

Shoe Measurement Chart

How it works...

- 1) Print this chart at a scale of 100% and place it on the floor (it may help to tape the chart in place).
- 2) Place your child's bare foot on the chart, lining up their right heel with the indicated line.
- 3) Make your measurement at the tip of their big toe.
- 4) Repeat these steps with the left foot.
- 5) If your child's feet are different sizes, choose the larger size when making your shoe purchase.
- 6) If your child's feet exceed the width of the chart's brackets, consider a wide shoe size.
- 7) **Congrats**—you've successfully measured their shoe size.

THIS SPACE SHOULD BE THE SAME SIZE
AS A STANDARD CREDIT CARD

REMEMBER: The first few years are a whirlwind of growth for your child. Measure their feet every 2-3 months to ensure the best fit at every stage.

Top Brands Size Chart

Not all shoes are created equal. Now that you've measured their foot length, use this chart to find the right sizes from your favorite brands.

Foot Length (in)	Foot Length (cm)	Approx Age	Standard US Size	Standard EU Size	See Kai Run	Pediped	Mini Melissa	Elephantito	Native	Saltwater by Hoy	Crocs	Stride Rite
