

# THE PARTNER OF CHOICE FOR MOBILE FORENSICS

Mobile forensics is our business. Since 1999, we've been trusted partners serving customers in the intelligence, public safety, military and enterprise industries with industry-leading, award winning mobile forensics solution components. With unparalleled data extraction and analysis capabilities optimized for both lab and field personnel, our unified workflow allows examiners, investigators and first responders to collect, protect and act decisively on mobile data with the speed and accuracy a situation demands - without ever compromising one for the other. Our innovative tools unlock the intelligence of mobile data to accelerate investigations, unify teams and protect evidence.

## Here's What Sets Us Apart:

### LARGE, ESTABLISHED USER COMMUNITY

1

30,000 global deployments in more than 100 countries are allowing intelligence services, border patrols, special forces, military forces, public safety agencies and securities and financial organizations to achieve their missions quickly, accurately and effectively. They trust us to get it right.

### SOLUTIONS FOR EVERY INVESTIGATIVE NEED AND ENVIRONMENT

2

Our flexible, scalable and purpose-built solutions arm law enforcement agencies and enterprises with the tools they need to quickly access, preview and act on mobile data – whenever and wherever they need it. We make it easy for forensic specialists to access mobile, location, private cloud and operator data from the widest range of mobile and GPS devices to solve crimes faster and reduce device backlogs.

### FORENSICALLY SOUND EVIDENCE EVERY TIME

3

Unlike competitors' "black box" third-party boot loaders, UFED remains the only mobile forensics solution with custom-designed, read-only boot loaders, which ensure forensically sound file system and physical extractions. For cloud-based data and logical mobile device extractions, UFED relies upon provider APIs. Our solutions ensure accountability for every action by every user with role-based workflows and permission management.

### THE BROADEST DEVICE & APP SUPPORT

4

We've forged close, collaborative relationships with original equipment manufacturers (OEMs) and wireless carriers worldwide. These global partners send us more than 100 new handsets-most prior to actual consumer market release-per month. We retain more than 8,000 mobile phones at company headquarters for ongoing innovation and support. We also release UFED software updates monthly to support new devices, mobile device apps, and new and updated features and capabilities.

### BEST-IN CLASS TRAINING ENSURES A REPEATABLE, REPRODUCIBLE MOBILE FORENSICS PROCESS

5

Our industry-leading online and instructor-led certification training programs deliver the best-in-class tools, knowledge and practices required for evidence collection from mobile phones and portable GPS devices, data analysis, searching, and reporting.

## SUPERIOR TECHNICAL AND PROFESSIONAL SERVICES

6

We offer the services support you need to tackle the toughest mobile forensic challenges. Our highly skilled global team will assess operational, technical and procedural processes and assist in optimizing all of them across your entire organization.

## RESEARCH & DEVELOPMENT DEDICATED TO TECHNOLOGY LEADERSHIP

7

You'll maximize your technology budget when you invest in our UFED platform. With a staff of 200+ engineers-the most of any mobile forensics solution provider-we are committed to investing in the ongoing research and development that allows us to innovate around customer needs and the market overall. We offer a future-proof technology platform designed to not only meet evolving customer needs, but also deliver a measurable return on investment.

## A COMMITMENT TO QUALITY

8

We balance R&D with continuous quality assurance (QA), rigorously testing phones on an ongoing basis to ensure that UFED products do what they are designed to do.

## RESPONSIVE 24/7 SUPPORT

9

Looking to avoid tech support headaches? Our unified driver technology reduces the time and effort it takes to install and update UFED hardware. And when and if you need support of any kind, our email and online web channels are staffed 24/7 by a dedicated team of experts ready to help.

Mobile data evidence is changing everything. But challenges of legal access and privacy remain. So as investigators, courts, government agencies, legal practitioners and social media companies grapple with how and when mobile data fits into existing rules of evidence, our innovation will continue. We are committed to ensuring UFED mobile forensics solutions unlock the intelligence necessary to accelerate investigations, unify teams at every level and extract evidence you can always stand behind.

## ABOUT CELLEBRITE

Cellebrite is the world leader in delivering cutting-edge mobile forensic solutions. Cellebrite provides flexible, field-proven and innovative cross-platform solutions for lab and field via its UFED Pro and UFED Field Series.

The company's comprehensive Universal Forensic Extraction Device (UFED) is designed to meet the challenges of unveiling the massive amount of data stored in the modern mobile device. The UFED Series is able to extract, decode, analyze and report data from thousands of mobile devices, including, smartphones, legacy and feature phones, portable GPS devices, tablets, memory cards and phones manufactured with Chinese chipsets. With more than 30,000 units deployed across 100 countries, UFED Series is the primary choice for forensic specialists in law enforcement, military, intelligence, corporate security and eDiscovery.

Founded in 1999, Cellebrite is a subsidiary of the Sun Corporation, a publicly traded Japanese company (6736/JQ)
