that year.

14 <u>Caiaphas</u> was the one who had advised the Jews that it was better to have one person die for the people. 15 Simon Peter and another disciple followed Jesus. Since that disciple was known to the high priest, he went with Jesus into the courtyard of the high priest,

16 but Peter was standing outside at the gate. So the other disciple, who was known to the high priest, went out, spoke to the woman who guarded the gate, and brought Peter in. 17 The woman said to Peter, "You are not also one of this man's disciples, are you?" He said, "I am not." 18 Now the slaves and the police had made a charcoal fire because it was cold, and they were standing around it and warming themselves. Peter also was standing with them and warming himself.

19 Then the high priest questioned Jesus about his disciples and about his teaching. 20 Jesus answered, "I have spoken openly to the world; I have always taught in synagogues and in the temple, where all the Jews come together. I have said nothing in secret. 21 Why do you ask me? Ask those who heard what I said to them; they know what I said." 22 When he had said this, one of the police standing nearby struck Jesus on the face, saying, "Is that how you answer the high priest?" 23 Jesus answered, "If I have spoken wrongly, testify to the wrong. But if I have spoken rightly, why do you strike me?"

24 Then Annas sent him bound to Caiaphas the high priest.

omit: P60(7th CE)

The canonical verse order is problematic. Especially the position of verse 24 is difficult. First Annas is questioning him (this is not mentioned in the Synoptics), then Annas sent him to Caiaphas. What happens there? We are not told. Some witnesses solve this problem nicely by inserting verse 24 after verse 13(a). Then the interrogation 19-23 is by Caiaphas and not Annas.

The reading by Sy-S is even more elaborate. It separates the story of Peter's denial from the interrogation. There is no evidence that this is the order of the Diatessaron. The sources we have give the normal order.

Streeter discusses this variation ("Four Gospels", p. 382): "possibilities of this kind open".

Interestingly already Martin Luther inserted a note after verse 13 in his 1545 German Bible: "Hie solt stehen der Vers: 'Und Hannas sandte jn gebunden zu dem Hohenpriester Caiphas.' Ist von dem Schreiber versetzt im umbwerffen des Blats, wie offt geschicht." (= "Here should stand the verse 24 ... misplaced by a scribe in turning a leaf, as often happens.") [taken from Reclam's Studienausgabe of Luther's 1545 NT].

On the Sy-S order Blass writes: "This is the narrative of the real author; the other one is that of blundering scribes." (Philology of the Gospels, p. 59)

W. Randolph Church proposed the order: 13, 24, 14, 19-23, 15-18. He notes that the two interchanged passages have about the same number of letters (19.23: 427; 15-18: 436) and some accidental exchange appeared.

All those changes in order are good suggestions but are difficult to explain. It is nevertheless interesting how many scribes moved verse 24 after verse 13.

Immediate context:

 NA^{27} John 18:9 ἵνα πληρωθῆ ὁ λόγος ὃν εἶπεν ὅτι οὓς δέδωκάς μοι οὐκ ἀπώλεσα ἐξ αὐτῶν οὐδένα.

ἀπολέσθαι probably comes from the reference in 11:50, where both words appear: εἷς ἄνθρωπος ἀποθάνη ... τὸ ἔθνος ἀπόληται.

It is either due to confusion or a deliberate abridgement.

This in itself is of course no argument in favor of one reading.

 $\mathring{\alpha}$ πολέσθαι is the more difficult reading, because it deviates from the position in the reference 11:50.

A direct harmonization to 11:50 is improbable, because in that case it would be more suitable to add the missing phrase $\kappa\alpha \lambda$ $\mu \dot{\eta}$ $\ddot{\delta}\lambda o\nu$ $\tau \dot{\delta}$ $\ddot{\epsilon}\theta\nu o\varsigma$ $\mathring{\alpha}\pi\acute{o}\lambda\eta\tau\alpha\iota$, as do 22 and a.

Different insertion points often indicate a secondary origin. It is possible that $\xi \xi \omega$ has been added in 18:29 to harmonize with 19:4. This is not very probable though, because in the following verse 38, where the same addition could be made, the reading without $\xi \xi \omega$ is safe.

On the other hand the different word orders might have just stylistic reasons. This is more probable because in 19:4 the same word-order variants appear. Note that 01 and W have the same word order in both verses.

It is therefore most probable that $\xi \omega$ has been omitted as redundant. The word order variants are difficult to decide. The 01, L reading in 19:4 is the same order as the txt reading in 18:29. This is probably the reason, why WH have this reading as alternative in the margin.

087: IGNTP has it without the "vid" qualifier. They give it as:

01* corrected by 01^{C2}

B: no umlaut

Compare:

 NA^{27} 1 Timothy 5:19 κατὰ πρεσβυτέρου κατηγορίαν μὴ παραδέχου

The omission is difficult to explain. Stylistic reasons? Weiss (Textkritik, p. 174) thinks that the $\kappa\alpha\tau\grave{\alpha}$ has been added, because the genitive was separated from its subject, and to connect it with the verb, $\kappa\alpha\tau\grave{\alpha}$ has been inserted.

It is possible that $\pi\acute{\alpha}\lambda\iota\nu$ has been omitted or changed to $\pi\acute{\alpha}\nu\tau\epsilon\zeta$ because no earlier shouting is recorded.

πάλιν πάντες is probably a conflation.

On the other hand it is also quite possible that one or the other word has been omitted due to homoioarcton ($\pi\alpha$... - $\pi\alpha$..). Note especially the incoherent support for $\pi\acute{\alpha}\lambda\iota\nu$. Homoioarcton is therefore clearly at least in part the reason for the shorter readings.

Zahn asks (Comm. Jo): "Why should anybody add $\pi \acute{\alpha} \lambda \iota \nu$ here, with no support from the context? ... Also nobody could miss a $\pi \acute{\alpha} \nu \tau \epsilon \zeta$ here, who has read verses 30, 31 and 19:12. Both short readings are suspicious and therefore $\pi \acute{\alpha} \lambda \iota \nu \tau \epsilon \zeta$ must be the origin of the variation."

Compare the similar variation in Mk 7:14.

B: no umlaut

Possibly omitted because it is difficult to understand?

Ehrman argues for a deliberate omission: "If the reading now preserved in Vaticanus once had a wider currency, then the deletion of the entire sentence makes considerable sense. Scribes found its implications troubling; for them, even though Jesus had been bloodied and reviled, he was not a mere mortal. Pilate's statement to the contrary could best be dismissed by being excised."

The addition of δ $\Pi\iota\lambda\hat{\alpha}\tau\sigma\zeta$ is only natural, because it could equally well be Jesus who is speaking, because he is the last mentioned subject. One is wondering why not more scribes added this.

P66: NA²⁷ has "P66* illeg.". In the facsimile one reads: $\delta \hat{\epsilon} \delta \hat{\epsilon} \kappa \rho]\alpha \acute{\nu} \gamma \alpha \sigma \alpha^N$. Thus P66 wrote $\tilde{\epsilon} \kappa \rho]\alpha \acute{\nu} \gamma \alpha \sigma \alpha$ but forgot the N, which is supplied above the line. But all of this appears to be a correction of yet something else. Swanson has $\tilde{\epsilon} \lambda \epsilon \gamma \delta \nu$ as conjecture. IGNTP has $\tilde{\epsilon} \lambda \epsilon \gamma \delta \nu$ as safe for P66*. This is possible, although nothing can be seen clearly in the facsimile. The $\tilde{\epsilon} \kappa \rho]\alpha \acute{\nu} \gamma \alpha \sigma \alpha$ is written quite compressed. The shorter $\tilde{\epsilon} \lambda \epsilon \gamma \delta \nu$ fits quite good to the normal size and distances of the letters.

It is interesting that the wording and the order of the languages in different in Jo and in Byz-Lk.

It has been argued that the txt order, Hebrew, Latin, Greek, is more natural, because we have first the language of the inhabitants, then the language of the occupation regime and finally the main language of the Mediterranean area (= national, official, common language). The Byzantine order could be a geographical ordering from East to West. But all this is not very convincing.

πίμπλημι appears only here in John.

Hyssop is possibly a very early error, perhaps by John already? An aromatic herb is not really suited for the purpose, but see below.

It is possible that the variant arose accidentally:

usswperiqent es usswpwperiqent es

476 is a typical Byzantine manuscript. It is probable that the reading has been introduced here either accidentally (the other way round) or on purpose to fit better to the context.

The real Hyssop (Hyssopus officinalis) does not occur in Palestine. It has been proposed that the Hyssop in the Bible is Origanum Maru, a marjoram. Its stems get about 1 m long. Another suggestion is that it is Sorghum vulgare, Durra, which gets almost twice as high as Origanum Maru and fits equally well. It is said that it would be in principal possible to put a sponge on it.

 \dot{b} σσ $\hat{\omega}$ was first conjectured by Joachim Camerarius in 1572:

"Hyssop is the name of a herb. What mentioning it here may mean, others have inferred elsewhere through guessing; Matthew mentions a reed. It is perhaps permitted to suspect that to this reed that herb as well had been attached; Nonnus asserts that the vinegar presented to Jesus was mixed with hyssop, for he calls it $\dot{\upsilon}\sigma\sigma\dot{\omega}\pi\dot{\omega}$ kekepaguévov [mixed with hyssop]. But if there is room left for conjectures, what if it would be permitted to suspect that the archetype had $\dot{\upsilon}\sigma\sigma\ddot{\omega}$ $\pi\rho\sigma\pi\epsilon\rho i\theta\dot{\epsilon}v\tau\epsilon\zeta$, so that on top of a spear a sponge, put around there, was presented to Jesus? For the spear of the Roman army, in particular the (throwing) javelin was called $\dot{\upsilon}\sigma\sigma\dot{\omega}\zeta$ by the Greek. From which Matthew perhaps used the common name of spears, 'reed'. Although also someone else could have taken a reed, drench a sponge with vinegar, and bring it mockingly to Jesus' mouth. But that I leave undecided, and in my view it cannot be known thus far, notwithstanding the inquiry into the essential truth." (taken from: "Notatio Figurarum Sermonis in Libris Quatuor Evangeliorum", Leipzig, Vögelin, 1572, pp. 297-298, translation by Jan Krans)

ύσσ $\hat{\omega}$ was printed by Baljon and Lagrange, and accepted in Moffatt's translation and the NEB.

Parker (Living Text): "Here is a conjecture $[\dot{b}\sigma\sigma\hat{\omega}]$ which would have been accepted in such a narrative in any other kind of text. It should be accepted here."

The Mishnah notes on the use of Hyssop for purification purposes (Mishnah Parah 12:1a): "Hyssop which is [too] short - one makes it suffice with a thread and with a spindle and immerses it and brings it up and holds on to the Hyssop [itself] and sprinkles."

Beethan writes: "The translation would then be 'therefore having placed round a "hyssop" (i.e. a bunch of hyssop lengthened and thereby stiffened with a spindle for the purpose of dipping and sprinkling) a sponge full of the sour wine, they conveyed it to his mouth.' "

The Jerusalem Bible translates "hyssop stick".

It appears rather improbable that hyssop is a simple error, because it is difficult to explain why it was so universally accepted when it makes no sense at all. There was something right about it, perhaps along the lines of the Mishna quote.

It has been suggested that Hyssop has been introduced here as a symbol, to indicate that Jesus is actually the Passah lamb. Note Exo 12:22 where Hyssop is mentioned to be used to disperse the blood of the lamb.

Compare context 19:33-37:

33 But when they came to Jesus and saw that he was already dead, they did not break his legs. 34 Instead, one of the soldiers pierced his side with a spear, and at once blood and water came out.

35 (He who saw this has testified so that you also may believe. His testimony is true, and he knows that he tells the truth.)

36 These things occurred so that the scripture might be fulfilled, "None of his bones shall be broken." 37 And again another passage of scripture says, "They will look on the one whom they have pierced."

The verse does not fit very good here, because it separates the events and the scripture references.

Cyrill of Alexandria in his commentary on John discusses the verses in the order 34. 36-37, 35.

This verse has another difficulty, namely: To what refers the $\ell \kappa \in \ell \nu 0 \zeta$? It is normally assumed that it refers to the beloved disciple, but this would be very unusual stylistically and unjohannine. It has been proposed therefore that it refers to Jesus (so Zahn).

Blass concludes: "everything is insecure: The whole verse and its position, also its parts, especially the $\dot{\epsilon}\kappa\dot{\epsilon}\hat{\iota}\nu o\zeta$ $o\hat{\iota}\delta\epsilon\nu$, and finally, if this could be fixed, we are left with the $\dot{\epsilon}\kappa\dot{\epsilon}\hat{\iota}\nu o\zeta$ and dispute about it. One thing should be clear: whoever wants to build on this verse a hypothesis regarding the origin of this Gospel, he builds on sand, drifting sand even."

If the words were original, there would have been no reason for an omission.

From context a natural addition.

What is interesting is that all these diverse witnesses have the same words. Where are they from?

It had been suggested that this reading was also in the Diatessaron, because it is found in several Gospel harmonies (e.g. the Heliand, the Middle Dutch harmonies, and several Latin harmonies). Compare Petersen "Diatessaron", p. 304-5.

Baarda analyzed the variant and concludes:

"(a) The Greek text was originally inserted into Greek texts as an interpolation in the second or early third century, in Alexandria (Ammonius? Origen?). It has influenced the Caesarean text, and through it also the Koine text and the Irish text of the Vulgate. The latter text may have influenced some of the Latin harmonies.

(b) Independently, or under the influence of this Greek text, the Syriac Diatessaron introduced another phrase, namely and ran up and wished to seize Him, which was used by the author of the Syriac version of our Epistle on Virginity and by Romanos. This eastern reading then was introduced into the early Latin translation of the Diatessaron, which in its turn has influenced the wording of the Heliand, Saelden Hort, the Dutch harmonies, Maerlant's Rymbybel and many Latin commentaries on the passage of John 20:16 f."

Baarda further notes that the corrector of Codex Sinaiticus "is supposed to have worked at Caesarea".

Interesting conjecture. The txt reading is difficult to understand, because, when Jesus is gone, he cannot be touched either. And in Jo 20:27 Jesus explicitly invites Thomas to touch him!

But, the universal addition of $\mu \hat{\eta}$ cannot really be explained as secondary. One of the many mysteries of St. John's Gospel.

Lepsius conjecture is very tempting, but his explanation is not. He is pointing to a lost Aramaic original of the Gospel and sees the reading as a dittography, without mentioning, which words he had in mind, though.

Jan Krans traced back the conjecture to an earlier source: Christoph Gotthelf Gersdorf (1763-1834). For Gersdorf the original was $\Hat\alpha\pi\tau\sigma\upsilon$ $\mu\sigma\upsilon$ or $\mu\sigma\upsilon$ $\Hat\alpha\tau\sigma\upsilon$, to which some pious scribe added $\mu\Hata\eta$ because he found it inappropriate to have Jesus touched by a woman. The readings with $\alpha \mathring{\upsilon} \tau o \hat{\iota} \varsigma$ are clearly a harmonization to Lk.

It is possible that originally nothing was present (= txt) and that some scribes added $\kappa\alpha \hat{\iota}$ others changed it to the $\alpha \hat{\upsilon} \tau o \hat{\iota} \varsigma$ reading.

On the other hand it is also possible that $\kappa\alpha i$ is original. With the meaning "also" it would seem to indicate that he had already shown something to them.

The situation in John is quite clear. He almost always uses the pronoun and the cases where there is variation are comparatively easy to judge. It has been speculated that John 21 has been added later to the Gospel of John.

If this is true it is possible that $\pi\rho\acute{o}\beta\alpha\tau\iota\alpha$ was in the source already.

Context is controlled by $\lambda \not\in \gamma \in I$. But the immediately preceding form is $\in \hat{l} \pi \in V$, which is safe. All preceding forms are safe!

It appears slightly more probable that scribes have been influenced by the preceding $\in \hat{l}\pi\in \nu$ to use it once again, than that scribes changed an existing $\in \hat{l}\pi\in \nu$ into $\lambda \notin \gamma \in l$ to conform it to context.

Perhaps the WH word order is a conformation to the preceding $\dot{\epsilon}\zeta\dot{\omega}\nu\nu\nu\epsilon\zeta$ $\sigma\epsilon\alpha\nu\tau\dot{\delta}\nu$.

Jesus words probably refer to Peter dying a martyr's death. A change to the plural is then only natural (so also Metzger).

A translational issue in the Latin. Is this a hypothetical condition or an affirmative statement? Probably an early error that got into the Clementine Vulgate. According to JR Harris (Codex Bezae, 1891, p. 36-39) it lead to discussions about the possible dominical sanction of celibacy. Jerome's text originally contained both words "si sic", just as D in verse 22.

Compare Jerome:

"And when they were fishing in the ship on the lake of Gennesaret, Jesus stood upon the shore, and the Apostles knew not who it was they saw; the virgin alone recognized a virgin, and said to Peter, 'It is the Lord.' Again, after hearing the prediction that he must be bound by another, and led whether he would not, and must suffer on the cross, Peter said, 'Lord what shall this man do?' being unwilling to desert John, with whom he had always been united. Our Lord said to him, 'What is that to you if I wish him so to be?' [Lat: Dicit ei Dominus: "Quid ad te si eum volo sic esse?"] Whence the saying went abroad among the brethren that that disciple should not die. Here we have a proof that virginity does not die [virginitatem non mori], and that the defilement of marriage is not washed away by the blood of martyrdom, but virginity abides with Christ, and its sleep is not death but a passing to another state. If, however, Jovinianus should obstinately contend that John was not a virgin, (whereas we have maintained that his virginity was the cause of the special love our Lord bore to him), let him explain, if he was not a virgin, why it was that he was loved more than the other Apostles."

Jerome, "Against Jovinianus", book I, 26 compare: Migne PL, Vol. 23, col. 258

Cyrill of Alexandria († 444 CE) wrote in his commentary on John (12th book to the passage):

Peter, then, observing him, longed for information, and sought to know in what perils he would be involved in the time to come, and in what way his life would end. But the question seemed unseemly, and it appeared to savour rather of a meddlesome and inquisitive spirit, that, after having learnt what was to happen unto himself, he should seek to know the future fate of others. For this cause, then, I think the Lord makes no direct reply to his question or inquiry, but, diverting the aim of the questioner, does not say that John will not die, but, If I will that he tarry till I come, what is that to thee? That is to say, Thou hast heard, O Peter, the things concerning thyself, what need is there for thee to ask questions about others, and to seek to fathom out of season the knowledge of the Divine decrees. For if he never die at all, He says, what consolation will this be to thy heart?

Chrysostom wrote (ca. 390 CE, 88th homily on the Gospel of John):

And observe, I pray you, here also the absence of pride in the Evangelist; for having mentioned the opinion of the disciples, he corrects it, as though they had not comprehended what Jesus meant. 'Jesus said not', he tells us, that 'he shall not die, but, If I will that he tarry.'

Originally the verse had been omitted in 01* and the colophon was added after verse 24 (scribe A). This has been erased and verse 25 added with a new colophon by another scribe (D). WH: "Tregelles, who examined the manuscript in Tischendorf's presence, believed the difference in handwriting to be due only to a fresh dip of the pen."

P109 (=POxy 4448) is our earliest witness to this verse, dated to the 3^{rd} CE.

Compare:

 NA^{27} John 20:30 Πολλὰ μὲν οὖν καὶ ἄλλα σημεῖα ἐποίησεν ὁ Ἰησοῦς ἐνώπιον τῶν μαθητῶν [αὐτοῦ], ὰ οὐκ ἔστιν γεγραμμένα ἐν τῷ βιβλίω τούτω:

 NA^{27} John 20:31 ταῦτα δὲ γέγραπται ἵνα πιστεύ[σ]ητε ὅτι Ἰησοῦς ἐστιν ὁ χριστὸς ὁ υἱὸς τοῦ θεοῦ, καὶ ἵνα πιστεύοντες ζωὴν ἔχητε ἐν τῷ ὀνόματι αὐτοῦ.

There are scholia in certain minuscules (e.g. 36, 137, 237, al) by an unnamed writer which claim that the text did not originally belong to the Gospel: The text of the verse, a marginal note by some careful person ($\tau\iota\nu\dot{o}\zeta$ $\tau\hat{\omega}\nu$ $\phi\iota\lambda\sigma\pi\dot{o}\nu\omega\nu$ - elsewhere this is a designation for Theodor of Mopsuestia), stood originally outside of the text ($\xi\xi\omega\theta\varepsilon\nu$) but has crept in without the knowledge of the first later.

It is not clear though if this refers to real knowledge about codices which are missing the verse, or if it is not simply just a suspicion. The note is also found in the Syrian writer Barhebraeus (Nestle 2^{nd} ed TC intro).

For the text of the scholion see Tis (8th ed. p. 966). See Zahn Einl. II p. 495.

Weiss (Jo Com.) suggests that the verse might have been omitted because of the bold exaggeration.

Note that 20:31 is missing in G^* (not in NA!).

It has been suggested (e.g. Trobisch, "The first edition of the NT", 2000), that this verse was an editorial note, the conclusion of the first Four-Gospel-Canon and does not really belong to the fourth Gospel.

Streeter ("Four Gospels"), p. 431) notes:

"a double change of person in three successive verses is so remarkable that - especially as the verse is merely a somewhat magniloquent repetition of the simple and natural 'Many other signs did Jesus ... which are not written in this book' of 20:30 - we are perhaps justified in holding on the evidence of this single manuscript that it is an addition by a very early scribe."

Minority reading:

Also arm^{mss} (acc. to Nestle, TC Intro 2nd ed. and Zahn)

Maurice Robinson comments on 565: "The PA text of 565 is now completely lacking, with only the beginning of a faded introduction to the PA being present (this introduction appears similar to what appears in manuscript 1). The last page is missing (or never was completed; the microfilm only goes to the point described. But I suspect no unfilmed blank page follows, or such would have been stated by earlier researchers, particularly Belsheim."

f1 and 565 form a group in John.

T&T wrongly list 565 for the omission. Klaus Witte confirms.
