

most venomous, and used to kill many Blacks; that the moon became angry and burnt his head as he slept at night in the grass, which made his head black and his bite harmless. They also relate of a snake called *Ollery*, or *Gollery*, which has long fangs, and is very venomous, that in past ages he had only small and harmless teeth; but meeting a venomous snake in the grass he said to him, "What fine long teeth you have; let me have yours and you mine?" and so the exchange was made, and *Ollery* became most venomous and his friend innocuous.

The above reminds me that years ago the Bangerang used to relate many wonderful tales in which the moon was constantly a principal performer.
