for protecting kids online.](#)

Parents! Read these basic Internet safety tips while taking a look at the iProtectYou control panel and see how easy it is to make iProtectYou do exactly

**Protect children and guard public-use computers
Solutions for parents, schools, libraries and cybercafes**

New: November 29, 2006

iProtectYou Pro Web Filter v8.1

Latest New Features

The iProtectYou Internet filtering and parental control software program enables you to fully control your child's online use, thus preventing your child from being exposed to the inappropriate, harmful and dangerous aspects of the Internet.

iProtectYou is now fully compatible with Microsoft

Vista.

- Filter harmful websites and newsgroups.
- Restrict Internet time to a predetermined schedule.
- Decide which programs can have internet access.
- Limit the amount of data that can be sent or received to/from your computer.
- Block e-mails, online chats, instant messages and P2P connections containing inappropriate words.
- Set different levels of restrictions for every member of your family depending on their maturity, interests, habits, and parental control needs.
- Get detailed Internet activity logs.
- Comes provided with a huge built-in database.
