IN REPLY
REFER TO

DTIC-R (FOIA 2015-60)

NOV 18 2014

This is in response to your letter dated November 5, 2014, received in this office November 13, 2014, requesting information under the Freedom of Information Act (FOIA) (enclosure 1). Under Department of Defense rules implementing the FOIA, published at 32 CFR 286, your request was categorized as "other."

Enclosure 2 is a computer-generated bibliography prepared by matching the subject terms in your request against our Technical Report database. The bibliography may contain some documents that do not apply to the specific subject areas in which you are interested; however, to eliminate any of the key search terms could also eliminate documents that do apply to your subject area(s) of interest.

Enclosure 3 consists of a bibliography that contains unclassified descriptions of classified and/or unclassified/limited distribution documents related to your request. These documents may only be released by the controlling activity. Requests for these documents should be forwarded to the controlling activity, usually identified in the Distribution Statement field of the citation. This office upon request can research documents with no controlling activity identified. NOTE: Although some of the citations listed on the bibliography at attachment 2 may indicate that the document can be viewed and/or downloaded in full text, be advised that these citations/documents are not available to the general public through the DTIC Online Public Technical Reports database.

To date, there are no assessable fees for services from DTIC. Please understand that other members of the public may submit a FOIA request for copies of FOIA requests received by this office, or the names of those who have submitted requests. Should such occur, your name and, if asked for, a copy of your request will be released; however, your home address and home telephone number will not be released. Other private citizens who have obtained your name by using such a request may contact you; however,

NOV 18 2014

correspondence from the DoD about your request will be on official letterhead. Please contact me at (703) 767-9204 if you have any questions. Thank you for your interest in obtaining information from DTIC.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Hamilton". The signature is written in a cursive style with a large initial "M".

MICHAEL HAMILTON
FOIA Program Manager

Number of Citations: 424

Format: FOIA U2 Display

EXPORT CONTROL

The following notice applies if this bibliography includes abstracts with references marked "Export Control" EXPORT CONTROL WARNING NOTICE This document contains technical data whose export is restricted by the Arms Export Control Act (Title 22, U.S.C., sec. 2751 et seq.) or Executive Order 12470. Violations of these export laws are subject to severe criminal penalties. Distribution of this document is subject to DoDD 5230.25.

DOWNGRADING ACTION

The security classification of each entry in this listing is current as of the date of the bibliography. Do not downgrade or declassify individual bibliographic entries without referring to the complete and current classification authority, duration, and change markings associated with the document referenced in the bibliographic entry.

DESTRUCTION NOTICE

For classified documents, follow the procedures in DoD 5200.22-M, National Industrial Security Program Manual, Section 7, or DoD 5200.1-R, Information Security Program Regulation, Chapter VI, Section 7. For unclassified, limited documents, destroy by any method that will prevent disclosure of contents or reconstruction of the document.

CONTROLLED REPORTS

You may obtain copies of controlled reports only if you are within the audience authorized by the secondary distribution markings assigned by the controlling office or if you are specifically authorized by the controlling organization. To request specific authorization, please complete a DTIC Form 55, Request for Release of Limited Document. Be sure to include all the information needed to identify the document and a justification as to why you need the document. DTIC encourages the use of the Automated Form 55 for those with access to the Internet. The Automated Form 55 can be found at: <http://www.dtic.mil/dtic/formsNguides/registration/form55.html>. For those using the paper form, please fax your completed Form 55 to DTIC.

IRD RESTRICTIONS

Independent Research And Development (IRD) information held by DTIC in its IRD Collection is Company Proprietary data and is only for the official use of DoD personnel registered with DTIC. IRD information is

protected as Trade Secrets (per 18 U.S.C. Chap. 90, Sections 1839) and its further distribution is not authorized. IRD information, printed or displayed, will be safeguarded as required, to preclude unauthorized dissemination to non-DoD personnel and organizations. (Per DoD 5100.66 and DLAR 5230.3 Encl. 1 Paragraph 3F). Penalties for the unauthorized distribution of IRD information are extensive and severe. (18 U.S.C. Section 1905 and 18 U.S.C. Chap. 90, Sections 1831 and 1832)

WARNING TO CONTRACTORS

As a condition of obtaining DTIC services, all information received from DTIC that is not clearly marked for public release will be used only to bid or perform work under a U.S. Government contract or grant or for purposes specifically authorized by the U.S. Government agency that is sponsoring access. Further, the information will not be published for profit or in any manner offered for sale. Non-compliance may result in termination of access and a requirement to return all information obtained from DTIC.

ASSISTANCE

If you need assistance with the search strategy or format for your bibliography, please contact 703-767-8265/8274, DSN 427-8265/8274 or Toll Free 1-800-CAL-DTIC (225-3842), (Menu selection 3, submenu 1, Training/Search Assistance).

Report Date: Mar 2011

Abstract: (U) Soon after the coup in February 1948 that brought the Communist Party of Czechoslovakia (CPC) into power, the government granted the security services -- civilian and military -- unlimited freedom of action against any target, with no regard for the rule of law. The StB (Statni bezpecnost, the civilian state security apparatus) was especially cunning in adapting and combining the techniques of Nazi Germany's Gestapo and the Soviet Union's special services in the struggle against the StB's primary targets: Americans and their Czech associates. The StB embraced the view of its Soviet teachers that its mission was not merely to identify and neutralize existing opponents to the new order through routine investigative methods. Instead, the StB adopted a more proactive method: It created fictitious resistance organizations, dangled them as bait, and waited for potential new resisters -- in addition to those already active -- to be drawn to them. Soviet special services introduced this approach to counterintelligence in postwar Eastern Europe with frightening success. In the late 1940s and early 1950s, Wolnosci Niezawislosc (WiN) -- a Soviet and Polish Communist security joint operation -- identified an underground organization, took it over, built it up, and used it to gain significant US, British, and Polish support. They ran this fictitious scheme to discourage domestic resistance and to gain Western cash and intelligence technology. The ruse ended in December 1952, when the communists publicly declared themselves to be the creators and managers of WiN.

Title: (U) A Cultural Evolution

PDF URL: (pdf) - 75 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA534886>

Accession Number: ADA534886

Personal Author(s): Cardillo, Robert

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Sep 2010

Abstract: (U) Many recent commentaries on the state of Intelligence Community (IC) reform have focused on the provisions of the Intelligence Reform and Terrorism Protection Act of 2004 (IRTPA) and the organizational issues associated with the creation of the Director of National Intelligence (DNI). Government organizations in particular gravitate to these kinds of observable developments and demonstrations of authority as a measure of success or the lack thereof. I believe we need to focus more on cultural change--less observable and less measurable--but infinitely more important than whether the Central Intelligence Agency or the DNI is in charge of overseas intelligence operations. From my perspective, we have achieved significant cultural change since 2004.

Title: (U) The National Cryptologic Museum Library

PDF URL: (pdf) - 41 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA534887>

Accession Number: ADA534887

Personal Author(s): Becker, Eugene

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Sep 2010

Abstract: (U) Last year, a widely published German technical author, Klaus Schmeh, e-mailed the library of the National Cryptologic Museum from his home in Gelsenkirchen, Germany. He needed information for an article on the Kryha cipher machine, a device popular in the 1920s. Librarian Rene Stein found articles about the machine but, even more useful, she found unpublished correspondence between Alexander von Kryha, the machine's inventor, and a German who had invested in the machine. She photocopied the files and sent them to Schmeh, who used them for a talk at the 2009 Cryptologic History Symposium and for an article in Cryptologia magazine. Thus the museum advanced knowledge of the history of cryptology. When scholar Chris Christensen needed information on the US Navy cryptology correspondence courses for his article on William Wray, an early NSA mathematician, he contacted the museum library. From its collection of Special Research Histories, he obtained copies of the courses produced by the Navy between 1937 and 1946. In researching his book on the vocoder, which played a role in speech scrambling, David Tompkins met at the NSA Museum with Frank Gentges, a vocoder consultant during the Cold War. Gentges and his partner, the late David Coulter, had contributed their collection of speech cryptodevices to the museum. Gentges took Tompkins on a Cold War Secure Voice tour, explaining the HY-2 vocoder and the STU-II and STU-III phone systems. (The museum's audio history of secure voice was also helpful.) Because Tompkins was primarily interested in the replica of the extremely secure World War II SIGSALY voice encryption system, he and Gentges spent most of the day in the library going through declassified SIGSALY files.

Title: (U) Claire Lee Chennault and the Problem of Intelligence in China

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA523664>

Accession Number: ADA523664

Personal Author(s): Bergin, Bob

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jun 2010

Abstract: (U) Claire Chennault went to China in 1937 as a military adviser to Chiang Kai-shek as Japan's war on China expanded. During late 1940-1941 he would organize and command the American Volunteer Group (AVG), popularly known as the Flying Tigers, an air unit supported covertly by the United States before Japan's attack on Pearl Harbor. Chennault understood the value of intelligence and wrestling with the problems of acquiring it during most of his career. Most of what has been written about Chennault has focused on his leadership of the Flying Tigers, his relationship with the Republic of China, and his service during World War II. This article draws from his memoirs and other material to specifically address Chennault's approach to intelligence.

Title: (U) In the Service of Empire: Imperialism and the British Spy Thriller, 1901-1914

PDF URL: (pdf) - 856 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526375>

Accession Number: ADA526375

Personal Author(s): Moran, Christopher R ; Johnson, Robert

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jun 2010

Abstract: (U) In the decade before the First World War, the British spy thriller was a cultural phenomenon drawing large and expectant readerships across all classes and catapulting its authors to prominence as spokesmen for then widely prevalent concerns about imperial strength, national power, and foreign espionage. Three hundred is a conservative estimate of the number of spy novels that went into print between 1901 and 1914. This article reflects upon some of the seminal publications from the period, including Rudyard Kipling's *Kim* (1901), the tale of a streetwise orphan who trains as a spy and becomes embroiled in the intelligence duel on India's North-West Frontier; Erskine Childers's *The Riddle of the Sands* (1903), the story of two gentleman yachtsmen who, cruising in the North Sea, stumble upon a secret German plot to invade England; and William le Queux's *Spies of the Kaiser* (1909), a dire prophecy of German espionage in advance of an invasion. While it is clear that Kipling, Childers, and le Queux were prone to exaggeration, their works were based on reality and, more importantly, reflected both an idealized view of Britain's imperial needs and a desire for greater security. The anxieties they represented were not entirely without foundation and appear all the more authentic when we remember that they were often passed on by military figures. Fiction is more believable when anchored in reality, and it is the case that early 20th century spy fiction was used to push genuine agendas, including calls for a national service army, a larger navy, and a secret service. Though they celebrated imperialism and the qualities that built it, they also represented a tool for the mobilization of opinion and stood as clarion calls against perceived complacency in Whitehall.

Title: (U) Deciphering the Rising Sun: Navy and Marine Corps Codebreakers, Translators, and Interpreters in the Pacific War

PDF URL: (pdf) - 37 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA523645>

Accession Number: ADA523645

Personal Author(s): Mercado, Stephen C

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jun 2010

Abstract: (U) Men and women who studied what seemed an impenetrable language in Colorado and Oklahoma contributed to victory over the Japanese Empire in the Second World War and to alliance with Japan during the Cold War. Roger Dingman, professor emeritus of history at the University of Southern California, tells in this book the story of the naval and Marine intelligence officers from the U.S. Navy Japanese Language School at the University of Colorado at Boulder and at Oklahoma A-M College in Stillwater. Dingman, who served for a time in the Navy before embarking on an academic career in Japanese history, describes with enthusiasm and in detail the lives of these language officers. Deciphering the Rising Sun: Navy and Marine Corps Codebreakers, Translators, and Interpreters in the Pacific War, by Roger Dingman, Annapolis, MD: Naval Institute Press, 2009, 340 pp., photos, maps, bibliography, index.

Title: (U) Office of Strategic Services Training during World War II

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525040>

Accession Number: ADA525040

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jun 2010

Abstract: (U) In the histories of the Office of Strategic Services (OSS), the heralded predecessor of the Central Intelligence Agency in World War II, what has been largely neglected is the challenge OSS leaders faced in developing a program to train the glorious amateurs of America's first central intelligence and covert operations agency. OSS's response to the challenge of preparing operatives for missions deep inside enemy-controlled territory began in 1942 with a paramilitary training program in two national parks. One of its legacies is the CIA training program today. In examining OSS training, this article draws on the author's recent 600-page report to the U.S. National Park Service on OSS training in the national parks as well as his subsequent research for a forthcoming book on OSS training and service in World War II. The article deals primarily with the two main direct action branches, Special Operations (SO) and Operational Groups (OG). In the process, it also refers to training in other operational branches: Secret Intelligence (SI), X-2 (Counterintelligence), Morale Operations (MO), and the Maritime Unit (MU), plus the Communications (Commo) Branch. Most of the organization's other components, such as the Research and Analysis Branch, employed people who were already skilled in their fields and who did not generally require OSS training. This essay addresses several questions. Why were the national parks chosen as training sites? How was the training program created? What were its aims and methods? How did it evolve? Most importantly, how effective was the training and what was its legacy?

Title: (U) Lessons for Intelligence Support to Policymaking during Crises

PDF URL: (pdf) - 476 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526376>

Accession Number: ADA526376

Personal Author(s): Miller, Paul D

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jun 2010

Abstract: (U) In the spring of 2007, President George W. Bush named Army Lt. Gen. Douglas Lute to serve as his assistant and deputy national security advisor for Iraq and Afghanistan to bring greater attention and coherence to U.S. policy making in those areas. Lute, who would be popularly referred to as the war advisor, or the war czar, served through the end of the Bush administration, and like Secretary of Defense Bob Gates, he continued working in the Obama administration, although with some changes to his title and portfolio. I worked for General Lute from September 2007 through September 2009 as director for Afghanistan on the National Security Council staff. I was detailed from the Central Intelligence Agency's Directorate for Intelligence (DI), where I served as a political analyst on the Afghanistan Branch from 2003 to 2007. Prior to that, in 2002, I served as an intelligence analyst in

the U.S. Army, deployed to the Combined Joint Task Force-180 Intelligence Support Element in Bagram, Afghanistan. During my two years in the NSC, I came to see both strengths and weaknesses in Intelligence Community (IC) support to policy making. In this article, after an overview of the NSC and my role in it, I will offer what I consider to be the lessons of my experience and suggest ways in which the IC might be able to improve its support to the NSC, especially in high-profile crisis situations.

Title: (U) Operation Hotel California: The Clandestine War Inside Iraq

PDF URL: (pdf) - 41 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA523647>

Accession Number: ADA523647

Personal Author(s): P, Matt

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jun 2010

Abstract: (U) What is the point of even having an intelligence service, since no one is listening to the field intelligence? This rhetorical question from former CIA officer Charles Sam Faddis is one of two themes of Operation Hotel California, an account of the CIA-U.S. Special Forces teams in Iraqi Kurdistan in advance of the opening of the Iraq War in 2003. The other theme is that these teams and their

Kurdish counterparts amassed an impressive record, something most works on the war have missed. Tucker is author of several books on the conflict, including *Among Warriors in Iraq: True Grit, Special Ops, and Raiding in Mosul and Fallujah* (The Lyons Press, 2005) and *RONIN: A Marine Scout/Sniper Platoon in Iraq* (Stackpole Books, 2008). Faddis was the leader of the CIA team that went into Iraq in the summer of 2002, 8 months before the U.S. military entered in force. In addition to providing insight into a little-known aspect of the U.S. involvement in Iraq, the book weighs in on current debates about wartime intelligence. These debates tend to focus on the efficacy of the Intelligence Community, but this book shows that also worthy of consideration is the extent to which the strategists and policy makers are willing to listen. *Operation Hotel California: The Clandestine War Inside Iraq*, by Mike Tucker and Charles Faddis. (Guilford, CT: The Lyons Press, 2009), 216 pp., index.

Report Date: Mar 2010

Abstract: (U) The Center for the Study of Intelligence (CSI) was founded in 1974 in response to Director of Central Intelligence James Schlesinger's desire to create within CIA an organization that could think through the functions of intelligence and bring the best intellects available to bear on intelligence problems. The center, comprising professional historians and experienced practitioners, attempts to document lessons learned from past activities, to explore the needs and expectations of intelligence consumers, and to stimulate serious debate about current and future intelligence challenges. To carry out this mission, CSI publishes Studies in Intelligence, as well as numerous books and monographs addressing historical, operational, doctrinal and theoretical aspects of the intelligence profession. It also administers the CIA Museum and maintains the Agency's Historical Intelligence Collection of published literature on intelligence.

Title: (U) Thinking and Writing: Cognitive Science and Intelligence Analysis

PDF URL: (pdf) - 395 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA520873>

Accession Number: ADA520873

Personal Author(s): Sinclair, Robert S

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Feb 2010

Abstract: (U) The monograph has two parts: first, a survey of cognitive science as we understood it in 1984; second, suggestions for changing the way we do intelligence analysis in light of what the discipline was telling us. As I have indicated, I think the survey section holds up pretty well. While I would like to think the reader will learn something useful from immersion in all the detail (notably the diagram on page 10, which makes graphic the many elements that interactively shape our conscious mental activity), the basic concept is quite simple. The conscious mind cannot track more than about seven cognitive elements at the same time (cognitivescience jargon often refers to these elements as chunks); and to cope with this constraint, our brains constantly manipulate those elements, always at top speed and usually outside our conscious awareness.

Report Date: 31 Dec 2009

Abstract: (U) The Deputy Director of National Intelligence for Analysis hereby submits this report in response to a congressionally directed action in Section 721 of the FY 1997 Intelligence Authorization Act, which states: (a) REPORTS: The Director of Central Intelligence shall submit to Congress an annual report on - (1) the acquisition by foreign countries during the preceding 6 months of dual-use and other technology useful for the development or production of weapons of mass destruction (including nuclear weapons, chemical weapons, and biological weapons) and advanced conventional munitions; and (2) trends in the acquisition of such technology by such countries. (b) SUBMITTAL DATES: (1) The report required by subsection (a) of this section shall be submitted each year to the congressional intelligence committees and the congressional leadership on an annual basis on the dates provided in section 415b of this title. (2) In this subsection: (A) The term congressional intelligence committees has the meaning given that term in section 401 a of this title. (6) The term congressional leadership means the Speaker and the minority leader of the House of Representative and the majority leader and the minority leader of the Senate. (c) Form of reports Each report submitted under subsection (a) of this section shall be submitted in unclassified form, but may include a classified annex.

Title: (U) Studies in Intelligence. Volume 53, Number 2 (Summer Supplement 2009). Intelligence in Contemporary Media: Views of Intelligence Officers

PDF URL: (pdf) - 965 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA504946>

Accession Number: ADA504946

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Jul 2009

Abstract: (U) One of the least appreciated facts about the intelligence profession is that it exists in, and is influenced by, a very complex environment. The public is a particularly important part of this environment. But unlike military services, intelligence organizations do not have recruitment centers in every mid-sized town; nor do most families have some member who has served in intelligence. Hence, what most in the public think about intelligence depends to a large extent on what they see in cinematic, documentary, and novelistic sources like those reviewed in this issue. This is particularly the case in the United States. As the reviewers make clear, what the public sees and reads is with rare exception fantasy mixed with a few kernels of truth. This is particularly true when it comes to American authors and directors. We have not yet produced an espionage novelist with the maturity and perfect pitch so frequently found in the work of British masters such as John le Carr. As important as detail is to all art, what often lingers is a dominant impression?what you remember days, weeks, or years after seeing a film or reading a novel. And in that respect, what I take from these reviews is modestly reassuring. When you look at all of the recent films about espionage, what lingers are several broad impressions: intelligence officers are often courageous, prepared to stand on principle, forced frequently to deal with stressful or ambiguous circumstances, and quite willing to take risks. So enjoy the Intelligence in Contemporary Media section of this issue of Studies in Intelligence and take heart from the thought that if life truly does imitate art, that would not be an entirely bad thing in the case of espionage.

Personal Author(s): Helgerson, John L

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC OFFICE OF THE INSPECTOR GENERAL

Report Date: 25 Aug 2008

Abstract: (U) In the 1990s, the US Government instituted several programs in cooperation with the Government of Peru as part of its war on drugs. The programs were designed to attack all aspects of the narcotics trade, from an eradication program designed to destroy coca fields under cultivation, to the Airbridge Denial Program (ABDP), designed to interrupt the transport of coca paste by civil aircraft from Peru to Colombia. By 1997, Agency reporting described the ABDP as a major success that played a key role in the significant decline in coca cultivation in Peru and as the linchpin of a successful strategy to disrupt the export of coca products. The ABDP operated east of the Andes Mountains in an area of Peru designated by the Peruvian Government as a special air defense identification zone. Under the terms of the US-Peruvian program, if an aircraft was reasonably believed to be involved in narcotics trafficking, the Peruvian Air Force (Fuerza Aerea del Peru or FAP) was authorized to direct the suspect aircraft to land at a designated airfield. If the suspect aircraft failed to follow instructions and after a series of required warnings, FAP fighter aircraft could be authorized to shoot it down.

Report Date: Jan 2006

Abstract: (U) In August 1991, the Soviet Union still regarded Lithuania and its Baltic neighbors, Estonia and Latvia, as members of the Soviet Union. All three had progressed much further toward a break with the Soviets and real independence than other Soviet republics since Gorbachev's liberal policies of the mid-1980s had encouraged nationalists to begin breaking with Moscow. In Lithuania, a new political force Sajudis (the Movement) emerged in June 1988 ostensibly to support the Soviet leader's reforms, but it also promoted a Lithuanian nationalist agenda. Sajudis demanded that the Soviet Union officially acknowledge the excesses of the Stalinist era, halt construction of a nuclear reactor in Lithuania, and disclose the secret protocols of the Soviet-Nazi Non-aggression Pact of 1939 that had granted the Soviets control of the Baltic states. Encouraged by the successes in neighboring Poland of the Solidarity movement in 1988, Lithuanian nationalists began to drive events with lightening speed. In October 1988 Sajudis elected Vytautas Landsbergis, a dynamic professor of musicology, its chairman. In March 1989 Sajudis representatives won seats in the Congress of People's Deputies, the Soviet Union's highest legislative body, and began advocating Lithuanian national interests in the Kremlin. In May the Lithuanians proclaimed their sovereignty and declared their country's incorporation into the Soviet Union illegal. State, and even communist, organizations declared their separation from Moscow and began to function independently. On 23 August 1989, the 50th anniversary of the Soviet-Nazi Non-aggression Pact, about 2 million people from Lithuania, Latvia, and Estonia stood holding hands along a highway from Vilnius to Tallinn to form a human chain stretching over 350 miles. In December the Lithuanian Communist Party seceded from the Communist Party of the Soviet Union. In 1990, Landsbergis was elected Chairman of the Lithuanian Supreme Soviet.

Title: (U) Curing Analytic Pathologies: Pathways to Improved Intelligence Analysis

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA500058>

Accession Number: ADA500058

Personal Author(s): Cooper, Jeffrey R

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Dec 2005

Abstract: (U) As a result of a number of analytic projects for different intelligence agencies, a major focus of my work during the past several years has involved examining the practice of analysis within the US Intelligence Community. This study was prompted by a growing conviction-shared by others, to be sure-that improving the analytic products delivered by Intelligence Community components had to begin with a critical and thorough appraisal of the way those products are created. A conversation with a physicist friend in 2002 had triggered thoughts on several basic differences between the practice of science and intelligence analysis. Shortly thereafter, an invitation to give a seminar on intelligence analysis at Stanford University led me to prepare a briefing entitled Intelligence and Warning: Analytic Pathologies, which focused on a diagnosis of the problems highlighted by recent intelligence failures. As Donald Stokes noted in his seminal book on science and technological innovation, Pasteur's Quadrant, Pathologies have proved to be both a continuing source of insight into the system's normal functioning and a motive for extending basic knowledge. The Analytic Pathologies framework yields four insights that are crucial both to accurate diagnosis and to developing effective remedies. First, the framework enables analysts to identify individual analytic impediments and determine their sources. Second, it prompts analysts to detect the systemic pathologies that result from closely-coupled networks and to find the linkages among the individual impediments. Third, it demonstrates that each of these networks, and thus each systemic pathology, usually spans multiple levels within the hierarchy of the Intelligence Community. Fourth, the framework highlights the need to treat both the systemic pathologies and the individual impediments by focusing effective remedial measures on the right target and at the appropriate level.

Report Date: Apr 2005

Abstract: (U) The publication of The 9/11 Commission Report, the war in Iraq, and subsequent negotiation of the Intelligence Reform and Terrorism Prevention Act of 2004 have provoked the most intense debate over the future of American intelligence since the end of World War II. For observers of this national discussion--as well as of future debates that are all but inevitable? this paper offers a historical perspective on reform studies and proposals that have appeared over the course of the US Intelligence Community's evolution into its present form. We have examined the origins, context, and results of 14 significant official studies that have surveyed the American intelligence system since 1947. We explore the reasons these studies were launched, the recommendations they made, and the principal results that they achieved. It should surprise no one that many of the issues involved--such as the institutional relationships between military and civilian intelligence leaders--remain controversial to the present time. For this reason, we have tried both to clarify the perennial issues that arise in intelligence reform efforts and to determine those factors that favor or frustrate their resolution. Of the 14 reform surveys we examined, only the following achieved substantial success in promoting the changes they proposed: the Dulles Report (1949), the Schlesinger Report (1971), the Church Committee Report (1976), and the 9/11 Commission Report (2004). The earliest such study, the January 1949 Dulles Report, achieved its considerable influence only after a disastrous warning failure almost 18 months later at the outset of the Korean War. A new Director of Central Intelligence (DCI), Lt. Gen. Walter Bedell Smith, used this report to make major changes at the Central Intelligence Agency.

Personal Author(s): Johnston, Rob

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Jan 2005

Abstract: (U) It is a rare season when the intelligence story in the news concerns intelligence analysis, not secret operations abroad. The United States is having such a season as it debates whether intelligence failed in the run-up to both September 11 and the second Iraq war, and so Rob Johnston's wonderful book is perfectly timed to provide the back-story to those headlines. The CIA's Center for the Study of Intelligence is to be commended for having the good sense to find Johnston and the courage to support his work, even though his conclusions are not what many in the world of intelligence analysis would like to hear. He reaches those conclusions through the careful procedures of an anthropologist -- conducting literally hundreds of interviews and observing and participating in dozens of work groups in intelligence analysis -- and so they cannot easily be dismissed as mere opinion, still less as the bitter mutterings of those who have lost out in the bureaucratic wars. His findings constitute not just a strong indictment of the way American intelligence performs analysis, but also, and happily, a guide for how to

do better. Johnston finds no baseline standard analytic method. Instead, the most common practice is to conduct limited brainstorming on the basis of previous analysis, thus producing a bias toward confirming earlier views. The validating of data is questionable -- for instance, the Directorate of Operation's (DO) cleaning of spy reports doesn't permit testing of their validity -- reinforcing the tendency to look for data that confirms, not refutes, prevailing hypotheses. The process is risk averse, with considerable managerial conservatism. There is much more emphasis on avoiding error than on imagining surprises. The analytic process is driven by current intelligence, especially the CIA's crown jewel analytic product, the President's Daily Brief (PDB), which might be caricatured as CNN plus secrets.

Abstract: (U) The Center for the Study of Intelligence (CSI) was founded in 1974 in response to DCI James Schlesinger's desire to create within CIA an organization that could think through the functions of intelligence and bring the best intellects available to bear on intelligence problems. The Center, comprising professional historians and experienced practitioners, attempts to document lessons learned

from past activities, to explore the needs and expectations of intelligence consumers, and to stimulate serious debate on current and future intelligence challenges. To carry out this mission, CSI publishes Studies in Intelligence, as well as numerous books and monographs addressing historical, operational, doctrinal and theoretical aspects of the intelligence profession.

Title: (U) Rethinking Alternative Analysis to Address Transnational Threats

PDF URL: (pdf) - 50 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525417>

Accession Number: ADA525417

Personal Author(s): Fishbein, Warren ; Treverton, Gregory

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Oct 2004

Abstract: (U) Understanding complex transnational issues, such as terrorism and weapons proliferation, requires an alternative analysis approach that is more an ongoing organizational process aimed at promoting mindfulness--continuous wariness of analytic failure--than a set of tools that analysts are encouraged to employ when needed. This means that Intelligence Community analytic organizations need to institutionalize sustained, collaborative efforts by analysts to question their judgments and underlying assumptions, employing both critical and creative modes of thought. For this approach to be effective, significant changes in the cultures and business processes of analytic organizations will be required. These are the key conclusions arising from a project undertaken by the CIA's Global Futures Partnership in the Sherman Kent School for Intelligence Analysis and the RAND Corporation to rethink alternative analysis--tools designed to help analysts and decision-makers employ rigorous self-review, question judgments, and explore alternative outcomes--to better address threats in the increasingly important realm of transnational issues. In a series of unclassified workshops, Intelligence Community analysts and analytic managers came together on a non-attribution basis with outside thinkers in a broad range of fields relevant to the analytic process, including cognitive psychology, psychiatry, organizational behavior, artificial intelligence, knowledge management,

intelligence studies, and the foreign policy process. Through presentations and discussions among participants, the workshops sought to generate broad concepts about adapting alternative analysis to enhance warning of out-of-the-ordinary actions undertaken by non-state actors, epitomized in the September 11 attacks. What follows in this report are some of the more intriguing practical ideas that surfaced at the workshops, augmented with insights from related studies that elaborate these ideas.

Report Date: Oct 2004

Abstract: (U) Intelligence Community analytic organizations need to institutionalize processes to consider whether and how they might have gotten it wrong to enhance their abilities to anticipate potential threats in highly complex, fast-moving transnational issues, such as terrorism and weapons proliferation. Such processes would involve sustained, collaborative efforts by analysts to question their judgments and underlying assumptions, employing both critical and creative modes of thought. For such

processes to be effective, significant changes in the cultures and business processes of analytic organizations will be required. These are the key conclusions arising from a project undertaken by the Kent School's Global Futures Partnership and the RAND Corporation to rethink alternative analysis-tools designed to help analysts and decision makers employ rigorous self-review, question judgments, and explore alternative outcomes-to better address threats in the increasingly important realm of transnational issues. In a series of unclassified workshops, Intelligence Community analysts and analytic managers came together on a nonattribution basis with outside thinkers in a broad range of fields relevant to the analytic process, including cognitive psychology, psychiatry, organizational behavior, artificial intelligence, knowledge management, intelligence studies, and the foreign policy process. Through presentations and discussions among participants, the workshops sought to generate broad concepts about adapting alternative analysis to enhance warning of out-of-the-ordinary actions undertaken by nonstate actors, epitomized in the September 11 attacks. What follows in this report are some of the more intriguing ideas that surfaced at the workshops, arrayed and developed by the project leaders into a systematic argument.

Title: (U) Intelligence and Policy: The Evolving Relationship

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA499842>

Accession Number: ADA499842

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Jun 2004

Abstract: (U) As became abundantly clear during a conference sponsored by CIA's Center for the Study of Intelligence (CSI) in Charlottesville, Virginia, on 10 and 11 September 2003, the challenges that face the US Intelligence Community in the aftermath of the terrorist attack on the United States two years earlier are perceived by members of that community as being far more complex, demanding, and consequential than any they have heretofore encountered. That conference brought together an experienced group of national security specialists from the intelligence and policy communities to discuss Intelligence for a New Era in American Foreign Policy. Not long after the Charlottesville conference, Dr. James Steiner, CIA's Officer in Residence and Associate at the Institute for the Study of Diplomacy (ISD) of the Edmund A. Walsh School of Foreign Service at Georgetown University, coordinated an effort to answer one of the challenging questions that have arisen in the changed post-9/11 security environment: how can the Intelligence Community effectively provide actionable intelligence while being mindful of its traditional practice of separating, to the extent possible, the intelligence and policy functions of national security decisionmaking. The resulting one-day roundtable conference became for CSI the first in a planned series of projects on intelligence and policy intended to foster better understanding of the often perplexing dynamic between the consumers of intelligence and intelligence professionals.

Title: (U) Thinking Straight: Cognitive Bias in the US Debate about China

PDF URL: (pdf) - 196 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA523245>

Accession Number: ADA523245

Personal Author(s): Kerbel, Josh

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2004

Abstract: (U) Of the axioms, dictums, and mantras echoing through the US foreign policy and intelligence debates in the wake of controversy over estimates of Iraqi weapons of mass destruction, none reverberates more than: be wary of mind-set and bias and constantly reexamine assumptions. The fact is, however, that genuine wariness and thorough reexaminations have been rare and attention has tended to focus on the more easily recognizable non-cognitive biases, the lowhanging fruit, that eclipse much more ingrained cognitive biases and the flawed assumptions they engender. Nowhere is this tendency more clearly evident than in the continuing US debate over China, which has long been conducted as if single-outcome predictions of China's long-term future are possible and that the United States is capable of promoting or altering a predicted outcome. I will argue here that these two assumptions are largely the result of an unrecognized, deeply ingrained, and enduring cognitive bias that results in the misapplication of a linear behavioral template to China, which, like all nation-states, in reality behaves nonlinearly. In making my case, I will explain how cognitive bias fosters this misapplication, discuss the illusions of certainty- especially of predictability and influence- that this misapplication promotes, and examine the complementary non-linear perspectives that might correct the imbalance. Finally, I will suggest how such nonlinear perspectives might be cultivated and applied to- in the words of Sherman Kent- elevate the level of debate.

Title: (U) Preserving Central Intelligence: Assessment and Evaluation in Support of the DCI

PDF URL: (pdf) - 105 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA515183>

Accession Number: ADA515183

Personal Author(s): Nolte, William

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Jan 2004

Abstract: (U) Once again, reform of the US intelligence establishment is a prime topic of Washington discussion. We have been here before since the Cold War ended, with a dozen or more studies, official and unofficial, focused on intelligence, its roles, and its functions. These efforts notwithstanding, it can be suggested that the end of the Cold War and the major changes which followed in both the operational and technical environments for intelligence did not produce sufficient momentum to overcome the institutional inertia that favored the status quo in the nature and structure of American intelligence. Moreover, neither the significant (though not as dramatic as some would like to claim) budgetary austerity of the 1990s nor the attacks of 11 September 2001 (remarkably at first glance) produced enough shock to prompt major changes. Before we choose to abandon, as some have begun to argue, the office of the Director of Central Intelligence, one of the great and most resilient creations of the National Security Act of 1947, we should at least explore options to strengthen and preserve it. This article will focus on suggestions for correcting two related deficiencies in the intelligence establishment, the absence of an effective internal assessment mechanism in service of the DCI and the absence of an equivalent to the US military's combatant command structure, which has proven invaluable to the defense establishment over the past half century.

Report Date: Jan 2004

Abstract: (U) The Internet, touted in much of the world as a vehicle for personal liberation, serves in North Korea as a pillar supporting Asia's most authoritarian government. The Democratic People's Republic of Korea (DPRK) has embraced the World Wide Web as the latest means of acquiring, processing, and disseminating the foreign technical information required for domestic research and development, while at the same time barring the door against information contrary to its ideology. From P'yongyang and sites outside the capital, researchers surf the Web to acquire the latest technical data. Meanwhile, overseas Koreans, particularly those residing in Japan, gather for their fatherland vast amounts of information with an ease unimaginable ten years ago. Inside North Korea, an Intranet serves as a means to disseminate technical information to research institutes, factories, and schools throughout the country. Accessing the latest foreign data on line from their place of work, North Korean researchers remain under the control of the authorities. The Internet thus limits the risks of foreign defection or ideological infection inherent in sending scientists abroad to study or attend international conferences.

Title: (U) When Jack Welch Was Deputy Director for Intelligence

PDF URL: (pdf) - 133 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA523243>

Accession Number: ADA523243

Personal Author(s): Cochran, Zefram

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2004

Abstract: (U) Washington, DC, September 2017: The following are the remarks of former DDI Jack Welch's executive assistant, who recently served as a panelist at a joint CSI-DI conference celebrating the 65th anniversary of the Directorate of Intelligence. Jack Welch became Deputy Director for Intelligence (DDI) after long service at General Electric. For me, a longtime student of management theory- especially Welch's- his arrival offered much promise. Amazingly, his arrival also led to the seeming fulfillment of an old dream of mine, service as the DDI's executive assistant. So forgive me, if I can't help but look back on his four years as DDI with fondness. Welch had come on board at the DCI's request and because he felt it was his patriotic duty. He came at a time in which the global challenges we faced and the pace of technological change in the military and policy communities had created a climate in which many were asking how we should adapt. Nevertheless, when Welch arrived, he was greeted both with optimism and skepticism: optimism, because he had, after all, been hailed as one of the greatest- if not the greatest- business leaders of the time. During Welch's 20-plus years as head of GE, he defied conventional wisdom and pioneered some of the modern business strategies that transformed the way we did business late in the 20th century and early in this one. Skepticism was rife because Welch had no background in intelligence and because the importation to CIA of business management ideas had been less than successful (or popular) before.

Report Date: Jan 2004

Abstract: (U) The career of John Frenchy Grombach has long been a mystery that apparently would never be solved, given the secrecy of his actual work and the exaggerations of his memoirs and collaborators. Mark Stout has labored valiantly in publicly available sources and, with the help of other historians, in personal collections to outline Grombach's activities. This article presents his findings. In late 2001, however, voluminous records of Grombach's semi-private intelligence organization were found in a barn in Virginia. Those records are now at the CIA, which, after reviewing them for lingering security concerns, will transfer them to the National Archives. Mr. Stout had access to the newly discovered records before he left the Agency in 2003.

Title: (U) Intelligence Support to the Life Science Community: Mitigating Threats from Bioterrorism

PDF URL: (pdf) - 232 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA523242>

Accession Number: ADA523242

Personal Author(s): Petro, James B

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2004

Abstract: (U) The al-Qa'ida attacks of 11 September 2001 and the delivery of Bacillus anthracis (anthrax) via the US Postal Service triggered a significant increase in initiatives to improve defense against biological attacks. They also reinvigorated a decades-old debate about the contributions that openly published scientific research might make to the efforts of bioterrorists and others who may be developing a biological warfare (BW) or other weapons of mass destruction (WMD) capability. Resolution of this debate could be made easier by input from knowledgeable intelligence and other national security professionals. Collaboration involving the national security and bioscience research communities could be key to minimizing the challenges posed by proliferation of research findings that have bioterror and BW applications. Unfortunately, while there have been recent discussions involving these communities, the relationship between them has been nearly nonexistent. Accordingly, initial approaches and interactions must be planned and carefully carried out to ensure that the bridges built

between the two communities are solid and long lasting. A necessary next step is to make sure that national security professionals who enter this collaboration are thoroughly familiar with the current and past debates among scientists about the potential openly published research findings have to enable BW or bioterrorism. This article is an overview of this debate, and it summarizes the most recent discussions among bioscience researchers. In addition, it offers some options the Intelligence Community (IC) can consider to help the life science community continue its work effectively, while safeguarding national security.

Report Date: Jan 2004

Abstract: (U) In Operation Iraqi Freedom, the world witnessed a progress report on the revolution in military affairs (RMA). The performance of US forces in the major combat phase of the operation in Iraq

demonstrated the ability of institutions functioning within standard bureaucratic, hierarchical structures to operate beyond those structures. To put it bluntly, US forces in Iraq leapt past jointness into networked operating models. They became hierarchies emulating networks. The challenge to the Intelligence Community is to keep pace with the significant flow of change emanating from the Department of Defense.

Report Date: Jan 2004

Abstract: (U) Our age's increasingly voluminous open-source intelligence (OSINT) sheds light on issues of the day for all-source analysts, covert collectors, and policymakers, but have we done enough to exploit its potential? My short answer is No, and here's why I think so. Collecting intelligence these days is at times less a matter of stealing through dark alleys in a foreign land to meet some secret agent than

one of surfing the Internet under the fluorescent lights of an office cubicle to find some open source. The world is changing with the advance of commerce and technology. Mouse clicks and online dictionaries today often prove more useful than stylish cloaks and shiny daggers in gathering intelligence required to help analysts and officials understand the world. Combined with stolen secrets, diplomatic reports, and technical collection, open sources constitute what one former deputy director of intelligence termed the intricate mosaic of intelligence. Today's commercial and technical advances are only the latest developments in a collection discipline whose pioneers began developing the field in the late 1930s. Building on early work at Princeton University to monitor foreign short-wave radio, the Foreign Broadcast Intelligence Service (FBIS) in 1941 began to turn radio into a primary intelligence source during World War II. The government did not neglect the printed word either. The Interdepartmental Committee for the Acquisition of Foreign Periodicals (IDC) gathered Axis publications through a global collection network. The men and women who labored in the OSINT fields of the day produced products that compared well in quantity and quality to those of other agencies that stamped their documents SECRET.

Title: (U) Analytic Professionalism and the Policymaking Process: Q-A on a Challenging Relationship

PDF URL: (pdf) - 37 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525418>

Accession Number: ADA525418

Personal Author(s): Davis, Jack

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Oct 2003

Abstract: (U) Intelligence professionalism regarding the proper relationship between analysts and policymakers is an issue that has challenged practitioners since Sherman Kent first grappled with it a half-century ago. Defining the role of intelligence analysts in the policymaking process remains very much a work in progress, and is one on which the Sherman Kent Center for Intelligence Analysis welcomes debate. This essay attempts to put into perspective the current intensive public examination of analyst-policymaker relations triggered by judgments on Iraq's WMD capabilities and relations with al- Qa'ida terrorists in the run up to the March 2003 US-led military invasion. The essay does not seek to render a substantive appraisal of who estimated what and why, or a scorecard of whose judgments turned out to be right or wrong in the large volume of intelligence analysis and policy analysis on Iraq produced before the war. The focus, rather, is on advancing generally applicable judgments about the professional prerogatives of analysts and policymakers where their views and interests seem to clash. Nine questions and answers about policymaker prerogatives are posed here to illuminate what actions represent legitimate exercise of their professional responsibilities. The text also addresses the responsibilities of analysts as members of a policy service organization and the professional standards they must protect in order to ensure their distinctive contribution to national security.

Title: (U) Sherman Kent's Final Thoughts on Analyst-Policymaker Relations

PDF URL: (pdf) - 115 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526589>

Accession Number: ADA526589

Personal Author(s): Davis, Jack

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Jun 2003

Abstract: (U) Sherman Kent, widely recognized as the single most influential contributor to the analytic doctrine and tradecraft practiced in CIA's Directorate of Intelligence, was long seized with the importance, and difficulty, of establishing effective relationships between intelligence analysts and policy officials. Based on World War II experience in the Research and Analysis Branch of OSS, Kent concluded that analysts, ever the junior partners, had to carry the larger burden in managing the relationships with their policy counterparts. This required analysts to reassess regularly the issue of effective ties as challenges and opportunities changed. Over his 17 years of Agency experience (1950-1967), Kent experienced frustrations as well as successes with what he saw as the central professional challenge of simultaneous service to two demanding masters-analytic integrity and policy clients. In a series of post-retirement lectures in training courses for CIA and Defense Intelligence Agency analysts, Kent addressed two recurring challenges in analyst-policymaker relations-providing warning and analyzing intentions-that he argued needed fresh examination by each new generation of practitioners. Kent titled these lectures Aspects of the Relationship between Intelligence Producers and Consumers. While he admitted, in his final recorded thoughts on the issues, that his generation had found no failsafe formulas to ensure effective ties, he did point to the general paths that he believed needed to be taken.

Title: (U) The Need to Reorganize the Intelligence Community

PDF URL: (pdf) - 257 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA523740>

Accession Number: ADA523740

Personal Author(s): Kindsvater, Larry C

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2003

Abstract: (U) The changes recommended in this paper would fundamentally alter how the IC actually functions, making substantive national security missions/issues/ threats the driving managerial force across the IC, and creating organized entities with someone in charge who is responsible for Community-wide efforts against specific national security missions. This arrangement would dramatically reduce the intelligence collection (stovepipe) management and organizational orientation of the IC. Moreover, it would place a DCI with expanded authorities at the top of an organization, the Central Intelligence Agency, that has an IC-wide (corporate) mission, responsibility, and authority.

Report Date: Jan 2003

Abstract: (U) On 20 September 1985, international wire service reports carried a statement distributed by the official Soviet news agency TASS that one A. G. Tolkachev, whom it described as a staff member at one of Moscow's research institutes, had been arrested the previous June trying to pass secret materials of a defensive nature to the United States. Subsequent news stories said Tolkachev was an electronics expert at a military aviation institute in Moscow who was compromised by former CIA officer Edward Lee Howard.

Report Date: Jan 2003

Abstract: (U) In early January 1962, I arrived in Vientiane, Laos, for my first assignment with We Central Intelligence Agency. Young case officers like myself, having completed basic training for the Clandestine Service and then paramilitary (PM) instruction, were being sent out in support of President Kennedys decision to hold the line against communist expansion. Trying to help the Laotians maintain their territorial integrity and their independent government was a tall order for a new officer. The demand for quick decisionmaking and constant flexibility to handle the unexpected in a war zone proved to he excellent preparation for my long career as a case officer in the field.

Title: (U) Strategic Warning: If Surprise is Inevitable, What Role for Analysis?

PDF URL: (pdf) - 53 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526588>

Accession Number: ADA526588

Personal Author(s): Davis, Jack

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Jan 2003

Abstract: (U) The dramatic events of 11 September 2001 color this paper, but it is not about the devastating terrorist attacks per se, nor about the daunting challenges of tactical warning. The focus, instead, is on strategic warning. Warning analysis is charged with applying all-source information, expert insights, and specialized tradecraft to help policy officials prevent or limit damage from threats to US security interests. Tactical warning, as defined in this paper, seeks to detect and deter specific threats to US interests; the objective is to avoid incident surprise and thus block or blunt damage. Strategic warning addresses perceived dangers in broader terms, in order to inform policymaker decisions on general security preparedness--again to prevent or limit damage. US national security resources are limited. Tactical warning cannot be counted on to pinpoint defensive measures by providing timely notice of all specific attacks and menacing developments. In this context, the challenge of strategic warning is to help policy officials decide--in advance of specific indicators of danger--which of the many plausible general threats to US security interests deserve concerted defensive and preemptive preparations. Strategic warning, to be effective, has to be credible in assessing contingent dangers and has to facilitate policymaker decision and action to protect against these dangers. This paper tables for consideration and debate several recommendations to advance two goals: (1) To reconstitute strategic warning as a collaborative governmental function by engaging policy officials responsible for effecting defensive measures in every step of the analysis process, including topic selection and trend monitoring; (2) To warrant a distinctive intelligence contribution to a collaborative warning effort by expanding dedicated analytic resources and sharpening requisite substantive expertise and specialized tradecraft.

Title: (U) Tensions in Analyst-Policymaker Relations: Opinions, Facts, and Evidence

PDF URL: (pdf) - 53 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526555>

Accession Number: ADA526555

Personal Author(s): Davis, Jack

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Jan 2003

Abstract: (U) This memorandum on tensions in analyst-policymaker relations is occasioned by recent media accounts of DOD-Intelligence Community differences over the extent of Iraqi-al Qa'ida ties. Similar patterns of tension have existed over the decades. The following conclusions could have been crafted about Vietnam War issues in the 1960s, Soviet strategic intentions in the 1970s, or Central American insurgencies in the 1980s. (1) Tension over policymaker criticism of intelligence performance on hot-button issues is normal; (2) The intensity and political content of policymaker criticism, and thus the analysts' pain, can vary considerably; (3) One key to effective management is to take seriously the analytic elements of criticism; (4) The analysts' pain is magnified when colleagues levy charges of unprofessional analysis and politicization against attempts to address policymaker concerns through more deliberate tradecraft or Alternative Analysis and (5) Leadership can ease tensions with policy officials and among analysts by articulating robust corporate tradecraft responses for disputes over interpretation of ambiguous evidence.

Title: (U) The Challenge for the Political Analyst

PDF URL: (pdf) - 331 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525680>

Accession Number: ADA525680

Personal Author(s): Petersen, Martin

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2003

Abstract: (U) Over thirty years as a political analyst and manager of analysts has convinced me that it is harder for political, leadership, and country analysts to be taken seriously by the policymaking audience than economic or scientific analysts, to name but two. There are good reasons why this is the case and they have nothing to do with the expertise of political analysis, their integrity, or the complexity of the issues involved. Rather, it is the nature of the beast-politics-that makes policymakers more skeptical of what political analysis can offer and adds to the credibility burden that all analysts share.

Title: (U) Sherman Kent and the Profession of Intelligence Analysis

PDF URL: (pdf) - 55 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526587>

Accession Number: ADA526587

Personal Author(s): Davis, Jack

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Nov 2002

Abstract: (U) It's tough living with a legend. The legacy of Sherman Kent is never far from the thoughts of Kent School faculty members--and his portrait looks down on us from the wall--as we go about the business of teaching the principles and practice of intelligence analysis to yet another generation of DI analysts. Sherman Kent's three decades as an analyst in OSS and CIA included over 15 years as the chief of the Office of National Estimates. Under his leadership, the Intelligence Community's Cadillac product was defined and developed. During the interval between his World War Two service and his return to CIA in 1950, Kent wrote one of the most influential books ever published on intelligence analysis, Strategic Intelligence for American World Policy. Later, Kent was the instigator and head of the editorial board for Studies in Intelligence, the professional journal of intelligence officers. In short, Sherman Kent was more than present at the creation of the intelligence profession; he was the father of our craft. Jack Davis's engaging essay captures both the history and some of the colorful spirit of this larger-than-life character. In it we read of Kent's rare blend of demanding intellect and disarming expression. He was the theorist who formulated Kent's Law of Coups (i.e., those coups that are known about in advance don't take place). He was the practitioner who painstakingly insured that the Estimates he forwarded to the Director of Central Intelligence met high standards of policy relevance, analytic rigor, and clarity.

Title: (U) When Everything is Intelligence - Nothing is Intelligence

PDF URL: (pdf) - 30 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526584>

Accession Number: ADA526584

Personal Author(s): Agrell, Wilhelm

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Oct 2002

Abstract: (U) This engaging, anecdote-rich essay, was delivered as a keynote speech on 23 May 2002 at the Kent Center Conference on Understanding and Teaching Intelligence Analysis: A Discipline for the 21st Century. In it, Professor Wilhelm Agrell of the University of Lund, Sweden reflects on the evolution of the practice of intelligence analysis into a modern profession. Highlighting what intelligence analysis is and, importantly, is not, he questions the recent fascination with applying the concept or perhaps the illusion of intelligence analysis too broadly, such as to information processing activities that are not really intelligence in the professional sense of the word. Professor Agrell sounds a cautionary note that is timely at a historical juncture when intelligence analysis is receiving unusual public attention. By stressing the importance of linking theory and practice, he provides useful guidance for those establishing academic training programs in intelligence analysis and echoes the mission of the Kent Center and these Occasional Papers in promoting the development of intelligence analysis as a professional discipline.

Title: (U) Improving CIA Analytic Performance: DI Analytic Priorities

PDF URL: (pdf) - 34 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA526579>

Accession Number: ADA526579

Personal Author(s): Davis, Jack

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Sep 2002

Abstract: (U) A host of reports have been written over the 50 years of CIA history evaluating analytic performance and recommending changes in priorities and tradecraft. These post-mortem reports have been issued by Agency leaders and components as well as by Congressional committees and commissions and non-governmental organizations concerned about intelligence performance. Starting with the 1990s, post-mortem reports increased in number, generated both by charges of specific intelligence failures and by general recognition that the post-Cold War period presented new challenges to intelligence. The recent post-mortem reports have helped Directorate of Intelligence leaders to examine current doctrine and practice critically, and to address identified challenges in training programs. This Occasional Paper is one of a series of assessments of what recent critiques have said about the key challenges facing the DI in the new century. The present paper addresses the challenge of establishing priorities among competing uses of analytic resources (for example, current trend reporting vs. customized action analysis vs. in-depth studies). It reviews six post-mortem critiques: (1) Twentieth Century Fund Task Force on the Future of Intelligence, In from the Cold (1996); (2) Adm. David Jeremiah (R), Intelligence Community's Performance on the Indian Nuclear Tests (1998); (3) Report of the Commission to Assess the Ballistic Missile Threat to the United States (1998); (4) Independent Task force of the Council on Foreign Relations, Making Intelligence Smarter: The Future of U.S. Intelligence (1996); (5) Commission on the Roles and Capabilities of the United States Intelligence Community, Preparing for the 21st Century: An Appraisal of U.S. Intelligence (1996); (6) Staff Study, Permanent Select Committee on Intelligence, House of Representatives, IC21: Intelligence Community in the 21st Century (1996).

Report Date: Jan 2002

Abstract: (U) This article is one intelligence consumers attempt to help bridge the gaps between the present and the future on the one hand, and policymakers and the Intelligence Community on the other. To begin, I will sketch the main forces that this policymaker sees shaping international relations in what Secretary of State Colin Powell has called the post-post-Cold War world. Then will outline some important questions that will merit serious attention by the Intelligence Community in the years ahead. (I doubt any one will be surprised that once again a policymaker will offer more questions than answers.) In conclusion, I will add another voice to the calls for a cultural change in the Intelligence Community, one that will encourage its members to seek out rather than shun direct and close engagement with policymakers and their concerns.

Title: (U) Evolution Beats Revolution in Analysis. Counterpoint to The Coming Revolution in Intelligence Analysis

PDF URL: (pdf) - 414 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525842>

Accession Number: ADA525842

Personal Author(s): Ward, Steven R

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2002

Abstract: (U) The recommendations presented in Carmen Medina's article, The Coming Revolution in Intelligence Analysis: What To Do When Traditional Models Fail, come across as solutions in search of a problem. Her description of the Directorate of Intelligence (DI) fails to take into account many of the changes that the DI has made in the past decade. Constructive self-assessments are important to any organization, but this critique of the Directorate's current practices lapses from examination to undeserved flagellation. The author is well known for having been thoughtfully engaged in seeking ways to improve the DI for many years; therefore, the suspicion arises that she crafted her article with the intent to provoke as much discussion as possible. In brief, Medina argues that the DI's current model of intelligence analysis is failing to respond to rapid changes in consumer needs and preferences. She contends that the DI is insufficiently focused on the consumer and is devoting its resources to increasingly useless syntheses of intelligence reporting. She recommends what she calls a revolutionary model that would shift analysis from a focus on day-to-day developments to forward-leaning, conceptual thinking that is less independent and neutral and more tailored to the policymakers' specific needs. The article's main failing is that its primary contentions fly in the face of history and recent feedback from our consumers and Agency leadership. This essay joins the debate by commenting in general on Medina's thesis and defending, in particular, the DI's focus on developments as the basis of any successful model of intelligence analysis.

Report Date: Jan 2002

Abstract: (U) The Intelligence Cycle is the process by which information is acquired, converted into intelligence, and made available to policy makers. Information is raw data from any source, data that may be fragmentary, contradictory, unreliable, ambiguous, deceptive, or wrong. Intelligence is information that has been collected, integrated, evaluated, analyzed, and interpreted. Finished intelligence is the final product of the Intelligence Cycle ready to be delivered to the policymaker. The three types of finished intelligence are: basic, current, and estimative. Basic intelligence provides the fundamental and factual reference material on a country or issue. Current intelligence reports on new developments. Estimative intelligence judges probable outcomes. The three are mutually supportive: basic intelligence is the foundation on which the other two are constructed; current intelligence continually updates the inventory of knowledge; and estimative intelligence revises overall interpretations of country and issue prospects for guidance of basic and current intelligence. The World Factbook, The President's Daily Brief, and the National Intelligence Estimates are examples of the three types of finished intelligence, The Factbook was created as an annual summary and update to the encyclopedic National Intelligence Survey studies. The World Factbook serves as a guide to country profiles of countries throughout the world. It contains a wealth of information on geography (including

physical and political maps), people, governments, economies, communications, transportation, military branches (including manpower and expenditures), and transnational issues of individual countries of the world.

Report Date: Jan 2002

Abstract: (U) The CIA workforce that is fighting the war on terrorism is much different from the work force that fought the Korean war, the Vietnam war, and the Cold War. The workforce of the 21st century is diverse in both gender and race. This article is dedicated to the women and minorities who broke the Agency's glass ceiling and the enlightened white male managers who helped it happen. It specifically recognizes Harritte Tee Thompson, the first woman to challenge the status quo at CIA in court. The details of this case came to my attention while I served as Deputy Inspector General in the late 1990s. Through Thompson's story, I hope to provide Agency women with a better appreciation for the history behind the professional opportunities that they enjoy today.

Report Date: Jan 2002

Abstract: (U) The American Intelligence Community was born in 1947 with the passage of the National Security Act. It was conceived, however, on 7 December 1941 by the surprise attack on Pearl Harbor. The experiences of Pearl Harbor and World War II, and, later, the Cold War, shaped Americas views of how intelligence would support defense and foreign policy for the rest of the century Overall, a finely honed and highly specialized intelligence architecture achieved indisputable success. Its occasional failures illustrate the incredibly high expectations that came to be the norm. The events of 11 September 2001 are another watershed, another chance to reconsider concepts and architectures. Over the past decade. commission upon commission has urged reform of the loose confederation that is the US Intelligence Community. Opposed by implacable champions of the status quo, precious few of these

commissions have provoked meaningful change. Ten years after the end of the Cold War, the threat of a nuclear Armageddon has receded, but the collapse of world communism and its repercussions are still works in progress. In a world with only one remaining superpower, even small and materially poor states and groups can pose terrible threats. This is a paper about decisions that must be made now. The problems we face are immediate and compelling. If we cannot identify effective responses to these challenges now, the shape of the future will evolve in ever more dangerous and unknown directions.

Title: (U) What To Do When Traditional Models Fail

PDF URL: (pdf) - 317 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525815>

Accession Number: ADA525815

Personal Author(s): Medina, Carmen A

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2002

Abstract: (U) The great challenge facing analysts and managers in the Directorate of Intelligence (DI) is providing real insight to smart policymakers. Meeting this challenge is hard, but intelligence officers have long believed that careful attention to the tradecraft of intelligence analysis would lead to work

that added value to the information available to policymakers. During its 50-plus years, the CIA. we believed, evolved a model that needed only successful execution to produce quality intelligence analysis. When we faltered, we blamed the analysts (or the collectors), but not the model. What if the failing, however, lies not with the analysts hut with the model they are asked to follow? Customer needs and preferences are changing rapidly, as is the environment in which intelligence analysis operates. Yet the DIs approach to analysis has hardly changed over the years. A DI analyst from decades ago would recognize most of what a typical analyst does today, from reading traffic to preparing finished intelligence. Stability is often comforting, but in the DIs case change may be what is most needed.

Accession Number: ADA514152

Personal Author(s): Armstrong, Fulton T

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC DIRECTORATE OF INTELLIGENCE

Report Date: Jan 2002

Abstract: (U) The CIA is neither a policy nor a law-enforcement agency-this is our mantra from the day that we sign on. Analysts do not have policy preferences. Analytic products do not lean in specific policy

directions. The Agency produces intelligence free from political bias. We say implicitly that we focus on national interests, not the policy or political interests of an administration or the Congress. Every piece of intelligence we produce is to be both policy relevant and-despite the correlation between relevance and the political stakes behind it-reflect a non-politicized interpretation of the national interest. We say we can swim without getting wet. Remaining relevant but neutral is a noble goal, but not an easy one. The lure of conforming to the view of reality held by interested players in the Executive and Legislative Branches is strong, although our culture in the Intelligence Community alerts us to resist. But who determines what is in the national interest if not the policymakers and the political processes that empower them?

Report Date: Jan 2002

Abstract: (U) The National Reconnaissance Office (NRO) was once the benchmark organization for excellence in acquisition and program management. It had a reputation for designing and procuring the most sophisticated unmanned satellite and aircraft reconnaissance systems in history. These acquisitions were mostly accomplished on time and within budget, and they performed as promised. Despite an occasional problem program, the NROs record of accomplishment was unsurpassed by any organization, considering the high technical risk that goes with developing state-of-the-art systems. A team of dedicated military and civilian personnel stood behind these accomplishments. Unfortunately, the NRO today is a shadow of its former self. Its once outstanding expertise in system engineering has drastically eroded. This article explores the dissolving relationship between the NRO and the CIA, which traditionally supplied a major portion of the organization's technical expertise. It provides a perspective on key issues as the NRO faces tough decisions and an uncertain future.

Title: (U) Wanted: A Definition of Intelligence

PDF URL: (pdf) - 385 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525816>

Accession Number: ADA525816

Personal Author(s): Warner, Michael

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2002

Abstract: (U) In a business as old as recorded history, one would expect to find a sophisticated understanding of just what that business is, what it does, and how it works. If the business is intelligence, however, we search in vain. As historian Walter Laqueur warned us, so far no one has succeeded in crafting a theory of intelligence. I have to wonder if the difficulty in doing so resides more in the slipperiness of the tools than in the poor skills of the craftsmen or the complexity of the topic. Indeed, even today, we have no accepted definition of intelligence. The term is defined anew by each author who addresses it, and these definitions rarely refer to one another or build off what has been written before. Without a clear idea of what intelligence is, how can we develop a theory to explain how it works? If you cannot define a term of art, then you need to rethink something. In some way you are not getting to the heart of the matter. Here is an opportunity: a compelling definition of intelligence might help us to devise a theory of intelligence and increase our understanding. In the hope of advancing discussions of this topic, I have collected some of the concise definitions of intelligence that I deem to be distinguished either by their source or by their clarity. After explaining what they do and do not tell us, I shall offer up my own sacrificial definition to the tender mercies of future critics.

Report Date: Jan 2002

Abstract: (U) Moscow's surreptitious dispatch of nuclear-capable SS-4 and SS-5 surface-to-surface missiles to Cuba in 1962 upset the strategic balance in an alarming way. The resulting show down-which the Russians call the Caribbean Crisis and the Cubans call the October Crisis brought the world to the brink of nuclear war. From its inception, the Soviet missile operation entailed elaborate denial and deception (D-D) efforts. The craft of denying the United States information on the deployment of the missiles and deceiving US policymakers about the Soviet Unions intent was the foundation of Nikita Khrushchev's audacious Cuban venture. Piecing together the deception activities from declassified US, Russian, and Cuban accounts yields insights that can help us anticipate and overcome the D-D efforts of a growing number of foreign adversaries today.

Report Date: Jan 2001

Abstract: (U) On 25 June 1950 the North Korean People's Army of the Democratic People's Republic of Korea (DPRK) swept across the 38th parallel and came close to uniting the Korean peninsula under the Communist regime of Kim Il-sung. American military and civilian leaders were caught by surprise, and only the intercession of poorly trained and equipped U.S. garrison troops from Japan managed to halt the North Korean advance at a high price in American dead and wounded. Four months later, the Chinese People's Liberation Army (PLA) intervened in massive numbers as American and U.N. forces pushed the North Koreans back across the 38th parallel. U.S. Military and civilian leaders were again caught by surprise, and another costly price was paid in American casualties.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2001

Abstract: (U) Historical Note: On April 14, 1942 William Donovan, as Coordinator of Information (forerunner of the Office of Strategic Services), activated Detachment 101 for action behind enemy lines in Burma. The first unit of its kind, the Detachment was charged with gathering intelligence, harassing the Japanese through guerrilla actions, identifying targets for the Army Air Force to bomb, and rescuing downed Allied airmen. Because Detachment 101 was never larger than a few hundred Americans, it relied on support from various tribal groups in Burma. In particular, the vigorously anti-Japanese Kachin people were vital to the unit's success. By the time of its deactivation on July 12, 1945, Detachment 101 had scored impressive results. According to official statistics, with a loss of some 22 Americans, Detachment 101 killed 5,428 Japanese and rescued 574 Allied personnel. The unit's accomplishments garnered a Presidential Unit Citation and helped to prove to the United States military the worth of clandestine and special operations units.

Title: (U) A Listening Post in Miami

PDF URL: (pdf) - 314 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525095>

Accession Number: ADA525095

Personal Author(s): Gleichauf, Justin F

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2001

Abstract: (U) In early January 1959, Fidel Castro forced the ouster of Cuban dictator Fulgencio Batista and would soon assume control in Havana. I had no inkling that within two weeks I would be in Miami as head-and sole staffer-of a newly authorized field office of the Domestic Contacts Division in the Directorate of Intelligence. My task would be to monitor and report on developments in Cuba.. The Headquarters briefing was short and not particularly enlightening as to my new duties: Basically, use your own good judgment. Raul Castro and Che Guevara were definitely identified as Communists, but Fidel's political status was still uncertain. The New York Times had no such doubt. Herbert L. Matthews, its Latin American expert, viewed Castro as a latter-day Robin Hood, whose program although vague and couched in generalities, represents a New Deal for Cuba. When I arrived in Miami, the first wave of Cuban refugees had landed, some on their yachts, with jewels and objets d'art. Palm Beach became a safehaven for Batistianos, including Batista's son-in-law. In contacts with them, I was never impressed with their opposition to Castro, although one offered the services of the captain of his yacht, who would do anything CIA desired. The trickle of refugees soon became a flood as the signs of a Communist state became more evident through the intervention of businesses and property. It did not take long for Robin Hood to change roles, and Castro's firing squads took care of several hundred dissidents, including a number of Americans.

Title: (U) Openness and the Future of the Clandestine Service

PDF URL: (pdf) - 616 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA524042>

Accession Number: ADA524042

Personal Author(s): Kinsman, N R

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2001

Abstract: (U) With the collapse of the Soviet Union and abortive efforts to dismember the CIA in the aftermath of the Cold War, the concept of openness gained widespread, uncritical acceptance, and this attitude probably will endure well into the future. In the context of intelligence operations, the concept signifies a compromise between the need of a people in a democratic society to be informed of government operations, and the responsibilities of a secret intelligence organization to defend the security of that society. It would be counterproductive to argue against openness, particularly in the aftermath of the Cold War and recognition that public awareness is one of the strongest pillars of a free society. Nonetheless, as there are legitimate abridgments to the First Amendment, so there have to be abridgments to openness in order to avoid heedless and inappropriate applications of the concept, which threaten the Viability of the CIA mission. If the Clandestine Service (CS) is rendered ineffective due to the Agency's inability or unwillingness to insist on rational and reasonable applications of openness to the business of intelligence, we will be found guilty of a self-inflicted intelligence failure that could prove fatal. It is imperative that the senior managers of the Directorate of Operations (DO), home of the CS, become intimately involved in declassification issues. They need to drive the openness train, not ride in the caboose, if a major wreck is to be avoided.

Title: (U) Israel's Quest for Satellite Intelligence

PDF URL: (pdf) - 496 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA524044>

Accession Number: ADA524044

Personal Author(s): Zorn, E L

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2001

Abstract: (U) In the spring of 1995, the successful orbiting of Ofeq-3 (the name is the Hebrew word for horizon) represented the initial satisfaction of a longstanding Israeli desire: an independent space reconnaissance capability. For more than 20 years before they began receiving imagery from the satellite, Israeli defense officials had recognized that spacecraft offered unique capabilities to intensify information gathering in adjacent countries while extending their intelligence reach to more distant lands. After the nation was almost overwhelmed in 1973, Israeli intelligence officers further focused their efforts on preventing future surprise attacks. Satellite photography was seen as a vital tool, able to provide unprecedented warning about the movement of enemy troops and equipment in preparation for war, as well as the movement of enemy forces once hostilities were underway.

Title: (U) Central Intelligence: Origin and Evolution

PDF URL: (pdf) - 198 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA500075>

Accession Number: ADA500075

Personal Author(s): Warner, Michael

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Jan 2001

Abstract: (U) In May 2001, President George W. Bush directed that the Director of Central Intelligence commission the first in-depth study of the nation's Intelligence Community in three decades. The panels appointed by DCI George Tenet will soon provide him, and the President, with their findings about the shape of the changing international order and the ability of the Intelligence Community to respond to the national security challenges and opportunities of the 21st Century. After the panels present their findings, the Central Intelligence Agency's Center for the Study of Intelligence, in conjunction with the Institute for the Study of Diplomacy at Georgetown University, intends to sponsor a conference to examine the transition required of the Intelligence Community. Panelists and attendees will strive to gain a clearer idea of what in our new era constitutes intelligence to policymakers, diplomats, commanders, and law enforcement officials. Conferees will also examine the ways in which the components of the Intelligence Community have adapted since the Cold War and the areas where change is still needed. What is the future of central intelligence? The creators of the CIA in Congress and the White House believed that the reforms accomplished by the National Security Act of 1947 would minimize problems that had lulled the nation's vigilance before Pearl Harbor. The centralization implied in the Truman administration's directives and the National Security Act never fully occurred, however, mainly because of the limits on DCI powers codified in that very Act. As the Cold War recedes into the past and a new world order emerges, it is important to understand why intelligence was centralized in the form it was, and to explore differing views about its future. The assault on New York's World Trade Center towers and the Pentagon in Washington bring this question into very sharp focus.

Report Date: Jan 2001

Abstract: (U) The need for counterintelligence (CI) has not gone away, nor is it likely to. The end of the Cold War has not even meant an end to the CI threat from the former Soviet Union. The foreign intelligence service of the new democratic Russia, the Sluzhba Vneshney Razvedki Rossii (SVRR) has remained active against us. It was the SVRR that took over the handling of Aldrich Ames from its predecessor, the KGB, in 1991. It was the SVRR that ran CIA officer Harold James Nicholson against us from 1994 to 1996. It was the SVRR that was handling FBI special agent Earl Pitts when he was arrested for espionage in 1996. It was the SVRR that planted a listening device in a conference room of the State Department in Washington in the summer of 1999. And it was the SVRR that was handling FBI special agent Robert Hanssen when he was arrested on charges of espionage in February 2001.

Report Date: Jan 2001

Abstract: (U) The UKs defense of Kuwait is chronicled in an extensive collection of documents, many only recently declassified. These papers portray a responsive intelligence system, despite collection limitations and the amount of time it took to redirect assets. The documents illustrate the difficulty of monitoring idiosyncratic leaders and UK frustration with human source intelligence and bazaar rumors that could not be corroborated by technical means. Despite these problems, the record shows JIC Assessments to be well crafted and credible. They appear to have had a compelling effect on UK contingency planning and force readiness posture against Iraq throughout the 1960s.

Report Date: Jan 2001

Abstract: (U) It has been 50 years since Alger Hiss was convicted of perjury for denying that he had been a Soviet spy, but his case continues to fascinate and stir controversy. The reasons for this are not surprising. The case had all the elements of a fine drama: compelling characters, accusations of treason, unusual evidence, the launching of a presidential career, and enough inconsistencies and ambiguities to leave the issue of guilt or innocence in doubt for decades. Indeed, when the Soviet Union collapsed in 1991, one of the first goals of historians was to gain access to Moscow's archives and settle the question. Although no specific file on Hiss has been released from the KGB or GRU archives, enough material has been found in other files--in Moscow, Eastern Europe, and Washington--to enable historians to write several new works that leave almost no room for doubt about Hiss's guilt. These developments also have significant implications for the intelligence professional today.

Report Date: Jan 2000

Abstract: (U) In September 1964, I reported to CIA Headquarters following a two-year tour as a Directorate of Operations (DO) officer involved in paramilitary work in Laos and Thailand. I was assigned to a country desk in the DOs Africa Division, and I signed up for part-time French language training in preparation for my next assignment. Through my language training, I came into contact with one of the divisions most senior officers, who had served in Leopoldville in the Republic of the Congo. We talked a lot about the rebellion going on in the Congo and the fact that our senior officer in Stanleyville and his two communications officers were prisoners of the Simba rebels.

Report Date: Jan 2000

Abstract: (U) One of the earliest and certainly the most infamous mass shootings of prisoners of war during World War II did not occur in the heat of battle but was a cold-blooded act of political murder. The victims were Polish officers, soldiers, and civilians captured by the Red Army after it invaded eastern Poland in September 1939. Strictly speaking, even the Polish servicemen were not POWs. The USSR had not declared war, and the Polish commander in chief had ordered his troops not to engage Soviet forces. But there was little the Poles could do. On 28 September, the USSR and Nazi Germany, allied since August, partitioned and then dissolved the Polish state. They then began implementing parallel policies of suppressing all resistance and destroying the Polish elite in their respective areas. The NKVD and the Gestapo coordinated their actions on many issues, including prisoner exchanges. At Brest Litovsk, Soviet and German commanders held a joint victory parade before German forces withdrew westward behind a new demarcation line.

Report Date: Jan 2000

Abstract: (U) During the Napoleonic Wars, the French revolutionized land-based communications with the erection of semaphore towers bearing rotating arms to fashion coded signals that could speed by line-of-sight from tower to tower along the coast and across the country at some 200 miles an hour. The British quickly followed suit in that new era of signals intelligence. Theft of the enemy's semaphore codebooks became an important part of the business of war. During the war on terrorism in Afghanistan, Predator unmanned aerial vehicles (UAVs), flying lengthy missions at heights of some 25,000 feet, have been providing multi-hour surveillance of designated geography, installations, and activity. Tasking to the Predator, as well as electro-optical video and infra-red images collected by its cameras, move near-instantaneously to and from the theater commanders and officials in Washington. Such communications flow through a secure network of ground stations and satellites, with part of the product traveling through a classified Internet counterpart.

Title: (U) An Interview with Richard Lehman

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525450>

Accession Number: ADA525450

Personal Author(s): Kovar, Richard

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2000

Abstract: (U) Dick Lehman developed the President's Intelligence Check List, or PICL (pronounced pickle) for Pres. Kennedy in June 1961. The Kennedy White House had become overwhelmed with publications from the intelligence community, many of which were duplicative in nature, and important pieces of information were beginning to fall between the cracks. The President and his advisers wanted one concise summary of important issues that they could rely on, and Lehman provided that summary in the form of the PICL. Kennedys enthusiastic response to the PICL ensured that it became an Agency institution. Former Dep. Director for Intelligence R. Jack Smith writes in his memoir, *The Unknown CIA*, that the President engaged in an...exchange of comments with its producers, sometimes praising an account, sometimes criticizing a comment, once objecting to the word boondocks as not an accepted word. For current intelligence people, this was heaven on earth! (The PICL was renamed *The Presidents Daily Brief [PDB]* in the Johnson administration.) For many years thereafter, Lehman played a key role in supervising the Agency's current intelligence support for the White House, including its briefings of Presidential candidates. Former Deputy Director for Intelligence (DDI) Ray Cline in his book *The CIA Under Reagan, Bush, and Casey*, calls him the longtime genius of the Presidents special daily intelligence report. Dick Lehman joined the Agency in 1949 and served for 33 years before retiring. As a junior analyst, he worked in the Gen. Div. of the Office of Reports - Estimates (ORE) using SIGINT to puzzle out the organization and output of various Soviet industrial ministries. He then spent much of his career in the Office of Current Intelligence (OCI), eventually serving as Director from 1970-1975.

Report Date: Jan 2000

Abstract: (U) Red White grew up poor in Tennessee. He was saved from a life of drudgery by a somewhat fortuitous appointment to the United States Military Academy at West Point. In the Army, he learned to accept responsibility, exercise authority, and, above all, lead men. He fought in the Pacific theater in World War II, earning a Distinguished Service Cross, a Silver Star, two Legions of Merit, and three Bronze Stars. Colonel White was severely wounded in the Philippines in 1945 and had to leave the Army after spending nearly two years in various military hospitals. He joined the newly created CIA in 1947, becoming in short order the chief of the Foreign Broadcast Information Branch later renamed FBIS in the Office of Operations, which handled all overt collection functions. White's success in transforming an unruly and trouble some organization caught the eye of his superiors, and he was promoted to Deputy Assistant Director of the Office of Operations in December 1950. He remained in that post until 1952, when he was named Assistant to the Deputy Director for Administration. White carried much of

the DDA's load in that job, and DCI Allen Dulles formally recognized that fact in 1954 when he appointed Red to be the Deputy Director for Administration. In 1965, DCI Raborn appointed him Executive Director-Comptroller, the position in which he remained until his retirement in 1972.

Report Date: Jan 2000

Abstract: (U) In January 1975, I was offered a position as counsel on the staff of the Church Committee. I was 30, and Senator Sam Ervin, for whom I had worked since 1971, had retired and returned to North Carolina. While I had participated in Senator Ervins inquiry into the domestic activities of Army intelligence elements during the Vietnam era, the foreign intelligence apparatus of the United States, which I now confronted, was, quite literally, foreign to me, as it was to many of those joining the Church Committee staff. To make matters worse, I was given the task (along with a staff colleague, Peter Fenn) of trying to crack what was perceived to be the most secretive of US intelligence agencies, the National Security Agency (NSA). Unlike the CIA and FBI, which were the agencies principally in the Committees sights thanks to a number of sensational press accounts, there had been no press exposes about NSA. Our supervisor, in fact, seemed to take particular delight in pitting Pete and me against this mysterious Goliath. They call it No Such Agency, he said. Lets see what you boys can find out about it. It was the first time I had heard the agency referred to this way, and it was not long before I understood why.

Report Date: Jan 2000

Abstract: (U) By the fall of 1944, it was obvious that the war in Europe was in its final year. In France, British and American forces had broken out of Normandy and were driving toward Paris and the Rhein. In the East, the Soviet Army was expanding its control westward across Europe. All over the Continent, Allied domination of the air was complete, and in the North Atlantic the back of the German U-Bootwaffe was finally broken. Policymakers had started to think of the peace. Future stability seemed to depend on taking measures to ensure that Germany would not provoke a third world war. Already the German problem was dominating Allied political thinking. In the United States, the War Department and the Department of Justice were making plans and drawing up lists for the postwar war crimes trials. At the Department of the Treasury, Secretary Henry Morgenthau had completed his scheme for the wholesale destruction of Germany's military and industrial power and its re-creation as a feudal, agrarian state. More immediately, in the wartime For Economic Administration (FEA), a small group of policymakers were putting the finishing touches on Project SAFEHAVEN, an operation designed to root out and neutralize German industrial and commercial power wherever it might be found. The origins of SAFEHAVEN are to be found in two memorandums sent from the FEA to the Departments of State and Treasury on 5 and 17 May 1944, proposing an interagency program to track down and block German assets in neutral and nonbelligerent countries throughout Europe and the Americas. The fear was that the German political and economic leadership, sensing defeat, would act to transfer secretly blocs of industrial and fiscal capital to neutral countries, thereby escaping confiscation and the reparations bill.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2000

Abstract: (U) When briefing the CIAs Directorate of Operations (DO) or other components of the Intelligence Community (IC) about the Office of Technical Services (OTS) exfiltration capability, I always made a point to remind them that readiness is the key. This is one of the full-time concerns of my former OTS office, the Graphics and Authentication Division (GAD). In arranging for the escape of refugees and other people of potential intelligence value who are subject to political persecution and hostile pursuit, prior planning is not always possible because they show up at odd hours in out-of-the-way places. Current surveys and collection of up-to-date intelligence regarding travel controls and procedures are vital. OTS engages in this activity worldwide. The readiness to move clandestine agents out of harms way using quasilegal methods is equally important. CIAs policy and practice are to bring its

valuable human assets in from the cold when they can no longer remain in place. Sometimes this includes their families. Public Law 110 gives the IC the authority to resettle these people in the United States as US persons when the time comes and the quota allows. OTS/GAD and its successor components have serviced these kinds of operations since OSS days. The authentication of operations officers and their agents by providing them with personal documentation and disguise, cover legends and supporting data, pocket litter, and so forth is fundamental deception tradecraft in clandestine operations. Personal documentation and disguise specialists, graphic artists, and other graphics specialists spend hundreds of hours preparing the materials, tailoring the cover legends, and coordinating the plan.

Title: (U) The Vilification and Vindication of Colonel Kuklinski

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525899>

Accession Number: ADA525899

Personal Author(s): Fischer, Benjamin B

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 2000

Abstract: (U) On a warm, sunny day in November 1999, a crowd gathered in the courtyard of the George Herbert Bush Library on the Texas A-M University campus to honor Americans and foreign agents who had lost their lives during the Cold War. The ceremony, In Memory of Those Who Died That Others Might Be Free, was organized by the University's Corps of Cadets. Former President George Bush and Director of Central Intelligence (DCI) George Tenet presided as former DCIs Richard Helms, William Webster, and Robert Gates looked on. Near the end of the event, Polish Colonel Ryszard Kuklinski, read a tribute to his many anonymous colleagues who served on both sides of the front line in the Cold War]. Kuklinski said, I am pleased that our long, hard struggle has brought peace, freedom, and democracy not only to my country but to many other people as well. Although DCI Tenet called Kuklinski a true hero of the Cold War, he is almost as anonymous to most Americans as those he was, eulogizing. Few know about the important contributions he made to the defense of the West during one of the most dangerous periods of the Cold War.

Report Date: Jan 2000

Abstract: (U) Most articles about the US information superhighway have concentrated on the need for better physical security, while at the same time identifying many of its cyber-related vulnerabilities. Few address what possibly is the most vulnerable element--the human operators--and the inability of those operators from the policy level down to practice good operations security (OPSEC). In a 4 June 1998 Guardian Online article by Duncan Campbell, entitled Hiding from the Spies in the Skies, he states, The Internet has made tracking and evading spy satellites childs play.... Data and programs downloaded from the Netenable anyone to track the satellites and work out when the spies in the sky are overhead. Campbell also provides instructions on how to visually acquire satellites with the naked eye and even lists six Internet Uniform Resource Locator addresses where one pan find programs and information on the location of the spies in the skies. He refers to several Internet sites in his article that offer the capabilities to track the locations, routes, and times certain satellites will pass over specific locations.

Title: (U) Planning Satellite Reconnaissance to Support Military Operations

PDF URL: (pdf) - 759 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA524256>

Accession Number: ADA524256

Personal Author(s): Behling, Thomas ; McGruther, Kenneth

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1999

Abstract: (U) The nations intelligence agencies face a dual challenge: how to come to grips with presidential tasking to become more directly supportive of current military operations, while also adjusting to a new national military doctrine that is still being developed. The presidential order was issued in 1995. The new military doctrine, Joint Vision 2010, was issued in 1996 and amplified in 1997 in a document called Con for Supporting Joint Operations. Meanwhile, the global planning structure to replace the Cold War paradigm, including the role the Intelligence Community (IC) should play, still is unfolding. The fundamental premise of JV2010 is that the operational commander will enjoy information superiority the ability to see and hear virtually everything of importance in any engagement. It may be a decade or more, however, before the military sufficiently understands the implications of the new doctrine to impose the associated intelligence require for targeting, damage assessment, simultaneous operations, and the like. This raises some difficult problems. Our current generation of satellites is reaching obsolescence and will have to be replaced within the next 5 to 10 years. Given design and develop lead-times, decisions about the next generation of reconnaissance satellites generation of reconnaissance satellites are being made now. As a result, by the time the military determines intelligence requirements to support its new doctrine, it may be too late to influence decisions about the very intelligence support systems upon which the doctrine depends. Commanders using the new doctrine would have to do so using reconnaissance satellites extrapolated from the intelligence needs of the early 1990s.

Title: (U) Psychology of Intelligence Analysis

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA500078>

Accession Number: ADA500078

Personal Author(s): Heuer, Jr, Richards J

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Jan 1999

Abstract: (U) This volume pulls together and republishes, with some editing, updating, and additions, articles written during 1978-86 for internal use within the CIA Directorate of Intelligence. Four of the articles also appeared in the Intelligence Community journal Studies in Intelligence during that time frame. The information is relatively timeless and still relevant to the never-ending quest for better analysis. The articles are based on reviewing cognitive psychology literature concerning how people process information to make judgments on incomplete and ambiguous information. I selected the experiments and findings that seem most relevant to intelligence analysis and most in need of communication to intelligence analysts. I then translated the technical reports into language that intelligence analysts can understand and interpreted the relevance of these findings to the problems intelligence analysts face. The result is a compromise that may not be wholly satisfactory to either research psychologists or intelligence analysts. Cognitive psychologists and decision analysts may complain of oversimplification, while the non-psychologist reader may have to absorb some new terminology. Unfortunately, mental processes are so complex that discussion of them does require some specialized vocabulary.

Report Date: Jan 1999

Abstract: (U) The Bay of Pigs invasion met its ignominious end on the afternoon of 19 April 1961. Three days after the force of Cuban emigres had hit the beach, the CIA officers who planned the assault gathered around a radio in their Washington war room while the Cuban Brigades commander transmitted his last signal. He had been pleading all day for supplies and air cover, but nothing could be done for him and his men. Now he could see Fidel Castro's tanks approaching. I have nothing left to fight with, he shouted. Am taking to the woods. I cant wait for you. Then the radio went dead, leaving the drained and horrified CIA men holding back nausea.

Title: (U) Calling the Sino-Soviet Split

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA524258>

Accession Number: ADA524258

Personal Author(s): Ford, Harold P

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1999

Abstract: (U) Once it was widely believed that the USSR and Communist China were firm allies acting in concert to spread Communist influence everywhere they could in the world. In the early 1950s, there was much to support that image. Mao Tse-tungs regime had triumphed in China and then allied itself formally with the Soviet Union. Communist North Korea had invaded the Republic of Korea. Communist China had intervened massively in that war. The USSR had provided its Communist allies with military assistance, including Soviet-piloted MiGs. The trouble was, among US policymakers such an image of Sino-Soviet solidarity persisted long after the Moscow-Beijing relationship had in fact begun to fray badly. Furthermore, that image persisted long after officers from various CIA units had begun to alert consumers that a Sino-Soviet break was definitely developing. Not all CIA officers were of one mind: some remained reluctant to change their long-held view of Communist bloc solidarity. All in all, however, the dominant voice of CIA analysts was out in front of the rest of the Intelligence Community (IC) in trying to alert policymaking consumers that the United States might someday face a significantly changed strategic situation. This article treats the highlights of that Sino-Soviet story: the judgments CIA officers made in the years up to 1963, by which time estrangement between Moscow and Beijing had become publicly evident; why these CIA officers came to hold those particular views; what they were up against in trying to promote their heresy amidst many policymakers who remained true believers; and the impact these CIA officers' judgments had or did not have on policymakers.

Title: (U) The Civil War: Black American Contributions to Union Intelligence

PDF URL: (pdf) - 643 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA527321>

Accession Number: ADA527321

Personal Author(s): Rose, P K

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1999

Abstract: (U) Black Dispatches was a common term used among Union military men for intelligence on Confederate forces provided by Negroes. This source of information represented the single most prolific and productive category of intelligence obtained and acted on by Union forces throughout the Civil War. In 1862, Frederick Douglass wrote: The true history of this war will show that the loyal army found no friends at the South so faithful, active, and daring in their efforts to sustain the government as the Negroes.... Negroes have repeatedly threaded their way through the lines of the rebels exposing themselves to bullets to convey important information to the loyal army of the Potomac.

Abstract: (U) In general, information available as of 1 January 1999 was used in the preparation of this edition. The World Factbook is prepared by the Central Intelligence Agency for the use of US Government officials, and the style, format, coverage, and content are designed to meet their specific requirements. Information is provided by the Bureau of the Census (Department of Commerce), Bureau of Labor Statistics (Department of Labor), Central Intelligence Agency, Council of Managers of National Antarctic Programs, Defense Intelligence Agency (Department of Defense), Defense Threat Reduction Agency (Department of Defense), Department of State, Fish and Wildlife Service (Department of the Interior), Maritime Administration (Department of Transportation), National Imagery and Mapping Agency (Department of Defense), Antarctic Information Program (National Science Foundation), Naval Facilities Engineering Command (Department of Defense), Office of Insular Affairs (Department of the Interior), Office of Naval Intelligence (Department of Defense), US Board on Geographic Names (Department of the Interior), and other public and private sources.

Title: (U) The Pike Committee Investigations and the CIA

PDF URL: (pdf) - 948 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525280>

Accession Number: ADA525280

Personal Author(s): Haines, Gerald K

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1999

Abstract: (U) A storm broke over the CIA on 22 December 1974, when Seymour Hersh published a front-page article in The New York Times headlined Huge C.I.A. Operation Reported in U.S. Against Anti-War Forces. Hersh's article alleged that the Agency had been engaged in massive domestic spying activities. His charges stunned the White House and Congress. In response, President Ford established a blue-ribbon panel, the Rockefeller Commission, to investigate CIA activities in the United States. Ford later complicated the already-delicate issue further by hinting of CIA involvement in assassination attempts against foreign leaders. Congress soon launched its own investigation of the entire Intelligence Community (IC) and its possible abuses. On 27 January 1975, the US Senate established the Senate Select Committee to Study Government Operations With Respect to Intelligence Activities (the Church Committee). On 19 February 1975, the House voted to create a House Select Intelligence Committee (the Nedzi Committee, which was replaced five months later by the Pike Committee.) These Congressional investigations eventually delved into all aspects of the CIA and the IC. For the first time in the Agency's history, CIA officials faced hostile Congressional committees bent on the exposure of abuses by intelligence agencies and on major reforms. In the Congress, there was no longer a consensus to support intelligence activities blindly. The old Congressional seniority system and its leadership was giving way. With the investigations, the CIA also became a focal point in the ongoing battle between the Congress and the executive branch over foreign policy issues and the imperial presidency. The investigations of the Pike Committee, headed by Democratic Representative Otis Pike of New York, paralleled those of the Church Committee, led by Idaho Senator Frank Church, also a Democrat.

Title: (U) Ronald Reagan and the President's Daily Brief

PDF URL: (pdf) - 469 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA524255>

Accession Number: ADA524255

Personal Author(s): Kerr, Richard J ; Davis, Peter D

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1999

Abstract: (U) The presidential election of 1980 was over, and it was the morning after. In CIA's Office of Current Operations, we knew that a new boss and a new set of customers had us in their sights. Ronald Reagan would be in the White House by the end of January, and a Republican team of national security officials would be calling the shots. CIA would have a new Director of Central Intelligence (DCI). He would bring in a new deputy. There probably would be other new faces at the top of CIA, and a new set of staff weenies would appear as well. Deja vu all over again? So it seemed to us: here we were, the Director and Deputy Director of the Office of Current Intelligence, and we faced another new administration, another foreign policy team, another group to which we had to prove ourselves all over again. But, while we were veterans of such transitions, neither of us had grown so jaded or so weary of trying to convince our customers of the value of intelligence that we did not warm to the possibility of new experiences. We were at once stimulated by the prospect of change and challenged by the problems we clearly had to overcome. It would not be easy, but it would be exciting. The task sounded straightforward if you had no experience trying to do it: providing a daily report of current intelligence

to the President and his national security team that was comprehensive, offered information and analysis not available from other sources, and helped rather than frustrated the policymaking process.

Report Date: Jan 1999

Abstract: (U) In the first two articles of this edition of Studies in Intelligence, we present American and Soviet/Russian perspectives on the U-2 program from two participants in the symposium. The first article consists of introductory remarks made by the Director of Central Intelligence, George J. Tenet, at the gathering. The second article discusses the U-2 as seen through the eyes of the sole Russian panelist, retired Colonel Alexander Orlov, who was a senior participant in the former USSR's efforts to counter this formidable intelligence collection program.

Report Date: Jan 1998

Abstract: (U) CIAs Publications Review Board (PRB) and its small staff perform a balancing act more than 300 times a year, navigating a process sanctioned by the US Supreme Court to clear the writings of Agency authors for nonofficial publication. The challenge: to balance CIAs secrecy agreement with the Bill of Rights. Business is brisk, as a growing number of former CIA employees seek to become published authors especially former operations officers reflecting on their clandestine careers abroad. The variety of material the PRB has reviewed for publication in recent years has encompassed former President Reagans memoirs, the Brown Commission Report on the Roles and Capabilities of the US Intelligence Community, and broadsides from timeworn Agency antagonist Phillip Agee. Former employees submit manuscripts directly to the PRB, as do some nonemployees such as former Defense Secretary

Weinberger; Judge Lawrence Walsh, the Iran-Contra Independent Counsel; and former members of Congressional oversight committee staffs who, because of their special access to CIA information, need to seek PRB review before publishing.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1998

Abstract: (U) While these diverse voices from across the CIA are addressing different issues from at times divergent perspectives, they are linked by a common concern for the integrity of the organization. This concern speaks both to effectiveness and to ethics, to how capably we achieve our mission and how honorably we go about doing it. The two, of course, are intimately linked; over time, even the most effective organization will be tripped up or eaten away by unethical behavior. At a moment when the Agency is engaged in numerous efforts to improve its effectiveness, ethical issues are also much on

people's minds. In a series of conversations with people from throughout the Agency, it was the four broad issues addressed by the speakers quoted above-issues of ideology, dissent, failure, and management-that I heard about most often as challenges to our integrity as an organization, and as critical determinants of our ability to navigate the potential minefield of ethics.

Title: (U) Congress as a User of Intelligence

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525100>

Accession Number: ADA525100

Personal Author(s): Snider, L B

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1998

Abstract: (U) The intelligence services of the United States, like their counterparts in most countries, exist principally to serve the needs of the executive authority. The US intelligence apparatus, however unlike that of most countries also makes a large part of its output available to the legislative authority. It has not always been so. Before the mid-1970s, Congress was given little intelligence, and access to it was limited. The Congressional investigations of US intelligence agencies in 1975-76 by the Church and

Pike Committees fundamentally altered this situation. For the first time, voluminous amounts of intelligence information were shared with the investigating committees. When permanent oversight committees were later created in both Houses, the trend toward ever-increasing disclosure continued. Ground rules to govern intelligence sharing were agreed to shortly after the oversight committees began operations, but none were written down. Over time, these understandings often gave way in the continuing tussle between the overseers and the overseen. Twenty years later, the system still operates without formal rules of the road. Serious problems, however, have largely been avoided because intelligence agencies have sought to accommodate virtually all Congressional requests in some manner. Congress, in turn, has generally demonstrated a willingness to protect the intelligence it has been given. The two sides continue to muddle along from one episode to the next, accommodating where they can, bending where they must.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Jan 1998

Abstract: (U) This History Staff Monograph offers a comprehensive and authoritative history of the CIA's manned overhead reconnaissance program, which from 1954 to 1974 developed and operated two extraordinary aircraft, the U-2 and the A-12 OXCART. It describes not only the program's technological and bureaucratic aspects, but also its political and international context. The manned reconnaissance program, along with other overhead systems that emerged from it, changed the CIA's work and structure in ways that were both revolutionary and permanent. The formation of the Directorate of Science and Technology in the 1960s, principally to develop and direct reconnaissance programs, is the most obvious legacy of the events recounted in this study.

Report Date: Jan 1998

Abstract: (U) On 10 May 1940, the German 10th Army, spearheaded by airborne troops, invaded the Netherlands. The rest of the Wehrmacht force committed to the overrunning of the West. executed the Manstein Plan through Belgium and the Ardennes Forest. On 14 May 1940, the Dutch commander ordered a cease-fire. Three days later, the entire Netherlands was occupied by Nazi Germany. The Netherlands royal family, led by Queen Wilhelmina, along with some 4,600 Dutch officers, sailors, soldiers, and policemen, staged a Dutch Dunkirk, assisted by remnants of the country's Navy and the entire merchant marine. This evacuation to Britain of the royal family and a cadre of the Dutch Government was critical in establishing a government-in-exile and the initial intelligence networks in Holland. Additionally, the emigration to Britain of Netherlands military people and civilians from all over the Continent and from over seas Dutch possessions helped form the core of a reconstituted Dutch Royal Army, Navy, and Air Force.

Title: (U) CIA Assessments of the Soviet Union

PDF URL: (pdf) - 740 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525827>

Accession Number: ADA525827

Personal Author(s): MacEachin, Douglas J

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) In the aftermath of the political breakup of the Soviet Union, charges that CIA was oblivious to the deteriorating economy and corroding societal conditions that set the stage for the breakup have taken on the aura of conventional wisdom. The New York Times, for example, asserted in an editorial on 22 October 1995 that: The CIA considered the Soviet Union an economic power when it was actually an economic wreck. An article in The Wall Street Journal on 27 July 1995 by Adam Wooldridge stated that the CIA--in the face of readily available evidence to the contrary-- continued to endorse the myth that the communists had transformed an agricultural backwater the USSR] into a mighty industrial power capable of ever higher levels of economic development. Neither of these assertions is accompanied by any examples in which CIA expressed the judgments it is accused of making. Wooldridges article was a review of a book-The Tyranny of Numbers by Nicholas Eberstadt- which includes similar, albeit less strident, criticisms of the CIA. The Foreword to Eberstadt's book was written by Senator Daniel Patrick Moynihan, who has been perhaps the most prominent and influential critic of CIA's performance on the Soviet Union.

Title: (U) Toward a Functional Model of Information Warfare

PDF URL: (pdf) - 583 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525989>

Accession Number: ADA525989

Personal Author(s): Johnson, L S

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) Information Warfare (IW) is one of the hottest topics in current discussions of battlefield and geopolitical conflict. It has been addressed in writings, conferences, doctrine and plans, and military reorganizations, and it has been proposed as a fundamental element of 21st-century conflict. In a way, the IW situation is reminiscent of the concept of logistics as a military discipline, circa 1940: (1) Elements of the concept had been known and used for millennia, (2) The value of integrating those elements into a coherent discipline was just beginning to be recognized, and (3) The discipline was to become a central element of modern warfare-it is now said that amateur generals (that is, Saddam Hussein) talk strategy, professional generals talk logistics. This comparison has another point of similarity: the interest in IW far outstrips the users understanding of the concept. Early in World War II, a senior US Army general said, I don't know what this 'logistics' is, but I want some. Today, many people worldwide are saying the same about IW.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) On 4 April 1995, the television net works evening news programs carried an unusual item. The Acting Director of Central Intelligence, Adm. William O. Studeman, held a press conference at the National Photographic Interpretation Center (NPIC) to address the topic of breast cancer. Also participating were the chairman and vice chairman of the Senate Select Committee on Intelligence (SSCI), Senator Arlen Specter of Pennsylvania and Senator Robert Kerrey of Nebraska, and Dr. Susan Blumenthal, the deputy assistant secretary of Health and Human Services and head of the Womens Health Office of the Public Health Service. Admiral Studeman announced that the Intelligence Community (IC) had been involved in an effort to identify and promote technologies developed within the IC that had promise in the national fight against breast cancer. He said this effort was to continue with the CIA, National Reconnaissance Office, and Community Management Staff (CMS) each contributing to the effort. A sum of \$375,000 had been identified for this research.

Title: (U) Fifteen Axioms for Intelligence Analysts

PDF URL: (pdf) - 241 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525713>

Accession Number: ADA525713

Personal Author(s): Watanabe, Frank

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) Recently, the Directorate of Intelligence (DI) has seen a spate of new thinking on its mission and on how it conducts that mission. As well-meaning and insightful as all this new thinking is, however, most is coming from senior DI managers, not from the analysts and other junior and mid-level officers who carry out the DI's mission on a daily basis. In addition, some frontline DI officers -- myself included -- would take exception to the idea that the concepts put forth in Tradecraft 2000 truly represent new thinking. Much of it is merely a return to the basics of DI tradecraft that many of us in the Directorate seem to have forgotten. Before leaving the DI on a rotational assignment, I endeavored to set down some of the axioms by which I have tried to live in my career. To experienced analysts, many of the principles will sound like truisms. But the new DI analyst, and more than a few old hands, would be well served by remembering these 15 principles in their everyday conduct. The principles are as follows: (1) Believe in your own professional judgments; (2) Be aggressive, and do not fear being wrong; (3) It is better to be mistaken than to be wrong; (4) Avoid mirror imaging at all costs; (5) Intelligence is of no value if it is not disseminated; (6) Coordination is necessary, but do not settle for the least common denominator; (7) When everyone agrees on an issue, something probably is wrong; (8) The consumer

does not care how much you know, just tell him what is important; (9) Form is never more important than substance; (10) Aggressively pursue collection of information you need; (11) Do not take the editing process too seriously; (12) Know your Community counter parts and talk to them frequently; (13) Never let your career take precedence over your job; (14) Being an intelligence analyst is not a popularity contest; and (15) Do not take your job or yourself too seriously.

Title: (U) The Coming Intelligence Failure

PDF URL: (pdf) - 664 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA527323>

Accession Number: ADA527323

Personal Author(s): Travers, Russ

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) The year is 2001. The Intelligence Community (IC) budget has remained under pressure and manpower cuts have continued, but bureaucratic politics and legislative prerogatives have perpetuated about a dozen national-level agencies and forced a further division of analytic labor. By the turn of the century, analysis had become dangerously fragmented. The Community could still collect

facts, but analysts had long ago been overwhelmed by the volume of available information and were no longer able to distinguish consistently between significant facts and background noise. The quality of analysis had become increasingly suspect. And, as had been true of virtually all previous intelligence failures, collection was not the issue. The data were there, but we had failed to recognize fully their significance and put them in context. At a time when the interrelationship among political, economic, military, social, and cultural factors had become increasingly complex, no agency was postured to conduct truly integrated analysis. From the vantage point of 2001, intelligence failure is inevitable.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) For years, CIA produced the best unclassified general reference map of Moscow. Initially created in the post World War II years primarily for US Embassy personnel in the Soviet capital,

dissemination of the map steadily expanded and it became a key reference guide for personnel of other friendly embassies in Moscow, as well as for many US visitors. On several occasions, even Soviet militiamen processing automobile accident reports involving US Embassy personnel found the maps useful for accurately locating the accident sites. This is the story of how the CIA developed this map to fill a basic intelligence gap.

Title: (U) Why CIA Analysts Were So Doubtful About Vietnam

PDF URL: (pdf) - 957 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA524774>

Accession Number: ADA524774

Personal Author(s): Ford, Harold P

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) It is well documented and well known that for decades CIA analysts were skeptical of official pronouncements about the Vietnam war and consistently fairly pessimistic about the outlook for light at the end of the tunnel. Less well known is why the Agency's analysts were so doubtful, especially because CIA was all the while a central player in US operational efforts to create and strengthen South

Vietnam. Thus, it is important to examine the sources of CIA analysts doubts about successive administrations repeated assurances and claims. Not all CIA analysts thought alike, and at times there were substantial differences of view. Skepticism and pessimism about Vietnam were present chiefly among those officers who produced finished intelligence in the form of National Intelligence Estimates and in Intelligence Directorate (then the DDI) publications: that is, analysts in the Office of National Estimates (ONE), the Office of Economic] Research and Reports, and the South Vietnam Branch of the Office of Current Intelligence (OCI). Such views were generally a bit less evident among officers of the North Vietnam Branch of OCI, many of whom had been transferred there from previous Soviet and North Korean assignments. The situation among the Agency's operational offices at home and abroad was mixed: some enthusiastically shared official White House views, while others were remarkably caustic. In more than a few cases, the Intelligence Community's (IC) coordination processes and top CIA officers muted doubts about Vietnam expressed in CIAs analytic ranks, yet the finished intelligence produced by the DDI and ONE maintained definitely pessimistic, skeptical tones over the years.

Report Date: Jan 1997

Abstract: (U) Go to the southwest gate of the White House complex, present the guard with identification, and state your business. If you are on the appointment list, an escort will be called. Walk up West Executive Avenue and turn tight into the West Basement entrance; another guard will check your pass for White House access. Take the first right, down a few stairs. To the left is the White House Mess; on the right is a locked door. Behind these layers of security is the White House Situation Room (WHSR), a conference room surrounded on three sides by two small offices, multiple workstations, computers, and communications equipment. The conference room is soundproofed and well appointed but small and slightly cramped. The technical equipment is up to date, though not necessarily leading edge; every square foot of space is functional. Visitors typically are impressed by the location and technology, but they are often surprised at the small size. While it is widely known that important meetings are held here, the importance of the WHSR in the daily life of the National Security Council (NSC) and White House staff and its critical role in Washington's network of key national security operations and intelligence centers are less understood. This paper is intended to fill that void. We believe there is a longstanding need within middle and senior levels of the Intelligence Community (IC) for a basic understanding of NSC and White House functions and how current intelligence information is provided to key decisionmakers, including the President.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) The story of escaped Nazis after the collapse of the Third Reich in 1945 has long gripped novelists and Hollywood screenwriters and provided the grist for such box office hits as *The Boys From Brazil* and *The ODESSA File*. Since the 1970s, the topic has also provided steady fare for history fans and journalists anxious to explore supposed cabals between American intelligence agencies and such personalities as Josef Mengele, the Angel of Death at Auschwitz, and former Austrian President Kurt Waldheim, a German intelligence officer in the Balkans during World War II. Separating fact from fiction about the alleged postwar relationships between American intelligence and its former German enemies and collaborators is both difficult and confusing. The General Accounting Office (GAO), at the request of the US Congress, has conducted two major investigations since 1977 to ascertain whether the US Government assisted in the immigration of these individuals to the United States and later concealed Federal involvement. In addition, the Immigration and Naturalization Service (INS) and, later, the Department of Justice's Office of Special Investigations (OSI) have proceeded with independent inquiries since the mid-1970s. OSI, dedicated solely to the investigation, denaturalization, and deportation of individuals who violated US immigration laws by covering up illegal activities during World War II, has stripped 52 people of their citizenship and removed another 44 since 1979. In addition, OSI has conducted nearly 1,500 investigations and placed the names of some 60,000 individuals on a watch list that alerts US immigration officials to prevent their entry into the United States.

Title: (U) CIA's Role in the Study of UFOs, 1947-90

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525986>

Accession Number: ADA525986

Personal Author(s): Haines, Gerald K

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) An extraordinary 95 percent of all Americans have at least heard or read something about Unidentified Flying Objects (UFOs), and 57 percent believe they are real. Former US Presidents Carter and Reagan claim to have seen a UFO. UFOlogists-a neologism for UFO buffs-and private UFO organizations are found throughout the United States. Many are convinced that the US Government, and particularly CIA, are engaged in a massive conspiracy and coverup of the issue. The idea that CIA has secretly concealed its research into UFOs has been a major theme of UFO buffs since the modern UFO phenomena emerged in the late 1940s. In late 1993, after being pressured by UFOlogists for the release of additional CIA information on UFOs, DCI R. James Woolsey ordered another review of all Agency files on UFOs. Using CIA records compiled from that review, this study traces CIA interest and involvement in the UFO controversy from the late 1940s to 1990. It chronologically examines the Agency's efforts to solve the mystery of UFOs, its programs that had an impact on UFO sightings, and its attempts to conceal CIA involvement in the entire UFO issue. What emerges from this examination is that, while Agency concern over UFOs was substantial until the early 1950s, CIA has since paid only limited and peripheral attention to the phenomena.

Title: (U) A Review of Congressional Oversight

PDF URL: (pdf) - 483 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA524502>

Accession Number: ADA524502

Personal Author(s): Van Wagenen, James S

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1997

Abstract: (U) Permanent, continuing, day-to-day Congressional oversight of the US Intelligence Community (IC) marked its 20th anniversary in May 1996. Two decades earlier, Senate Resolution 400 established the Senate Select Committee on Intelligence (SSCI) following revelations of intelligence abuses. In July 1997, the SSCIs House counterpart, the House Permanent Select Committee on Intelligence (HPSCI), will celebrate its 20th birthday. During this time, the ICs missions, responsibilities, capabilities, size, and management have experienced dramatic changes. The Congressional oversight committees have played a significant role in shaping these changes and continue to do so. Some individuals within the Community have argued, with a certain amount of justification, that Congressional oversight has been intrusive, meddling, short-sighted, and counterproductive; has involved micromanagement on a grand scale; and has served to drag the IC into the political cockpit of partisan politics from which it had previously been immune. Others tend to view Congressional oversight as being, on balance and after a somewhat rocky start in the late 1970s, a decided plus for the Community by providing loci for Congressional advocacy and support for intelligence and by providing rigorous review and questioning of intelligence activities and budgets. Perhaps, in looking back at what Congressional oversight has and has not been, we will be better able to discern the future of oversight by the Congress. First, it is important to dispel the popular notion that Congressional oversight started with the establishment of the SSCI and the HPSCI. That notion is not accurate. Before their

establishment, however, oversight was certainly not intense or much of an inconvenience to the agencies that carried out intelligence activities.

Personal Author(s): Deutch, John

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: 22 Feb 1996

Abstract: (U) This report outlines the threats to the United States and its interests now and into the next century. We still call this the post-Cold War world. Among the opportunities and challenges of our time, there is not yet one dominant enough to define the era on its own terms and give it a name. Looking beyond our borders, we see much that is uncertain: --The stability of many regions of the world is threatened by ethnic turmoil and humanitarian crises. --Two great powers, Russia and China, are in the process of metamorphosis and their final shape is still very much in question. --Free nations of the world are threatened by rogue nations - - Iran, Iraq, North Korea, and Libya, that have built up significant military forces and seek to acquire weapons of mass destruction. --The world community is under

assault from those who deal in proliferation of weapons of mass destruction, terrorism, drugs and crime. --And the interdependence of the world economy has made us more vulnerable to economic shocks beyond our borders. The strategic threat to our continent is reduced, but the potential for surprise is greater than it was in the days when we could focus our energies on the well-recognized instruments of Soviet power. No one challenge today is yet as formidable as the threat from the former Soviet Union. If nurtured by neglect on our part, these new challenges could expand to threaten the growth of democracy and free markets. All the tools of national security -- diplomacy, the military, and intelligence -- must remain sharp. It is the task of the Intelligence Community to provide policymakers and military commanders with early warning of emerging problems -- warning that can allow us to avoid crisis or military conflict. We must continuously monitor and assess the threats so that our leaders can manage these wisely.

Report Date: Jan 1996

Abstract: (U) January 1996 marked the 50th anniversary of President Truman's appointment of the first Director of Central Intelligence (DCI) and the creation of the Central Intelligence Group (CIG), CIA's institutional predecessor. The office diary of the President's chief military adviser, Ft. Admr. William D. Leahy, records a rather unexpected event on 24 January 1946: At lunch today in the White House, with only members of the Staff present, RAdm. Sidney Souers and I were presented (by President Truman) with black cloaks, black hats, and wooden daggers, and the President read an amusing directive to us outlining some of our duties in the Central Intelligence Agency, Cloak and Dagger Group of Snoopers. With this whimsical ceremony, President Truman christened Admiral Souers as the first DCI.

Title: (U) Paul Wolfowitz on Intelligence Policy-Relations

PDF URL: (pdf) - 569 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525681>

Accession Number: ADA525681

Personal Author(s): Davis, Jack

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1996

Abstract: (U) To Paul Wolfowitz, former Under Secretary of Defense for Policy, the essential challenge for policy officials is to make sound decisions amidst inherent uncertainty about the character of pending threats to and opportunities for US security interests. To succeed in these circumstances, policymakers must become, in effect, the senior analyst on their core accounts. Above all, they must become adept at the analytic techniques for doing battle with incomplete information and contradictory assumptions. Policymakers need support from intelligence to help deal with uncertainty. Thus, policy officials come to respect and rely on analysts and managers who appreciate this aspect of the decision process. Analysts and their analysis are deemed most useful when they: 1) Clarify what is known by laying out the evidence and pointing to cause-and-effect patterns. 2) Carefully structure assumptions and argumentation about what is unknown and unknowable. 3) Bring expertise to bear for planning and action on important longshot threats and opportunities. By the same standard, the heavily engaged policymaker has little use for intelligence products that emphasize prediction over explanation and opinion over evidence. The policymaking process is particularly ill served by assessments that trivialize the challenge of uncertainty by burying honest debate in compromise language and by ignoring high-impact contingencies.

Report Date: Jan 1996

Abstract: (U) During 34 years as an intelligence officer, I have had my share of exciting assignments and difficult passages. But, as I think back on my career, one brief period stands out as uniquely memorable three weeks in November and December of 1986, when I found myself in the middle of the Agency's effort to understand and come to grips with its roles in the Iran-Contra affair. These were the three weeks when the roof, in both political and physical terms, fell in on DCI Bill Casey. It was also the period during which the impression formed within other parts of the executive branch, the Congress, the media, and the public that Casey and the CIA were involved in a conspiracy to cover up the facts of their involvement in Iran-Contra - an impression that still lingers.

Title: (U) CORONA and the Intelligence Community

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525679>

Accession Number: ADA525679

Personal Author(s): Ruffner, Kevin C

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1996

Abstract: (U) On 24 May 1995, CIA's Center for the Study of Intelligence (CSI) concluded a day-and-a-half conference on satellite intelligence at George Washington University. Cosponsored with GWU's Space Policy Institute, the conference--entitled Piercing the Curtain: CORONA and the Revolution in Intelligence-- marked a significant event in CIA's efforts to provide more information to the American public. Three years earlier, Director of Central Intelligence (DCI) Robert Gates launched CIA's openness program and expanded CSI's duties. Shortly after becoming DCI, Gates formed the Classification Review Task Force (CRTF) to examine the feasibility of releasing satellite imagery. R. James Woolsey, who succeeded Gates as DCI in 1993, continued his predecessors initiatives. In September of that year, Woolsey informed the House Permanent Select Committee on Intelligence that when protection of certain information is no longer required, then we owe it to our citizens to work hard to disclose as much of that information as we can, consistent with our mission--warts and all. Even before Woolsey's testimony on Capitol Hill, CSI Director David D. Gries had made plans to hold a conference on satellite intelligence. The end of the Cold War had spurred interest in satellites and their possible use for environmental and other studies. When CSI's working group for the satellite intelligence conference met in July 1993, Gries expected to hold it in February 1994. Composed of representatives from CSI, the Office of Research and Development (ORD), the National Photographic Interpretation Center (NPIC), and other elements of the Intelligence Community (IC), including the then classified National Reconnaissance Office (NRO) and the Central Imagery Office (CIO), the working group anticipated few problems with the conference.

Title: (U) Thoughts Engendered by Robert McNamara's in Retrospect

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525279>

Accession Number: ADA525279

Personal Author(s): Ford, Harold P

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1996

Abstract: (U) Mr. McNamara's accounting of history is ambiguous, debatable, and, above all, selective. It does illuminate certain facets of policymaking and intelligence, but it does not dispel many of the frustrations that have long clouded our comprehension of the war. Mr. McNamara's troubled conscience tells us, repeatedly, that he and his colleagues were wrong, terribly wrong. They should not have tried to fight a guerrilla war with conventional military tactics against a foe willing to absorb enormous casualties. . . in a country lacking the fundamental political stability necessary to conduct effective military and pacification operations. It could not be done, and it was not done. They did not adequately level with the public. There were many occasions in which they should have begun considering a withdrawal from Vietnam. And so on. He lists many questions which US conduct of the war left unanswered. Would the loss of South Vietnam pose a threat to US security serious enough to warrant extreme action to prevent it? If so, what kind of action should we take? Should it include the introduction of US air and ground forces? Risking war with China? What would be the ultimate cost of such a program in economic, military, political, and human terms? Could it succeed? And if the chances of success were low and the costs high, were there other courses such as neutralization or withdrawal that deserved careful study and debate? In Mr. McNamara's view, these questions remained unanswered during Lyndon Johnson's presidency and for many many years thereafter.

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1996

Abstract: (U) What should we do? Who should do it? How much should we pay? The answers to these questions will determine the future structure and operation of the US Intelligence Community. Public debate on reinventing intelligence to date has focused on organizational relationships and interactions. When intelligence was a cottage industry, this was an adequate approach. In dealing with today's global intelligence enterprise, however, this anthropological perspective no longer suffices. If the goal of changing the Intelligence Community is improved efficiency, accountability, and responsiveness to the nations needs, the relationship between intelligence producers and consumers has to be redefined in economic terms--Adam Smith, not Margaret Mead. Doing so is the first step in ensuring that Americans get the best intelligence value for the tax dollar. In the military, we budget for food, fuel, ammunition, communications, personnel, and training. A business man or economist should not be surprised that we face a perceived crisis in intelligence and medical care, the two areas we continue to treat as a right and not a resource to be carefully husbanded.

Title: (U) The Farewell Dossier

PDF URL: (pdf) - 467 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA527328>

Accession Number: ADA527328

Personal Author(s): Weiss, Gus W

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1996

Abstract: (U) During the Cold War, and especially in the 1970s, Soviet intelligence carried out a substantial and successful clandestine effort to obtain technical and scientific knowledge from the West. This effort was suspected by a few US Government officials but not documented until 1981, when French intelligence obtained the services of Col. Vladimir I. Vetrov, Farewell, who photographed and supplied 4,000 KGB documents on the program. In the summer of 1981, President Mitterrand told President Reagan of the source, and, when the material was supplied, it led to a potent counterintelligence response by CIA and the NATO intelligence services. President Nixon and Secretary of State Kissinger conceived of detente as the search for ways of easing chronic strains in US-Soviet relations. They sought to engage the USSR in arrangements that would move the superpowers from confrontation to negotiation. Arms control, trade, and investment were the main substantive topics. The Soviets viewed detente as peaceful coexistence and as an avenue to improve their inefficient, if not beleaguered economy using improved political relations to obtain grain, foreign credits, and technology. In pure science, the Soviets deserved their impressive reputation, and their space program demonstrated originality and accomplishment in rocket engineering but they lacked production know-how necessary for long-term competition with the United States. Soviet managers had difficulty in translating laboratory results to products, quality control was poor, and plants were badly organized. Cost accounting, even in the defense sector, was hopelessly inadequate. In computers and micro electronics, the Soviets trailed Western standards by more than a decade.

Title: (U) Some Thoughts on Irregular Warfare

PDF URL: (pdf) - 637 KB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA525282>

Accession Number: ADA525282

Personal Author(s): White, Jeffrey B

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR THE STUDY OF INTELLIGENCE

Report Date: Jan 1996

Abstract: (U) Westerners, with their superior technology and organization, have been killed for a long time by primitives or savages whose style of war the Westerners misunderstood and whose skills exceeded those of the West in irregular wars. Irregular warfare is the oldest form of warfare, and it is a phenomenon that goes by many names, including tribal warfare, primitive warfare, little wars, and low-intensity conflict. The term irregular warfare seems best to capture the wide variety of these little wars. Such wars plague much of the non-Western world, and they will increasingly claim the Intelligence Community's attention. Since World War II, by one count, there have been more than 80 irregular conflicts. They include civil wars in Rwanda and Somalia, guerrilla wars in Sudan, and rebellions in Chechnya; they involve irregular elements fighting against other irregular elements, regular forces of a central government, or an external intervention force. The acquisition and use of modern military technology is often seen as a solution to the problems of warfare in the late 20th century, with information warfare the latest example. Irregular warfare, however, remains confoundingly unaffected by changes in technology. In an irregular conflict, sociology, psychology, and history will have more to say about the nature of the conflict, including its persistence and intensity.

Title: (U) The Weapons Proliferation Threat.

PDF URL: (pdf) - 1 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA338686>

Accession Number: ADA338686

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: 01 Mar 1995

Abstract: (U) Few international dangers confronting the United States have more serious and far-reaching implications for national security and worldwide stability than the proliferation of weapons of mass destruction (WMD). The legendary Chinese master of military strategy, Sun Tzu, is reported to have said that the best method of preserving security is to avoid direct battle and instead attack the enemy's plans and strategies. That, in essence, is a fundamental principle of the nonproliferation policy of the United States. If we can determine and understand the plans and intentions of would-be proliferators of weapons of mass destruction, and then frustrate those plans before they reach fruition, we will have preserved the security of our nation without having to confront the devastating power of the weapons themselves. The proliferation of WMD is a global problem that cuts across geographic, political, and technological lines. It involves some of the largest and smallest, richest and poorest countries led by some of the most reactionary and unstable regimes. Many potential proliferators are convinced that they need to develop WMD and associated delivery systems to protect their national security.

Report Date: Jan 1995

Abstract: (U) The infiltration of agents behind enemy lines during World War II could be accomplished without undue technical difficulty, thanks to the use of parachutes. Thousands of individuals descended upon occupied Europe through Joe holes in Royal Air Force Halifaxes and Army Air Force B-24s, or out the side doors of C-47s. Extraction of personnel, however, proved a far more challenging task. Usually, individuals had to exfiltrate enemy territory by hazardous land routes. Sometimes they could be flown out by light aircraft, like the British Lysander, that landed at night on makeshift airstrips.

Title: (U) Corona: America's First Satellite Program

PDF URL: (pdf) - 18 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA499635>

Accession Number: ADA499635

Personal Author(s): Ruffner, Kevin C

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Jan 1995

Abstract: (U) Since the CORONA satellite made its first successful flight in August 1960, the Intelligence Community's overhead reconnaissance programs have been among the nation's most closely guarded secrets. The end of the Cold War, however, has at last made it possible to declassify both information and imagery from the first American satellite systems of the 1960s. To do this, President William Clinton in February of this year ordered the declassification within 18 months of historical intelligence imagery from the early satellite systems known as the CORONA, ARGON, and LANYARD. Because the President's Executive Order 1295 1 (see appendix) envisions scientific and environmental uses for this satellite imagery, the declassified photographs will be transferred to the National Archives with a copy sent to the US Geological Survey. Vice President Albert Gore, who first urged the Intelligence Community to open up its early imagery for environmental studies, unveiled the first CORONA satellite photographs for the American press and public at CIA Headquarters on 24 February 1995. To mark this new initiative, CIA's Center for the Study of Intelligence and the Space Policy Institute at George Washington University are cosponsoring a conference, "Piercing the Curtain: CORONA and the Revolution in Intelligence," in Washington on 23-24 May 1995. On the occasion of this conference, the CIA History Staff is publishing this collection of newly declassified documents and imagery from the CORONA program. This is the fourth volume in the CIA Cold War Records Series, which began in 1992 when Director of Central Intelligence Robert Gates launched CIA's Openness Policy and reorganized the Center for the Study of Intelligence to include both the History Staff and a new Historical Review Group to declassify historically important CIA records.

Title: (U) Of Moles and Molehunters: A Review of Counterintelligence Literature, 1977-92

PDF URL: (pdf) - 9 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA511203>

Accession Number: ADA511203

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC CENTER FOR STUDY OF INTELLIGENCE

Report Date: Oct 1993

Abstract: (U) This monograph has two parts. The first is an essay on the counterintelligence literature produced from 1977 to 1992. The second contains reviews of selected books from that period. The essay and reviews concentrate on the major counterintelligence issues of the period. Highlighted are the controversial views of James Angleton, former head of CIA's Counterintelligence (CI) Staff, about the threat posed by Soviet intelligence operations. Also featured is Soviet defector Anatole Golitsyn, whose claims about Soviet operations had a compelling influence on Western counterintelligence services beginning about 1962 and until 1975. The study focuses mainly on books about the American, British, and Canadian intelligence and security services as they dealt with the Soviet intelligence threat, although it also mentions the services of other West European countries such as France, West Germany, and Norway. Not every book on espionage and counterintelligence published between 1977 and 1992 is reviewed; only those that are historically accurate, at least in general, and were influential are assessed. Excluded are some recent works? like Widows, by William R. Corson and Susan and Joseph Trento?because they are not reputable by even the generally low standards of most counterintelligence writing.

Title: (U) CIA Documents on the Cuban Missile Crisis, 1962

PDF URL: (pdf) - 21 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA498025>

Accession Number: ADA498025

Personal Author(s): McAuliffe, Mary S

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Oct 1992

Abstract: (U) The collection in this volume includes many of CIA's most important documents on the Cuban missile crisis. It contains the honeymoon cables that Director of Central Intelligence (DCI) John A. McCone sent to Headquarters from France a month before the missile crisis, as well as McCone's notes taken during the National Security Council Executive Committee meeting at the height of the crisis. It also includes intelligence memorandums and estimates, briefing papers, Cuban refugee reports, and memorandums on Operation MONGOOSE, the clandestine program aimed at destabilizing the Castro regime. Many of the evaluations of the missile threat contained here draw upon IRONBARK material, whose source was Soviet Col. Oleg Penkovsky. All documents in this volume have been subject to declassification review, and portions of some have been deleted for security reasons.

Title: (U) Directory of Soviet Officials: Science and Education: A Reference Aid

PDF URL: (pdf) - 12 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA327992>

Accession Number: ADA327992

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: May 1989

Abstract: (U) The Directory of Soviet Officials identifies individuals who hold positions in selected party, government, scientific, and public organizations of the USSR. It may be used to find either the incumbents of organization or the positions of given individuals. For some organizations, it serves as a guide to the internal structure of the organization. Coverage. This publication supersedes Directory of Soviet Officials: Science and Education (LDA 87-11012, May 1987). It identifies individuals who hold positions in or are members of selected scientific and educational organizations. It is one of a three-part series: the other volumes deal with national- and republic-level organizations. Because of the broad scope of the Science and Education Directory, the level of coverage within any particular organization is necessarily limited; most organizations listed herein are covered only through the level of director. An index of major organizations and a personality index appear at the end of the publication. Duplicate names in the personality index refer to different individuals who have the same name.

Title: (U) Directory of Polish Officials: A Reference Aid

PDF URL: (pdf) - 7 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA327986>

Accession Number: ADA327986

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Apr 1989

Abstract: (U) This edition of the Directory of Polish Officials supersedes LDA 87-10997, produced in April 1987. It identifies individuals who hold positions in selected party, government, economic, scientific, and other public organizations. It also provides a guide to the internal structure of some of these organizations. Dates of Information. The date an individual either assumed or was first identified in a position is listed in the 'position' column. Dates of birth are listed in the 'birth' column for selected officials. The Polish language uses the Latin alphabet with the addition of a variety of diacritics to indicate pronunciation. This directory, however, omits all diacritics. It follows the system authorized by the US Board on Geographic Names for transliteration of place names, except in instances where another word is more easily recognized and commonly used, such as 'voivodship' instead of 'wojewsdztwo.' Personal Names. Polish names consist of a family name and a given name. A surname ending in the suffix-ski is changed to -ska for women. This publication lists the full name of each individual whenever it is known. The family name appears first in bold type, followed by the given name. In rare instances a family name consists of a double name that appears in a hyphenated form or as two words. Additional Directory Entries. The directory includes political party affiliation for each individual whenever it is known or can be assumed by the position held. It also lists some academic degrees and military, police, security, and ecclesiastical ranks. The names of organizational components are standardized. Street addresses, transliterated names are provided for some organizations. Many economic and commercial organizations are listed by a cable designation or by a commonly known transliterated name.

Report Date: 14 Jul 1988

Abstract: (U) The Directory of Czechoslovak Officials identifies individuals who hold positions in selected party, government, economic, scientific, and other public organizations. It also provides a guide to the internal structure of some of these organizations: Dates of Information -- The date an individual either assumed or was first identified in a position is listed in the 'position' column. Dates of birth are listed in the 'birth' column for selected officials. Transliteration -- The Czech and Slovak languages use the Latin alphabet with the addition of several diacritical superscripts to indicate pronunciation. This directory omits all diacritics. Personal Names -- Czech and Slovak names consist of a family name and a given name. This publication lists the full name of each individual whenever it is known. The family name appears first in bold type, followed by the given name. Additional Directory Entries -- The directory includes political party affiliation for each individual whenever it is known or can be assumed by the position held. It also lists some academic degrees and military, police, security, and ecclesiastical ranks. An index of major organizations and a personality index follow the directory listing. Duplicate names in the personality index refer to different individuals.

Title: (U) Preparing Personnel to Live with a Protean Terrorist Threat,

Accession Number: ADP004496

Personal Author(s): Hix,B

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: 04 Apr 1984

Abstract: (U) Everybody has statistics. Somebody else mentioned there were 1,500-plus terrorist acts against Americans over a period of years. In preparation for this talk I asked our people to do a run for me on terrorism worldwide for the calendar year 1983. They gave me separate sheets this thick on 569 terrorist incidents worldwide in the calendar year 1983: kidnappings, barricades, hostage occupation, letter bombings, explosive bombings, things like Beirut, Ireland, crimes against U.S. business both at home and abroad, missile attacks, takeovers, assassinations, sabotage, break-ins, conspiracy, sniping.

Title: (U) Soviet Gross National Product in Current Prices, 1960-80.

Accession Number: ADE750832

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Mar 1983

Abstract: (U) This report presents a set of GNP accounts for 1980 that is similar in coverage and methodology to those for 1960, 1970, and 1976 developed previously by the Central Intelligence Agency. We then use these accounts to investigate several important questions about the Soviet

economy that require estimates of Soviet GNP in current prices. These are inflation, real GNP growth, allocation of resources, and structure of production.

Title: (U) China: International Trade Annual Statistical Supplement.

Accession Number: ADE750430

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Feb 1982

Abstract: (U) The commodity data for China's world trade presented in this publication are estimated from the statistics of China's trade partners. The data are obtained by aggregating across countries commodity data that have been categorized according to the United Nations' Standard International Trade Classification, Revised (SITC), Revision 1). Although China has occasionally released some commodity data. the data are not detailed and are not based on a standard trade classification system. Three different procedures are used to estimate commodity values for countries that lag in reporting data or for countries for which data are incomplete or nonexistent. First, for countries that report quantities but not values, the values are estimated by multiplying the quantity data by average prices for those commodities in China's trade with other countries. Second, for countries that have not reported commodity data in a given year, values for that year are extrapolated from the most recent year for which complete commodity data exist. Total values for missing years, obtained from the tables in the quarterly trade paper, are distributed proportionately over the commodities of the known base year.

For 1980, more than 97 percent of China's total exports and 98 percent of total imports are obtained either directly from reported trade statistics or by this extrapolation procedure. Finally, for countries that have never reported commodity details in the period from 1970 to 1980, the small remainder is distributed proportionately over the commodity values obtained from the above procedures.

Title: (U) Preliminary Analysis of Planning Norms for Soviet Ground Forces, Volume 1.

Accession Number: ADE750885

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Jan 1982

Abstract: (U) In response to a request from the Office of Soviet Analysis (SOVA) regarding the study of the historical existence and the evolution of Soviet ground forces planning norms, nineteen Russian language military-historical monographs, authored by the Soviet Ministry of Defense (MOD) between 1957 and 1962, were translated and analyzed. The nineteen monographs contained two direct references to planning norms. A limited amount of additional open source material, reviewed concurrently, indicated three more specific references to planning norms but very few details about their values. While recognizing the limitations of analysis based on such a small sample of data, preliminary indications suggest numerical correlations consistent with the existence of common factors which may be construed as planning norms. When considered in the light of other well established

historical and doctrinal information regarding Soviet military practice, the existence of planning norms appears confirmed. While these correlations are in some cases stated to two decimal places it must be emphasized that this analysis has not considered the numerous additional factors which undoubtedly influenced the planning and especially the execution and reporting of the operations studied. The theorized norms and some of the conclusions are therefore based essentially on 'circumstantial evidence' rather than confirmed by hard data.(author)

Title: (U) Directory of Chinese Officials: Provincial Organizations.

Accession Number: ADE750455

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Dec 1981

Abstract: (U) The document identifies individuals who hold positions on the provincial level in the Chinese Communist Party (CCP), legislatures, governments, and selected mass organizations. It also identified those who hold posts in military regions and military district headquarters and in the CCP government organizations of the provincial capitals. The early and late dates denote specific identification of an individual in his position. The names of females are followed by the letter f. The names of members and alternate members of the Central Committee of the CCP are followed by Mbr, CC and Alt Mbr, CC, respectively. The directory may be used to find both the incumbents in given positions within an organization and the positions of specific individuals. Also included are alphabetical indexes of organizations and of personalities, with Standard Telegraphic Codes when available.

Title: (U) A Perspective on the Pinyin Romanization of Chinese Characters.

Accession Number: ADE750312

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Sep 1981

Abstract: (U) On 1 January 1979 China adopted the Pinyin system of romanizing Chinese characters as its sole official transliteration system. In this country, the US Government and most of the public media soon followed suit. Confusion ensued, however, as people who needed to deal with Chinese names discovered that the methods they had used to understand and pronounce such names in the previously official Wade-Giles romanization system did not work for Pinyin. This reference aid has been designed to reduce the confusion. It includes a detailed map of China in which all geographic names are rendered in Pinyin, as well as a map, gazetteer, romanization conversion tables, and a Pinyin pronunciation guide.

Title: (U) Patterns of International Terrorism: 1980.

Accession Number: ADE750311

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Jun 1981

Abstract: (U) International terrorism resulted in more casualties in 1980 than in any year since the analysis of statistics related to terrorism began in 1968. The total number of events last year was also high--second only to 1978. Established patterns of striking at targets in industrialized democracies and attacking symbols of Western power continued into 1980. Americans remained the primary targets of international terrorism, with nearly two out of every five incidents involving US citizens or property. Terrorist events aimed at causing casualties, especially assassinations, increased over previous years. Over 30 percent of the attacks in 1980 resulted in at least one casualty. Last year marked the first year that a large number of deadly terrorist attacks were carried out by national governments. The Libyan Government's assassination campaign against dissidents living in Europe and the exchange of terrorist attacks on diplomats in the Middle East were the most noteworthy examples of government-sponsored terrorism. There was a sharp increase in right-wing terrorist activity in Europe. The attacks at the Munich Oktoberfest and at the railroad station in Bologna, Italy, rank among the worst terrorist incidents ever recorded. On the positive side, incidents involving hostages and barricade incidents were more successfully countered in 1980, as governments became better equipped to deal with such situations. Two prominent hostage-takings--the Iranian Embassy in London and a skyjacking in Turkey--were countered successfully by military force, and another two in Latin America were resolved by careful negotiations.

Title: (U) Key Soviet-Yugoslav Documents.

Accession Number: ADE750163

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Feb 1980

Abstract: (U) This reference aid is a compilation of selected documents relevant to the relationship between the USSR and Yugoslavia. It also contains a brief description of the historical circumstances in which each of these documents was issued. It is intended as a tool for analysts who follow relations between these two states; it does not attempt to provide new insights into the Soviet-Yugoslav relationship nor to project the future of these relations.

Title: (U) Consolidated Translation Survey. Number 151

PDF URL: (pdf) - 13 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=AD0873815>

Accession Number: AD0873815

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: 31 Jul 1970

Abstract: (U) This survey is prepared monthly from lists received through the cooperation of US government agencies and includes universities, research institutions, and commercial translation organizations. It is a compilation of projects completed or started during the preceding month. Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date of publication, and publication identifications of the completed project are given when available. Tables of contents of journals translated cover-to-cover are reproduced from the current publications. Projects in process, i.e., not completed as of the date of this survey, are noted with an asterisk (*), and when available, a project-control or 'in-process' number is noted in parentheses following the title. Certain details may be unavailable on such projects. New projects in process are not listed again until they are completed. An index to authors of items in this issue is provided at the end of the survey. Scientific and technical translations are grouped according to the COSATO subject category list except for military science and ordnance items which are listed under 'military' in the appropriate geographic areas.

Title: (U) Foreign Broadcast Information Service. History. Part 1: 1941-1947

PDF URL: (pdf) - 18 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=ADA510770>

Accession Number: ADA510770

Personal Author(s): Roop, Joseph E

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Apr 1969

Abstract: (U) A superficial examination might suggest that the Foreign Broadcast Information Service (FBIS) of 1967 is a radically different organization from the Foreign Broadcast Monitoring Service (FBMS) of 1941, or even from the Foreign Broadcast Intelligence Service that emerged from World War II. Today's FBIS is considerably larger, much more efficient, and it handles tasks such as the analysis of

foreign documents that were not even considered in the earlier years. Yet in its fundamental organization and responsibilities, its basic operations and methods, the change is not great. FBIS took form during those six years before its adoption by the Central Intelligence Agency, and came to CIA almost mature, trained and disciplined, and ready to plunge immediately into the tasks outlined for it. The basic operation of monitoring foreign broadcasts was learned and almost perfected prior to 1947. Monitoring is performed today very much as it was then, despite the vast improvements in technical equipment during the past 20 years. Methods of distributing FBIS products, and the extent of distribution, are very much the same today as they were in 1947. FBIS, emerged, then as the only recognized service organization trained and equipped to monitor and process foreign broadcasts for the benefit of all government agencies needing the service. It had thoroughly demonstrated by 1947 that the task of listening to foreign broadcasts and reporting to other government units was an essential task that could not be abandoned, and that the best way to meet the need was to assign the responsibility to one central organization. Worldwide coverage of the foreign radio to the extent it exists today was of course only a dream in 1947, but the goals already were established, and important first steps toward international cooperation to make possible the most efficient organization for worldwide coverage had been taken.

Report Date: 31 Mar 1969

Abstract: (U) Consolidated Translation Survey is prepared monthly from lists received through the cooperation of US government agencies. Translations are listed by area and subject category. Scientific projects, are grouped as a section regardless of geographic area. Scientific and technical translations are grouped according to the COSATI subject category list except for military science and ordnance items which are listed under 'military' in the appropriate geographic areas.

Report Date: Nov 1966

Abstract: (U) This survey is prepared monthly by the Foreign Documents Division, Office of Central Reference, CIA, from lists received through the cooperation of US government agencies and includes translations prepared by such agencies, private industry, universities, research institutions, and commercial translation organizations. It is a compilation of foreign documentary projects completed or started during the preceding month. Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date of publication, and publication identification of the completed project are given when available. Tables of contents of journals translated cover-to-cover are reproduced from the current publications.

Title: (U) CONSOLIDATED TRANSLATION SURVEY NUMBER 69

PDF URL: (pdf) - 7 MB -

<https://www.dtic.mil/DTICOnline/downloadPdf.search?collectionId=tr-docId=AD0834365>

Accession Number: AD0834365

Corporate Author: CENTRAL INTELLIGENCE AGENCY WASHINGTON DC

Report Date: Sep 1963

Abstract: (U) This Survey is prepared monthly from lists received through cooperation of US government agencies and includes translations of such agencies, private industry, universities, research institutions, and commercial translation organizations. It is a compilation of foreign documentary projects, completed or started during the month preceding this publication. Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date and data of publication, and publication identification of the completed project are given when available.

Report Date: Feb 1963

Abstract: (U) This Survey is prepared monthly from lists received through cooperation of US government agencies and includes translations of such agencies, private industry, universities, research institutions, and commercial translation organizations. It is a compilation of foreign documentary projects, completed or started during the month preceding this publication. Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date and data of publication, and publication identification of the completed project are given when available.

Report Date: Jul 1960

Abstract: (U) This Survey is prepared monthly by Foreign Documents Division, CIA, from lists received through cooperation of US government agencies and includes translations of such agencies, private industry, universities, research institutions and commercial translation organizations. It is a compilation of foreign documentary projects, completed or started during the month preceding this publication. Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date and data of publication, and publication identification of the completed project are given when available.

DTIC Bibliography

Export Time Stamp: 2014-11-12 10:33:16 AM

Number of Citations: 97

Format: FOIA UL Display

EXPORT CONTROL

The following notice applies if this bibliography includes abstracts with references marked "Export Control" EXPORT CONTROL WARNING NOTICE This document contains technical data whose export is restricted by the Arms Export Control Act (Title 22, U.S.C., sec. 2751 et seq.) or Executive Order 12470. Violations of these export laws are subject to severe criminal penalties. Distribution of this document is subject to DoDD 5230.25.

DOWNGRADING ACTION

The security classification of each entry in this listing is current as of the date of the bibliography. Do not downgrade or declassify individual bibliographic entries without referring to the complete and current classification authority, duration, and change markings associated with the document referenced in the bibliographic entry.

DESTRUCTION NOTICE

For classified documents, follow the procedures in DoD 5200.22-M, National Industrial Security Program Manual, Section 7, or DoD 5200.1-R, Information Security Program Regulation, Chapter VI, Section 7. For unclassified, limited documents, destroy by any method that will prevent disclosure of contents or reconstruction of the document.

CONTROLLED REPORTS

You may obtain copies of controlled reports only if you are within the audience authorized by the secondary distribution markings assigned by the controlling office or if you are specifically authorized by the controlling organization. To request specific authorization, please complete a DTIC Form 55, Request for Release of Limited Document. Be sure to include all the information needed to identify the document and a justification as to why you need the document. DTIC encourages the use of the Automated Form 55 for those with access to the Internet. The Automated Form 55 can be found at: <http://www.dtic.mil/dtic/formsNguides/registration/form55.html>. For those using the paper form, please fax your completed Form 55 to DTIC.

IRD RESTRICTIONS

Independent Research And Development (IRD) information held by DTIC in its IRD Collection is Company Proprietary data and is only for the official use of DoD personnel registered with DTIC. IRD information is protected as Trade Secrets (per 18 U.S.C. Chap. 90, Sections 1839) and its further distribution is not authorized. IRD information, printed or displayed, will be safeguarded as required, to preclude unauthorized dissemination to non-DoD personnel and organizations. (Per DoD 5100.66 and DLAR 5230.3 Encl. 1 Paragraph 3F). Penalties for the unauthorized distribution of IRD information are extensive and severe. (18 U.S.C. Section 1905 and 18 U.S.C. Chap. 90, Sections 1831 and 1832)

WARNING TO CONTRACTORS

As a condition of obtaining DTIC services, all information received from DTIC that is not clearly marked for public release will be used only to bid or perform work under a U.S. Government contract or grant or for purposes specifically authorized by the U.S. Government agency that is sponsoring access. Further, the information will not be published for profit or in any manner offered for sale. Non-compliance may result in termination of access and a requirement to return all information obtained from DTIC.

ASSISTANCE

If you need assistance with the search strategy or format for your bibliography, please contact 703-767-8265/8274, DSN 427-8265/8274 or Toll Free 1-800-CAL-DTIC (225-3842), (Menu selection 3, submenu 1, Training/Search Assistance).
