CB12-02

NOVEMBER 2011 CONSTRUCTION AT \$807.1 BILLION ANNUAL RATE

The U.S. Census Bureau of the Department of Commerce announced today that construction spending during November 2011 was estimated at a seasonally adjusted annual rate of \$807.1 billion, 1.2 percent ($\pm 1.6\%$)* above the revised October estimate of \$797.4 billion. The November figure is 0.5 percent ($\pm 1.9\%$)* above the November 2010 estimate of \$803.0 billion.

During the first 11 months of this year, construction spending amounted to \$724.8 billion, 2.5 percent ($\pm 1.1\%$) below the \$743.6 billion for the same period in 2010.

PRIVATE CONSTRUCTION

Spending on private construction was at a seasonally adjusted annual rate of \$522.3 billion, 1.0 percent $(\pm 1.0\%)^*$ above the revised October estimate of \$517.3 billion. Residential construction was at a seasonally adjusted annual rate of \$243.7 billion in November, 2.0 percent $(\pm 1.3\%)$ above the revised October estimate of \$238.9 billion. Nonresidential construction was at a seasonally adjusted annual rate of \$278.6 billion in November, nearly the same as $(\pm 1.0\%)^*$ the revised October estimate of \$278.5 billion.

PUBLIC CONSTRUCTION

In November, the estimated seasonally adjusted annual rate of public construction spending was \$284.9 billion, 1.7 percent ($\pm 2.2\%$)* above the revised October estimate of \$280.1 billion. Educational construction was at a seasonally adjusted annual rate of \$71.9 billion, 0.5 percent ($\pm 3.8\%$)* above the revised October estimate of \$71.5 billion. Highway construction was at a seasonally adjusted annual rate of \$82.9 billion, 1.9 percent ($\pm 5.4\%$)* above the revised October estimate of \$81.3 billion.

December 2011 data will be released on February 1, 2012 at 10:00 A.M. EST. For more detailed data and methodologies, go to our website:

http://www.census.gov/constructionspending

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 2 months to establish an underlying trend for total construction and as long as 8 months for specific categories of construction. The statistics in this release are estimated from several sources and surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimates of the standard errors are provided in Table 3. Whenever a statement such as "2.3 (±3.1) percent above" appears in the text, this indicates the range (-0.8 to +5.4 percent) in which the actual percent change is likely to have occurred. All ranges given are 90 percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. Statistics for the current month are preliminary estimates subject to revision in following months as additional data become available. The average absolute percent changes from preliminary estimate to first revision for the major seasonally adjusted components are as follows: total construction, 1.1 percent; private construction, 1.6 percent; and public construction, 1.3 percent.

^{* 90%} confidence interval includes zero. The U.S. Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.

Table 1. Value of Construction Put in Place in the United States, Seasonally Adjusted Annual Rate (Millions of dollars. Details may not add to totals due to rounding.)
