

# Perfect Privacy

## Electronic Frontier Foundation's 2014 Annual Privacy Report

Among the Internet Access Providers on the Electronic Frontier Foundation's report, Sonic alone earned a perfect six out of six stars. No other Internet Access Provider earned more than three stars.

Your private information passes through your Internet Access Provider. So, although a number of web services companies also earned a perfect score — Apple, Twitter and Dropbox among them — your Internet Access Provider's privacy practices are critical.

Safeguard what's important to you and your business: switch to Sonic.

## Sonic's Six-Star Score

### WE'VE GOT YOUR BACK

When you use Sonic as your Internet Access Provider, we work hard to guard your privacy. Sonic instituted strong privacy practices when the company was founded nearly 20 years ago and we've had your back all these years.

See the report for all the details: [www.eff.org/who-has-your-back-government-data-requests-2014](http://www.eff.org/who-has-your-back-government-data-requests-2014)
