

Full Spectrum Resistance to Full Spectrum Dominance

Keep Space for Peace

In another historic moment, we must decide: Shall the people of earth submit to full corporate surveillance and domination of every aspect of our lives? We say no! Military satellites now allow surveillance under programs like NSA and NRO. **Eyes in the Sky** can target every place on the planet, as the killer drone program reveals. While the US and NATO encircle Russia, China and other nations, **Eyes in the Sky**

enable the functioning of “missile defense” and other provocative “forward deployed” military operations.

We of The Global Network, working with friends in local and international movements, stand in opposition to “full spectrum dominance” by pledging nonviolent “full spectrum resistance” until our lands, resources, citizens and governments are free from corporate control!

**International Week of Protest
to Stop the Militarization of Space**

October 4-11, 2014
