TOP PRIORITY FOR IMMEDIATE BROADCAST  
MELBOURNE SEVERE THUNDERSTORM WARNING  
For Damaging Wind Gusts, Large Hailstones and Flash Flooding  
For people in the Melbourne metropolitan area south from the CBD, The Geelong and Bellarine Peninsula and Port Phillip and Western Port areas.  
Issued at 1:25 am EDT on Friday 20 January 2006

A severe thunderstorm has been identified on radar southeast of Ballarat moving towards the east and southeast and expected to enter the warning area in the next 10 minutes

- In the interests of community safety the SES suggests some simple precautions:
  - Secure any loose objects in the vicinity of your home then
  - Stay indoors if possible
  - If you are outdoors, avoid sheltering under trees
  - Listen to the radio station for the storm updates
  - Switch off computers and electrical appliances
  - Do not drive vehicles through flooded areas

The next warning is due to be issued by 2:25 am Friday. A broad based severe thunderstorm warning for the Central District has been issued.

This warning is also available through TV and Radio broadcasts; the Bureau's website at www.bom.gov.au or call 1300 659 217. The Bureau and State Emergency Service would appreciate this warning being broadcast regularly.

TOP PRIORITY FOR IMMEDIATE BROADCAST  
MELBOURNE SEVERE THUNDERSTORM WARNING  
For Damaging Wind Gusts, Large Hailstones and Flash Flooding  
For people in the Western Suburbs, Geelong and Bellarine Peninsula, Mornington Peninsula and Port Phillip areas.  
Issued at 3:45 pm EDT on Friday 20 January 2006

Thunderstorms have been observed on radar near a south westerly wind change that is currently approaching the Geelong area. Further storms over the western parts of Victoria are moving steadily east. These thunderstorms have the potential to produce locally damaging wind gusts, large hail and heavy rainfall leading to flash flooding.

- In the interests of community safety the SES suggests some simple precautions:
  - Secure any loose objects in the vicinity of your home then
  - Stay indoors if possible
  - If you are outdoors, avoid sheltering under trees
  - Listen to the radio station for the storm updates
  - Switch off computers and electrical appliances
  - Do not drive vehicles through flooded areas

The next warning is due to be issued by 4:40 pm Friday. A broad based severe thunderstorm warning for the Central District has been issued.

This warning is also available through TV and Radio broadcasts; the Bureau's website at www.bom.gov.au or call 1300 659 217. The Bureau and State Emergency Service would appreciate this warning being broadcast regularly.

TOP PRIORITY FOR IMMEDIATE BROADCAST  
MELBOURNE SEVERE THUNDERSTORM WARNING  
For Damaging Wind Gusts, Large Hailstones and Flash Flooding  
For people in the Greater Melbourne area, including Geelong, the Bellarine and Mornington Peninsulas, Port Phillip and Western Port.  
Issued at 2:05 PM EDT on Friday 27 January 2006

Thunderstorms in a line from just south of Ballarat to Anakie near Ballan and developing over Southern Melbourne suburbs may become severe producing locally damaging wind gusts, very heavy rain leading to flash flooding, and possibly large hail during the next 2 hours.

- In the interests of community safety the SES suggests some simple precautions:
  - Secure any loose objects in the vicinity of your home, then
  - Stay indoors if possible
  - If you are outdoors, avoid sheltering under trees
  - Listen to the radio station for the storm updates
  - Switch off computers and electrical appliances
  - Do not drive vehicles through flooded areas

The next warning is due to be issued by 4pm Friday. A broad based severe thunderstorm warning for the Central District has been issued.

This warning is also available through TV and Radio broadcasts, the Bureau's website at www.bom.gov.au or call 1300 659 217. The Bureau and State Emergency Service would appreciate this warning being broadcast regularly.

TOP PRIORITY FOR IMMEDIATE BROADCAST  
MELBOURNE SEVERE THUNDERSTORM WARNING  
For Damaging Wind Gusts, Large Hailstones and Flash Flooding  
For people in the Greater Melbourne area, including the Mornington and Bellarine Peninsulas, Port Phillip and Western Port, but excluding Geelong.  
Issued at 1:20 PM EDT on Friday 27 January 2006

Thunderstorms over much of the Melbourne suburban area and western Port Phillip are locally severe, producing very heavy rain leading to flash flooding, damaging winds and possibly large hail. The thunderstorms are moving south-eastwards at 15 to 45 km/h. Reports of 1mm and 4mm hail have been recorded with thunderstorms from Flemington and Mt. Eccleson, respectively. A wind gust of 135km/h has been recorded at Fawkner Beaton and 87km/h has been recorded at Melbourne Airport.

- In the interests of community safety the SES suggests some simple precautions:
  - Secure any loose objects in the vicinity of your home, then
  - Stay indoors if possible
  - If you are outdoors, avoid sheltering under trees
  - Listen to the radio station for the storm updates
  - Switch off computers and electrical appliances
  - Do not drive vehicles through flooded areas

The next warning is due to be issued by 3:15pm Friday. A broad based severe thunderstorm warning for the Central District has been issued.

This warning is also available through TV and Radio broadcasts, the Bureau's website at www.bom.gov.au or call 1300 659 217. The Bureau and State Emergency Service would appreciate this warning being broadcast regularly.

TOP PRIORITY FOR IMMEDIATE BROADCAST  
MELBOURNE SEVERE THUNDERSTORM WARNING  
For Damaging Wind Gusts, Large Hailstones and Flash Flooding  
For people in northern and western parts of the Greater Melbourne area.  
Issued at 5:15 PM EDT on Friday 27 January 2006

Showers with isolated embedded thunderstorms are affecting areas around Bunbury to Cranburn, western suburbs around Box Hill to Stoneybay, and near and southeast of Paraburdoo. The cells are moving north-east at 17 km/h, and may produce heavy rain leading to flash flooding. There remains a slight risk of damaging wind gusts and large hail, also. 5mm was recorded in 25 minutes at Moppers Crossing. A wind gust of 135km/h has been recorded at Frankston.

- In the interests of community safety the SES suggests some simple precautions:
  - Secure any loose objects in the vicinity of your home, then
  - Stay indoors if possible
  - If you are outdoors, avoid sheltering under trees
  - Listen to the radio station for the storm updates
  - Switch off computers and electrical appliances
  - Do not drive vehicles through flooded areas

The next warning is due to be issued by 7pm Friday. A broad based severe thunderstorm warning for the Central District has been issued.

This warning is also available through TV and Radio broadcasts, the Bureau's website at www.bom.gov.au or call 1300 659 217. The Bureau and State Emergency Service would appreciate this warning being broadcast regularly.

TOP PRIORITY FOR IMMEDIATE BROADCAST  
MELBOURNE SEVERE THUNDERSTORM WARNING  
For Flash Flooding  
For people over all of the Greater Melbourne area.  
Issued at 1:15 PM EDT on Saturday 28 January 2006

Isolated thunderstorms in the Ballan to Bunbury area are embedded in a general area of rain moving south-eastwards at about 10km/h. Parts of the greater Melbourne area will be affected by this activity over at least the next hour or two, with a significant risk of flash flooding.

- In the interests of community safety the SES suggests some simple precautions:
  - Secure any loose objects in the vicinity of your home, then
  - Stay indoors if possible
  - If you are outdoors, avoid sheltering under trees
  - Listen to the radio station for the storm updates
  - Switch off computers and electrical appliances
  - Do not drive vehicles through flooded areas

The next warning is due to be issued by 1pm Saturday. A broad based severe thunderstorm warning for the Central District has been issued.

This warning is also available through TV and Radio broadcasts, the Bureau's website at www.bom.gov.au or call 1300 659 217. The Bureau and State Emergency Service would appreciate this warning being broadcast regularly.
