CLASSIFICATIONS

Classification of Historical Core Municipalities		
Nature of Historical Core Municipality: Classification based upon 2010 City Limits	Large Urban Core in 1940?	2010 City Limits
Pre-War & Non-Suburban	Yes	Is pre-war core; nearly all included land area was developed by 1940. Little development that is post-war suburban in character. Little or no change in boundaries since 1940.
Pre-War & Suburban	Yes	Includes pre-war core, however contains substantial development that is post-war suburban in character (2010 boundaries contain substantial areas that were greenfield in 1940)
Post War & Suburban	No	Has smaller pre-war core: less than 100,000 population in 1940 and nearly all development is post-war suburban in character.
<p>The historical core municipality is the municipality with the largest 1940 population in the present metropolitan area (metropolitan statistical area).</p> <p>There can be more than one historical core municipality in a metropolitan area, with the exception below.</p> <p><i>There can be a second historical core municipality if (1) it is adjacent to a historical core municipality classified as "Pre-War & Non-Suburban," (2) had a 1940 population at least 25 percent of the first historical core municipality and (3) a population density of at least 5,000 per square mile.</i></p> <p>Multiple municipality names listed in some other metropolitan areas for reference purposes.</p>		

NOTES

Data from US Bureau of the Census

Category definitions in Table 1

Large Louisville population 2000-2010 increase due to a municipal-county consolidation

Las Vegas 1950 urban land area: Assumed to be the city limits of Las Vegas (Las Vegas was not an urban area in 1950)

2000 to 2010 population includes population growth due to annexations
