

## JS Foundation

### Intellectual Property Policy

The JS Foundation supports numerous individual projects (each, a “Project” and together, the “Projects”). Contributions to individual projects are made pursuant to the license applicable to each such Project (with respect to each Project, the “Applicable License”). The Applicable License for each Project with respect to contributions of code will be the Apache License, Version 2.0 (available at <http://www.apache.org/licenses/LICENSE-2.0>), unless an alternative inbound or outbound license is requested by the technical governing body of a Project and approved by the Board of Directors of the JS Foundation (the “Board”). Any such alternative license will be reflected in the license file for the applicable Project.

The JS Foundation and its Projects seek to integrate and contribute back to other open source projects within the scope of driving widespread adoption and continued development of key JavaScript solutions and related technologies. Based on this design goal for the JS Foundation, the development community will:

- conform to all license requirements of the open source projects leveraged within the project; and
- operate to maximize opportunities for compatibility with other projects that might be leveraged in the project.

Except as may be approved by the Board:

- All new code contributions to any Project shall be made under the Applicable License accompanied by either a JS Foundation CLA Signature available at <https://js.foundation/CLA> or a Developers Certificate of Origin (DCO, available at <http://developercertificate.org/>).
- All outbound code will be made available under the Applicable License.
- All documentation (including without limitation code that is intended as sample code) will be contributed to the Project and made available under the Applicable License or, if approved by the Project, Creative Commons Attribution 4.0 International License or under CC0.

Furthermore, on notice to the Projects, the Board may adopt and/or modify contribution policies for the contribution of code to any Project.

The technical governing body of each Project may provide for additional requirements with respect to contributions.

Except for (a) each member’s commitment to be bound by this Policy with respect to its or its employees’ authorized contributions to any Project and (b) any applicable contributor license

agreement, if any, no license is granted by the member to its intellectual property, and none shall be implied by general membership in the JS Foundation.

---

As adopted by the Board of Directors on February 14, 2017
