**AT&T Government Solutions Wins \$4.8 Million Contract for LAN Upgrade for Army and Air Force Exchange Services**

**Vienna, Virginia, April 18, 2006**

AT&T Government Solutions has been awarded a contract valued at \$4.8 million over three years to conduct a LAN upgrade for the Army and Air Force Exchange Services (AAFES), a multi-billion dollar joint-service military organization serving both the Army and Air Force.

The contract was awarded by AAFES. AT&T Corp. will provide LAN upgrades to address AAFES requirements for headquarters, disaster recovery and call center operations.

"Disaster recovery is a critical need of all government agencies," said Don Herring, president of AT&T Government Solutions. "This contract is an opportunity for AT&T to apply our network-enabled solutions capabilities and expertise in disaster recovery to the AAFES LAN upgrade."

AAFES, which is headquartered in Dallas, Texas, has a two-fold mission: to provide quality merchandise and services at competitive prices and to generate earnings to augment military morale, welfare and recreation programs. For nearly 111 years, AAFES has served alongside Soldiers, Sailors, Airmen, and Marines, wherever they go, to provide necessary goods and services and a sense of home to active duty, National Guard, reserve members, military retirees and their family members.

*AT&T Government Solutions, headquartered in Vienna, Va., is a long-standing, trusted source of information technology solutions for the federal government, integrating unmatched network resources and professional services expertise with innovative technologies from AT&T Labs and industry-leading partners.
