

# Statistical Bulletin

# Labour Market Statistics, January 2012

Coverage: UK

Date: **18 January 2012** 

Geographical Area: UK and GB

Theme: Labour Market

## For September to November 2011:

- The employment rate for those aged from 16 to 64 was 70.3 per cent, down 0.1 on the guarter. There were 29.12 million people in employment aged 16 and over, up 18,000 on the quarter.
- The unemployment rate was 8.4 per cent of the economically active population, up 0.3 on the guarter. There were 2.68 million unemployed people, up 118,000 on the guarter. The unemployment rate has not been higher since 1995 and the number of unemployed people has not been higher since 1994.
- The inactivity rate for those aged from 16 to 64 was 23.1 per cent, down 0.2 on the guarter. There were 9.29 million economically inactive people aged from 16 to 64, down 61,000 on the quarter.
- Total pay (including bonuses) rose by 1.9 per cent on a year earlier, down 0.2 on the three months to October 2011(with both the private and public sectors showing lower pay growth).
- Regular pay (excluding bonuses) rose by 1.9 per cent on a year earlier, up 0.1 on the three months to October 2011.

#### In this Bulletin

This Statistical Bulletin contains the latest estimates for employment, unemployment, economic inactivity, claimant count, average earnings, labour productivity, vacancies and labour disputes. All estimates discussed in this Statistical Bulletin are seasonally adjusted except where otherwise stated.

Regional estimates are available from the Regional Labour Market Statistical Bulletin.

#### New this month:

Labour Force Survey and Average Weekly Earnings estimates for September to November 2011.

Claimant count estimates for December 2011.

Vacancies estimates for October to December 2011.

Labour disputes estimates for November 2011.

### Summary of labour market statistics published on 18 January 2012

A video explaining this story is available on the ONS YouTube channel.

The **employment rate** for those aged from 16 to 64 for the three months to November 2011 was 70.3 per cent, down 0.1 percentage point on the quarter. The **number of people in employment aged 16 and over** increased by 18,000 on the quarter and by 26,000 on the year to reach 29.12 million. The number of employees fell by 109,000 over the quarter to reach 24.79 million. The number of self-employed people increased by 101,000 on the quarter to reach 4.12 million. The number of people in other categories of employment increased by 26,000 over the quarter to reach 210,000. The number of people in full-time employment fell by 57,000 over the quarter to reach 21.26 million but the number of people in part-time employment increased by 75,000 to reach 7.86 million. The number of employees and self-employed people who were working part-time because they could not find a full-time job increased by 44,000 on the quarter to reach 1.31 million, the highest figure since comparable records began in 1992.

The **unemployment rate** for the three months to November 2011 was 8.4 per cent of the economically active population, up 0.3 on the quarter. The unemployment rate was last higher in the three months to November 1995. The total **number of unemployed people** increased by 118,000 over the quarter to reach 2.68 million. The number of unemployed people was last higher in the three months to August 1994. The number of unemployed people aged from 16 to 24 increased by 52,000 over the quarter to reach 1.04 million; this figure includes 313,000 people in full-time education who were looking for work. The unemployment level for people aged from 16 to 24 was the highest since directly comparable records began in 1992. However earlier data, calculated on a slightly different basis, indicates that the level of youth unemployment was higher in the mid-1980s.

The **inactivity rate** for those aged from 16 to 64 for the three months to November 2011 was 23.1 per cent, down 0.2 on the quarter. The **number of economically inactive people** aged from 16 to 64 fell by 61,000 over the quarter to reach 9.29 million. This quarterly fall in economic inactivity was mainly due to fewer women looking after the family or home (down 44,000) and fewer retired people below the age of 65 (down 34,000).

There were 1.60 million people claiming **Jobseeker's Allowance** (JSA) in December 2011, up 1,200 on November. The number of people claiming JSA for up to six months fell by 16,500 between November and December to reach 928,200.

The whole economy **earnings annual growth rate for total pay** (including bonuses) fell by 0.2 percentage points between the three months to October 2011 and the three months to November to reach 1.9 per cent. The annual growth rate for the private sector fell from 2.1 per cent to 2.0 per cent and the public sector growth rate fell from 2.1 per cent to 1.9 per cent, the lowest figure since

comparable records began in 2001. The annual growth rate for the public sector, excluding financial corporations, fell from 1.7 per cent to 1.4 per cent, the lowest figure since comparable records began in 2001. However, in November 2011, average weekly pay for the private sector (£462 per week) was lower than the total public sector (£477 per week) and the public sector excluding financial corporations (£467 per week).

In November 2011, there were 988,000 **working days lost** due to labour disputes, the highest figure since July 1989. Most of the working days lost in November 2011 were due to a one day strike on 30 November called by several trade unions in connection with a dispute over proposed changes to pension schemes for some public sector workers.

# **Employment**

Employment measures the number of people in paid work and differs from the number of jobs because some people have more than one job. A comparison between estimates of employment and jobs is available in an <u>article published on the website</u> on 14 December 2011. The employment rate for those aged from 16 to 64 was 70.3 per cent in the three months to November 2011, down 0.1 percentage point on the three months to August 2011 and down 0.2 percentage points from a year earlier.

#### Employment rate (aged 16 to 64), seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

#### **Download chart**

XLS XLS format (26 Kb) The employment rate for men aged from 16 to 64 was 75.2 per cent, down 0.2 percentage points on the previous quarter. The corresponding employment rate for women was 65.4 per cent, down 0.1 percentage point on the previous quarter.

The number of people in employment was 29.12 million in the three months to November 2011, up 18,000 from the three months to August 2011 and up 26,000 on a year earlier. The number of people in full-time employment was 21.26 million in the three months to November 2011, down 57,000 from the three months to August 2011. Of this total, 13.57 million were men and 7.69 million were women. The number of people in part-time employment was 7.86 million in the three months to November 2011, up 75,000 from the three months to August 2011. Of this total, 2.01 million were men and 5.84 million were women.

The number of people in public sector employment was 5.99 million in September 2011, down 67,000 from June 2011. The number of people in private sector employment in September 2011 was 23.12 million, up 5,000 from June 2011. Further information on public sector employment is available in the <u>Public Sector Employment Statistical Bulletin</u> published on 14 December 2011.

## **Employment by country of birth and nationality (not seasonally adjusted)**

ONS publishes estimates of employment by both country of birth and by nationality. The number of non-UK born people in employment is greater than the number of non-UK nationals in employment, as the non-UK born series includes many UK nationals. The estimates relate to the number of people in employment rather than the number of jobs. These statistics have sometimes been incorrectly interpreted as indicating the proportion of new jobs that are taken by foreign migrants.

The number of UK nationals in employment was 26.60 million in the three months to September 2011, down 280,000 on a year earlier. The number of non-UK nationals in employment was 2.56 million, up 147,000 from a year earlier.

The employment rate for UK nationals aged from 16 to 64 was 70.7 per cent in the three months to September 2011, down 0.6 percentage points on a year earlier. The corresponding employment rate for non-UK nationals was 68.3 per cent, unchanged on a year earlier.

The number of UK born people in employment was 25.08 million in the three months to September 2011, down 311,000 on a year earlier. The number of non-UK born people in employment was 4.08 million, up 181,000 from a year earlier.

The employment rate for UK born people aged from 16 to 64 was 71.1 per cent in the three months to September 2011, down 0.5 percentage points on a year earlier. The corresponding employment rate for non-UK born people was 67.3 per cent, down 0.5 percentage points on a year earlier.

### Employment by country of birth and nationality, changes on year (not seasonally adjusted)

#### **Download chart**

XLS XLS format (25 Kb)

#### **Actual hours worked**

Actual hours worked measures the number of hours worked in the economy. Total hours worked per week were 916.3 million in the three months to November 2011, down 0.2 million from the three months to August 2011. Average weekly hours worked in the three months to November 2011 were 31.5, unchanged from the three months to August 2011.

### Total weekly hours, seasonally adjusted

#### **Download chart**

XLS XLS format (26.5 Kb)

# **Earnings**

Earnings measures the money received in return for work done, gross of tax. The estimates relate to Great Britain and include salaries but not unearned income, benefits in kind or arrears of pay. Average total pay (including bonuses) was £464 per week in November 2011. In the three months to November 2011 total pay rose by 1.9 per cent on a year earlier, down 0.2 from the three months to October. Average regular pay (excluding bonuses) was £438 per week in November 2011. In the three months to November 2011 regular pay rose by 1.9 per cent on a year earlier, up 0.1 from the three months to October.

#### GB whole economy average earnings annual growth rates, seasonally adjusted

Source: Monthly Wages and Salaries Survey - Office for National Statistics

#### **Download chart**

Average total pay (including bonuses) in the **private sector** was £462 per week in November 2011. In the three months to November 2011 total pay in the private sector rose by 2.0 per cent on a year earlier. Average regular pay (excluding bonuses) in the private sector was £428 per week in November 2011. In the three months to November 2011 regular pay in the private sector rose by 2.0 per cent on a year earlier.

Average total pay (including bonuses) in the **public sector** was £477 per week in November 2011. In the three months to November 2011 total pay in the public sector rose by 1.9 per cent on a year earlier. Average total pay in the public sector, excluding financial services, was £467 per week in November 2011. In the three months to November 2011 total pay in the public sector, excluding financial services, rose by 1.4 per cent on a year earlier. Average regular pay (excluding bonuses) in the public sector was £474 per week in November 2011. In the three months to November 2011 regular pay in the public sector, excluding financial services, was £465 per week in November 2011. In the three months to November 2011 regular pay in the public sector, excluding financial services, rose by 1.4 per cent on a year earlier.

## **Labour productivity**

Whole economy output per worker is the ratio of output to employment while unit labour costs is the ratio of total labour costs to output. Whole economy output per worker increased by 1.2 per cent between 2011 Q2 and 2011 Q3. Whole economy unit labour costs increased by 0.5 per cent between these quarters. Further information is available in the Labour Productivity Statistical Bulletin published on 23 December 2011.

## Output per worker and unit labour costs, percentage changes on quarter (seasonally adjusted)

Source: Office for National Statistics

#### **Download chart**

## **Labour disputes (not seasonally adjusted)**

These estimates measure disputes (ie, strikes) connected with terms and conditions of employment. In November 2011, there were 988,000 working days lost from eight stoppages. In the twelve months to November 2011, there were 1.38 million working days lost from 134 stoppages. Most of the working days lost in November 2011 were due to a one day strike by several trade unions in connection with a dispute over proposed changes to pensions for some public sector workers.

#### Working days lost cumulative 12 month totals, not seasonally adjusted

Source: Labour Disputes Statistics - Office for National Statistics

#### Notes:

- 1. There was a one day strike on 30 November 2011 called by several trade unions in connection with a dispute over proposed changes to pension schemes for some public sector workers.
- 2. Estimates of working days lost for the dispute mentioned in Note 1 do not include days lost due to people unable to attend work due to industrial action taken by others.

#### **Download chart**

## Unemployment

Unemployment measures people without a job who have been actively seeking work and are available to start work if a job is offered. The unemployment rate was 8.4 per cent in the three months to November 2011, up 0.3 percentage points from the three months to August 2011 and up 0.5 from a year earlier. Unemployment rates are calculated, in accordance with international guidelines, as the number of unemployed people divided by the economically active population (defined as those in employment plus those who are unemployed).

#### Unemployment rate (aged 16+), seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

#### **Download chart**

The number of unemployed people was 2.68 million in the three months to November 2011, up 118,000 from the three months to August 2011 and up 189,000 from a year earlier. The number of unemployed men was 1.56 million in the three months to November 2011, up 59,000 from the three months to August 2011. The number of unemployed women was 1.13 million in the three months to November 2011, up 59,000 from the three months to August 2011. The number of people unemployed for over one year was 857,000 in the three months to November 2011, down 10,000 from the three months to August 2011. The number of people unemployed for over two years was 424,000 in the three months to November 2011, up 1,000 from the three months to August 2011.

# Young people in the labour market

In the three months to November 2011, there were 3.64 million 16 to 24 years olds in **employment**, down 28,000 from the three months to August 2011. There were 2.62 million **economically inactive** 16 to 24 year olds (most of whom were in full-time education), down 33,000 on the three months to August 2011. There were 1.04 million **unemployed** 16 to 24 year olds, up 52,000 from the three months to August 2011.

The **unemployment rate** for 16 to 24 year olds was 22.3 per cent in the three months to November 2011, up 1.0 percentage points from the three months to August 2011. In accordance with international guidelines, unemployment rates are calculated as the number of unemployed people

divided by the economically active population (defined as those in employment plus those who are unemployed). Movements in youth unemployment rates can therefore be affected by changes to the economically active population, which can result from changes in the number of young people who are economically inactive because they are in full-time education.

In accordance with international guidelines, people in full-time education are included in the youth unemployment estimates if they have been looking for work within the last four weeks and are available to start work within the next two weeks. **Excluding people in full-time education**, there were 729,000 unemployed 16 to 24 year olds in the three months to November 2011, up 8,000 from the three months to August 2011. The corresponding unemployment rate was 20.7 per cent of the economically active population for 16 to 24 year olds not in full-time education, up 0.5 percentage points from the three months to August 2011.

### Youth unemployment (aged 16 to 24) September to November 2011, seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

#### **Download chart**

XLS XLS format (25 Kb)

#### Claimant count

The claimant count measures the number of people claiming Jobseeker's Allowance (JSA) and differs from unemployment (which measures people who meet the internationally agreed definition of unemployment). The claimant count can be affected by changes to the overall benefits system. For example, from late 2008 until mid-2011 changes in eligibility rules for Lone Parent Income Support

resulted in fewer lone parents (predominantly women) being able to claim that benefit resulting in more lone parents claiming JSA while they look for work. From April 2011, the Dept. for Work and Pensions has been re-assessing claimants of Incapacity Benefit (IB) resulting in some people who have been declared ineligible for IB claiming JSA while they look for work. The effect of this exercise on monthly changes in the claimant count is likely to be small.

The claimant count in December 2011 was 1.60 million, up 1,200 on the previous month and up 142,400 on a year earlier. The claimant count rate was 5.0 per cent, unchanged on the previous month but up 0.4 percentage points from a year earlier.

#### Claimant count, seasonally adjusted

#### **Download chart**

XLS XLS format (25.5 Kb)

# Comparison between unemployment and the claimant count

**Unemployment** is measured using the Labour Force Survey and estimates are published for three month average rolling time periods. Unemployed people in the UK are:

- without a job, have actively sought work in the last four weeks and are available to start work in the next two weeks or:
- out of work, have found a job and are waiting to start it in the next two weeks.

People who meet these criteria are classified as unemployed irrespective of whether or not they claim Jobseeker's Allowance or other benefits.

**The claimant count** measures the number of people claiming unemployment-related benefits: since October 1996 this has been the number of people claiming Jobseeker's Allowance (JSA). Some JSA claimants will not be classified as unemployed. For example, people in employment working less than 16 hours a week can be eligible to claim JSA depending on their income.

The chart below and the associated spreadsheet compare movements in unemployment and the claimant count for the same three-monthly average time periods. The unemployment estimates shown in this comparison exclude unemployed people in the 16 to 17 and 65 and over age groups as well as unemployed people aged from 18 to 24 in full-time education. This provides a more meaningful comparison with the claimant count than total unemployment because people in these population groups are not usually eligible to claim JSA.

When three-month average estimates for the claimant count are compared with unemployment estimates for the same time periods and for the same population groups (people aged from 18 to 64 excluding 18 to 24 year olds in full-time education), the movements in the two series over the latest quarter are fairly close. For this population group, between June-August and September-November 2011, unemployment increased by 67,000 and the claimant count increased by 39,000. The chart below, and the associated spreadsheet, compare quarterly changes in unemployment and the claimant count for people aged from 18 to 64, excluding 18-24 year olds in full-time education, for the last two years.

# Quarterly changes in unemployment and the claimant count (aged 18 to 64), seasonally adjusted

Source: Office for National Statistics, Work and Pensions

#### Notes:

- 1. Unemployment estimates are sourced from the Labour Force Survey (a survey of households). The unemployment figures in this chart, and the associated spreadsheet, exclude unemployed people aged from 18 to 24 in full-time education.
- 2. Claimant count estimates are sourced from administrative data from Jobcentre Plus (part of the Dept. for Work and Pensions).

#### **Download chart**

# **Economic inactivity**

Economically inactive people are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work within the next two weeks. The economic inactivity rate for those aged from 16 to 64 was 23.1 per cent in the three months to November 2011, down 0.2 percentage points on the three months to August 2011 and from a year earlier. The number of economically inactive people aged from 16 to 64 fell by 61,000 over the quarter and by 71,000 over the year, to reach 9.29 million in the three months to November 2011.

## Economic inactivity rate (aged 16 to 64), seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

#### **Download chart**

#### Redundancies

The redundancies estimates measure the number of people who have been made redundant or have taken voluntary redundancy. In the three months to November 2011, 164,000 people had become redundant in the three months before the Labour Force Survey interviews, up 14,000 from the three months to August 2011 and up 5,000 from a year earlier. The redundancy rate was 6.6 per 1,000 employees, up 0.6 on the previous quarter and up 0.2 on a year earlier.

#### Redundancies, seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

#### **Download chart**

#### **Jobs**

Workforce jobs measures the number of filled jobs in the economy. It differs from the number of people in employment as some people have more than one job. A comparison between estimates of employment and jobs is available in an <u>article published on the website</u> on 14 December 2011. There were 31.27 million workforce jobs in September 2011, up 150,000 over the quarter and up

89,000 on a year earlier. The sector showing the largest increase in jobs over the quarter was administrative and support services activities which increased by 66,000 to reach 2.40 million.

#### Workforce jobs changes on quarter between June and September 2011, seasonally adjusted

Source: Office for National Statistics

#### **Download chart**

XLS XLS format (25 Kb)

#### **Vacancies**

Vacancies are defined as positions for which employers are actively seeking to recruit outside their business or organisation. There were 463,000 job vacancies in the three months to December 2011, down 2,000 on the three months to September 2011 and down 18,000 on a year earlier. There were 1.8 vacancies per 100 employee jobs in the three months to December 2011, unchanged on the previous quarter but down 0.1 percentage point on the year.

#### Vacancies, seasonally adjusted

#### **Download chart**

#### **Data tables**

The <u>Index of Data tables</u> lists all of the regularly published labour market spreadsheets. These spreadsheets can be accessed from hyperlinks within this <u>Index</u>. The pdf version of this Statistical Bulletin includes all of the tables which appeared in the old style Labour Market Statistical Bulletin pdf files as published by ONS before the introduction of the new website on 27 August 2011.

#### **Revisions**

One indication of the reliability of the key indicators in this Statistical Bulletin can be obtained by monitoring the size of revisions. Data tables <a href="EMP17">EMP17</a> (432 Kb Excel sheet), <a href="UNEM04">UNEM04</a> (1.37 Mb Excel sheet), <a href="UNE

Labour market statistics are revised in line with the revisions policy.

## Sampling variability and seasonal adjustment

#### Sampling variability

<u>Data table A11 (52 Kb Excel sheet)</u> shows sampling variabilities, calculated on not seasonally adjusted data, for the **Labour Force Survey**. These sampling variability ranges represent '95 per cent confidence intervals'. It is expected that in 95 per cent of samples the range would contain the true value.

The sampling variability of the three month average **vacancies** level (95 per cent confidence interval) is around +/- 1.5 per cent of that level.

The sampling variabilities of the whole economy single month **Average Weekly Earnings** growth rates (95 per cent confidence intervals) are as follows:

- +/- 0.6 percentage points excluding bonuses
- +/- 0.7 percentage points including bonuses (April to November)
- +/- 0.9 percentage points including bonuses (December to March)

#### Seasonal adjustment

Like many economic indicators, the labour market is affected by factors that tend to occur at around the same time every year; for example school leavers entering the labour market in July and whether Easter falls in March or April. In order to compare movements other than annual changes in labour market statistics, such as since the previous quarter or since the previous month, the data are seasonally adjusted to remove the effects of seasonal factors and the arrangement of the calendar. All estimates discussed in this Statistical Bulletin are seasonally adjusted except where otherwise stated.

A number of videos relating to labour market statistics are available on the <u>ONS YouTube channel</u>. A number of stories relating to labour market statistics are available from NOMIS®.

#### **Summary Quality Report**

A Summary Quality Report for labour market statistics is available on the <u>Quality Reports for</u> Business Statistics page of the website.

## **Background notes**

#### 1. This month's Statistical Bulletin

Data table CLA03 (63.5 Kb Excel sheet), and Table 10(1) in the pdf version of this Statistical Bulletin, show estimates of lone parent claimants of Jobseeker's Allowance. This table has been improved to include new age breakdowns (0-4 and 5-6). Lone parents who are currently eligible for income support until their youngest child reaches seven, will become ineligible once their youngest child reaches five from early 2012 subject to the passage of the Welfare Reform Bill. This continues the process of reducing the age of eligibility from 16 which started in November 2008. Although this is not a change in the eligibility for Jobseeker's Allowance, it is likely to have an impact on the level of the Claimant Count as lone parents who were not previously looking for work may start to do so.

<u>Data table LABD03 (79 Kb Excel sheet)</u> (Stoppages of work) has been improved to show information on the cause of disputes in the most recent month, which is presented alongside the twelve month totals. Additional information has also been made available on disputes continuing from earlier months.

#### 2. Next month's Statistical Bulletin

There are no major developments planned for next month's Statistical Bulletin.

#### 3. Publication policy

Publication dates for 2012 can be found in the Background Notes to the <u>November 2011 edition</u> of this <u>Statistical Bulletin</u>. A list of the job titles of those given <u>pre-publication access</u> (34.4 Kb Pdf) to the contents of this Statistical Bulletin is available on the website.

National Statistics are produced to high professional standards set out in the Code of Practice for Official Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

Aug-Oct 2011 Sep-Nov 2011	
Vacancies level Oct-Dec 2011 463,000 (464,000) (459,000) Apr-Jun	2001
Vacancy ratio (per Dec-Feb 2011 Sep-Nov 2011	
100 employee jobs) Oct-Dec 2011 1.8 (1.9) (1.7) Apr-Jun	2001

<sup>(\*)</sup> The unemployment level for those aged from 16 to 24 is the highest since directly comparable records began in 1992. However earlier data, calculated on a slightly different basis, indicate that the youth unemployment level was higher in the mid-1980s.

#### **INDEX OF TABLES**

Data are also available in spreadsheet format at:

http://www.ons.gov.uk/ons/rel/lms/labour-market-statistics/january-2012/index.html

#### **SUMMARY**

- 1 Summary of headline Labour Force Survey indicators
- 2 Labour market status by age group

#### **EMPLOYMENT AND JOBS**

- 3 Full-time, part-time and temporary workers
- 4 Public and private sector employment
- 4(1) Public sector employment by industry
- 4(2) Public sector employment including and excluding financial corporations
- 5 Workforce jobs
- 6 Workforce jobs by industry
- 7 Actual weekly hours worked
- 7(1) Usual weekly hours of work
- 8 Employment levels by country of birth and nationality
- 8(1) Employment rates by country of birth and nationality

#### **UNEMPLOYMENT**

9 Unemployment by age and duration

#### **CLAIMANT COUNT**

- 10 Claimant count levels and rates
- 10(1) Claimant count: lone parent claimants by age of youngest child
- 11 Claimant count by age and duration

#### **ECONOMIC ACTIVITY AND INACTIVITY**

- 12 Economic activity by age
- 13 Economic inactivity: reasons
- 14 Educational status, economic activity & inactivity of people aged from 16 to 24

#### **EARNINGS & LABOUR PRODUCTIVITY**

- 15 Average weekly earnings total pay
- 15(1) Average weekly earnings bonus pay
- 16 Average weekly earnings regular pay
- 17 Labour productivity

#### **REGIONAL AND INTERNATIONAL SUMMARY**

- 18 Regional labour market summary
- 19 International comparisons

#### **LABOUR DISPUTES**

20 Labour disputes

#### **VACANCIES**

- 21 Vacancies by size of business
- 21(1) Vacancies and unemployment
- 22 Vacancies by industry

#### **REDUNDANCIES**

- 23 Redundancies levels and rates
- 24 Redundancies by industry

#### **BENEFITS**

25 Key out of work benefits

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

- 1. The Labour Force Survey (LFS) is a survey of the population of private households, student halls of residence and NHS accommodation.
- 2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.
- 3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.
- 4. The headline inactivity rate is the number of economically inactive people aged 16 to 64 divided by the population aged 16 to 64.

#### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

#### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity level for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

/20 Source: Labour Force Survey Labour market statistics enquiries: labour.market@ons.gov.uk Relationship between columns: 1= 2+3+4+5; 1=6+7; 2=8+9; 3=10+11; 13=15+17+18+19; 20=9+11; 14=13/2; 16=15/13; 22=21/20

The split between full-time and part-time employment is based on respondents' self-classification.
 These series cover Employees and Self-employed only. These series include some temporary employees recorded in columns 13 to 19.
 The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of columns 21, 23, 24 and 25.

Source: returns from public sector organisations

- 1. This series includes publicly owned financial corporations. Royal Bank of Scotland Group plc and Lloyds Banking Group plc are classified to the public sector from 13 October 2008. They are therefore included in the public sector estimates from December 2008 onwards but not for earlier periods.
- Estimated as the difference between LFS total employment and the data from public sector organisations.
   LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
- 4. This series excludes locally engaged staff stationed outside the United Kingdom.
- 5. This series excludes the Northern Ireland Civil Service.
- 6. This series does not exactly equal the sum of columns 1 to 4 and 6 to 9 because each series is independently seasonally adjusted.
- 7. This series includes publicly owned financial corporations, excluding insurance and pension funding, as defined by Section 64 of Standard Industrial Classification 2007.

Workforce jobs enquiries 01633 456776 Sources: Employer surveys, Labour Force Survey and administrative sources

<sup>1.</sup> Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3.

2. This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

Labour market statistics enquiries: labour.market@ons.gov.uk

<sup>1.</sup> Those aged 16 and over.

<sup>2.</sup> This series is the not seasonally adjusted equivalent of the total employment series MGRZ appearing at Table 1. The series does not equal the sum of the "UK" and "Non-UK" series because the total includes people who did not state their country of birth or nationality.

people who do not state their country of birth of hattoriality.

3. Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden

4. Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic, Slovenia.

<sup>1.</sup> People aged from 16 to 64.
2. This series is the not seasonally adjusted equivalent of the 16-64 employment rate series LF24 appearing at Table 1. It includes people who did not state their country of birth or nationality.

<sup>3.</sup> Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and Sweden. 4. Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovak Republic, Slovenia.

<sup>1.</sup> The claimant count measures the number of people claiming Jobseeker's Allowance.

The level measures the number of claimants on the second Thursday of each month (the "count date").

The flows figures are collected for 4 or 5 week periods between count dates; the figures are then standardised to a 4  $^{1}/_{3}$  week month. The levels and flows are independently seasonally adjusted. For these reasons, movements in the flows do not tally exactly with movements in the levels.

More detailed estimates are available from Nomis® at:

http://www.nomisweb.co.uk

Source: Jobcentre Plus administrative system and HM Revenue & Customs child benefit data Labour market statistics enquiries: labour.market@ons.gov.uk

- 1. Lone Parents are defined as those claiming Child Benefit for at least one child aged under 16 at the Jobseeker's Allowance (JSA) count date (second Thursday of the month) who have their marital status recorded as single, widowed, divorced or separated.
- 2. Age of youngest child relates to the age of the youngest child at the JSA count date.
- 3. These figures are experimental statistics and may be subject to retrospective changes as and when the Department for Work and Pensions (DWP) receive updated Child Benefit data.
- 4. The number of people claiming JSA in Great Britain. These figures are different from the figures at table 10 (series BCJA) which relate to the UK. Series BCJA (shown at Table 10) and BCJG (shown above) also include clerical claims which are not used in producing the subsequent lone parent series and are therefore slightly different to JSA figures published by the DWP on similar tables in their publications. Therefore, there may be some lone parents including the GB total which have not been included in the subsequent breakdowns.
- 5. Some JSA claimants have their marital status coded as "not known". Such claimants who are claiming Child Benefit for at least one child under 16 may be lone parents but are not recorded as such in the above table.

The estimates for Lone Parent claimants shown in the above table are produced a month later than the Claimant Count estimates shown at Table 10.

From 24 November 2008 most lone parents with older children are no longer entitled to Income Support if they are only claiming it because they are a lone parent. Instead those able to work may be entitled to claim Jobseeker's Allowance. This change has been introduced for most lone parents with: (i) a youngest child aged 12 or over from 24 November 2008, (ii) a youngest child aged 10 or over from 26 October 2009, (iii) a youngest child aged 7 or over from 25 October 2010. Subject to the passage of the Welfare Reform Bill there will be a further change in early 2012 restricting eligibility to lone parents whose youngest child is under 5 years old.

Further estimates of lone parents claiming JSA are available from DWP at

http://statistics.dwp.gov.uk/asd/

<sup>1.</sup> Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who are not in employment, education or training ("NEET") cannot therefore be derived from this table.

<sup>2.</sup> People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

<sup>3.</sup> Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Sources: Eurostat, national statistical offices. Labour market statistics enquiries: labour.market@ons.gov.uk

- 1. The UK employment rate shown in the lower part of the table as published by the Office for National Statistics is seasonally adjusted; all other employment rates are unadjusted.
- 2. All employment rates for EU countries published by EUROSTAT (including the rate for the UK) are based on the population aged 15-64. The rates for Canada and Japan are also based on the population aged 15-64, but the rate for the US is for those aged 16-64. The employment rate for the UK published by the Office for National Statistics is based on the population aged 16-64.
- 3. Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data. A standard population basis (15-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and Japan are for those aged 15 and over. All unemployment rates are seasonally adjusted.
- 4. The unemployment rate for the UK published by EUROSTAT is based on the population aged 16-74 but the unemployment rate for the UK published by the Office for National Statistics is based on those aged 16 and over. There are other minor definitional differences.
- 5. The "Total EU" series consist of all 27 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia and Spain.
- 6. The Japanese employment rate from January-March 2011 and the unemployment rate between March and August 2011 exclude those regions of Japan affected by the March 2011 earthquake and tsunami.

Source: ONS Labour Disputes Inquiry Labour disputes enquiries 01633 456724

- 1. Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.
- 2. Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.
- 3. The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.
- 4. These series exclude disputes which do not result in a stoppage of work, those involving fewer than ten workers or lasting less than one day unless the total number of working days lost in the dispute is 100 or more.

Source: Labour Force Survey

<sup>1.</sup> The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

<sup>2.</sup> The redundancies levels as derived directly from the Labour Force Survey do not currently display seasonality. For this reason series BEAO is currently identical to the not seasonally adjusted series BEYV shown at Table 24.

<sup>1.</sup> The estimates in this table are for calendar quarters only whereas the estimates at Table 23 are for rolling three-monthly time periods.

<sup>2.</sup> The total series includes those people who did not state their industry. The series also includes SIC 2007 categories A (Agriculture, forestry and fishing), B (Mining and quarrying), D (Electricity, gas, etc.) and E (Water supply, sewerage, etc.). These sectors are not shown separately in this table as the sample size is too small to provide reliable estimates. See footnote 2 at Table 23.

<sup>3.</sup> Includes both public and private sectors.

<sup>4.</sup> Other Services are not shown separately in this table as the sample size is too small to provide reliable estimates.

Source: Dept. for Work & Pensions (DWP)

- 1. This table includes the key out of work statistical groups, showing all claimants. Carers, who are not subject to labour market activation policies in the same way as other groups, are not included.
- 2. Claimants have been assigned to a statistical group according to a hierarchy to avoid double counting of claimants. The order is shown in the table (ie, Jobseeker followed by incapacity benefits, etc.). For example, a person claiming both incapacity benefits and Lone Parent benefit will be recorded under the former but not the latter.
- 3. The estimates for Jobseekers claimants shown in this table are for Great Britain (GB) and are consistent with the not seasonally adjusted estimates for the United Kingdom shown at Table 10 (Claimant Count). However the figures are different from the estimates of jobseekers claimants shown at Table 1.1 of the Dept. for Work & Pensions (DWP) Quarterly Statistical Summary. This is because of methodological differences between the Benefits estimates produced by the DWP and the Claimant Count estimates produced by the Office for National Statistics.
- 4. "Jobseekers" are recipients of Jobseeker's Allowance.
- 5. This series includes claimants of Employment and Support Allowance, Incapacity Benefit and Severe Disablement
- 6. "Lone parents" are single recipients of Income Support with a child under qualifying age.
- 7. "Other Income related" covers recipients of Income Support or Pension Credit who are not included in "incapacity benefits" or "Lone parents".
- 8. Proportions of population receiving state benefits have been calculated using residence based populations for those aged 16 to 64 for both men and women. The age at which women reach state pension age has been gradually increasing from 60 since April 2010. Movements in the time series over this period will partly reflect these changing eligibility criteria.
- 9. The jobseekers proportions shown in this table are different from the non seasonally adjusted claimant count rate shown at Table 10 as the denominator for the latter is workforce jobs plus claimant count.
