If you **THINK** about what you buy will **REALLY** cost, you may think twice before you spend the money you don't have, because you are going to buy it with your **TIME**, a commodity you can't reclaim with the money you were paid for it. "Because of work, no matter what we do, we keep looking at our watches. Free time is mostly devoted to getting ready for work, travelling to and from work, recovering from work... The only thing free about free time is that the boss doesn't have to pay for it" *Bob Black, The Abolition of Work*
