

Environmental policy and philosophy of Corinthia Hotel St Petersburg

THE PHILOSOPHY

To maintain and portray a responsible and professional attitude in maintaining and protecting our environment, both inside and outside of the hotel, today, tomorrow, and in the future for our staff, our guests and our planet.

THE OBJECTIVE

Our objective is to meet and exceed the stringent local regulatory guidelines and legislation in order to maintain our rating as a 5 star ECO hotel. Our intention will always be to retain the Green Hotel Certification.

We will achieve this by committing ourselves to the specific requirements and demands of the established committee and regulatory board.

Regular training and awareness programmes for all staff and team delegates will be carried out and led by our Learning and Development department.

The achievements will be planned, measured and tracked by regular reporting and submission of data to the authorities on a quarterly basis.

We will commit ourselves to a yearly inspection of the ECO union to meet and maintain all required criteria.

We also undertake the promise of understanding the need to observe and maintain the local culture, encourage local activities, and enhance our relationships with the community.

CORINTHIA HOTEL ST PETERSBURG'S GREEN COMMITTEE

Corinthia Hotel St Petersburg has set up an ongoing committee that meets monthly to discuss progress and goals within their teams and how we can make any improvements. Record is kept of these meetings and is filed as part of the Green Document.

The committee is headed at present by the Hotel Resident Manager and supported by the Executive Housekeeper as the Permanent Secretary of the committee, Director of Technical Services as the Technical Advisor, and the Engineering Manager as the Administrative Member.

In addition, this leading team is supported by several staff members from different departments including the Executive Chef, Food and Beverage Director, Purchasing Manager, and representatives of the HR Department from Training and Health sections.

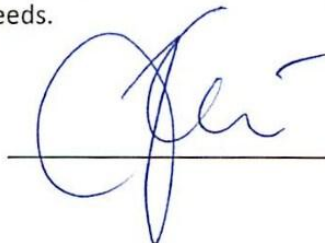

THE NEGATIVE IMPACTS THAT WE FACE

- WASTE MANAGEMENT
- AIR POLLUTION
- WATER CONTROL
- CHEMICAL CONTROL AND UTILISATION
- STUDY AND OBSERVATION OF BUILDING EFFICIENCY
- ENERGY CONTROL AND MINIMISATION
- UTILISING NEW WAYS OF INCORPORATING ENVIRONMENTALLY FRIENDLY MATERIALS INTO THE HOTEL

THE COMMITMENT

By adhering to this policy and philosophy we, as the team of Corinthian Hotel St Petersburg, will strive to implement and achieve our goals in the long term effort to improve and minimize the ecological effect that our hotel has and creates on today's global environment needs.

THE TEAM

General Manager
Jesper Bo Henriksen
