### WHEN FREEDOM IS ATTACKED, AUSTRALIANS HAVE ALWAYS SAID NO!

Australia has never lacked men of courage and honour, prepared to defend the liberties of their country when the need arose.

Now they must act.

Their liberties are in danger once again—the whole peaceful development of Australian democracy is at stake.

Who are they, these fighters for freedom?

Not the Government politicians—deliberately

deluding their electors with false cries of treason, sedition and sabotage.

Not the Press—free to muzzle and distort the truth at the will of those who control it.

Not those, either, who would stir up race and religious hatreds, hoping to divide the people against each other.

No, the true fighters for freedom are those who, irrespective of their position in life, their personal differences, beliefs and opinions, are uniting in action—those who have seen through the fraud

that is being practised upon the entire people of Australia, and are prepared to speak, write and act for freedom.

To such courageous people, we dedicate this issue of "Liberty," proud that we are able to merge our small effort in the mighty tide of progress that will ultimately and for all time win for Australia the freedoms contained in the United Nations' Universal Declaration of Human Rights.

Forward to Freedom and a "No" Vote on September 22!
