

# Build the Mildura Solar Plant NOW Renewable is Do-able

# Protest

at final creditors meeting

**2.45pm** (meeting starts 3pm) **Fri Feb 19**

Institute of Chartered Accountants, Level 3, **600 Bourke St City**

**Solar Systems has been sold to the company Silex, this is a better outcome than liquidation, but concerns remain, we will be protesting to demand:**

## 1. Build the Mildura solar power plant now

Not in 2011 as Silex says it *may* do, but start construction now,

Government must guarantee the full 154 Mwh Mildura solar power plant as a condition of the sale.

2. All Solar Systems working power stations in remote Aboriginal communities, must be kept running

3. Redundant workers who want their jobs back must be re-employed

4. Redundant employees who have moved on, must be paid their entitlements, before PriceWaterhouseCoopers collects its obscene fees

It has been reported PriceWaterhouseCoopers may get a third of the \$20 million sale in fees and repayments for emergency loans.
