General Information

This Volume includes marine meteorological and other related geophysical information necessary for safe and economic conduct of shipping operations, as well as for fishing and other marine activities.

CHAPTER 1 – The Global Maritime Distress and Safety System (GMDSS) Services

CHAPTER 2 – SATELLITE – INMARSAT C

CHAPTER 3 - Meteorological Broadcasts by Radio-Facsimile

CHAPTER 4 – Meteorological Broadcasts by Radiotelegraphy and Radiotelephony

CHAPTER 5 - Visual Storm Warning Signals

CHAPTER 6 – Focal Point Contact Information

CHAPTER 1 – The Global Maritime Distress and Safety System (GMDSS) SERVICES

To ensure complete area coverage and adequacy of services, the Oceans and Seas have been divided into METAREAS. This Chapter provides charts indicating the limits of METAREAS together with the area co-ordinates followed by the transmission schedule for the full GMDSS service.

The GMDSS of the International Maritime Organization (IMO) entered into force on 1 February 1992. The high seas marine broadcast system for the GMDSS, which operates through the International SafetyNET Service of INMARSAT, was also implemented from this date.

The GMDSS provides for urgency and safety communications and the promulgation of maritime safety information (navigational and meteorological warnings and forecasts and other urgent safety information).

For some ocean areas, the full GMDSS service is not yet implemented because of technical reasons related to access to the appropriate CES. For these areas, an interim urgent meteorological warning information service has been put in place.

For the purpose of the preparation and issue of meteorological warnings and the regular preparation and issue of weather and sea bulletins, the oceans and seas are divided into areas for which National Meteorological Services assume responsibility. The areas of responsibility together provide complete coverage of oceans and seas by meteorological information contained in warnings and weather and sea bulletins for the high seas. The areas of responsibility as defined in the world map represents a minimum requirement for issuing and preparation services.

Preparation Service: Is a National Meteorological Service which has accepted responsibility for the preparation of forecasts and warnings for parts of, or an entire, designated area (METAREA) in the WMO system for the dissemination of meteorological forecasts and warnings to shipping under the GMDSS and for their transfer to the relevant issuing service for broadcast.

Issuing Service: A National Meteorological Service accepts responsibility for and ensures that meteorological forecasts and warnings for shipping are disseminated through the INMARSAT SafetyNET service to the designated area for which the Service has accepted responsibility under the broadcast requirements of the GMDSS. The forecasts and warnings for broadcast may be prepared solely by the issuing service, or by another preparation service, or a combination of both, on the basis of negotiations between the services concerned. The issuing service is responsible for composing a complete broadcast bulletin on the basis of information input from the relevant preparation services, and for inserting the appropriate EGC header. The issuing service is also responsible for monitoring the broadcasts of information to its designated area of responsibility.

Issuing and preparation services may extend beyond the area of coverage of responsibility if they wish to meet national requirements. In which case, the area of coverage should be specified with the broadcast times.

CHAPTER 2 – SATELLITE – INMARSAT C

Satellite systems operated by the INMARSAT, are important elements of the GMDSS. The Inmarsat C provides ship/shore, shore/ship and ship/ship store-and-forward data and email messaging, the capability for sending preformatted distress messages to a rescue coordination center, and the Inmarsat C SafetyNET service. The Inmarsat C SafetyNET service is a satellite-based worldwide maritime safety information broadcast service of high seas weather warnings, NAVAREA navigational warnings, radionavigation warnings, ice reports and warnings generated by the USCG-conducted International Ice Patrol, and other similar information not provided by NAVTEX. SafetyNET works similarly to NAVTEX in areas outside NAVTEX coverage.

The International SafetyNET Service, the Information Provider forward the MSI for a given area to an Inmarsat Land Earth Station (LESs), for broadcasting via the satellite network over an entire Inmarsat ocean region; consequently vessels can receive SafetyNET MSI anywhere in that Ocean region, irrespective of their distance from the LES / Information Provider.

CHAPTER 3 - METEOROLOGICAL BROADCASTS BY RADIO-FACSIMILE

This part contains the facsimile broadcast transmissions of meteorological charts of interest to shipping and fisheries provided by some Members.

CHAPTER 4 – METEOROLOGICAL BROADCASTS BY RADIOTELEGRAPHY AND RADIOTELEPHONY

This part contains the broadcast schedules of weather and sea bulletins issued throughout the world by radiotelephony and radiotelegraphy, for shipping and other marine use. This Chapter provides information on maritime stations: eg NAVTEX stations, Marine Rescue Co-ordination Centres, Other maritime stations and Commercial Stations.

CHAPTER 5 - VISUAL STORM WARNING SIGNALS

This part contains information on the systems of visual storm warning signals adopted by the various maritime countries.

Visual storm warning signals are hoisted, when applicable, at ports for the benefit of shipping and other marine operations.

CHAPTER 6 – FOCAL POINT CONTACT INFORMATION

This Chapter provides contact information for :

- National contact points for WMO GMDSS marine broadcast system
- Ship weather routing services
- Port Meteorological Offices: While in port, the user may obtain advice or assistance in meteorological matters by personal contact with the Port Meteorological Officer (PMO) or the meteorological office established for the purpose either at the port itself or at a location outside the port.

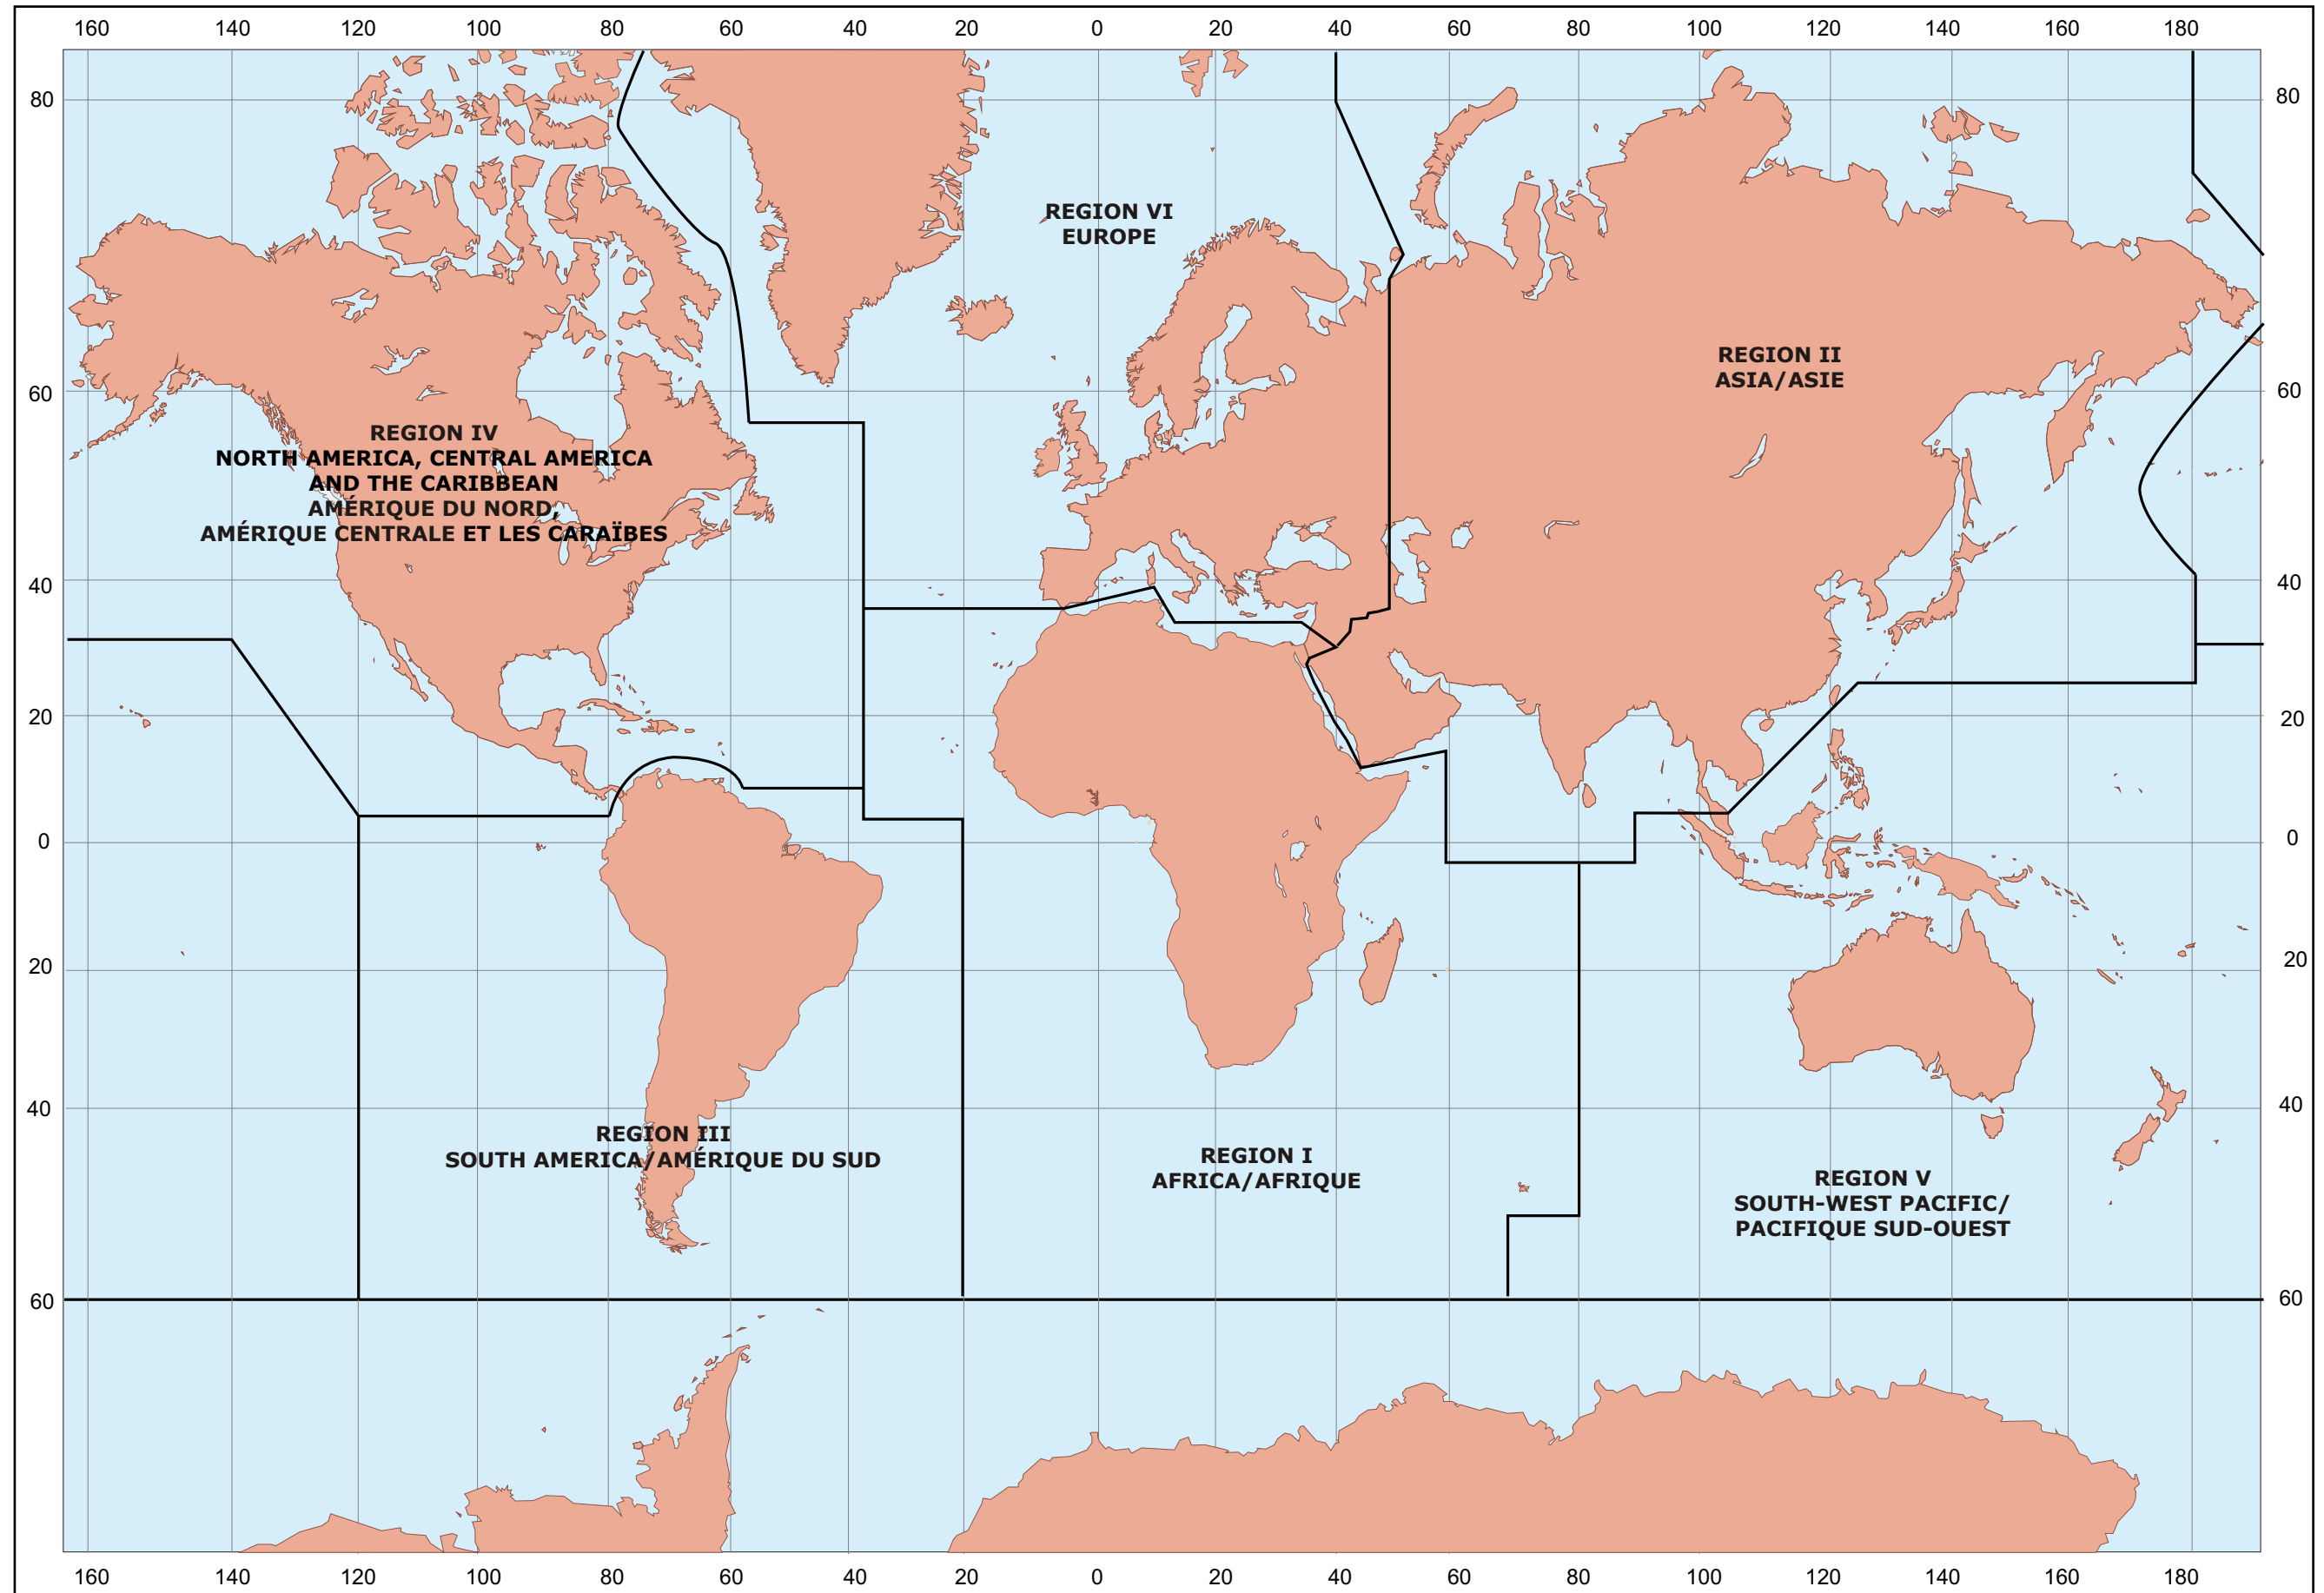

Notification of Changes

In seeking to maintain a high standard of accuracy in the material published in *Volume D*, the WMO Secretariat depends entirely on the goodwill of the meteorological services throughout the world. Their co-operation in keeping the Secretariat fully informed of all changes is a decisive factor in attaining this aim.

General Disclaimer

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the World Meteorological Organization concerning the legal status of any country, territory, city or area of its authorities, or concerning the delimitation of its frontiers or boundaries.

LIMITS OF METAREAS

Co-ordinates for GMDSS METAREAS

METAREA Coordinates

- I** The North Atlantic Ocean east of 35°W, from 48°27'N to 75°N including the North Sea and Baltic Sea sub-area.
- II** Atlantic waters east of 35°W, from 7°N to 48°27'N, and east of 20°W from 7°N to 6°S, including the Straits of Gibraltar.
- III** The Mediterranean and Black Seas, east of the Straits of Gibraltar.
- IV** The western part of the North Atlantic Ocean eastwards of the North American coast to 35°W, from 7°N to 67°N, including the Gulf of Mexico and Caribbean Sea.
- V** Atlantic waters west of 20°W from 35°50'S to 7°N, narrowing in the coastal strips at the extremities to the Uruguay/Brazil frontier in 33°45'S and the French Guyane/Brazil frontier in 4°30'N.
- VI** The South Atlantic and Southern Oceans south of 35°50'S, from 20°W to the longitude of Cape Horn, 67°16'W.
- VII** The South Atlantic and Southern Oceans south of 6°S from 20°W to the coast of Africa, thence south to the Cape of Good Hope; the South Indian and Southern Oceans south of 10°30'S from the Cape to 55°E, thence south of 30°S to 80°E.
- VIII(N)** The area of the Indian Ocean enclosed by lines from the Indo-Pakistan frontier in 23°45'N 68°E to 12°N 63°E, thence to Cape Gardafui; the East African coast south to the Equator, thence to 95°E, to 6°N, thence NE'wards to the Myanmar/Thailand frontier in 10°N 98°30'E.
- VIII(S)** The East African coast from the equator south to 10°30'S, thence to 55°E, to 30°S, to 95°E, to the Equator, to the east African coast.
- IX** The Red Sea, Gulf of Aden, Arabian Sea and Persian Gulf, north of Area VIII.
- X** The South Indian and Southern Oceans east of 80°E and south of 30°S to 95°E, to 12°S, to 127°E; thence the Timor Sea, South Pacific and Southern Oceans south of 10°S to 141°E to the equator, to 170°E, to 29°S, thence SW'wards to 45°S in 160°E, then the 160°E meridian.
- XI** The Indian Ocean, China Sea and North Pacific Ocean northward of Area X and on the equator to longitude 180°, eastward of Area VIII and the Asian continent to the North Korea/Russian Federation frontier in 42°30'N 130°E, thence to 135°E, NE'wards to 45°N 138°E, to 45°N 180°.
- XII** The eastern part of the Pacific Ocean, west of the North and South American coast and east of 120°W, from 3°24'S to the equator, thence to 180°, to 50°N thence NW'wards to 53°N 172°E, NE'wards following the marine frontier between USA and Russian Federation waters to 67°N.
- XIII** Sea areas enclosed north of area XI and west of Area XII; also all Arctic waters from 170°W westwards to 20°E.

- XIV** The South Pacific and Southern Oceans south of the equator, bounded by Area X to the west, the equator to the north and 120°W to the east.
- XV** The South Pacific and Southern Oceans south of 18°21'S following the coast of Chile to the longitude of Cape Horn in 67°16'W, and 120°W.
- XVI** The South Pacific Ocean between 18°21'S and 3°24'S bounded by the coast of Peru and 120°W.
- XVII** The Arctic Ocean
Bound by: 67°00'N 168°58'W, 90°00'N 168°58'W, 90°00'N 120°00'W, to south to the Canadian coastline along the 120°00'W meridian. The Arctic Ocean from south-west corner 67°00'N, 44°00'E to north-east corner 80°00'N, 165°00'W.
- XVIII** The Arctic Ocean
Bound by: A position on the Canadian coastline at the 120°W meridian to 90°N 120°W, 90°N 035°W, 67°N 035°W.
- XIX** The Arctic Ocean
From a position on the Norwegian coastline at 65°N to 65°N 005°W, 75°N 005°W, West to a position on the Greenland coastline.
From the border between Norway and Russia (Inland) to: 69°47'68"N 030°49'16"E, 69°58'48"N 031°06'24"E, 70°22'00"N 031°43'00"E, 71°00'00"N 030°00'00"E.
From this geographical position (71°00'00"N - 030°00'00"E) further north along the 030°00'00"E meridian to: 90°00'00"N 030°00'00"E, 90°00'00"N 035°00'00"W, South to the Greenland coastline along the 035°00'00W meridian
- XX** The Arctic Ocean:
From the border between Norway and Russia (Inland) to: 69°47'68"N 030°49'16"E, 69°58'48"N 031°06'24"E, 70°22'00"N 031°43'00"E, 71°00'00"N 030°00'00"E.
From this geographical position (71°00'00"N - 030°00'00"E) further north along the 030°00'00"E meridian to: 90°00'00"N 030°00'00"E, 90°00'00"N 125°00'00"E, then south to the Russian Federation coastline along the 125°00'00"E meridian.
- XXI** The Arctic Ocean
From a geographical position on the Russian Federation coastline at the 125°00'00"E meridian to: 90°00'00"N 125°00'00"E, 90°00'00"N 168°58'00"W, 67°00'00"N 168°58'00"W, West to a geographical position on the Russian Federation coastline along the 67°00'00"N parallel

Forecast Areas - Zones de prévisions

(1) Sub-areas used in the CMRE Buenos Aires forecasts:

Boundaries of coastal forecast areas I, II and III

Area I:

Covers the Río de la Plata, from the mouths of the Paraná and Uruguay rivers up to an imaginary line joining PUNTA DEL ESTE (Uruguay - 34° 58'062 S, 54° 57'032W) and PUNTA RASA DEL CABO SAN ANTONIO (Argentina - 36°17'23"S, 56°47'03"W), and the area of the Atlantic Ocean between the two geographical points and 300 nautical miles out to sea.

Area II:

The Atlantic Ocean between 36°17'23"S and 55°00'00"S. Coastal area extends 300 nautical miles offshore.

This extensive area is subdivided into variable, smaller coastal areas in accordance to the meteorological situation at the moment of the issuing of the Bulletin. The northern and southern boundaries of each subdivision is expressed in degrees latitude.

Area III:

Islas Malvinas coasts

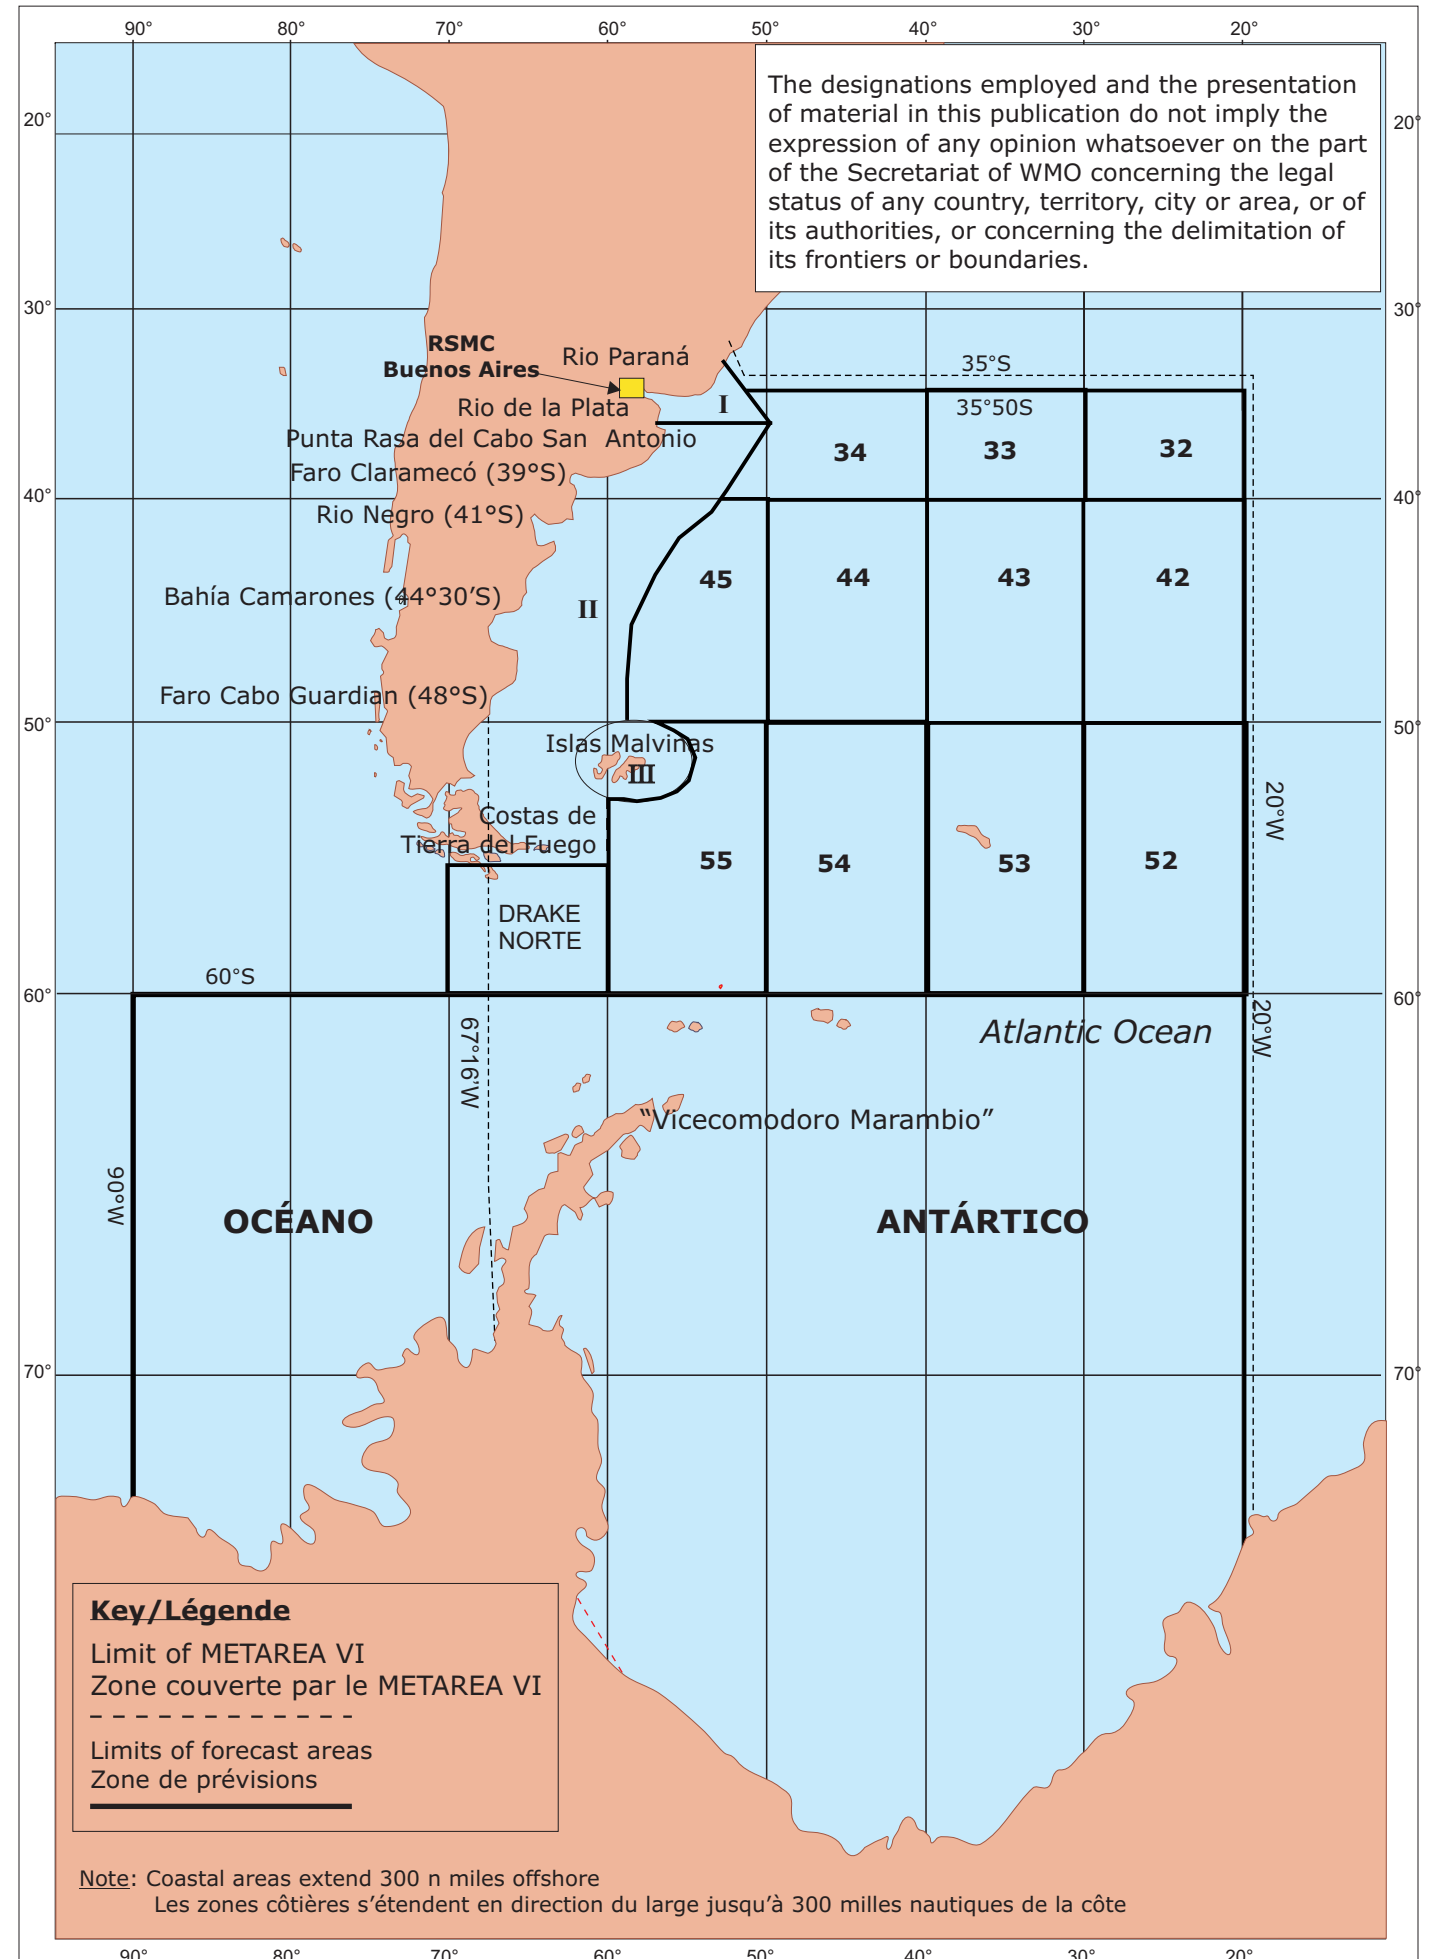

(2) Sub-areas used in the CMAVM forecasts:

(a) COASTAL AREAS:

Mar de la Flota coastal area
Gerlache Strait
Margarita Bay area
Erebus and Terror Gulf area

(b) OCEANIC AREAS:

Drake South (south of 60° S)
Northern Bellingshausen Sea
Southern Bellingshausen Sea
Northern Weddell Sea
Southern Weddell

Notes:

- (1) Scheduled bulletins and warnings for the western Mediterranean Sea are prepared by France.
 - (2) Forecast for area 30°S-50°E / 50°S-80°E and tropical cyclone warnings are prepared by La Réunion.
 - (3) Tropical Cyclone warnings if any issued by La Réunion as unscheduled broadcasts.
 - (4) Local time. The Bass Strait bulletins are Coastal Warnings and Forecasts transmitted only to SafetyNET Coastal Area D in Navarea X.
 - (5) Northern Territory bulletins are Coastal Warnings and Forecasts transmitted only to SafetyNET Coastal Areas G and H in Navarea X.
 - (6) Local time. Western Australia bulletins are Coastal Warnings and Forecasts transmitted only to SafetyNET Coastal Areas F and G in Navarea X.
 - (7) Scheduled bulletins and warnings for south of the equator prepared by Australia.
 - (8) Implementation of the meteorological forecast and warning components of the GMDSS for Arctic METAREAs is ongoing and is expected to become fully operational by 1 June 2011.
 - (9) The USA issues marine forecasts for its jurisdictional coastal and offshore waters north of Alaska.
 - (10) Forecasts for sections of METAREA XVII north of 75°N and east of 141°W (Sea Area A4) are broadcast by Canadian Coast Guard radio from Iqaluit NU via High Frequency Narrow Band Direct Printing (HF NBDP), on a frequency of 8416.5 kHz. Broadcast times are 0330 and 1530 UTC during the operational season.
 - (11) Forecasts for sections of METAREA XVIII north of 75°N (Sea Area A4) are broadcast by Canadian Coast Guard radio from Iqaluit NU via High Frequency Narrow Band Direct Printing (HF NBDP), on a frequency of 8416.5 kHz. Broadcast times are 0330 and 1530 UTC during the operational season.
- *** Scheduled bulletins and warnings for south of the equator prepared by Australia.

NOTES:

- (1) Ships previously reporting through Perth (renamed to Station 12) must use SAC 1241 when sending weather reports through IOR 312
- (2) Arvi will accept code 41 reports from within Metarea VIII(N) only.
- (3) Via Nakhodka

CHAPTER 3

**METEOROLOGICAL BROADCASTS BY RADIO-FACSIMILE
DIFFUSIONS MÉTÉOROLOGIQUES PAR RADIO FAC-SIMILÉ**

Chapter 3 - Meteorological Broadcasts by Radio-Facsimile

This part contains the facsimile broadcast transmissions of meteorological charts of interest to shipping and fisheries. The following presentation has been adopted for each schedule:

KENYA

Nairobi

HKNC

I. TECHNICAL SPECIFICATIONS — CARACTÉRISTIQUES TECHNIQUES

Frequency	Band Width Largeur de bande	Call Sign Indicatif d'appel	Class of Emission Catégorie d'émission	Power Supplied to the Antenna Puissance fournie à l'antenne	Hours of Operation Heures d'utilisation
9 043 kHz	White/black ± 400 kHz	5YE1	F3C	10 kW	H24
17 445kHz	White/black ± 400 kHz	5YE1	F3C	10 kW	1430-0230
4 610 kHz	White/black ± 400 kHz	5YE1	F3C	10 kW	Jul-Dec

II. MAP AREA — ZONE COUVERTE PAR LA CARTE

Area / Zone	Area Coverage / Zone Couverte	Projection	Scale / Échelle
1.	05N - 60N, 110W - 160W	Mercator	1: 25.000.000 at 22°30'

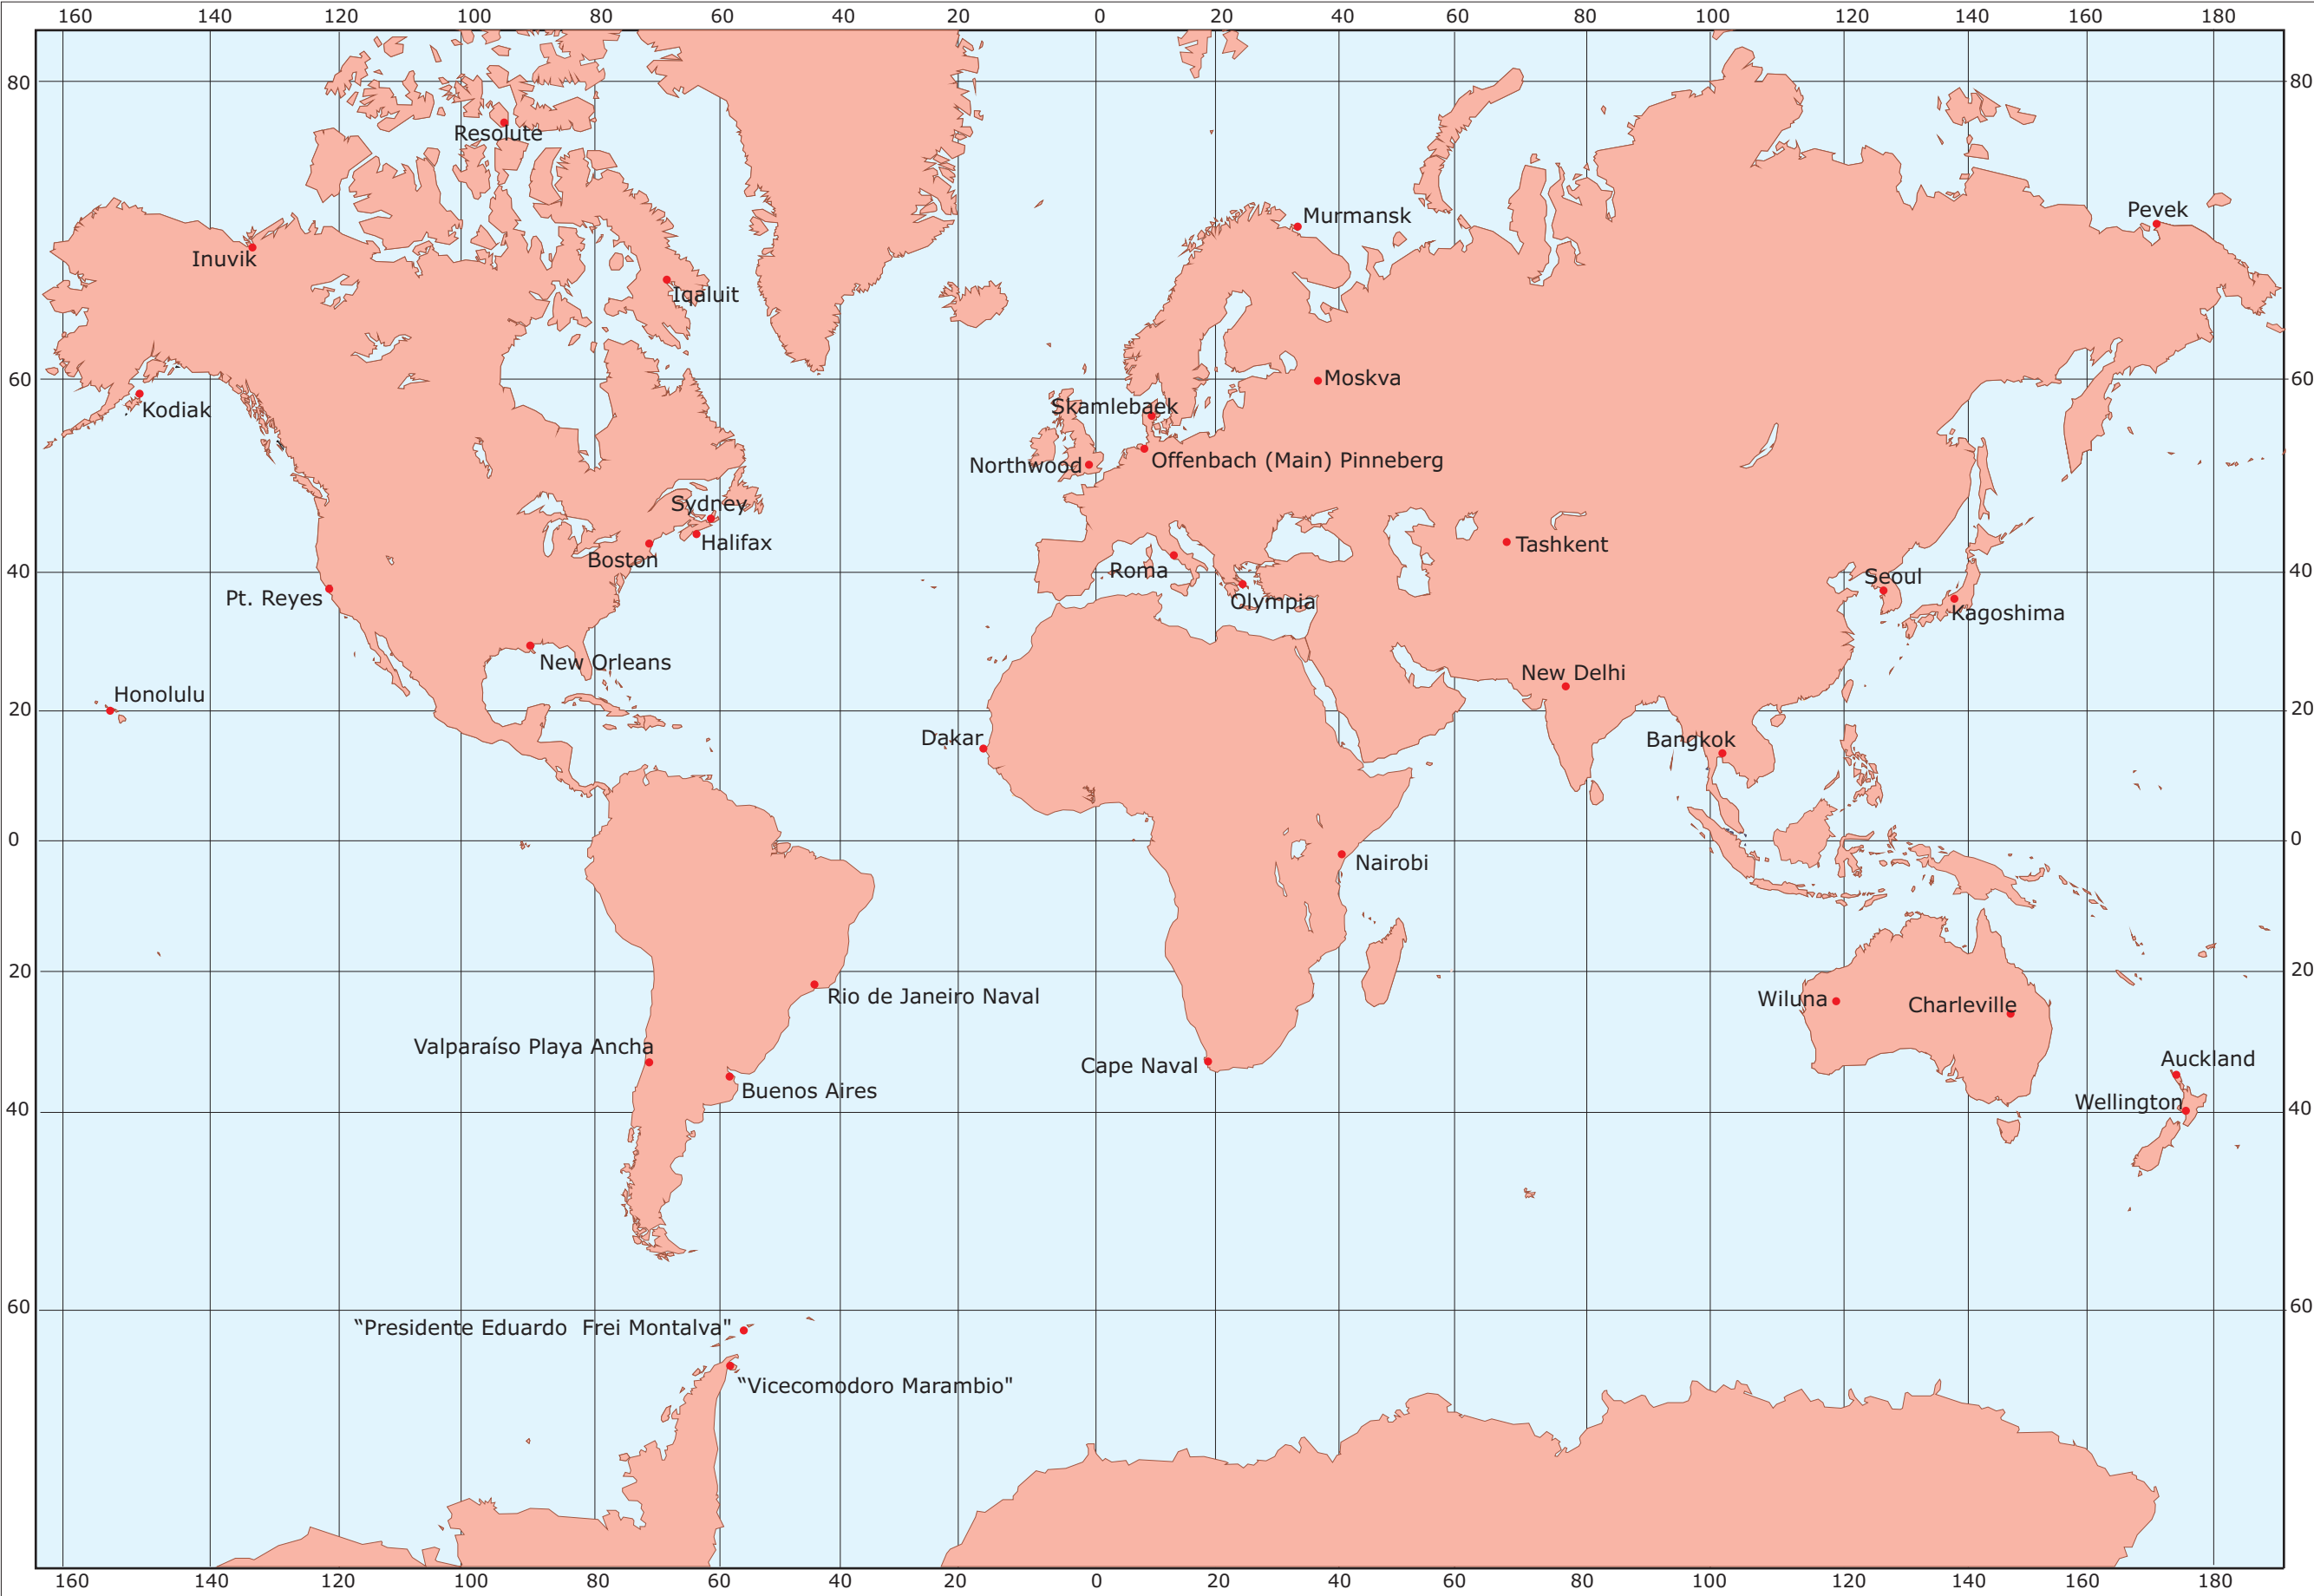

III. CONTENTS OF BROADCAST SCHEDULES — CONTENU DES PROGRAMMES DE DIFFUSION

Transmission Time (Time Group) Heure de transmission (Groupe horaire) (UTC)	TTAAii	CCCC	Details of Chart Renseignements figurant sur la carte	Map Area Zone couverte par la carte	Drum Speed Vitesse du cylindre
1345(06) 1708(12)		EDZW	E/B	Indian Ocean analysis	120/576
0530(00) 1730(12)		EDZW	A	250 hPa analysis	120/576
1121 2200		EDZW		Ice analysis Gulf of St. Lawrence	120/576

Explanation of the radio-facsimile presentation:

KENYA	The schedules are arranged in English alphabetical order of countries, with the name of the country transmitting the broadcast schedule given at the top of the page.												
Nairobi HKNC	The name of the transmitting centre. CCCC - International four letter location indicator of the centre originating the chart.												
Area coverage	The area in which the broadcast is intended to bereceived. This can include geographical co-ordinates or a geographical area.												
I	<table border="0"> <tr> <td style="vertical-align: top;">(a) Frequency</td> <td style="vertical-align: top;">Refers to the centre value about which the frequency shift takes place.</td> </tr> <tr> <td style="vertical-align: top;">(b) Band width</td> <td style="vertical-align: top;">Frequency shift</td> </tr> <tr> <td style="vertical-align: top;">(c) Call Sign</td> <td style="vertical-align: top;">Can either be the Name of the call sign of the Station</td> </tr> <tr> <td style="vertical-align: top;">(d) Class of Emission</td> <td style="vertical-align: top;">This column specifies the class of emission of the frequencies indicated under the column "Frequency used". The following symbols are used</td> </tr> </table> <p>AMPLITUDE MODULATION</p> <p>A1A Telegraphy without the use of a modulating audio frequency (by on-off keying)</p> <p>A2A Telegraphy by the on-off keying of an amplitude-modulating audio frequency of audio frequencies, or by the on-off keying of the modulated emission (special case: an unkeyed emission amplitude modulated)</p> <p>A3E Telephony, double sideband</p> <p>R3E Telephony, single sideband, reduced carrier</p> <p>H3E Telephony, single sideband, full carrier</p> <p>J3E Telephony, single sideband, suppressed carrier</p> <p>B9W Combination of telephony and telegraphy (two independent sidebands)</p> <p>FREQUENCY MODULATION</p> <p>F1B Telegraphy by frequency shift keying without the use of a modulating audio frequency, one of two frequencies being emitted at any instant</p> <p>F3E Telephony, by direct frequency modulation of the carrier</p>	(a) Frequency	Refers to the centre value about which the frequency shift takes place.	(b) Band width	Frequency shift	(c) Call Sign	Can either be the Name of the call sign of the Station	(d) Class of Emission	This column specifies the class of emission of the frequencies indicated under the column "Frequency used". The following symbols are used				
(a) Frequency	Refers to the centre value about which the frequency shift takes place.												
(b) Band width	Frequency shift												
(c) Call Sign	Can either be the Name of the call sign of the Station												
(d) Class of Emission	This column specifies the class of emission of the frequencies indicated under the column "Frequency used". The following symbols are used												
(f) Hours of operation	When appropriate this column indicates the hours of operation, in UTC, of the various frequencies. Any seasonal variations are also shown eg H24, 0600-1600, Summer, June-December												
II	<table border="0"> <tr> <td style="vertical-align: top;">(a) Area</td> <td style="vertical-align: top;">The map area refers to table "II. MAP AREA"</td> </tr> <tr> <td style="vertical-align: top;">(b) Projection</td> <td style="vertical-align: top;">Projection type eg Mercator, Lambert's Conical Orthomorphic, Polar Stereographic</td> </tr> <tr> <td style="vertical-align: top;">(c) Scale</td> <td style="vertical-align: top;">Indicates the scale of the map eg. 1:6,000,000 true at 60°N (45 cm x 55 cm)</td> </tr> </table>	(a) Area	The map area refers to table "II. MAP AREA"	(b) Projection	Projection type eg Mercator, Lambert's Conical Orthomorphic, Polar Stereographic	(c) Scale	Indicates the scale of the map eg. 1:6,000,000 true at 60°N (45 cm x 55 cm)						
(a) Area	The map area refers to table "II. MAP AREA"												
(b) Projection	Projection type eg Mercator, Lambert's Conical Orthomorphic, Polar Stereographic												
(c) Scale	Indicates the scale of the map eg. 1:6,000,000 true at 60°N (45 cm x 55 cm)												
III	<table border="0"> <tr> <td style="vertical-align: top;">(a) Transmission time</td> <td style="vertical-align: top;">This column gives the time at which the transmission is scheduled to begin. 0600(00) The times at which the observations contained in the chart were made are presented in parentheses.</td> </tr> <tr> <td style="vertical-align: top;">(b) TTAAii</td> <td style="vertical-align: top;">Abbreviated heading - data type and geographical designators.</td> </tr> <tr> <td style="vertical-align: top;">(c) CCCC</td> <td style="vertical-align: top;">International four letter location indicator of the centre originating the chart.</td> </tr> <tr> <td style="vertical-align: top;">(d) Map area</td> <td style="vertical-align: top;">For each chart transmitted this column gives a letter/digit which corresponds to the area covered. The map areas corresponding to the letters are indicated at the beginning of the schedule. See table II – Map Area</td> </tr> <tr> <td style="vertical-align: top;">(e) Details of chart</td> <td style="vertical-align: top;">This column specifies details of the content of the chart eg: H+24 surface prognosis / Indian Ocean analysis / Test chart</td> </tr> <tr> <td style="vertical-align: top;">(e) Drum speed</td> <td style="vertical-align: top;">This relates to the drum speed, in revolutions per minute, and the Index of co-operation, which is generally 576. For complementary information see "WMO Publication No. 386 - Manual on the Global Telecommunication System, Volume"</td> </tr> </table>	(a) Transmission time	This column gives the time at which the transmission is scheduled to begin. 0600(00) The times at which the observations contained in the chart were made are presented in parentheses.	(b) TTAAii	Abbreviated heading - data type and geographical designators.	(c) CCCC	International four letter location indicator of the centre originating the chart.	(d) Map area	For each chart transmitted this column gives a letter/digit which corresponds to the area covered. The map areas corresponding to the letters are indicated at the beginning of the schedule. See table II – Map Area	(e) Details of chart	This column specifies details of the content of the chart eg: H+24 surface prognosis / Indian Ocean analysis / Test chart	(e) Drum speed	This relates to the drum speed, in revolutions per minute, and the Index of co-operation, which is generally 576. For complementary information see "WMO Publication No. 386 - Manual on the Global Telecommunication System, Volume"
(a) Transmission time	This column gives the time at which the transmission is scheduled to begin. 0600(00) The times at which the observations contained in the chart were made are presented in parentheses.												
(b) TTAAii	Abbreviated heading - data type and geographical designators.												
(c) CCCC	International four letter location indicator of the centre originating the chart.												
(d) Map area	For each chart transmitted this column gives a letter/digit which corresponds to the area covered. The map areas corresponding to the letters are indicated at the beginning of the schedule. See table II – Map Area

CCCC: AMMC
 Region: V

Scanning line density: 3.8 lines/mm. ning frequency 120 lines/minute

Start Signals: Carrier modulated by 300 Hz for five (5) seconds.

Phasing signals: BLACK signal interrupted by one (1) WHITE phasing pulse per revolution of the facimile drum, transmitted for at least thirty (30) seconds prior to the transmission of the chart.

Stop signals: Carrier modulated by 450 Hz for five (5) seconds followed by ten (10) seconds of BLACK signal will be transmitted.

NOTES:

This schedule of chart and text transmission is subject to short notice change according to the requirements of the Canadian Forces.

The geographical area of coverage for the ice charts varies according to season. The typical areas are: Gulf of St. Lawrence, East Newfoundland waters, Labrador Coast, Hudson Strait, Davis Strait and Baffin Bay. The Canadian Ice Service prepares all ice charts.

Transmission Time (Time Group) (UTC)	TTAAii	CCCC	Details of Chart	Map Area	Drum Speed
0028 0003(2) 1243 1308 1333		EKMI/EKC	Ice chart	2 (or 1)	120/576
0943 1008 1153 1218 1803 1828		EKMI/EKC	Ice chart	1	120/576

NOTES :

(1) Call sign is transmitted for a period of 2 minutes immediately prior to chart transmission.

(2) Either one of chart #2 is transmitted if available, otherwise chart #1 is transmitted.

(3) Chart #1 covers the southern tip of Greenland. Chart #2 is a section, which may cover any area north of 62 degrees north according to need and time of year either on west or east coast of Greenland.

GERMANY

CCCC: EDZW
Region: VI

Footnotes:

* If required during the arctic summer times.

- (1) If the manually modified chart is not available then the automatically processed chart will be broadcast where the heading "ii" = "98" instead of "ii" = "89"
- (2) Issued by: Canadian Ice Service Ottawa or USCG International Ice Patrol
- (3) Issued by: "Bundesamt fuer Seeschiffahrt und Hydrographie"
- (4) Irregularly, only if required because of the ice conditions
- (5) Rebroadcast of Norrkoping (ESWI) transmissions

Notes:

Abbreviations used in column 'Contents' have the following meaning:

GME = Global model (31 layers, 60 km)

H = Contour lines (gpdam)

MSL = Mean sea level

T = IsothermC

U = Relative humidity (%)

NOTES:

STREAMLINES ARE LINES OF CONSTANT WIND DIRECTION.

WIND SPEEDS ARE GIVEN BY WIND BARBS INDEPENDENT OF STREAMLINES.

THE SIGNIFICANT CLOUD FEATURES CHARTS DEPICT CLOUD FEATURES BASED UPON IMAGES FROM THE VARIOUS GEOSTATIONARY AND POLAR ORBITING SATELLITES OVER THE PACIFIC.

ABBREVIATIONS ON THESE CHARTS INCLUDE:

AC - ALTOCUMULUS; AS - ALTOSTRATUS; BKN - BROKEN; CB - CUMULONIMBUS; CC - CIRROCUMULUS; CI - CIRRUS; CS - CIRROSTRATUS; CU - CUMULUS; FEW - FEW; ISOL - ISOLATED; LYRS - LAYERS; NS - NIMBOSTRATUS; OVC - OVERCAST; SC - STRATO-CUMULUS; SCT - SCATTERED; TCU - TOWERING CUMULUS; TSTM - THUNDERSTORM.

RADIOFAX FREQUENCIES ARE ASSIGNED FREQUENCIES. TO CONVERT TO CARRIER FREQUENCIES, SUBTRACT 1.9 KHZ FROM THE ASSIGNED FREQUENCIES.

CHAPTER 4

**METEOROLOGICAL BROADCASTS
BY RADIOTELEGRAPHY AND RADIOTELEPHONY**

**DIFFUSIONS MÉTÉOROLOGIQUES
EN RADIOTÉLÉGRAPHIE ET RADIOTÉLÉPHONIE**

Chapter 4- Meteorological Broadcasts by Radiotelegraphy and Radiotelephony

This part contains the broadcast schedules of weather and sea bulletins issued throughout the world by radiotelephony and radiotelegraphy, for shipping and other marine use. The following presentation has been adopted for each schedule:

KENYA

Cape Town (ZSC)	33° 53'S 18° 30'E	HKNC
Gris Nez (CROSS)	50° 52'N 1° 35'E	
Irakleio Radio (Crete) (SVH)	35° 20'N 25° 7'E	

I. TECHNICAL SPECIFICATIONS CARACTÉRISTIQUES TECHNIQUES

(a)	(b)	(c)	(d)	(e)	(f)
A	8 514 kHz	RT (HF)			Summer
B	Ch 02	VHF	Wicklow Head	52° 58'N 6° 00'W	H24
C	2 663 kHz	RT (MF)			Jun-Dec

II. CONTENTS OF BROADCAST SCHEDULES CONTENU DES PROGRAMMES DE DIFFUSION

(a)	(b)	(c)	(d)
A	1300, 2000	In Swedish	Contents of Bulletin
A-C	1000, 1410	In Portuguese	Contents of Bulletin

Explanation of the presentation:

I KENYA <div style="border: 1px solid black; padding: 2px; display: inline-block;">CCCC</div>	<p>The schedules are arranged in English alphabetical order of countries, with the name of the country transmitting the broadcast schedule given at the top of the page.</p> <p>CCCC – The international four letter location indicator of the centre originating the chart.(see Annex I)</p>
<div style="background-color: red; color: white; padding: 2px;">Cape Town (ZSC)</div> <div style="background-color: cyan; color: black; padding: 2px;">Gris Nez (CROSS)</div> <div style="background-color: orange; color: black; padding: 2px;">Irakleio Radio (Crete) (SVH)</div> <div style="background-color: lime; color: black; padding: 2px;">Radiodiffusion Télévision Algérienne</div>	<p>Name of station (call sign) and station position</p> <p>NAVTEX</p> <p>Marine Rescue Co-ordination Centre</p> <p>Other maritime Station</p> <p>Commercial Station</p>
<p style="text-align: center;">Area coverage</p>	<p>This column provides the geographical limits of the area covered by the weather forecasts. For warnings, the area affected is specified in the message</p>
II (a) A <hr/> (b) 8 514 kHz <hr/> (c) RT (HF) <hr/> (d) Wicklow Head <hr/> (e) 52°58'N 6°00'W <hr/> (f) Hours of operation	<p>Letter used to identify the frequency in the broadcast schedule</p> <p>Frequency used</p> <p>Mode of Transmission:</p> <p>VHF = Very High Frequency</p> <p>RT (MF) = Radio-Telephone (Medium Frequency)</p> <p>RT (HF) = Radio-Telephone (High Frequency)</p> <p>Radio-Telex = F1B narrow band direct printing</p> <hr/> <p>Remote transmitting site NAME</p> <hr/> <p>Remote transmitting site POSITION</p> <hr/> <p>When appropriate this column indicates the hours of operation, in UTC, of the various frequencies. Any seasonal variations are also shown</p> <p>eg H24, 0600-1600, Summer, June-December</p>
II (a) A A-C <hr/> (b) 1300, 2000	<p>Frequency identifier (see Frequency table II)</p> <p>Transmission time: This column gives the time at which the broadcast of the bulletin begins, or the times of beginning and ending of the broadcast if both have been specified.</p> <p>When a broadcast (e.g. a storm warning) is repeated several times during the day at fixed hours, the symbol H indicates the whole hours. When the broadcast does not begin exactly on the hour, the minutes are added as follows: H+10. The hours to which H refers are specified, where necessary. The "end of silence period" frequently mentioned under this column or in notes or footnotes referring to this column is H+18, H+48 for morse broadcasts and H+03, H+33 for radiotelephony broadcasts.</p>
(c) In English	<p>Language or code form (FM system) used:</p> <p>This column specifies the language used for messages broadcast in clear (plain language), or the FM code number for coded messages. Full information on the FM system of code forms is given in WMO Publication No. 306 - <i>Manual on Codes</i>.</p>
(d) Contents of the bulletins	<p>This column specifies the contents of the bulletins and provides such information as: subdivision of the bulletin into parts, forecast areas, period of validity of forecast, types of analysis etc., as well as any other clarification on the nature of information broadcast which seems desirable</p>

Coastal Waters Bulletins

"Coastal Waters" bulletins extends up to 20 n miles from the coast. The area covered extends along the coasts from Metropolitan France, Corsica included.

BMS are broadcast whenever the wind has risen to or is forecast to rise to Gale force 7 within coastal waters (BMS Coastal) instead of Gale force 8 in high seas and distant waters (BMS Offshore).

Regular bulletins and BMS are broadcast on VHF, in French. They consist of a repeat of any BMS warnings in force, a description of the general situation, a detailed forecast for the following 24 hours (actual situation, wind, sea state, visibility), further weather trends dependent on the forecast and where appropriate reports from signal stations.

Broadcasts transmitted on Channel 16 before being broadcast on the scheduled frequency.

BMS Coastal bulletins are systematically transmitted at every hour, starting at H+03 (simultaneous broadcasting is not possible).

Bulletin area Station Transmitter – VHF canal – times of broadcast

Coastal Waters Bulletins

"Coastal Waters" bulletins extends up to 20 n miles from the coast. The area covered extends along the coasts from Metropolitan France, Corsica included.

BMS are broadcast whenever the wind has risen to or is forecast to rise to Gale force 7 within coastal waters (BMS Coastal) instead of Gale force 8 in high seas and distant waters (BMS Offshore).

Regular bulletins and BMS are broadcast on VHF, in French. They consist of a repeat of any BMS warnings in force, a description of the general situation, a detailed forecast for the following 24 hours (actual situation, wind, sea state, visibility), further weather trends dependent on the forecast and where appropriate reports from signal stations.

Broadcasts transmitted on Channel 16 before being broadcast on the scheduled frequency.

BMS Coastal bulletins are systematically transmitted at every hour, starting at H+03 (simultaneous broadcasting is not possible).

CHAPTER 5

VISUAL STORM WARNING SIGNALS SIGNAUX VISUELS D'AVIS DE TEMPÊTE

Chapter 5 - VISUAL STORM WARNING SIGNALS

1. CONTENTS

As stipulated in the International Convention for the Safety of Life at Sea (Chapter V, Regulation 4 (b) (i)), Countries concerned should display at coastal points appropriate visual storm warning signals when applicable.

WMO Technical Regulationsspecifies that any Member establishing a new visual storm warning signal system should adopt the international system.

This part contains information on the systems of visual storm warning signals adopted by the various maritime countries. Where no such signals are used, a statement to this effect is given. The contents of this part are

based on official notifications from the countries concerned.

Annex I - International System of Visual Storm Warning Signals

Annex II - National Systems of Visual Storm Warning Signals (Day Signals)

Annex III - National Systems of Visual Storm Warning Signals (NightSignals)

2. LAYOUT

Each country is arranged in alphabetical order according to their English names.

Chapter 5 - Visual Storm Warning Signals

Annex I

INTERNATIONAL SYSTEM OF VISUAL STORM WARNING SIGNALS

Day signals Signaux de jour	Description of wind force Description de la force du vent	Night signals Signaux de nuit	Remarks Remarques
	Near gale any direction. / Grand frais toute direction		This signal applies to wind force 7 Beaufort (28-33 kt) (see Note 3). / Ce signal s'applique au vent de force Beaufort 7 (28-33 oeuds) (voir la Note 3).
	Gale or storm commencing in the NW quadrant. / Coup de vent ou tempête commençant dans le quadrant NW.		This cone applies to winds of force 8 Beaufort (34-40 kt) or more (see Note 4). / Ce cône représente les vents de force Beaufort 8 (34-40 nœuds) ou au-delà (voir la Note 4).
	Gale or storm commencing in the SW quadrant. / Coup de vent ou tempête commençant dans le quadrant SW.		This cone applies to winds of force 8 Beaufort (34-40 kt) or more (see Note 4). / Ce cône représente les vents de force Beaufort 8 (34-40 noeuds) ou au-delà (voir la Note 4).
	Gale or storm commencing in the NE quadrant. / Coup de vent ou tempête commençant dans le quadrant NE.		This cone applies to winds of force 8 Beaufort (34-40 kt) or more (see Note 4). / Ce cône représente les vents de force Beaufort 8 (34-40 Noeuds) ou au-delà (voir la Note 4).
	Gale or storm commencing in the SE quadrant. / Coup de vent ou tempête commençant dans le quadrant SE.		This cone applies to winds of force 8 Beaufort (34-40 kt) or more (see Note 4). / Ce cône représente les vents de force Beaufort 8 (34-40 noeuds) ou au-delà (voir la Note 4).
	Wind expected to veer (clockwise change in direction). / Saute de vent (changement de direction dans le sens des aiguilles d'une montre)		Flags may be of any suitable colour. / Les pavillons peuvent être de toute couleur appropriée
	Wind expected to back (counter-clockwise change in direction). / Saute de vent (changement de direction dans le sens contraire des aiguilles d'une montre).		Flags may be of any suitable colour. / Les pavillons peuvent être de toute couleur
	Hurricane (or local synonym) with wind of force 12 Beaufort (64 kt and above) from any direction. / Ouragan (ou synonyme local) avec vent de force Beaufort 12 (64 noeuds et plus) dans toute direction.

Day	Night	Remarks

ANGOLA

See International Visual Storm Warning Signals.

ANTIGUA AND BARBUDA

40a	40a
-----	-----

Tropical disturbance reported; likely to affect the island.

Signals used in Antigua.

41a	41a
-----	-----

Hurricane warning. Danger expected.

Signals used in Antigua.

ARGENTINA

No visual storm warning signals at present (the use of the international system is planned).

AUSTRALIA

* At present there is no national system of visual storm warning signals in general use in Australia.

The control of the various major shipping ports in Australia is vested in various State and Local Authorities, some of whom exhibit local signals.

AZORES (PORTUGAL)

15a	15a
-----	-----

Hurricane

BANGLADESH

2a+	2a+
-----	-----

III. Danger Signal Number Three.

A storm (of gale force associated sustained winds 39-54 m.p.h. (34-47 knots)) will soon strike you. All vessels are to seek shelter immediately.

These signals are used for river ports, river and police stations in Bangladesh.

10a*	10a*
------	------

II. Distant Warning Signal Number Two.

A storm has formed (cyclonic storm with surface winds 39-54 m.p.h. (34-47 knots))

These signals indicate that ships may be exposed to danger after leaving the harbour.

3a*	3a*
-----	-----

III. Local Cautionary Signal Number Three.

The port is threatened by squally weather (cyclonic circulation with surface winds 25-31 m.p.h. (22-27 knots)) or squalls due to Nor'Westers)

These signals indicate that the port itself and the ships in it are in danger.

2a*	2a*
-----	-----

IV. Local Warning Signal Number Four.

The port is threatened by a storm, but it does not appear that the danger is as yet sufficiently great to justify extreme measures of precaution (cyclonic circulation with surface winds 32-38 m.p.h. (28-33 knots))

These signals indicate that the port itself and the ships in it are in danger.

17a*	17a*
------	------

V. Danger Signal Number Five.

The port will experience severe weather from a storm, of slight or moderate intensity, that is expected to cross the coast to the south of the port (to the east of the port in case of Chalna) (cyclonic storm with surface winds 39-54 m.p.h. (34-47 knots))

These signals indicate that the port itself and the ships in it are in danger.

18a*	18a*
------	------

VI. Danger Signal Number Six.

The port will experience severe weather from a storm, of slight or moderate intensity, that is expected to cross the coast to the north of the port (to the west of the port in case of Chalna) (wind speed same as in Signal No. V)

These signals indicate that the port itself and the ships in it are in danger.

19a*	19a*
------	------

VII. Danger Signal Number Seven.

The port will experience severe weather from a storm, of slight or moderate intensity, that is expected to cross over or near to the port (wind speed same as in Signal No. V)

These signals indicate that the port itself and the ships in it are in danger.

20a*	20a*
------	------

VIII. Great Danger Signal Number Eight.

The port will experience severe weather from a storm, of great intensity, that is expected to cross the coast to the south of the port (to the east of the port in case of Chalna) (severe cyclonic storm with surface winds 55-73 m.p.h. (46-63 knots) or severe cyclonic storm of hurricane intensity with winds 74 m.p.h. (64 knots) or above)/

These signals indicate that the port itself and the ships in it are in danger.

SIGNALS		Specifications
Day	Night	Remarks
21a*	21a*	IX. Great Danger Signal Number Nine. The port will experience severe weather from a storm, of great intensity, that is expected to cross the coast to the north of the port (to the west of the port in case of Chalna) (wind speed same as in Signal No. VIII) These signals indicate that the port itself and the ships in it are in danger.
10a+	10a+	IV. Great Danger Signal Number Four. A violent storm (of whole gale force and above, associated sustained wind speed exceeding 54 m.p.h. (47 knots)) will soon strike you). All vessels continue taking shelter immediately These signals are used for river ports, river and police stations in Bangladesh.
1a+	1a+	II. Warning Signal Number Two. A storm 1 (of depression intensity, associated sustained winds not more than 38 m.p.h. (33 knots) or Nor'Wester squall (of wind speed exceeding 40 m.p.h. (35 knots) is likely to strike you (vessels of 65 feet and under in length are to seek shelter immediately). These signals are used for river ports, river and police stations in Bangladesh.
24a+	24a+	I. Cautionary Signal Number One. Your area is threatened by squally winds of a transient nature (Nor'Wester squall of wind speed not exceeding 40 m.p.h. (35 knots). Look out for further development. These signals are used for river ports, river and police stations in Bangladesh.
16a*	16a*	I. Distant Cautionary Signal Number One. There is a region of squally weather in which a storm may be forming (well marked low or depression with surface winds up to 38 m.p.h. (33 knots)) These signals indicate that ships may be exposed to danger after leaving the harbour.
23a*	23a*	XI. Failure of Communications. Communications with the Meteorological Warning Centre have broken down, and the local officer considers that there is danger of bad weather These signals indicate that the port itself and the ships in it are in danger.
22a*	22a*	X. Great Danger Signal Number Ten. The port will experience severe weather from a storm, of great intensity, that is expected to cross the coast over or near to the port (wind speed same as in Signal No. VIII) These signals indicate that the port itself and the ships in it are in danger.

* Signals meant for maritime ports.

+ Signals meant for river ports.

BARBADOS

45a	45a	The island is out of danger.
41a	41a	The green flag of the day signal has a white diagonal stripe. Hurricane conditions are expected within 24 hours.

BELIZE

43a	43a	(i) A tropical depression moves into or develops anywhere in the quadrant south of 21°N latitude and west of 80°W longitude, OR (ii) A tropical storm or hurricane moves into or develops anywhere in the quadrant south of 21°N latitude and between longitudes 80°W and 83°W
45a	45a	The tropical depression, tropical storm or hurricane has passed or no longer poses a threat to Belize and coastal waters.
41a	41a	A tropical storm or hurricane moves into or develops anywhere in the quadrant south of 20°N latitude and west of 85°W longitude.
40a	40a	A tropical or hurricane moves into or develops anywhere in the quadrant south of 20°N latitude and between longitudes 83°W and 85°W.

BRAZIL

See International Visual Storm Warning Signals.

CAMBODIA

No visual storm warning signals at present.

CAMEROON

See International Visual Storm Warning Signals.

SIGNALS		Specifications
Day	Night	Remarks

CHILE

9a	9a	Storm
1a	1a	Bad weather
48a	48a	Variable
47a	47a	The traffic, loading and unloading of cargo are totally suspended; lighters and tugs should make fast.
46a	46a	The traffic of small craft is suspended in the bay on account of bad weather.

Note: (a) These signals correspond to the current synoptic chart.

(b) The "Bad weather" signal should be interpreted as a forecast of N'ly winds of force 4 to 7 which hinder shipping movements in the bay: this situation is already considered threatening and, accordingly, the appropriate precautionary measures should be taken.

COSTA RICA

At present there is no national or international system of visual storm warning signal in general use in Costa Rica

COTE D'IVOIRE

See International Visual Storm Warning Signals.

DJIBOUTI

See International Visual Storm Warning Signals.

EGYPT

50a	50a	Too much sea, pilot cannot go out.
5a	5a	Gale commencing with wind in the SE quadrant.
4a	4a	Gale commencing with wind in the NE quadrant.
3a	3a	Gale commencing with wind in the SW quadrant.
15a	15a	Hurricane.
2a	2a	Gale commencing with wind in the NW quadrant.

FIJI

35a	35a	Storm/hurricane alert. A tropical cyclone of storm or hurricane intensity exists and may affect the locality within 24 or 36 hours.
-----	-----	--

FRANCE

See International Visual Storm Warning Signals.

FRENCH POLYNESIA

See International Visual Storm Warning Signals.

GABON

See International Visual Storm Warning Signals.

GAMBIA

See International Visual Storm Warning Signals.

GHANA

9a	9a	Squally weather from a line-squall or thunderstorms of slight to moderate intensity are expected to affect the locality accompanied by North-East to Easterly winds. Accordingly, appropriate precautionary measures should be taken. Displays are made at signal stations on prominent buildings on the coast at Tema (05°37'N, 00°00') and Takoradi (04°45'N, 01°45'W) whenever a storm becomes a threat in the coastal sea area on the landward boundary.
----	----	---

Note: The Offices of the Harbour Master, Harbour Authority which operate the system are kept informed by radio or land-line telephone by the National Meteorological Services Department (Weather Forecasting and warning Services Division) when the situation is considered threatening and is likely to affect ship movements in the harbours.

SIGNALS		Specifications Remarks
Day	Night	
GIBRALTAR		
2a	2a	A gale or strong wind from eastward is probable
3a	3a	A gale or strong wind from westward is probable
GRENADA		
41a	41a	Winds above 63 kt Signals used in Grenada.
40a	40a	Winds 34-63 kt Signals used in Grenada.
56a	56a	Winds 28-33 kt Signals used in Grenada.
HAWAII (U.S.)		
56a	56a	Small Craft Advisory: weather or sea conditions (either present or forecast), sustained for more two hours, that might be hazardous to small boats. Mariners learning of a Small Craft Advisory are urged to determine immediately the reason by tuning their radios to the latest marine broadcasts. Decision as to the degree of hazard will be left up to the boatmen, based on his experience and size and type of boat. The threshold conditions for the Small Craft Advisory are usually 18 knots of wind (less than 18 knots in some dangerous waters) or hazardous wave conditions. 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".
41a	41a	Hurricane warning: winds 74 miles an hour (64 kt) and upwards when in connection with a tropical cyclone 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".
39a	39a	Gale warning: winds within the range 39 to 54 miles an hour (34 to 47 kt). 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".
40a	40a	Storm warning: wind 55 miles an hour (48 kt) and upwards, except that when winds are associated with a tropical cyclone, HURRICANE warnings will be hoisted for winds 74 miles an hour (64 kt) and upwards. (See "Hurricane warning" below) 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".
INDIA		
10a	10a	GREAT DANGER. A violent storm will soon strike you These signals are used for Ganges Delta ports and river and police stations in West Bengal.

SIGNALS		Specifications
Day	Night	Remarks
21a	21a	Port will experience severe weather from a severe cyclone expected to move keeping the port to the right of its track. This signal indicates that the port itself and the ships in it are in danger.
22a*	22a*	Port will experience severe weather from a severe cyclone expected to move over or close to the port. This signal is also hoisted when a storm is expected to skirt the coast without (actually) crossing it.
16a	16a	There is a region of squally weather in which a storm may be forming. These signals indicate that ships may be exposed to danger after leaving the harbour.
23a*	23a*	Communications with the Meteorological Warning Centre have broken down, and the local officer considers there is a danger of bad weather These signals are used for Ganges Delta ports and river and police stations in West Bengal.
2a	2a	DANGER. A storm will soon strike you These signals are used for Ganges Delta ports and river and police stations in West Bengal.
10a	10a	A storm has formed These signals indicate that ships may be exposed to danger after leaving the harbour.
20a	20a	Port will experience severe weather from a severe cyclone expected to move keeping the port to the left of its track. This signal indicates that the port itself and the ships in it are in danger.
19a*	19a*	Port will experience severe weather from a cyclone expected to move over or close to the port. This signal is also hoisted when a storm is expected to skirt the coast without (actually) crossing it.
18a	18a	Port will experience severe weather from a cyclone expected to move keeping the port to the right of its track. These signals indicate that the port itself and the ships in it are in danger.
17a	17a	Port will experience severe weather from a cyclone expected to move keeping the port to the left of its track. These signals indicate that the port itself and the ships in it are in danger.
2a*	2a*	Port is threatened by a storm, but it does not appear that danger justifies extreme measures of precaution. Squally weather is meant to cover occasional or frequent squalls with rain or persistent type of strong gusty wind (mean wind speed not less than 20 knots) accompanied by rain. Such conditions are associated with low pressure systems or onset and strengthening of monsoon. Mean wind speeds exceeding 33 knots associated with cyclonic storms are generally covered by signals higher than 3a.
3a*	3a*	Port is threatened by squally weather. Squally weather is meant to cover occasional or frequent squalls with rain or persistent type of strong gusty wind (mean wind speed not less than 20 knots) accompanied by rain. Such conditions are associated with low pressure systems or onset and strengthening of monsoon. Mean wind speeds exceeding 33 knots associated with cyclonic storms are generally covered by signals higher than 3a.
1a	1a	WARNING. A storm may affect you shortly These signals are used for Ganges Delta ports and river and police stations in West Bengal.

SIGNALS		Specifications
Day	Night	Remarks

* BRIEF SYSTEM: In the brief system only one of the five signals marked by an asterisk of the general system is hoisted, and the Port Officers are kept informed of the prospects of local bad weather associated with any disturbance in the sea, for the general information of shipping.

EXTENDED SYSTEM: Special signals, in addition to those of the general system, are exhibited at certain ports in the bay of Bengal belonging to the extended system. If the port itself is threatened, the appropriate local signals of the general system are hoisted. But, if there is an area of squally weather or a storm that does not threaten the port, the distant cautionary or distant warning signal of the general system is hoisted under the distant signals, to indicate the position of the disturbance in the Bay. The following shapes, when hung below a distant cautionary or warning signal, become locality signals, indicating the six divisions into which the bay of Bengal has been divided for this purpose.

Signal: 3a 10a 24a 16a 2a 23a
 Section: I II III IV V VI

The divisions are as indicated on the chart given on page D-D-II-9. Thus, if there is squally weather in Section IV of the Bay, the signal 25a would be hoisted at the various ports; and if a storm has formed in Section II, the signal 11a would be hoisted at all ports which were not directly threatened. As already stated, the ports directly threatened would hoist either one of the local signals. The Meteorological Department endeavours to keep the number of locality signals on each hoist as small as possible, and generally the number of only that section in which the centre of the storm is situated is given in the Warning Telegram.

Examples:

Storm centre	Locality signals
Latitude 16°N - Longitude 86°E	II
Latitude 16°N - Longitude 88°E	II & III
Latitude 16°N - Longitude 89°E	III & II
Latitude 18°N - Longitude 87°30'E	II, I & III
Latitude 19°N - Longitude 89°30'E	I, III & II

If however, the center of the storm is near the boundary of a division, the hoisting of two locality signals is requested, the first indicating the division in which the center is thought to be situated and the second the division nearest to the first. In the event of a storm center being near the corner where three divisions meet, the hoisting of three locality signals is requested, the first indicating the division in which the storm is estimated to be centered, the second the nearest adjoining division, and the third the remaining division.

8a	8a	Hurricane with wind of force 12 Beaufort (64 kt and above) from any direction

PUERTO RICO

56a	56a	Small Craft Advisory: weather or sea conditions (either present or forecast), sustained for more two hours, that might be hazardous to small boats. Mariners learning of a Small Craft Advisory are urged to determine immediately the reason by tuning their radios to the latest marine broadcasts. Decision as to the degree of hazard will be left up to the boatmen, based on his experience and size and type of boat. The threshold conditions for the Small Craft Advisory are usually 18 knots of wind (less than 18 knots in some dangerous waters) or hazardous wave conditions. 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".
41a	41a	Hurricane warning: winds 74 miles an hour (64 kt) and upwards when in connection with a tropical cyclone. 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".
39a	39a	Gale warning: winds within the range 39 to 54 miles an hour (34 to 47 kt). 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".
40a	40a	Storm warning: wind 55 miles an hour (48 kt) and upwards, except that when winds are associated with a tropical cyclone, HURRICANE warnings will be hoisted for winds 74 miles an hour (64 kt) and upwards. (See "Hurricane warning" below). 1. Displays are made from about 200 points along the sea coasts, the Great Lakes, Hawaii and Puerto Rico. No displays are made in Alaska but warnings are broadcast by radio. 2. Hurricane watch: an announcement made to the public and all other interests by press and radio and television broadcasts whenever a tropical storm or hurricane becomes a threat to a coastal area. The "Hurricane watch" announcement is not a warning; it indicates that the hurricane is near enough that everyone in the area covered by the "watch" should listen for subsequent advisories and be ready to take precautionary action in case hurricane warnings are issued. No display is provided for the "Hurricane watch".

REPUBLIC OF KOREA

Services provided:

Full weather routeing: Initial advisory service. Regular recommendations and advice on optimum routes. Frequent forecasts along the vessel's track, extending to five days ahead.

Fast Track Service: Extended forecasts and recommendations covering the complete voyage for high-speed scheduled vessels (e.g. container ships) transitting the North Atlantic and North Pacific Oceans.

Area Forecasts: Specialist vessels such as cable ships, survey vessels, tugs and tows can be supplied with specific forecasts for a designated geographical area and period of time. These cover a summary of the weather in the area of operation, Visibility, Wind strength and direction, Significant wave height, Swell direction and period, Tropical Cyclone information, Sea Ice limits and other factors that might affect a passage.

Services to the Leisure Industry: Forecasting and routeing services can be supplied to luxury charter and private yachts of any type.

Voyage Assessment and Consultancy. Useful in a weather-related dispute when an authoritative second opinion from MetWorks can help to make a case for the client.

General: MetWorks services are based on advanced software working with data supplied under contract by the UK Met Office. Advice is transmitted promptly by satellite to the Master of the vessel.

Every member of the MetWorks Operational and Management team is a Master Mariner combining at least 20 years of seagoing experience with weather-routeing expertise and close familiarity with the characteristics of many types of vessel.
