Boost Efficiency for Your Road Warriors

Digitize and Mobilize Operations

Communicate and Collaborate Better

Accelerate and Automate HR Processes

# ONE Productivity Stream

Empower all of your employees to be engaged and successful.

## Relevant

No more clutter. The productivity stream shows items that only matter to each individual. Approvals, alerts, notifications, news - they are all designed to make decisions quickly and easily.

## Simple

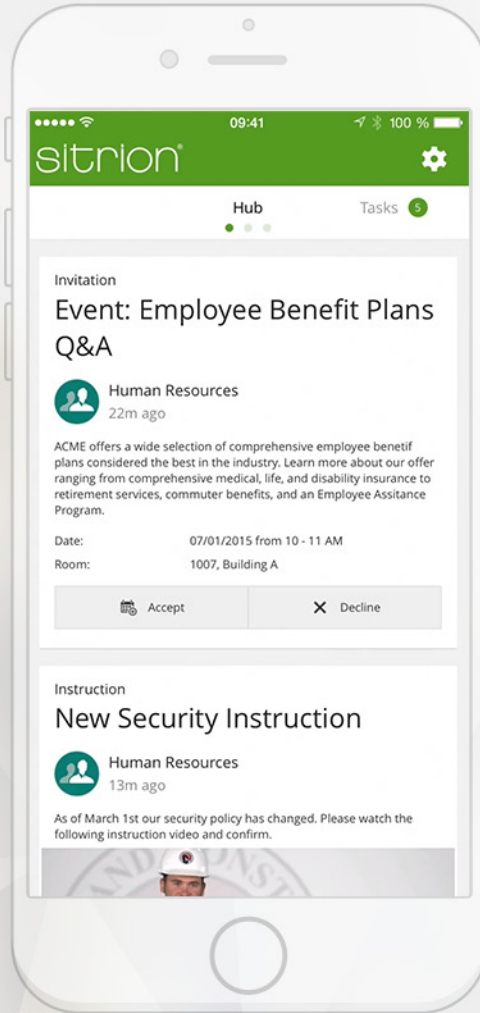

Simplicity drives adoption and productivity. Every aspect of the productivity stream is designed to empower every employee, hourly worker, or contractor to get things done as quickly as possible.

## Integrated

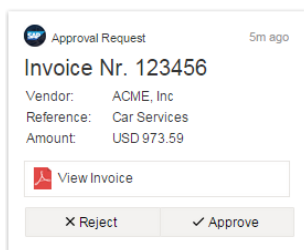

No more logging into each system of record on the road (e.g., HCM, CRM, ERP, etc.). The productivity stream is your personal assistant to gather everything you need in one place.

## Smart

Imagine a field engineer receiving all of the necessary information to meet with a customer - just based on his geo-location or work schedule. That is the intelligence behind the scenes of the productivity stream.

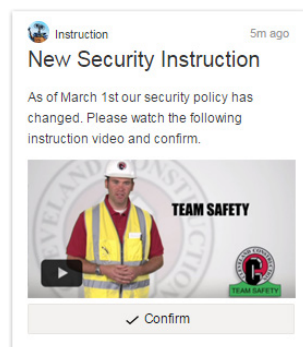

## Approvals made simple.

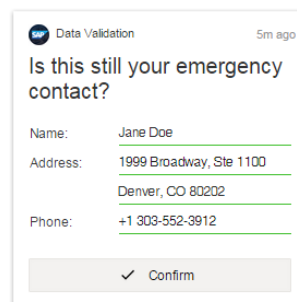

Get pertinent information in one spot to execute a decision quickly. Even get approvals from different systems into your ONE productivity stream.

## Watch, confirm, done.

Get rid of paper-based processes and mobilize routines easily.

## Mobilize requests.

Automate validation requests from HR, Marketing, or Finance and get responses faster.

## Act immediately.

Don't just inform - offer your employees a way to take immediate action on a notification to avoid being a bottleneck.

# Jumpstart your efficiency initiative

The impactful scenarios from our 5+million users packaged for you – out-of-the-box.

## Sales Efficiency

Optimize and automate work routines for your road warriors.

# Enterprise Ready by Design.

Founded on more than a decade of experience serving Global 2000 companies.

Enterprise-Class Security

Out-of-the-Box Backend Integrations

Compelling User Experience

Easy and Affordable

Efficient Administration

## Enterprise-Class Security

Benefit from more than a decade of experience in creating enterprise software for 550+ out of the Global 2000 companies. Our smart architecture ensures end-to-end enterprise-class security leveraging existing ecosystems and infrastructure.

> [Click here for our Security Guide and FAQs](#)

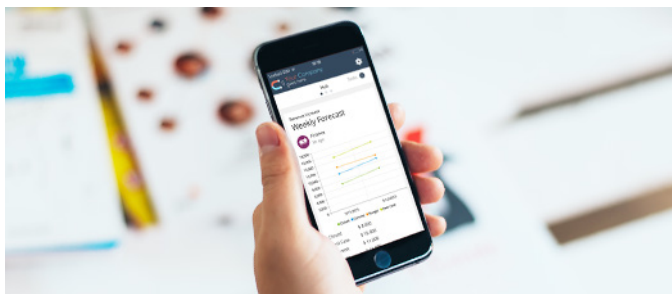

## Out-of-the-Box Backend Integrations

Recent surveys show that integrating with cumbersome, behind-the-firewall systems like SAP, Peoplesoft, and SharePoint account for up to 70% of mobile development costs. Leverage our pre-built connectors or create custom ones.

> [Click here to access our Mobility Research Package](#)

## Easy and Affordable

Utilizing our secure infrastructure, pre-built connectors and mobile use cases, MS Visual Studio-based development tool, as well as a standard design pattern, our end-to-end solution delivers up to 90% less development costs and 87% faster time to deliver the solution to your employees.
