

4 Deserts 4 Song Saa Foundation

- 3 Deserts and €7500 to go by 26 November 2016 -

Thanks to the generous support of donors, we exceeded our target of €2500 for Race 1, with Allen Kerton - friend and Song Saa Ambassador - successfully completed the 250KM 'Sahara Run', ranking 54 out of 196 competitors!

Well Done Allen!

Now, Allen has challenged himself to complete the next 3 races of the Desert series, with the goal of raising a further €7500 for the Song Saa Foundation and its conservation programme by the end of November 2016.

"The 250km challenge that I have just completed was made a lot easier knowing that in addition to the blisters and the finisher's medal, I was helping to make a real and positive change to the environment and people of the Koh Rong Archipelago, Cambodia." - **Allen Kerton**

Support Allen's efforts with his next 750 KM competition & [Contribute Here!](#)

- Research Centre
- Education Centre

SONG SAA FOUNDATION

The Song Saa Foundation, an independent non-profit organisation has been established to carry forward the values of Song Saa, working towards sustaining and improving the health and well-being of the land, sea and human environments of the Koh Rong archipelago.

"A BIG thank you to Allen! With our capacity to make money go far, with the funds raised from Allen's first desert run allowing us to build on our support for marine conservation in the Koh Rong archipelago. This includes initiatives targeting sea turtle conservation, community patrols of fragile marine habitats and sea education programmes with local children."

– Dr. Wayne McCallum, Executive Director, Song Saa Foundation

How SSF are making a change

A Home for Land Conservation

The Archipelago's first dedicated sustainability learning facility, the Song Saa Sustainability Centre (Sala Song Saa) features teaching and training resources that enable villagers and Foundation staff to share knowledge, skills and experience.

Leading a Sea Change

The Song Saa Foundation is working hard to protect the Koh Rong marine area through conservation, education and research initiatives.

The Community

The Foundation works across a variety of areas including education, community health, waste management and livelihood activities to build a sustainable future for the villagers of the Archipelago.
