"In ancient times mountains were erected, they moved rivers, lakes were formed. Our Amazon, our Chaco, our highlands and our plains and valleys were covered with greenery and flowers. We populate this sacred Mother Earth with different faces, and understood since the current plurality of everything and our diversity as beings and cultures. So we settle our people, and never understood racism until we suffer from the fatal colonial times...

**PREAMBLE OF THE NEW CONSTITUTION OF THE STATE OF BOLIVIA
PLURINATIONAL.**

CALL

PLANETARY FIRST SUMMIT DECOLONIZATION STRUGGLE AGAINST PATRIARCHY, RACISM AND ALL FORMS OF DISCRIMINATION

Decolonization! Patriarchalization! Live Good! Mother Earth! Harmony!
Balance!

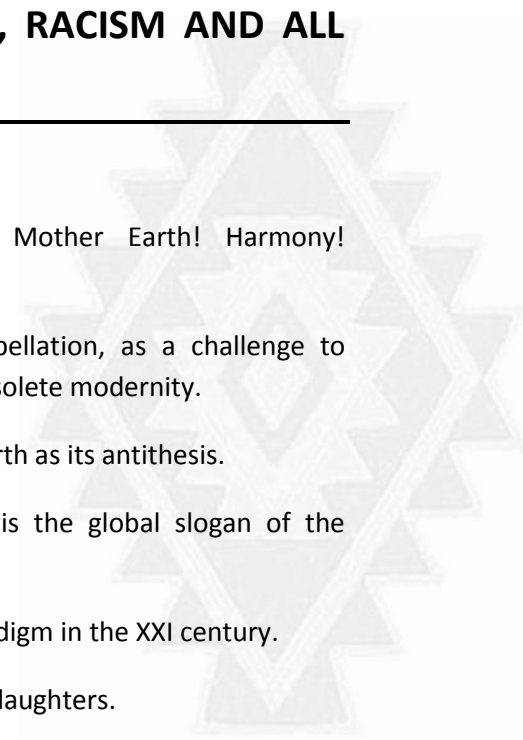

It is the cry that comes from Bolivia, as interpellation, as a challenge to economic, political, social system outdated and obsolete modernity.

We oppose the neo-colonial capitalism: Mother Earth as its antithesis.

Either capitalism dies or Mother Earth dies! It is the global slogan of the century.

Pachamama, Mother Earth; It is the planetary paradigm in the XXI century.

Pachamama emergency has been all her sons and daughters.

What's going on?

To know what we must do, it is always important to know what the world standard, imperialism, that is made: US Among its many activities, US It is dedicated to making weapons. After make them need to sell their weapons and to sell their weapons and wars must exist if there are no wars USA He is responsible for inventing.

So they invented the war against Iraq, Afghanistan, Libya, etc. etc.

The invasion of Iraq was the pretext that Saddam Hussein was developing weapons of mass destruction and so far US He could not prove it.

The pretexts for invading Libya was: Democracy, Human Rights. In Libya there were no problems of hunger, work, etc.

The standard of living of a Libyan was much higher than in any European country.

The root cause for the US-led invasions is oil.

USA It is an insatiable beast that increasingly need more and more oil.

One day we will touch us and we must be prepared. But while the US It is worried about invading countries across the world, in our territories continental emergency develops.

This decade is no accident that happens in our countries.

It is no coincidence that in Argentina have organized pickets turned in one year 3 presidents to establish the Kirchner era.

It is no coincidence that in Brazil the workers organized in the PT President Lula achieved as Paraguay or followers of liberation theology expressed in President Lugo. In Uruguay the Tupamaros militants form the government via Mujica or Sandinista Nicaragua after 40 years of armed struggle against the Somoza dynasty, now democratically take power with Daniel Ortega.

In Venezuela, the patriotic soldiers near the village make President Chavez.

Estado Plurinacional de Bolivia
Ministerio de Culturas y Turismo

But the cherry on the cake will be Evo Morales. For the first time in history an Indian president of Bolivia. And with a historic vote that never anybody nobody ever achieved: 54%. Voting is repeated successively in all electoral acts.

To this continental emergency, we call: **PACHA -KUTI.**

We live in times of **PACHACUTI.**

PACHA: World.

KUTI: Change, wallow, revolution - return to equilibrium.

How did all this happen?

To explain our process and the processes of other countries is necessary a historical reading.

From this reading we understand that Bolivia is a country that failed.

If you do not understand this does not understand the tasks ahead.

In 1825 (founding of Bolivia) there was a form of country that claimed to be modern, that claimed to be civilized, that would resemble to resemble Europe and Europe had to deny himself.

That kind of country to be modern had to liquidate its indigenous peoples, thus to be civilized country had to go their languages, their knowledge, their roots ... his identity.

Until 2003 they could not disappear indigenous peoples, they could disappear their languages, their knowledge, their identity.

So Bolivia is a country that failed, he sank.

And that is why the refounding of Bolivia is imposed and thus call for a Constituent Assembly.

With a new State Constitution we started a new path for building a society for all.

Today we are a world leader, we have become a political laboratory.

Estado Plurinacional de Bolivia
Ministerio de Culturas y Turismo

Two are the cornerstones of our revolutionary process:

DIGNITY AND IDENTITY.

By **DIGNITY** we understand that we can not continue supporting our country in the hands of transnational corporations. Railways, airlines, our oil, our mining companies, our natural and strategic resources were raffled transnational in times of neoliberalism. For National Dignity began a process of nationalization of our companies.

IDENTITY: We can not govern with laws designed from the colonial logic, laws designed to oppress minorities by majorities and therefore imposes build a new State Constitution via Constituent Assembly.

DIGNITY - IDENTITY: fundamentals of our revolutionary process.

And in the Constituent Assembly we understand that Bolivia is a country built without us: indigenous peoples; further, Bolivia is a country built against us indigenous peoples. Bolivia is a country without a nation and we, the indigenous peoples are stateless nations.

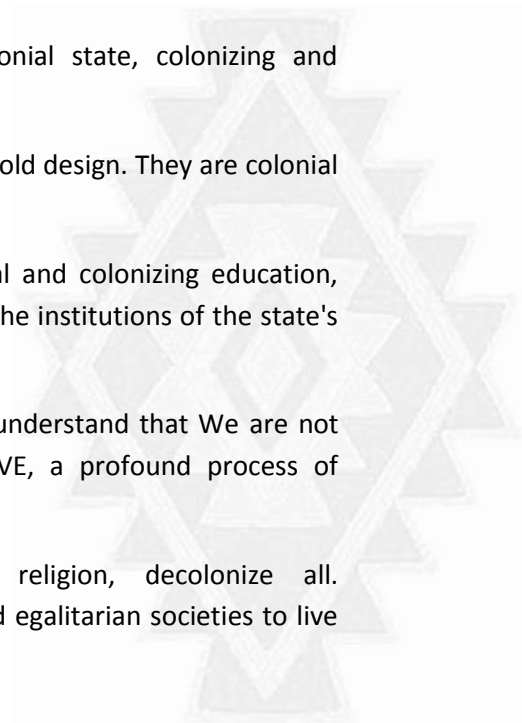

To all this we characterize it as Bolivia, a colonial state, colonizing and colonized.

All nation-states on this continent have the same mold design. They are colonial and colonizing.

This means that its laws are colonial, the colonial and colonizing education, colonial religion, armed forces, police, etc. etc. all the institutions of the state's colonial and colonizing.

Therefore, the Constitution in Article 9 makes us understand that We are not able to build a new society but DEVELOP ABOVE, a profound process of decolonization.

Decolonize education, decolonize the laws, religion, decolonize all. Decolonization at all levels is the condition to build egalitarian societies to live well.

Estado Plurinacional de Bolivia
Ministerio de Culturas y Turismo

Decolonization is no return to the past, there is a romantic return to the past; it is rather a scientific recovery of the best of our past to combine with modernity, but not with any currency, but with a modernity that we can afford to develop the country without violating Mother Earth, industrialize careful balance with Mother Earth. It is not green fundamentalists or indigenous messianism. **BALANCE.** Balance between men and women as a condition to restore the balance between human beings and Mother Earth.

The philosophies of indigenous peoples are the answers to the challenges of the twenty-first century.

Faced with the global crisis. Economic crisis, food crisis, moral crisis, ethical crisis, political crisis, etc. etc. indigenous people respond to them, Pachamama, Mother Earth; Living Well, decolonization struggle against patriarchy, harmony, balance.
