DEMOGRAPHIA

Demographia World Urban Areas (World Agglomerations) 8th Annual Edition: Version 2

July 2012

Demographia World Urban Areas is the only annually published inventory of population, corresponding land area and population density for world urban areas with more than 500,000 population. Moreover, *Demographia World Urban Areas* is unique in exclusively regularly reporting data exclusively on urban areas (areas of continuous urban development). Other lists include use metropolitan area or municipality area data instead of urban area data for specific cases.

Demographia World Urban Areas has been widely cited and has been used by respected websites, such as “[City Mayors](#).”

DEMOGRAPHIA WORLD URBAN AREAS (URBAN AGGLOMERATIONS)

This report contains population, land area and population density for all nearly 850 identified urban areas (urban agglomerations or urbanized areas) in the world with 500,000 or more population as of the volume date. The total population of these urban areas is estimated at nearly 1.8 billion, 48 percent of the world urban population (2012).

A number of additional urban areas are also listed, including all urban areas over 100,000 in France, New Zealand, Puerto Rico, the United Kingdom and the United States and all urban areas over 50,000 in Australia and Canada. Rankings are indicated only for urban areas of 500,000 and over. The 1,500 urban areas of all sizes account for 52 percent of the world urban population.

Revisions from the last edition: This edition provides estimates based upon new censuses, such as in China, India, Canada, Pakistan, the Philippines and the United States. Improved satellite imagery has become also available for a number of urban areas since the publication of the last edition, which increases the accuracy of land area estimates that are not available from national census authorities.

DEFINITIONS AND ISSUES

An urban area (urbanized area agglomeration or urban centre) is a continuously built up land mass of urban development that is *within* a labor market (metropolitan area or metropolitan region).

An urban area is best thought of as the “urban footprint” --- the lighted area that can be observed from an airplane (or satellite) on a clear night. National census authorities in Australia, Canada, France, the United Kingdom and the United States designate urban areas. Except in Australia, the authorities use a minimum urban density definition of 400 persons per square kilometer (or the nearly identical 1,000 per square mile in the United States).

In some cases, urban areas have virtually grown together, yet are still considered separate urban areas. This report confines urban areas to a single metropolitan area (below) or labor market area. Continuous urbanization that extends beyond individual labor markets (metropolitan areas) can be called "urban extents." What constitutes a particular metropolitan area is a matter of judgment and there are no generally accepted international principles for delineating metropolitan areas (unlike urban areas). However, it is necessary to “draw a line,” especially where adjacent urban areas have “grown together,” but remain essentially distinct labor markets. For example, the following urban extents are composed of more than one urban area:

- A plausible argument could be made for designating the south coast of Japan from Tokyo-Yokohama to Osaka-Kobe-Kyoto as a single urban area, because it has nearly “grown together.” Yet, this ribbon of urbanization is far too large to be a single metropolitan area (labor market) and thus considered to be multiple urban areas.
- The Pearl River Delta urban areas of Shenzhen, Dongguan, Zhongshan, Jiangmen, Huizhou, Zhuhai, Guangzhou and Foshan in China’s Guangdong province are very close to one-another and in some cases their extremities touch. Yet, this huge swath of urbanization not considered a single agglomeration because they are not a single market. This report considers Guangzhou and Foshan as a single urban area, because they have become more economically integrated than the other urban areas. Each of the other areas in the Pearl River Delta economic region remain classified as separate urban areas.

International Urban Areas: Urban areas are confined to a single nation, unless there is virtual freedom of movement (including labor) between the adjacent nations. This is indicated by the lack of customs or immigration facilities at borders, or the broad access to work permits for working in adjacent countries. Currently, this condition is met only between some continental nations of the European Union. For example, the Lille urban area is in both France and Belgium yet is considered a single urban area because there is freedom of labor movement without trade, immigration or customs barriers. Treaty provisions render Geneva (Switzerland)-Annemasse (France) as a single urban area.

However, Detroit-Windsor and San Diego-Tijuana are not considered single urban areas because there is not freedom of labor movement between the two nations. Moreover, Shenzhen and Hong Kong, adjacent urban areas in China, are considered to separate urban areas, principally because unfettered labor movement between is not permitted.

Metropolitan Areas: Contrast: An urban area is different from a metropolitan area. A metropolitan area is a labor market and includes substantial rural (non-urban) territory or area of discontinuous urban development (beyond the developed urban fringe). Urban areas draw employees from a much larger area than the area of continuous development. Some web based agglomeration lists incorrectly contain metropolitan area data for some areas. There is no consistent international definition for metropolitan areas and among the nations that have such designations, there is considerable variation. As a result, international metropolitan area comparisons are difficult.¹

Municipality (City or Commune): An urban area is different from a municipality (also often called a city or a local government authority). Municipalities have political boundaries that usually include only a part of the urban area. For example, the city of Seoul represents less than one-half of the population of the Seoul-Incheon urban area, which extends well beyond the municipality. On the other hand, a municipality may be considerably larger than an urban area and therefore contain considerable non-urban (or rural) territory. Zaragoza, Spain is an example. A large part of the municipality of Mumbai is rural, composed of the Rajiv Ghandi National Park and thus not included in the urban area.

Many of what are referred to as “cities” in China are better defined as “regions” and used to be referred to as "prefectures." They extend far beyond the area of continuous urbanization and (Beijing, Tianjin and Shanghai). The city of Chongqing, which has the largest population of any entity called a city (municipality) and the stretches far beyond any reasonable definition of a metropolitan area and has a land area similar to that of Austria. Its population is largely rural, not urban and is far too large to be considered a metropolitan area (unlike some Chinese "cities").

Urban Population Density: This report provides average urban population density data. It is not possible to coordinate the dates of current population estimates with land area estimates. As a result, population densities (calculated using current estimates) are expressed in rounded numbers (to the nearest 100). Thus, the urban population densities should be considered reasonable approximations, rather than precise.

By necessity, average data masks significant variations within urban areas. For example, the population density of the Phoenix urban areas is more than half-again higher than that of the Boston urban area. Yet, the highest population densities of the Boston core are at least five times that of the highest density areas in Phoenix. Moreover, Boston has a far larger commercial core (“central business district” or “downtown”). The difference is that the Phoenix suburbs are considerably more dense than the Boston suburbs. Similarly, London and

¹ Also see: *Urban Terms Defined* (<http://demographia.com/db-define.pdf>)

Athens have similar population densities. Yet, the core densities in Athens are considerably higher than in London. The Athens suburbs, however, are among the least dense in the world. The Essen-Dusseldorf and Milan urban areas have almost identical densities, yet core densities are considerably higher in Milan. The purpose of this presentation is to define the population and density of urban footprints, regardless of their density profiles.

Nonetheless, average density and the geographical expanse of urban areas is important, even without regard to internal population density profile differences. For example, the differences in urban density profiles make only marginal in urban transport planning. This is because with the geographical expanse of nearly all modern, high-income urban areas, automobiles provide by far the greatest coverage, with considerably shorter travel times than public transport. For example, in Phoenix, more than 99 percent of motorized travel is by car, while automobiles account for only 96 percent of Boston, with its steeper density gradient. Automobiles account for 88 percent of travel in the Essen-Dusseldorf urban area, somewhat more than the 77 percent in Milan, with its steeper density gradient.

URBAN AREA POPULATION AND LAND AREA

A base year population is provided for all urban areas. The base year estimate uses the methodology indicated by the coding in the “Source: Population” column. Current population estimates are provided for larger urban areas, using projected population growth rates.

Base Year Population Estimates: Methods and Cautions

Demographia uses maps, satellite photographs to estimate continuous urbanization. Demographia also uses small area population data, where available, to match population estimates to urban land area.

National census authority land area data is presented in Australia, Canada, France,² the United Kingdom and the United States.

Satellite photograph examination may produce higher urban densities than other methods. This is because national census authority approaches include small amounts of rural land in fringe areas (where the units comprising urban areas, such as municipalities (communes) or census tracts are not fully urban). The Demographia estimates include little or no rural area. Tests of the two methods in France and the United States indicate that in most cases the variation is less than 10 percent (with the Demographia estimate producing the smaller land area, or higher density).

The sources of the based population estimates are, in order by reliability:

² Except for Marseille. See note under “Individual Urban Areas.”

(1) National census authorities, where representative agglomeration data is available (such as in the United States, the United Kingdom, Canada, France, Sweden, Norway and Australia).³ India urban agglomerations are not used in some cases because the geographical size of constituent units (municipalities) include large rural (non-urban) areas (A, B & N below, see *Sources for Base Population & Land Area Estimates*, below).

(2) Demographia population estimates developed lower order jurisdictional data from national census authorities (Source C).

(3) Estimates based upon the *United Nations World Urbanization Prospects* database, where the data is representative of urban area population. In some cases, the UN is not provided urban area data, and instead reports metropolitan area or municipality data. In these cases, *Demographia* relies on other population estimation methods (Source D).

(4) Other estimates (All other sources).

Sources for Base Population & Land Area Estimates

A: National census authority data agglomeration data (land area or population).

B: Demographia land area estimate based upon map or satellite photograph analysis.

C: Demographia population from lower order jurisdictions, including reduction for rural areas.

D: Population estimate based upon United Nations agglomeration estimate.

E: Demographia population estimate from national census authority data.

F: Other Demographia population estimate.

L: Demographia population estimate from local authority data.

N: Combined urban area using national census authority data

Current Year (Volume Year) Population Estimate

A current year population estimate is provided for larger urban areas, principally using annualized United Nations population growth rates from the base year to the current year.⁴ Exceptions are as follows:

³ In China, sub-city or sub-regional districts called “shixiaqu” (市辖区) are sometimes referred to as urban areas. Shixiaqu, however are more akin to labor markets (metropolitan areas) and extend well beyond the urban footprint. Similarly, urban areas as defined in New Zealand are more akin to labor markets (metropolitan areas) because they extend beyond the urban footprint.

⁴ Population projections are available at <http://www.demographia.com/db-wuaproject.pdf>

Colombo, Sri Lanka: United Nations national urban population projection growth rate used. The United Nations data does not include Colombo.

Essen-Dusseldorf, Germany: Average rate for Cologne and Hamburg used. The United Nations data does not include Essen-Dusseldorf.

Frankfurt, Germany: Average rate for Cologne and Hamburg used. The United Nations data does not include Frankfurt.

Jakarta, Indonesia: Share of national urban population growth for Jabotabek regencies used for projection, due to substantially differing urban area definitions (see Individual Urban Area Notes, below).

Katowice-Gliwice-Tychy, Poland: United Nations population projected rate for Warsaw used. The United Nations data does not include Katowice-Gliwice-Tychy.

Khartoum, Sudan: Projection rate from the Central Statistical Bureau of Sudan.

Kuala Lumpur, Malaysia: United Nations national urban projected population growth rate used, due to substantially differing urban area definitions (see Individual Urban Area Notes, below).

Manila, Philippines: Annual population growth rate is based upon the Manila metropolitan region's share of the 2000-2007 national growth and projected using the United Nations national urban population growth rate (see Individual Urban Area Notes, below).

Milan: United Nations national urban population growth rate used, due to substantially differing urban area definitions (see Individual Urban Area Notes, below).

Taipei: Taiwan projected population growth rate used, due to substantially differing urban area definitions (see Individual Urban Area Notes, below).

Tunis: United Nations national urban population projected growth rate used. The United Nations data does not include Tunis.

United States (all urban areas with current year estimates): Population growth rates are based upon the share of the urban area's corresponding metropolitan area growth from 2000 to 2008 as a share of the United Nations projected urban population growth to 2030.

Cautions

Demographia World Urban Areas (World Agglomerations) is a continuing project. Revisions are made as more accurate satellite photographs and population estimates become available. However, it is important to recognize that most of the data is estimated. Appropriate caution is therefore advised.

ADDITIONAL URBAN AREAS NOTES

Combined Urban Areas: In the United States, metropolitan areas may be combined into Combined Statistical Areas, which are, in effect, larger metropolitan areas or metropolitan regions. Where the urban footprint (composing a single labor market) extends beyond the metropolitan area, the Demographia urban area definition includes the entire urban footprint as a combined urban area. In Canada, where national census authorities also define metropolitan areas, the Toronto, Hamilton and Oshawa metropolitan areas are also considered a single labor market and are combined into a single combined urban area.

COMBINED URBAN AREAS	
Designated only in Nations Reporting Urban Agglomeration Data	
NATION	COMBINED URBAN AREA (Population & Land Area Code "H")
Canada	Toronto: Toronto, Hamilton, Oshawa
United States	Boston: Boston, Nashua (NH)
United States	Chicago, Kenosha (WI), Round Lake
United States	Dallas-Fort Worth: Dallas Fort Worth, Denton, McKinney
United States	Houston: Conroe, Houston
United States	Los Angeles: Los Angeles, Riverside-San Bernardino, Mission Viejo
United States	New York: New York, Bridgeport (CT), New Haven (CT), Trenton (NJ), Danbury (CT), Twin Rivers (NJ)
United States	Orlando: Kissimmee, Orlando
United States	Phoenix: Avondale, Phoenix, Sierra Vista
United States	San Francisco: Concord, Livermore, San Francisco, San Jose, Vallejo
A combined urban area consists of adjacent urban areas that are located within the same labor market area	

Identified Components of Urban Areas: These notes identify *some* additional components (generally municipalities) of urban areas that (1) might be thought to be separate, (2) are classified as separate by statistical agencies or are (3) listed to indicate to better describe the geography of an urban area.

For example, the United States Bureau of the Census considers the San Jose, Concord, Vallejo, Livermore urban areas as separate from the San Francisco urban area. *Demographia World Urban Areas* considers these areas to be continuous in development and in the same labor market and therefore includes them in the San Francisco urban area.

The identification of a component in an urban area below does not, however, imply that all components are listed.

Amman, Jordan: Includes Az-Zarqa.

Ansan, Korea: Included in Seoul-Incheon.

Avondale, AZ, USA: Included in Phoenix.

Bahadurgarh, Haryana, India: Included in Delhi.

Baltimore, MD, USA: The US Census Bureau combines Washington and Baltimore into a single combined metropolitan area (combined statistical area) but considers the two as separate urban areas. Washington and Baltimore are separate urban areas in *Demographia World Urban Areas*.

Bataysk, Russia: Includes Rostov.

Bhiwandi, Maharashtra, India: No longer included in Mumbai.

Boston, MA, USA: Includes Worcester and Nashua.

Bridgeport, CT, USA: Included in New York.

Chicago, IL, USA: Includes Kenosha and Round Lake.

Chungli, Taiwan: Included in Taipei.

Concord, CA, USA: Included in San Francisco

Conroe, TX, USA: Included in Houston.

Dallas-Fort Worth, TX, USA: Includes Denton and McKinney

Danbury, CT, USA: Included in New York.

Darwin, NT, Australia: Includes Palmerston.

Delhi: Includes Faridabad, Ghaziabad, Noida, Gurgaon and Bahadurgarh.

Denton, TX, USA: Included in Dallas-Fort Worth

Dhaka, Bangladesh: Nayaranganj included.

Dongguan, Guangdong, China: The *Demographia* estimate is lower than last year, because local estimates previously used were higher than reported in the 2010 census.

Dubai, UAE: Includes Sharja

Faridabad, Haryana, India: Included in Delhi.

Foshan, Guangdong, China: Included in Guangzhou-Foshan

Francisco Morato, Sao Paulo, Brazil: Included in Sao Paulo

Ghaziabad Uttar Pradesh, India: Included in Delhi.

Guangzhou-Foshan, Guangdong, China: Includes Foshan

Gurgaon, Haryana, India: Included in Delhi.

Hamilton, ON, Canada: Included in Toronto.

Himeji, Hyogo, Japan: Included in Osaka-Kobe-Kyoto.

Houston, TX, USA: Includes Conroe.

Hubli, West Bengal, India: Does not include Dharwad.

Huiyang qu (Huizhou), Guangdong, China: Included in Shenzhen.

Huizhou, Guangdong, China: Huicheng qu only

Fukuoka, Fukuoka, Japan: Shown as a separate urban area. Some sources combine Fukuoka with Kitakyushu (such as the United Nations).

Incheon, South Korea: Included in Seoul-Incheon,

Jakarta, Indonesia: Jakarta is perhaps the only major urban area in the world that has adopted a formal new name for the urban area/metropolitan area that has spread beyond the boundaries of the central city. However, two forms of the new name are used, Jabotabek and Jabodetabek, both names being acronyms formed from major jurisdictions in the area. Various international sources limit their population estimates to DKI Jakarta itself (the national capital district) or include only inner suburbs (such as the cities of Tangerang, South Tangerang, Bekasi and Depok). However, the urbanization of Jakarta extends beyond into the regencies of Tangerang, Bekasi and Bogor and to the separate city of Bogor. Demographia continues to use the “Jakarta” name because of its familiarity.

Jianbizhen (qu): Included in Zhenjiang

Jinjiang, Fuzhou, China: Included in Quanzhou.

Kalyan, Maharashtra, India: No longer included in Mumbai.

Karachi, Pakistan: The population is lower than other estimates (such as the United Nations), which include metropolitan area population not within the continuously developed urban area.

Karaj, Iran: Not included in Tehran.

Kenosha, WI, USA: Included in Chicago.

Kitakyushu, Fukuoka, Japan: Shown as a separate urban area. Some sources combine Kitakyushu with Fukuoka (such as the United Nations), which is not a part of the continuous urbanization of Kitakyushu. The Demographia population estimate is a “build-up” of municipality population within the continuously developed area (urban area or agglomeration).

Kissimmee, FL, USA: Included in Orlando.

Kuala Lumpur, Malaysia: The population is higher other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area. Continuous urbanization extends well beyond the municipality of Kuala Lumpur, for example to Port Klang and the area represents a single labor market (metropolitan area) The Demographia population estimate is a “build-up” of municipality population within the continuously developed area (urban area or agglomeration).

Lagos, Nigeria: Higher population estimates are indicated by some source. The Demographia population estimate is determined from accumulating smaller area population data from the 2006 census.

Livermore, CA, USA: Included in San Francisco.

Los Angeles, CA, USA: Includes Riverside-San Bernardino and Mission Viejo.

Manila, Philippines: The population is higher other agglomeration estimates (such as the United Nations), which tend to be limited to Metro Manila (the National Capital Region), which is a province level jurisdiction. The continuous urbanization of Manila extends outward into Bulacan, Cavite, Laguna, Rizal and Batangas provinces.

Maputo, Mozambique: Includes Matola.

Marseille, France: A Demographia land area estimate is used because the INSEE (census authority of France) urban area definition includes an unusually large rural area (a mountain range, Chaine de etoile).

McKinney, TX, USA: Included in Dallas-Fort Worth.

Miami, FL, USA: This urban area includes the former urban areas of Fort Lauderdale and West Palm Beach, which were combined by the US Census Bureau into Miami in 2000.

Milan, Italy: The population is higher other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area, which stretches well into Como, Lecco and Varese provinces.

Mission Viejo, CA,USA: Included in Los Angeles.

Moscow, Russia: Demographia is indebted to Richard Forstall, who has provided local authority area population data for portions of Moscow Oblast within the Moscow urban areas. Other estimates (such as the United Nations estimate) include only the municipality of Moscow, which includes only part of the urban footprint.

Mumbai, Maharashtra, India: Excludes Kalyan, Bhiwandi and Vasai-Virar, which are outside the urban footprint of Mumbai. The Census of India classifies Kalyan within the Mumbai agglomeration. Kalyan is excluded by Demographia because of the lack of continuous urbanization Mumbai includes Panvel.

Nara, Nara, Japan: Included in Osaka-Kobe-Kyoto.

Navi Mumbai, Maharashtra, India: Included in Mumbai.

Nayaranganj, Bangladesh: Included in Dhaka.

Nashua,NH, USA: Included in Boston.

New York, NY-NJ-CT, USA: Includes Bridgeport, New Haven, Trenton, Danbury and Twin Rivers urban areas

Noida, Uttar Pradesh, India: Included in Delhi.

Orlando, FL, USA: Includes Kissimmee.

Osaka-Kobe-Kyoto, Japan: Portions of the prefectures of Osaka, Kobe, Kyoto and Nara area included. Includes Himeji. United Nations estimates separate Osaka-Kobe and Kyoto and exclude both Nara and Himeji.

Oshawa, ON, Canada: Included in Toronto.

Quanzhou, Fuzhou, China: Includes Shishi and Jinjiang

Palmerston., NT, Australia: Included in Darwin

Panvel, Maharashtra, India: Included in Mumbai.

Phoenix, AZ, USA: Includes Avondale and Sierra Vista (which are designated by the US Census Bureau as separate urban areas).

Riverside-San Bernardino, CA, USA: Included in Los Angeles.

Rostov, Russia: Includes Bataysk.

Round Lake, IL, USA: Included in Chicago.

San Francisco, CA, USA: Includes San Jose, Concord, Livermore and Vallejo.

San Jose, CA, USA: Included in San Francisco.

Sao Paulo, Sao Paulo, Brazil: Includes Francisco Morato.

Seoul-Incheon, Korea: Includes Suweon and Ansan.

Sharja, UAE: Included in Dubai.

Shenzhen, Guangdong, China: Includes Huiyang qu (Huizhou).

Shishi (shi), Fuzhou, China: Included in Quanzhou.

Sierra Vista, AZ, USA: Included in Phoenix.

Stuttgart, Germany: The population is lower than other estimates (such as the Millennium Cities Database), which include metropolitan area population not within the continuously developed urban area. The Demographia population estimate is a “build-up” of municipality population within the continuously developed area (urban area or urban agglomeration).

Suweon, Korea: Included in Seoul-Incheon.

Taipei, Taiwan: The population is higher than other estimates (such as the United Nations), which do not include all population within the continuously developed urban area (especially in Taipei County). Includes New Taipei (urban portion) and Taoyuan.

Taiyuan, Shanxi, China: Includes Yuci qu (Jinzhong).

Taoyuan, Taiwan: Included in Taipei.

Tehran, Iran: Does not include Karaj.

Tianjin, Tianjin, China: The population is lower than other agglomeration estimates (such as the United Nations), which include metropolitan area population not within the continuously developed urban area. The Demographia population estimate is a “build-up” of sub-metropolitan districts (county level) population within the continuously developed area (urban area or agglomeration).

Tokyo-Yokohama, Japan: Includes large areas Tokyo, Kanagawa, Chiba and Saitama prefectures and smaller areas of Gunma, Tochigi and Ibaraki prefectures.

Toronto, ON, Canada: Includes Hamilton and Oshawa.

Trenton, NJ, USA: Included in New York.

Twin Rivers, NJ, USA: Included in New York.

Vallejo, CA, USA: Included in San Francisco.

Vasai-Virar, Maharashtra: Not included in Mumbai.

Washington, DC-VA-MD: The US Census Bureau combines Washington and Baltimore into a single combined metropolitan area (combined statistical area) but considers the two as separate urban areas. Washington and Baltimore are separate urban areas in *Demographia World Urban Areas*.

Xi'an, Shaanxi, China: Includes Xiangyang.

Xiangyang, Shaanxi, China: Included in Xi'an.

Xicheng, Ningxia, China: Included in Yinchuan.

Yanzhou, Jiangsu, China: Includes Jiangdu shi.

Yinchuan, Ningxia, China: Includes Xicheng.

Yuci qu (Jinzhong), Shanxi, China: Included in Taiyuan.

Zhenjiang: Includes Jianbizhen qu.

COMMENTS AND SUGGESTIONS

Demographia wishes to produce the most accurate possible estimates. This edition incorporates changes from suggestions that were deemed to be appropriate. Comments, suggestions, criticism and data are welcomed.
