eTapestry Minimum System Requirements

This document lists the minimum system infrastructure required to run your Blackbaud system. *eTapestry* is a hosted solution. Therefore, your data must be hosted by Blackbaud. Please note that system requirements are subject to change. Make sure you have the latest information before making any purchases.

Note: If you are running other Blackbaud products, please refer to the Minimum System Requirements for those products separately.

workstation minimum requirements	
browser	The web application should be accessed through any of the following supported browsers: • Google Chrome (latest version) • Mozilla Firefox (latest version) • Internet Explorer 10 • Internet Explorer 11 The browser must accept cookies and have javascript enabled in order to display *eTapestry* properly.
internet connection	Blackbaud recommends using a high-speed Internet connection.
display	A minimum screen resolution of 1024x768, 256 colors, 16-bit color or better is recommended.
