

Using the DUMP button

STUDIO 1

If you are doing a phone interview/talkback and your guest says something defamatory, there is a green DUMP button that will take them off air.

3CR broadcasts in 12 second DELAY. Listeners hear what we say 12 seconds after we've said it.

Pressing the DUMP button takes 3CR out of DELAY, so that anything said in the 12 seconds before you pressed DUMP will not be broadcast to listeners.

Pressing the DUMP button means you are LIVE-TO-AIR in the truest sense.

If you had cause to use the DUMP button, it is important to take the next opportunity to put 3CR back into DELAY.

Turn over this page to find out how to put 3CR back into DELAY.
