

AGU Signs Memorandum of Agreement With Soil Science Society of America

I am pleased to announce that AGU has taken another step in our effort to build strategic alliances with partner groups by signing a memorandum of agreement with the Soil Science Society of America (SSSA).

This agreement is based on the common interests of our members and will allow us to strengthen our respective organizations by

- Exchanging information on key programs and initiatives.
- Expanding membership of both our organizations through possible joint programs.

- Exchanging information and possible joint activities concerning educational opportunities, student programs, and professional services.
- Exchanging information and possible co-organization of scientific conferences.

This agreement, similar to one we signed in May with the European Geosciences Union, was signed by AGU president Michael McPhaden, SSSA president Charles Rice, SSSA executive director Ellen Bergfeld, and me.
