

This J11 is a first for me, as it will be an experience beyond the gates of prison... Being on supervised release i'm still, for all extents and purposes, only out in the physical sense – in every other aspect my ass is still within those walls of concrete, steel, & razor wire... while i was held within the confines of county jail for 28 months, 3 & 1/2 years at medium II fci victorville, & 3 plus years at the low security fci terminal island in Long Beach, the aid and nourishment i received from communities around the world on J11 was paramount to my survival... receiving books, funds for visitors, & the letters that maintained those crucial connections which i needed the most - J11 provided in abundance without fail... i can not express with adequate depth what it meant for me to receive even the shortest note of support & solidarity from someone on the outside - some of which have become friendships i cherish to this day... my thanks will never be enough for the nourishment of my foundation over the last 9 years, and for your continued solidarity & aid to those held from family, loved ones, & their community...

in solidarity
