

NetSuite SuiteSolutions – Dashboard Tiles

Description and Terms of Service

Overview of Functionality

This SuiteSolution provides a visually striking way of displaying KPIs for business users in the NetSuite Service dashboards via a custom tiles portlet.

The appearance of the tile including colors and icons to be used are specified via configuration. The tile can also display Variance, Ratio or Difference for by comparing this KPI to another static or dynamic KPI value. It also includes visual alerts to direct the attention of the users to metrics that do not meet specified thresholds.

Limitations:

1. Only saved searches that can execute within a SuiteScript are accepted in the configuration of these Tiles.
2. Drag and drop of tiles to reorder them in the portlet is not supported.
3. Email alerts depending on thresholds is not supported.
4. The URL for drilldown in the link is manually entered by the user and there is no validation for the URL.
5. Edit permissions for the tiles are not supported. You can set view permissions but any edits to a tile are visible to all users who have display access to that tile.
6. View permissions are at a role level, not at a user level.

Terms of Service:

SuiteSolutions are pre-built offerings used to accelerate the delivery of custom functionality into Customer's account. Any custom configurations or code deployed with SuiteSolution is not locked and can be further customized in Customer's account. It is Customer's sole responsibility to review the functionality and limitations enabled by this SuiteSolution item before procuring. Unless specifically agreed in writing in a separate Statement of Work, SuiteSolutions are not supported, maintained or upgraded by NetSuite. In addition, unless otherwise agreed upon in writing pursuant to a Statement of Work between NetSuite and Customer, Customer is responsible for all testing and configuration of all SuiteSolutions. SuiteSolutions can only be deployed to the account of the specific Customer that has procured the SuiteSolution. SuiteSolutions are for Customer's internal use only for use with Customer's NetSuite Service account and cannot be re-bundled and/or shared. Customer may continue to use this SuiteSolution item during the term of their use of the NetSuite Service.

This item shall be considered a Deliverable (as such term is defined in the PS Terms) and is provided to you pursuant to and governed by (in order of preference, as applicable): (i) the Professional Services Addendum to the NetSuite Subscription Services Agreement entered by and between the parties, (ii) the separate NetSuite Professional Services Agreement entered by and between the parties; or (iii) if neither (i) nor (ii) are applicable, the NetSuite Professional Services Agreement found at www.netsuite.com/termservice (the "PS Terms").

The SuiteSolution may include open source software programs licensed under different terms or licensed by a vendor other than NetSuite. To the extent that NetSuite includes open source software in or with the SuiteSolution (“Open Source Software”), the licenses governing such Open Source Software will apply to Customer’s access and use of such Open Source Software. A list of certain Open Source Software notices applicable to the SuiteSolution is set forth below. Customer agrees to comply with all applicable provisions of the licenses and terms governing Open Source Software. Notwithstanding anything to the contrary set forth herein or in the PS Terms, , NetSuite is not responsible for, and makes no warranties, express or implied, related to Open Source Software and will have no liability for Customer’s use of such Open Source Software.

Open Source Software:

The following notice may be updated from time to time as provided in the code.

jQuery-ColorPicker v1.0.2

NetSuite elects to use jQuery-ColorPicker v1.0.2 under the MIT license. The original notice, which accompanied the code, is at the following link <https://github.com/Belelros/jquery-colorpicker/blob/master/LICENSE> and is reproduced below:
