Canberra, ACT 2601

Dear Alice:

The Australian Sound Recordings Association (ASRA) will hold its National Conference in Canberra at the National Film and Sound Archive from the 26-29 April (inclusive). The theme for this year's Conference will be "Australia's Heritage in Sound". This topic was selected to celebrate the appearance of the first discs in the project of the Sound Heritage Association "Australia's Heritage in Sound" which documents sound recording in Australia in all of its many fields.

As a participant in the Sound Heritage Association's project I would like to invite you to be one of the speakers at the abovementioned Conference. Your talk would probably be on either the 26th, 27th or 28th, the Monday being taken up by discographical and technical sessions.

I would welcome your acceptance to speak and would like to have your confirmation to do so at your earliest convenience. Please inform me of the technical equipment you will need. Slides, overhead projectors are available as well as all sound producing equipment.

The Conference will be attended by people of many and varied interests in the fields of sound recording. We hope to have a programme that will be of interest to everyone.

Sincerely,

D. C. F. Rentz

Convener, 1991 National Conference

Sorry to be so formal. Hope you will take on 2 speaking roles. AJR
