

## Presentation of the partners

- **European Commission – Marie Curie – COFUND**

The Co-funding of Regional, National, and International Programmes (COFUND) is one of the Marie Curie Actions part of the Seventh Framework Programme for Research and Technological Development. COFUND is a co-funding mechanism providing an-extra financial support to national, regional research mobility programmes. Marie Curie Actions offer additional funding to existing or new regional and national fellowship programmes for research training and career development in order to encourage their moves across borders.

- **CERI**

CERI is the oldest and the largest of Sciences Po's research centers. Founded in 1952 with only a handful of permanent fellows, is has grown into France's most preeminent social science research institution on international affairs, foreign societies and transnational challenges.

CERI's current faculty of 62 full-time and 22 affiliated fellows consists of sociologists, political scientists, anthropologists, economists, legal scholars and historians. They conduct their research in five major thematic areas – security and risks, international politics, capitalism and globalization, political systems, identities and politics –, with a strong emphasis on fieldwork and comparative methods. Regional expertise is one CERI's main fortes, in particular in the field of Asian, Middle-Eastern, Latin American and, increasingly, African studies.

Its excellence in scholarship regularly brings to CERI a number of visitors, advanced doctoral students, academics and foreign policy practitioners, from across the globe. The center organizes numerous public lectures and seminars and publishes a journal, *Critique Internationale*, two book series in French and two other with UK and US publishers, in and a growing number of electronic publications available on its website.

- **Collège d'Études Mondiales (CEM)**

Le *Collège d'études mondiales de Paris* is a new research institution founded in 2011 by the *Fondation Maison des sciences de l'homme* at the initiative of his General Director, internationally renowned French sociologist Michel Wieviorka. The main thrust of the *Collège* is to analyze the major transformations of the contemporary world with updated intellectual tools that go way beyond “methodological nationalism” and to propose new paradigms that reach a higher level of “global thinking” on cultural change and social justice while taking into full account individual and collective actors’ subjectivity and cultural orientations. Through its unique programme combining Research Chairs, Research Initiatives and Seminars Series, the *Collège* offers first-class conditions to high-level international scholars to develop innovative and multidisciplinary research programmes in Paris.

The *Collège* is structured around three major areas — (a) democracy and collective action; (b) the production of new norms and frontiers; (c) global risks — and develops its activities through the work and interaction between its fifteen Research Chairs.

- **DAAD (Deutscher Akademischer Austausch Dienst)**

The German Academic Exchange Service (DAAD) is the largest funding organisation in the world supporting the international exchange of students and scholars. Since it was founded in 1925, more than 1.5 million scholars in Germany and abroad have received DAAD funding. It is a registered association and its members are German institutions of higher education and student bodies. Its activities go far beyond simply awarding grants and scholarships. The DAAD supports the internationalisation of German universities, promotes German studies and the German language abroad, assists developing countries in establishing effective universities and advises decision makers on matters of cultural, education and development policy.

- **École Centrale Paris**

Ecole Centrale is a French university-level institution (*grande école*) in the field of engineering. Founded in 1829, it is one of the oldest and most prestigious engineering schools in France and has the special status of Grand établissement. École Centrale Paris offers graduate degree programs as well as PhD opportunities. The school, reputed for its international orientation, has partnerships with the best universities all over the world, such as Cornell University, Dartmouth College, Northwestern University, University of California, Berkeley, University of Chicago, Hong Kong University of Science & Technology, Seoul National University, and University of Peking.

- **Ecole des Hautes Etudes en Sciences Sociales (EHESS – School for Advanced Studies in the Social Sciences)**

EHESS is a leading French institution for research and higher education, a *Grand Établissement*. Its mission is research and research training in the social sciences, including the relationship these latter maintain with the natural and life sciences. The main areas of specialization include: history, literary theory, linguistics, philosophy, philology, sociology, anthropology, economics, cognitive science, demographics, geography, archaeology, psychology, law. It functions as a research, teaching, and degree-granting institution. It offers advanced students high-level programs intended to lead to research careers. Eminent scholars have been associated with this school such as Lucien Febvre, Fernand Braudel, Jacques Le Goff, François Furet, Claude Lévi-Strauss, Le Roy Ladurie, Jean-Marie Pesez, Pierre Nora, Georges Balandier, Marc Augé, Pierre Bourdieu, Luc Boltanski, Robert Castel, Alain Touraine, Jean-Claude Passeron, Jean-Louis Fabiani, Michel Wieviorka.

- **Ecole pratique des hautes études (EPHE)**

**The Ecole pratique des hautes études (EPHE)** is a leading institution of higher education and research, which provides highly specialized **practical training in basic and applied research** in a wide range of disciplines.

The EPHE is **headquartered in Paris** and is present in many locations in France.

The School brings together 240 faculty members and about 3,000 students and non-degree students into three core “Sections” : **Earth and Life Sciences; Historical and Philological Sciences; Religious Sciences.**

The School conducts research and training in research through designated **teams** (*unités d'accueil*) and **joint research units** (*unités mixtes de recherche*) which are linked to the National Center for Scientific Research (*CNRS*) and other organizations such as INSERM and

INRA. Completing these are **three Institutes** set up to disseminate scholarly knowledge: the European Institute of Religious Sciences (IESR); the recently created Pacific Coral Reef Institute (IRCP); the Transdisciplinary Institute for the Study of Aging (ITEV).

- **Fondazione Bruno Kessler (FBK), Italy**

The Fondazione Bruno Kessler is located in Trento, in northern Italy. With more than 350 researchers, its interdisciplinary nature and its ability to capitalize on the wide array of competencies on hand, make FBK unique in the Italian research landscape. Its activities range from humanistic studies to scientific and technological research. Its Research in the humanities revolves around three scientific units:

- Italian-German Historical Institute (ISIG)
- Center for Religious Studies (ISR)
- Research Institute for the Evaluation of Public Policies (IRVAPP)
- Research Center on International Politics and Conflict Resolution (CeRPIC)
- Research project on behavioral economics and nudging

<http://www.fbk.eu/>

- **Fritz Thyssen Foundation (Fritz Thyssen Stiftung)**

The sole aim of the Foundation is to provide direct support for science and research at universities and research institutes primarily in Germany.

For over 50 years, the Fritz Thyssen Foundation supports research in the fields of history, language and culture, state, economics, society and medicine, devoting special attention to support for junior researchers.

- **Princeton University**

Princeton University is a vibrant community of scholarship and learning that stands in the nation's service and in the service of all nations. Chartered in 1746, Princeton is the fourth-oldest college in the United States. Princeton is an independent, coeducational,

nondenominational institution that provides undergraduate and graduate instruction in the humanities, social sciences, natural sciences and engineering.

As a world-renowned research university, Princeton seeks to achieve the highest levels of distinction in the discovery and transmission of knowledge and understanding. At the same time, Princeton is distinctive among research universities in its commitment to undergraduate teaching.

- **LUISS –Libera Università Internazionale degli Studi Sociali Guido Carli, Italy**

LuiSS is an independent university that offers an innovative educational approach at its four Departments: Economics and Finance, Business and Management, Law, and Political Science. Its goal is not simply to convey knowledge but to train young people, giving them a sense of mastery over their future. What distinguishes LUISS is its privileged relationship with the business world. Over 200 companies, multinationals, and public and private institutions collaborate with the University, offering its degree candidates and new graduates their first real opportunities to step foot in the business world. Research at LUISS Guido Carli primarily focuses on the social sciences, in the fields of Economics, History, Politics, Sociology, Political Theory, Theory of Government and Public Organizations, as well as on Law and Management. The aim of these research activities is to contribute to the dissemination and development of knowledge in these fields, and we are committed to maintaining the highest national and international standards. We strive to be a source of knowledge for the scientific community and civil society overall, with academic research and participation in public debates on a wide range of issues concerning government policies, industrial relations, institutional innovations and interactions between interest groups with significant social impact.

Research is carried out within four departments (Economics and Finance, Law, Business and Management, and Political Science) and two schools (the LUISS Business School and the School of Government). Each of these structures examines a limited number of academic fields and is home to a number of research centers, academic communities and doctoral programs.

Research Centres:

- **Center for Ethics and Global Politics**
- **Center for Experimental Studies of Internet, Entertainment and Gambling (CESIEG)**
- **Center for Labor and Economic Growth (CeLEG)**
- **Center for Media and Communication Studies “Massimo Baldini” (CMCS)**
- **Centro Arcelli per gli Studi Monetari e Finanziari (CASMEF)**
- **Centro di ricerca per il Diritto d’Impresa (CERADI)**
- **Centro di Ricerca sui Sistemi Informativi (CeRSI)**
- **Centro di studi sul Parlamento (CESP)**
- **Centro Italiano Studi Elettorali (CISE)**

- **Centro Studi di Economia della Formazione e delle Professioni (CeFOP)**
- **Gruppo di Ricerche Industriali e Finanziarie “Fabio Gobbo” (GRIF)**
- **International Centre on Democracies and Democratizations “Victor Zaslavsky” (ICEDD)**
- **Laboratorio di analisi politica e sociale (LUISS – LAPS)**
- **LUISS Lab of European Economics (LLEE)**
- **Osservatorio di Proprietà Intellettuale, Concorrenza e Comunicazioni (OPICC)**

## LabEx

**LabEx** (“Laboratories of Excellency” = centers of excellence) were created in 2010 by the French Ministry of Research. They embody the new face of research in France and the Ministry reallocated its funds in accordance to the frame of the “Grand Emprunt” (“major loan” scheme). The government's plan for the reorganization of university and research also includes Idex (“Initiatives d’excellence”) and PRES (“pôles de recherche et d’enseignement supérieur”: Consortium for Research and Higher Education).

A LabEx regroups several research units from universities, the CNRS, the grandes écoles or other research institutions, under the coordination of a unique coordinator. It contributes to the reorganization and revitalization of research and high education in France in order to face international competition.

The candidates’ projects should match the areas of research of the general project and the collaborative programmes of each institution or LabEx in the social and human sciences; host laboratories are institution’s “partners”: to identify them and to learn more on their research areas, please refer to their internet website.

- **LabEx CORAIL « Coral Reefs facing global change »**

CORAIL has focus on research on coral reefs ecosystems with a view to improve sustainable management. While only constituting 0.02% of the ocean Coral reefs harbour 25% of the biodiversity in the seas. Viewed from that perspective, it is clear that such an ecosystem should be a priority at the scale of the planet. But coral reefs are slowly dying, and recent reports estimates that 20% are already definitively destroyed, another 25% are in great immediate threat and another 25% will be threatened by 2050. It is urgent to react now and improved sustainable management comes from increased knowledge integrated into governance decisions. The objective of CORAIL is to contribute our expertise for France, for the French overseas territories as well as for small insular countries in the Pacific Ocean, the Indian Ocean and the Caribbean, developing better management strategies, integrating scientific knowledge and interacting scientists with policy makers. Coral reefs are decreasing rapidly and present global change - human demography and climate change - adding pressure to coastal ecosystems that already face direct use from human populations. Multidisciplinary project integrates biologists, ecologists and human scientists in order to forge a link between biodiversity, ecosystem use and governance politics.

The LabEx “CORAIL” groups together 82 principal investigators that are only able to carry post-doc projets, from the 9 partners:

- **LabEx DynamiTe**

LabEx DynamiTe ambitions to reinforce geography's position within the social sciences in order to engage them to take a "spatial turn".

This LabEx includes top research units in the fields of geography, history, archeology, sociology, anthropology and economics. The purpose is to improve our capital of knowledge and our potential for action via a reappraisal of the notion of "territory" in the perspective of a collective projection towards a shared future.

Four lines of research have been selected, in which these challenges in terms of knowledge and action are particularly crucial:

- Environment: evolution, risks, vulnerabilities and diversity of territories;
- Cities: resilience of territorial forms and social dynamics;

- Development: diffusion of models and diversification of their territorialisation;
- Exchanges: new territorialities and a new approach to modes of "in-habiting".

Coordinator: **Géographie-cités**

- **Labex ICCA -- Industries Culturelles et Creation Artistique (Cultural Industries and artistic creation)**

ICCA is an interdisciplinary research center on the arts, culture and digital markets and their practices. Founded in 2011, ICCA ambitions to define new economic and regulatory models and to study new uses, emerging markets and changing legal frameworks, in traditional sectors as well as the digital sphere.

ICCA brings together interdisciplinary teams from several universities in domains as diverse as sociology, economics, law, communication and education.

ICCA is also a forum promoting dialogue with professional networks and industrial actors in culture and the arts. As a leading partner and thing tank, it provides analysis, expertise and forecastings.

ICCA teams' research includes:

- Publishing, cinema and broadcasting industries in the digital age (prospective analysis of the changes induced in these sectors by digital technologies, actors' strategies, economic models, creation, uses...)
- Convergence in contents (analysis of multi-support exploitation practice and of the evolution of content creation process- and development of new forms of production and circulation of these contents on the web 2.0.
- Regulation of creative industries and of the internet (analysis of regulation needs and existing regulations; economic and legal aspects ; evaluation)
- Video Games and education industries (interactions between the video games sector and education, serious games, e-learning)
- The contribution of cultural economics to growth, in particular in relation to the integration of cultural industries into creative industries. Differentiation in territorial attractiveness (analysis of the territorial issues linked to the cultural and digital industries, employment, development, population, training at the local scale – regions, departments, urban communities or cities)

Coordinator: Paris 13

- **Labex IDGM +**

Designing new international development policies from research outcomes. An enhanced "Initiative for Development and Global Governance"

The project IDGM+ acts for the enhancement of a high quality research leading to the reexamination of international development policies. The main issues addressed cover sustainable development, cooperation for development, developing countries policies and world governance. It aims at bridging the gap between high standard research and policy advice on fundamental issues of development economics. The project also aims at fostering the expertise of tomorrow's researchers and policy makers through the participation of its members to high standard training programmes."

Coordinated by École normale supérieure, the LabEx IEC is a unique interdisciplinary center conducting research and offering advanced courses in Cognitive Science (the study of higher mental functions such as perception, action, attention, decision making, reasoning, language, emotions, social skills, etc). The IEC is located at the prestigious Ecole normale supérieure (Ulm) in Paris. It promotes fundamental research, teaching and translational research on human cognition, at the interface between humanities and social sciences, life sciences, and engineering and computer sciences.

The IEC supports strategic research programs in four cutting-edge areas:

1. Perception, Attention and Consciousness,
2. Language,
3. Social and Collective Cognition
4. Decision making and rationality

**Observing and interpreting changes in society, in order to anticipate future change**

The iPOPs projet -Individuals, Populations, Societies - is one of the hundred "Laboratories of Excellence" selected in 2010 by the French Ministry of Higher Education and Research under its programme of investment in the future financed by the national loan scheme (known as "le Grand Emprunt").

Hosted by INED in partnership with four universities and the Campus Condorcet, iPOPs aims to occupy a central position in research and training in the population sciences, and to place its research at the disposal of the economic, social and political worlds.

Project partners

Hosted by INED in partnership with four universities, the Campus Condorcet and several associated or affiliated laboratories, iPOPs aims to occupy a central position in research and training in the population sciences. iPOPs is also an associate member of the HeSam research and higher education cluster, and is soon to join that of "Sorbonne Paris Cité".

- **LabExMed - Social Sciences and Humanities at the Heart of the Multidisciplinarity for the Study of the Mediterranean**

LabExMed is a Center of Excellence dedicated to the Mediterranean studies. It mutualises various and complementary scientific disciplines and skills in order to structure an interdisciplinary and comparative project. The aim is to analyze and decipher the main challenges facing today social sciences and humanities, as well as our societies: geopolitical changes, migration and mobility, social and economic transformations, political and religious controversies, cultural interactions and confrontations, resource management, as well as patrimonial issues, risks and crisis. Bringing together more than 500 researchers, senior lecturers, administrative and technical staff, as well as 800 PhD students, LabExMed will implement innovative interdisciplinary research programs. These activities will be structured around five main themes: Systems of production, circulation and interdependencies; Socio-environmental processes; Knowledge, technology and languages; Patrimony: issues, practices and representations; State, Law and belonging.

- **LabEx Les Passés dans le Présent – The Pasts in the Present**

The Pasts in the Present: History, Heritage, Memory cluster of excellence is concerned with the presence of the past in contemporary society.

More specifically, the cluster of excellence seeks to understand mediations of history in the digital age, politics of memory, social appropriations of the past up- and downstream from heritage policies. The reflection is interdisciplinary and organised in two fundamental themes. The first, “Connections to the Past: Representations and Assessments,” seeks a global analysis of representations of the past from every epoch (from prehistory to the present). The second, “Active Knowledge of the Past: Practices and Tools of Transmission,” is based on documentary and archival resources and collections conserved by the cluster’s different partners. It seeks to make available, for different audiences, new digitized collections, which, for some, contribute to the history of disciplines (archeology, ethnology, ethnomusicology).

As part of the general reflection on digital humanities, the labex Pasts in the Present seeks to work on the interoperability of these corpuses not only between partners but also with other databases, in order to inscribe them in the Web of Data (Linked Data). This implies modeling catalogues and inventories, using international standards of data representation and of enrichment of the indexing metadata.

The Past in the Present cluster has also developed a dynamic network of programs, based on heritage, culture and text, history, sociology of memory, art history.

Coordinator: The cluster is coordinated by the University Paris Ouest Nanterre La Défense (UPO), in association with the Centre national de la recherche scientifique (CNRS).

- **LabEx Patrima**

The LabEx PATRIMA unites the humanities, social sciences and natural sciences in the Fondation des Sciences du Patrimoine. The purpose of the Foundation is to honour and promote cultural heritage through the development of international research and education programs.

Initiated by the universities of Cergy-Pontoise and Versailles-Saint Quentin in Yvelines, PATRIMA is a unique initiative. It is made up of prestigious cultural institutions including the Musée du Louvre, la Bibliothèque nationale de France and le Château de Versailles, many major research and restoration laboratories, scientists, historians, and conservationists.

This project is organized around three axes: -1- Know and Understand: (To study and understand the physical properties of the materials that compose artefacts as well as their

historical and cultural significance. To develop conceptual tools which will allow us to perform a more in depth analysis. )

-2- Conserve and Restore : (To obtain a better understanding of the effects of the environment on the artefacts and their decay. To be aware and keep track of what restoration techniques have already been applied. To develop new, innovative, less invasive and more effective methods of conservation and restoration. To pass on this knowledge to future generations of restorers and historians. To perform further research in the field of digitalization and bring new perspectives to the dematerialization of cultural objects.)

-3- Share and Publicize : (To ensure that the findings are effectively transmitted from the scientific community to the public. To study social and cultural mediation techniques in order to best communicate this information through the development of technological tools and launching of new museum experiences.)

Coordinator: Fondation des sciences du patrimoine

- **LabEx MiChem - Multi-Scale Integrative Chemistry: From Single Molecule to Nano-edifices**

The Multi-Scale Integrative Chemistry LabEx (MiChem) will usher in a new era of chemistry. This LabEx will integrate several cultures: molecular chemistry, physical chemistry and chemical solid-state physics. MiChem will go beyond parallel approaches to tackle scientific

frontiers with different but complementary means. Several research fields are concerned and one of its thematic axes is dedicated to the “Chemistry and Cultural Heritage” encompassing pluridisciplinary approaches between humanities and chemistry.

- **LabEx OT-Med - Objective earth: Mediterranean basin**

The aim of the LabEx OT-med (Objective earth: Mediterranean basin) is to create an Earth Institute, interdisciplinary and international, specialized on ecology and environmental issues around the Mediterranean Sea and the semiarid areas in the south (analysis of issues such as vulnerability of Mediterranean coastal areas, global change, human-environment relationships in the past, biodiversity management, ecosystem, international governance for environment, etc.). OT-med is supported by the « Earth Institute of Columbia University » (<http://www.earth.columbia.edu>), the « Grantham Institute for Climate Change of Imperial College » (<http://www3.imperial.ac.uk/climatechange>) and the London School of Economics (<http://www2.lse.ac.uk/home.aspx>).

- **LabEx Resmed – Religions and Societies in the Mediterranean world**

By its diversity and continuity in time, religion is a privileged observatory for studying religious systems, and the way societies integrate them. In the Mediterranean, religion is an effective identity marker and explains the history and formation of different communities. From a careful and reasoned approach to sources, the aim of the LabEx Resmed is to conduct studies focused on revealing and significant periods, mostly from Antiquity until the end of the Middle ages, sometimes up to contemporary times. Postulating the importance of

viewpoints and interdisciplinary collaborations, the program ambitions to inform current debates and suggest explanations of contemporary Mediterranean complexity. This project is organized around three themes: 1. Religions, places and conflicts; 2. Religion and reason: Tradition and Innovation; 3. Religions and social practices.

- **LabEx TEPSIS – State Transformation, Politicisation of Society, Institutionalisation of Social Issue**

The LabEx proposes to link analysis of the governmental and administrative modes of modern and contemporary societies with analysis of the social practices which are transforming the organisational and regulatory forms of human activity. The LabEx is organized around nine major teaching and research themes: Historicity of the State; State weaknesses; Politics within and beyond the State; Political timescales, territorial discontinuity, and mobilisation; Everyday relations to politics; Legitimacy and delegitimation of elites; The political construction of subjectivities; The structuring of the social order; Social differentiations and inequalities and one federative transversal operation: The Encyclopedia of the historical and social sciences of politics.

- **LabEx TransferS - Cultural Transfers, Translation, Interfaces**

Coordinated by the Collège de France and the École normale supérieure, the LabEx TransferS studies how Cultural Transfers have been shaping societies and cultures from Antiquity to the Present Day. Resolutely transdisciplinary, it will develop the use of digital data in the humanities. It will also explore synergies between the methodological and conceptual frameworks developed in the Humanities and Social Sciences, and those from the Natural and Formal sciences.

The LabEx TransferS regroups 13 of the leading French teams in Social Sciences and the Humanities.
