

The Security & Special Forces Theatre will be located on the DSEI show floor in the North Hall. The 2015 programme will address key technological developments within the security sector and the rapidly evolving challenges within the cyber domain.

Given the increasing movement towards interoperability and mutual knowledge exchange between defence and the civilian world (reflecting the increased co-operation and partnership between large security companies and defence primes) the sessions will feature speakers from across senior military personnel and special civilian forces, as well as from leading defence companies presenting their very latest innovations and technologies.

Core Themes

- **Information Superiority**
- **Warfare In the Information Age, hosted by Joint Forces Command**
- **Security, Counter-Terrorism and Force Protection**
- **SMEs, Science & Technology and Apprentices**
