

# Maximum budget control. More technology for students and faculty.

## Apple Education Finance program

Apple offers flexible financial plans that allow you to leverage your technology dollars. You'll benefit from payment, leasing, and refresh options that are tailored for you. With financing, you can select a payment schedule that's right for your budget cycle and match payments to the life of the equipment. You can also include software, support, and training in the lease payment.

Whether your technology plan calls for a mobile lab or a full deployment of hardware, software, installation, and professional development, Apple Financial Services will design a financing solution that fits your needs.

The Apple Education Finance program enables you to:

- Explore possibilities beyond bonds, grants, or cash.
- Acquire several years' worth of equipment at once while maintaining annual budgets.
- Keep your technology current.

### Options to meet your needs

- \$1 Purchase Option: Rapidly increase the number of devices available to students and teachers. Own the equipment at the end of the term.
- Fair Market Value: Low periodic payments and the option to purchase or return equipment at the end of the term.
- Same-as-cash delayed payment structures.
- Flexible escrow financing.
- Parent- and community-based funding solutions with Invest for Learning.

**Learn how financing can streamline the management of your technology plans and your budget. Contact your Apple education representative or call Apple Financial Services at 1-800-APPLE-LN (1-800-277-5356).**
