

Does your child have:

- Bipolar Disorder?
- Attention Deficit Hyperactivity Disorder (ADHD)?
- Generalized Anxiety Disorder (GAD)?

Bradley Hospital is seeking children (age 7-17 years old) with bipolar disorder, ADHD, or anxiety to participate in a research study.

After interviews, selected subjects will play special computer games and have a magnetic resonance imaging scan (MRI).

Subjects will be compensated for their time.

This is not a treatment study.

**Interested? Call 401-793-8200 Daniel Dickstein M.D.
Director, Bradley Hospital Pediatric Mood, Imaging, &
NeuroDevelopment Program (Pedi-MIND Program).**
