

The One Program in Cape Verde

Objective of the One Programme

The One Programme's objective is to maximize and make efficient use of the joint contributions of participating Agencies to better support Cape Verde national policies in accelerating economic growth, promoting competitiveness, creating productive employment and fighting poverty. The One Programme therefore aims to help the Government implement national priorities, such as those proposed at the Forum that assembled the Government, the United Nations System and Civil Society together at Praia on the 22nd of October, 2007 concerning: (i) the achievement of international development goals, including the Millennium Development Goals (MDG) ; (ii) successful management of the period following graduation and (iii) support during the phase of post- accession to the World Trade Organization (WTO).

The four areas of the One Programme are: **1. Good Governance; 2. Promotion of Growth and Economic Opportunities; 3. Environment, Energy, Disasters Prevention and Response. 4. Human Capital and Social Protection**

3. Environment, Energy, Disasters Prevention and Response- The preservation of the environment is a fundamental element for Cape Verde's sustainable development. The Government has set as objectives the protection of the environment, the promotion of efficient use of all natural resources, the reduction of the country's dependence on fossil fuels, and the reinforcement of its capacity to deal with disasters and catastrophes. The UN System aims to contribute to the improvement of the sustainable management of the environment, preservation of the quality of life and preventative management of disasters. The United Nations also aims to support the Government so that people and institutions are important stakeholders in the process.

Duration	Starting date: 01 July/2008 End date: 31/Dec/ 2011								
Sub-Program	Environment, Energy and Disasters Prevention and Response
