

Libya

**End the foreign military intervention
Ceasefire now * No blood for oil**

Australian Government involvement in Libya should be diplomacy, negotiations, and international pressure, not war. Bringing cruise missiles to the “rescue”? No way! Bombs and missiles are not instruments of peace and democracy.

The UN resolution says force may only be used to protect Libyan civilians, but top US, British and French officials have stated repeatedly that “Gaddafi must go” and that he has “lost legitimacy to rule”. They clearly want regime change.

If the US and NATO want to protect civilians they should not have armed Gaddafi and they should now support a ceasefire so the Libyan people can decide their own destiny.

These self-proclaimed champions of civilians have moved so quickly to interfere in Libya but they have shown no compassion for the people of Bahrain, Yemen, Iraq, Saudi Arabia and Palestine.

For the last few months, the US has been sidelined by the powerful democracy movements sweeping aside the dictators in Tunisia and Egypt.

We are calling this protest to demand an end to the West’s bombing of Libya. This is not even the “no-fly zone” that was talked about. This is an all-out military attack on Libya.

As the invasions of Iraq and Afghanistan show, democracy will not be imposed from the outside.
