

**UAACC is a place for learning and leadership training!**

Many of our students become teachers themselves! Some find jobs in other institutions... some actually start their own community service projects influenced by their experiences at UAACC! We believe in planting the seeds of service that will grow across the country!

Sam and Msechu were budding filmmakers at UAACC and now head the Kilimanjaro Film School!

Adrian Mwaikambo learned this new technique of fabric art at UAACC and is now a world class artist!

Anande learned that jobs are not gender biased. She is now a computer teacher at St. Judes!

Mzee Cato taught Building construction architecture and later was inspired to begin another NGO for adult learning

All of these youth in the hardware maintenance computer class are now teachers at various schools and centers in Arusha, Moshi and Babati

It's so empowering to know that we all can be teachers in all fields!

## We Believe in Practical Applications of Learning at UAACC

Much of the training is 'on the job'... here Kidasa, learns about mechanics

We try to instill confidence in positive traditions and cultures

We make sure there are plenty opportunities for competition in sports for boys and girls

...and opportunities to learn music...

...music production is a way to economic empowerment at UAACC recording studio

...and dance is a way to entertain and retain traditions!!

**There are always new opportunities for new learning experiences at UAACC!**

UAACC founder, Mzee O'Neal not only arranged for students to fly for the first time...

...Mwajabu Sadiki, yoga teacher and UAACC assistant, actually flew co-pilot for a while!!!

Art students learned about art from around the world including art from the Ndebele community in South Africa...

...then the decorated the English classroom!

Students always have an opportunity to interact with people from around the world...including Academy Award winning actor Jude Law and his family who visited at UAACC!

Students enjoy sharing knowledge during periodic seminars, like this HIV/AIDS seminar with group from Ngaramtoni

## Students at UAACC learn that Sharing Knowledge is A Key to Success in Life!

Students are encouraged to speak out...

...and to express themselves in acting...

...or song as in this HIV/AIDS day activity

Learning about other life forms as in this herpetology class...

...or learning new skills as with this art quilt that was exhibited and sold in America!

Sharing the joy of success...  
...it's all about Sharing Knowledge...the key to a successful life!

**UAACC is about outreach in our Community!**

Several containers of medical supplies have been arranged by UAACC for Arusha!

UAACC volunteer teaching computer skills to staff at Arusha Regional library

UAACC & KUJI water project brings accessible *maji* to our community!

The village vehicle serves as transport in times of emergency and death and just getting to the road on market day!

We arrange donations for orphanages and street children

The UAACC KUJI solar project has brought light to 85 families in our community!

**We realize the importance of Outreach programs!**

Whether it is helping to beautify our national monument...

...teaching youth the importance of art and skills...

...actively informing our community about health issues...

... building a sense of community through shared events like festivals...

...providing life skills opportunities...

...or just opportunities to 'show off' a bit...

**...we understand and actively promote the importance of outreach to youth and elders!**
