

WE'RE MARCHING FOR A NUCLEAR-FREE VICTORIA

**WHY NOT JOIN US?
FRIDAY
NOVEMBER 20th
TREASURY GARDENS
4.30pm**

STOP NUCLEAR MADNESS!

Nuclear power for Victoria is on the drawing board.

Already exploration for uranium by CRA is taking place less than 30 miles from the heart of Melbourne. Senior federal and state politicians, including Prime Minister Fraser and Premier Thompson, are openly advocating nuclear power development in Victoria.

The SEC has jumped the gun by investigating a variety of sites for nuclear power stations, including Portland and Westernport.

The government's energy policies, in particular the Alcoa aluminium smelter, the encouragement of coal-to-oil conversion and the deliberate running down of our public transport system are all part of a nuclear package.

More and more Victorians are supporting the call for a nuclear free Victoria— joining with people around the world who want an end to this nuclear madness, with its total disregard for health and safety, the environment, aboriginal landrights, and civil liberties.

WEAPONS PROLIFERATION

More and more people are mobilising against the twin evils of nuclear power and nuclear weapons.

The threat of nuclear war — a war without winners — has grown dramatically.

New weapons are being developed while more countries are gaining a nuclear weapons potential through the spread of uranium and nuclear technology.

Instead of fuelling the nuclear arms race we can play a key role in stopping it.

We must say NO to uranium mining and export and NO to foreign military bases, including the Omega base in Gippsland.

Lets make a nuclear free Victoria our first step in the campaign for a nuclear free Pacific — a nuclear free world.

Join us on November 20th as part of the movement towards a nuclear free world.
