Notwithstanding, the Department of Agriculture and Water Resources, ABARES, its employees and advisers disclaim all liability, including liability for negligence, for any loss, damage, injury, expense or cost incurred by any person as a result of accessing, using or relying on any of the information or data in this publication to the maximum extent permitted by law.

# Foreword

*Agricultural commodity statistics* provides a comprehensive compilation of data on the Australian economy and the agriculture, fisheries and forestry sectors. The tables presented here contain current data and historical data, with some series extending more than 40 years. This provides useful information for decision-makers to monitor industry developments over time.

The information contained in *Agricultural commodity statistics* underpins and complements ABARES analysis and can be used in conjunction with ABARES forecasts updated throughout the year in *Agricultural commodities* and *Australian crop report*. The information from these publications is presented at our national and regional Outlook conferences ([agriculture.gov.au/abares/conferences-events](http://agriculture.gov.au/abares/conferences-events)).

Other ABARES publications containing more detailed commodity data are *Australian forest and wood products statistics* and *Australian fisheries and aquaculture statistics*. A range of other research reports and tools can also be found at [agriculture.gov.au/abares](http://agriculture.gov.au/abares). These cover a wide range of economic and scientific information and data that can be downloaded at national, state and regional levels. Visit the webpage for a full picture of ABARES publications on the physical and financial characteristics of the rural sector.

USDA	United States Department of Agriculture	

All values and prices are in nominal terms unless stated in table footnotes.

Small discrepancies in totals are generally caused by rounding. Zero is used to denote nil or a negligible amount.

# Contents

## Australian economy

### Overview

1	Australian gross product, by sector	1
2	Australian employment, by sector	2
3	Value of Australian exports, by sector – balance of payments basis	3
4	Value of Australian exports, by sector a – chain volume measures	4
5	Australian rural unit export returns	5

### Macroeconomic indicators

6	Australian main macroeconomic indicators	6
7	Australian trade balance and foreign debt	7
8	Australian exchange rates with selected countries	8
9	Exchange rates for selected countries	9
10	Real gross domestic product growth for selected countries	10
11	Inflation and interest rates in selected countries	11
12	Population in selected countries and regions	12

### Farm sectors

13	Number of agricultural establishments and rural employment in Australia	13
14	Persons employed in agriculture, forestry and fisheries	14
15	Farm land use and livestock numbers in Australia	15
16	Australian farm returns, costs and prices	16
17	Indexes of prices paid by farmers in Australia	17
18	Indexes of prices received by farmers in Australia	19
19	Major components of Australian farm costs	21
20	Volume of Australian farm production indexes	22
21	Gross value of Australian farm production	23
22	Australian winter and summer crop area and production	24
23	Australian winter and summer crop area and production, by state	25
24	Value of Australian agricultural exports (fob)	26
25	Value of Australian agricultural exports (fob), by country	27
26	Value of Australian agricultural imports	28
27	Value of Australian agricultural imports by country	29

## Rural commodities

### Coarse grains

28	Summary of Australian statistics for coarse grains	31
29	Australian coarse grains area, yield and production, by state	32
30	Summary of Australian statistics for barley, crops sown for grain	35
31	Summary of Australian statistics for oats, crops sown for grain	36
32	Summary of Australian statistics for sorghum, crops sown for grain	37
33	Summary of Australian statistics for corn (maize), crops sown for grain	38
34	Summary of Australian statistics for triticale, crops sown for grain	39
35	Volume of Australian exports of barley and sorghum, by destination	40
36	Australian coarse grains supply and disposal, by grain	41
37	Australian feed grains prices	42
38	Summary of world statistics for coarse grains	43
39	World coarse grains production, by region and country	44
40	World coarse grains production, by grain	45
41	Volume of world coarse grains trade, by region and country	46
42	Volume of world corn trade, by region and country	47
43	Volume of world barley trade, by region and country	48
44	Volume of world sorghum trade, by country	48
45	US coarse grains supply and disposal	49
46	US corn supply and disposal	49
47	US grain sorghum supply and disposal	50
48	Feedgrains export price quotation, by category	51
49	Coarse grains supply and disposal in major exporting countries	52

### Cotton

50	Australian cotton area harvested and lint yield	54
51	Australian cottonseed and lint production	55
52	Australian production, trade and use of raw cotton	56
53	Volume of Australian exports of raw cotton, by destination	57
54	Cotton prices and unit values	58
55	Summary of world statistics for raw cotton	59
56	World area, yield and production of raw cotton	60
57	Volume of world exports of raw cotton, by country	61
58	Volume of world imports of raw cotton, by destination	61

**Dairy products**

59	Summary of Australian statistics for dairy products	62
60	Value of Australian exports of dairy products, by destination	63
61	Volume of Australian exports of dairy products, by destination	64
62	Australian dairy cow numbers, by state	65
63	Australian production of whitemilk, by state	66
64	Australian manufacture of dairy products	67
65	Australian consumption of dairy products	67
66	Australian milk prices and gross value of production	68
67	Average export unit values of Australian dairy products	69
68	Volume of Australian imports of cheese, by variety	70
69	Summary of world statistics for dairy products	71
70	Milk production in selected regions and countries	72
71	Production of dairy products in selected regions and countries	73
72	Volume of exports of dairy products, by selected countries	74
73	Volume of imports of dairy products, by selected countries	75
74	Stocks of dairy products in principal producing countries	76

**Farm inputs**

75	Indicative interest rates for the Australian farm sector	77
76	Rural indebtedness to financial institutions	78
77	Australian farm fuel prices	79
78	Australian wages and the consumer price index	80
79	Australian tractor sales, by type	81
80	Value of Australian trade in selected farm machinery	82
81	Australian sales and prices of agricultural chemicals, by product type	83
82	Australian fertiliser prices, by type	84
83	World fertiliser indicator prices	85
84	Australian fertiliser consumption, by element	86
85	Volume of Australian imports of fertiliser, by element	87
86	Volume of Australian imports of raw materials for fertiliser production, by source	88
87	Volume of Australian trade in manufactured fertiliser, by type	89
88	Volume of Australian fertiliser imports, by state	90
89	Value of Australian fertiliser imports, by state	91

**Fisheries**

90	Summary of Australian fisheries production	92
91	Australian exports of edible fisheries products	93
92	Australian exports of fish, by product type and destination	94
93	Australian exports of crustaceans, by product type and destination	95
94	Australian exports of molluscs, by product type and destination	96
95	Australian imports of edible fisheries products	97
96	Australian imports of fish, by preparation and source	98
97	Australian imports of crustaceans, by preparation and destination	100
98	Australian imports of molluscs, by product type and source	101
99	Australian exports and imports of non-edible fisheries products	102

**Food**

100	Summary statistics for the Australian processed food industry	103
101	Value of Australian food exports, by level of transformation	104
102	Value of Australian food exports to selected regions	105
103	Value of Australian food imports, by level of transformation	106
104	Value of Australian food imports from selected regions	107
105	Value of world food imports, by level of transformation	108
106	Value of world trade in processed foods, by major exporting countries	110
107	Value of world trade in processed foods, by major importing countries	112

**Forestry**

108	Logs harvested and estimated logs consumed	114
109	Land areas, by forest vegetation cover, 2011	115
110	Australian prices of selected forest products	116
111	Sales and service income in forest product industries	117
112	Employment in forest product industries	118
113	Value of Australian wood products trade	119
113	Value of Australian wood products trade a continued	120
114	Australian production, trade and apparent consumption of sawnwood	121
115	Volume of Australian imports of sawnwood, by source and type	122
116	Australian production, trade and apparent consumption of panel products	123
117	Volume of Australian imports of veneer and wood-based panels, by source	124
118	Australian production, trade and apparent consumption of paper and paper products	125
119	Volume of Australian imports of paper and paperboard, by type and source	126
120	Volume of Australian imports of wood pulp, by type and source	128
121	Volume of Australian roundwood and woodchip trade	129

<b>Horticulture</b>	
122 Summary of Australian statistics for fruit, nuts and vegetables	130
123 Australian production and trade for grapes and dried vine fruit	131
124 Production and trade of Australian fruit	132
125 Production and trade of Australian vegetables	133
<b>Meat – general</b>	
126 Summary of Australian statistics for meat	134
127 Australian saleyard prices of livestock	135
128 Australian retail prices of meat	136
129 Australian exports of meat and livestock, by product	137
130 Summary of world statistics for livestock	138
131 Summary of US meat statistics	139
132 Gross value of Australian livestock slaughterings	140
<b>Meat – beef and veal</b>	
133 Australian supply and use of beef and veal	141
134 Australian cattle numbers, by state and territory	142
135 Volume of Australian exports of beef, veal and live cattle, by destination	143
136 Value of Australian exports of beef and veal, and live cattle (fob)	144
137 Prices for Australian beef and veal in principal overseas markets	145
138 World cattle numbers, by country	146
139 World beef and veal production, by country	146
140 Volume of trade in beef and veal, by selected countries	147
141 Summary of Japanese beef and veal statistics	148
142 Summary of Korean beef and veal statistics	149
<b>Meat – pig and poultry</b>	
143 Australian supply and use of pig and chicken meats	150
144 Australian pig numbers, by state and territory	150
145 World pig and chicken meat production in selected countries	151
146 Volume of world pig meat trade for selected countries	151
<b>Meat – sheep</b>	
147 Australian supply and use of lamb and mutton	152
148 Australian sheep numbers, by state and territory	153
149 Volume of Australian exports of sheep meat and live sheep, by destination	154
150 Value of Australian exports of sheep meat and live sheep (fob)	155
151 Prices for Australian lamb and mutton on principal overseas markets	156
152 World sheep numbers, by country	157
153 World lamb and mutton production, by country	158
154 Volume of trade in sheep meat, by selected countries	158
155 Volume of New Zealand sheep meat exports, by destination	159

**Oilseeds**

156	Summary of Australian statistics for canola	160
157	Australian oilseeds area, yield and production, by state and type	161
157	Australian oilseeds area, yield and production, by state and type continued	162
158	Australian exports of oilseeds, vegetable oils and meals, by type	163
159	Volume of Australian exports of selected oilseeds products, by destination	164
160	Volume of Australian imports of oilseeds, vegetable oils and meals, by type	165
161	Summary of world statistics for oilseeds	166
162	World oilseeds production, by country	167
163	World oilseeds production, by type	168
164	Volume of world oilseeds trade, by type and country	169
165	Volume of world protein meals trade, by type and country	170
166	Volume of world vegetable oils trade, by type and country	171
167	Selected oilseed, oilseed meal and vegetable oil import price quotations, by country	172

**Pulses**

168	Summary of Australian statistics for pulses	173
169	Australian area sown, yields and production of selected pulses, by state	174
170	World pulses production, by region and country	177
171	Volume of world pulses trade, by region and country	178

**Rice**

172	Summary of Australian statistics for rice	180
173	Australian rice trade and payments to growers	181
174	Summary of world statistics for rice	182
175	World rice production, by country or region	183
176	Volume of world rice trade, by country	184
177	US rice supply and disposal	185
178	Rice export price quotations, by country	186
179	Rice supply and disposal in major exporting countries	187

**Sugar**

180	Summary of Australian statistics for sugar cane	188
181	Australian sugar production	189
182	Volume of Australian exports of sugar, by destination	190
183	World sugar supplies, consumption, trade and prices	191
184	World sugar production, by region and country	192
185	Volume of world sugar trade, by country	193

<b>Water</b>		
186	Average rainfall for principal Australian cropping districts	194
187	Agriculture water use, Australia	196
188	Irrigation activity, Australia	198
189	Sources of agricultural water, Australia	200
190	Water consumption, agriculture industry, Australia	202
191	Irrigation expenditure, Australia	
<b>Wheat</b>		
192	Summary of Australian statistics for wheat	206
193	Australian wheat area, yield and production, by state	207
194	Volume of Australian exports of wheat, by destination	208
195	Australian wheat supply and disposal	209
196	Summary of world statistics for wheat	210
197	World wheat production, by country	211
198	Volume of world wheat trade, by country	212
199	US wheat supply and disposal	213
200	Wheat export price quotation, by country and category	214
201	Wheat supply and disposal in major exporting countries	215
<b>Wine grapes</b>		
202	Summary of Australian statistics for wine grapes	217
203	Summary of Australian statistics for wine	218
204	Australian wine exports, by type and major destination	219
205	Australian wine imports, by type and major source	220
206	Australian domestic wine sales, by type	221
207	Retail price indexes for alcoholic beverages	222
<b>Wool</b>		
208	Summary of Australian statistics for wool	223
209	Australian shorn wool production, by state	224
210	Australian sheep disposal and wool production	225
211	Average prices for clean wool in principal exporting countries	226
212	Average world prices for synthetic fibres	227
213	Australian wool exports, by destination, recorded trade basis	228
214	Australian wool exports, by type	229
215	World wool production, by country and type	230
216	Volume of wool exports, by main producing countries	231
217	Market prices for Australian wool, by category	232

## APEC – Asia-Pacific Economic Cooperation

### Founding members (1989)

Australia  
Brunei Darussalam  
Canada  
Indonesia  
Japan  
Republic of Korea  
Malaysia  
New Zealand  
Philippines  
Singapore  
Thailand  
United States

### First enlargement (1991)

People's Republic of China  
Hong Kong  
Taiwan

### Second enlargement (1993)

Mexico  
Papua New Guinea

### Third enlargement (1994)

Chile

### Forth enlargement (1998)

Peru  
Russian Federation  
Vietnam

## ASEAN – Association of Southeast Asian Nations

Brunei Darussalam  
Burma  
Cambodia  
Indonesia  
Laos  
Malaysia  
Philippines  
Singapore  
Thailand  
Vietnam

## European Union

### Founding members (1957)

Belgium  
France  
Germany  
Italy  
Luxembourg  
Netherlands

### First enlargement (1973)

Denmark  
Ireland  
United Kingdom

### Second enlargement (1981)

Greece

### Third enlargement (1986)

Portugal  
Spain

### Fourth enlargement (1995)

Austria  
Finland  
Sweden

### Fifth enlargement (2004)

Cyprus  
Czech Republic  
Estonia  
Hungary  
Latvia  
Lithuania

Malta

Poland  
Slovakia  
Slovenia

### Sixth enlargement (2007)

Bulgaria  
Romania

### Seventh enlargement (2013)

Croatia

**This list is designed to help you locate some commonly used or difficult to find general items.**

<b>Item</b>	<b>Table no./s</b>
Balance of payments	3, 4
Consumer price index	6, 16, 78
Employment	2, 13, 14, 112
Exchange rates	8, 9
Exports, by sector	3, 4
Export price indexes	5
Farm chemical, sales and prices of	81

a Represents total establishments engaged in agricultural activities. b Based on ANZSIC 2006. Average employment over four quarters. Data represents agriculture, forestry, fishing and hunting, and services to these industries. Caution should be used when utilising employment statistics at the ANZSIC subdivision and group levels due to estimates that may be subject to sampling variability and standard errors too high for most practical purposes. na Not available.

Note: Australian Bureau of Statistics advises caution should be used when using employment statistics at the ANZSIC subdivision and group levels due to estimates that may be subject to sampling variability and standard errors too high for most practical purposes.

a Year ended 31 March. From 1999–2000, year ended 30 June. Details for establishments with estimated value of agricultural operations (EVAO) of \$2 500 or more until 1985–86; EVAO of \$5 000 or more from 1986–87 to 1988–89; EVAO of \$20 000 or more from 1989–90 to 1990–91; EVAO of \$22 500 or more from 1991–92 to 1992–93; and EVAO of \$5 000 or more from 1993–94. b Year ended 31 March. From 1999–2000, year ended 30 June. Before 1987, includes livestock holdings on establishments with an EVAO of \$2 500 or more. From 1987, the EVAO has been raised to \$5 000.

c Includes barley, canola, chickpeas, field peas, lupins, oats, triticale, maize, rice, sorghum, soybeans, sunflowerseed, linseed, safflowerseed, sugar cane and winegrapes. Excludes winegrapes before 1974–75. na Not available.

a Obtained by deflating the net value of farm production by the consumer price index. b ABARE revised the method for calculating farm, price and production indexes in October 1999. The indexes for the different groups of farm commodities are now calculated on a chained weight basis using Fisher's ideal index with a reference year of 1997–98 = 100. c Ratio of index of prices received by farmers to index of prices paid by farmers. d Base: 2016–17 = 100.

Note: ABARE revised the method for calculating farm production indexes in October 1999. The indexes for the different groups of farm commodities are now calculated on a chained weight basis using Fisher's ideal index with a reference year of 1997–98 = 100.

a Cotlook 'A' index quotes (cif Northern Europe) for strict middling (SM) 1 1/16" cotton from 1972–73 to July 1981, and for SM 1 3/32" cotton from August 1981. August–July crop year. b Equivalent to 'in store' prices – that is, Cotlook prices in USc/lb to which freight differentials have been added, then converted to Australian currency, with 'into store' charges added finally. Prices approximate import parity prices. c Value of lint and cottonseed less ginning costs.

a A slight series break occurs in 1977–78 as a result of a change in the method of valuation. b Since deregulation of farmgate milk prices from July 2000, manufacturing and market milk prices are no longer reported separately.

c From 1990–91, manufacturing milk price is reported net of market support. na Not available.

a Estimated average rate paid by all broadacre farms on all farm business debt for the year ended 30 June. Data for the lastest year shown is preliminary. b Refers to the midpoint of a range of rates that apply to the lowest risk borrowers for a range of banks. In practice many borrowers pay an additional risk margin. c 3-month bank accepted bills, average of monthly data from 1972–73 to 1975–76, average of daily data from 1976–77. na Not available.

a For the years to 1995, data are based on sales at the factory gate. These figures do not include sales from non-AVCARE members but are likely to represent about 90 per cent of actual total sales. For the years from 2005, data are on a financial basis. b For the years after 1997, figures refer to total Australian sales as recorded by the APVMA. c Based on Australian Bureau of Statistics benchmark data. na Not available.

<sup>a</sup> Expressed in gross roundwood equivalent (GRWE) logs. <sup>b</sup> Log consumption estimates are calculated as logs harvested plus estimated log equivalent of imported primary wood products less log equivalent of exported primary wood products. The figures exclude non-log fibre inputs into production, such as recovered paper. Excludes firewood, paper manufactures and secondary wood products (such as furniture). na Not available.

a The increasing availability of high-resolution remote-sensing data and better methods for determining forest continue to improve estimates of Australia's forest cover.

This largely explains the change in estimated total forest area from 149 million hectares in 2008 to 125 million hectares reported here; little of the change is because of real forest loss. For a full explanation see Australia's State of the Forests Report 2013. b Totals may not tally exactly because of rounding. c Includes commercial plantation data as at June 2015. d Other forest includes non-commercial plantations, including sandalwood, environmental plantings and plantations within reserve system.

**a** Sales and service income is defined as follows: sales of goods whether or not manufactured by the business, exclusive of goods and services tax (GST). See Australian Bureau of Statistics publication Explanatory Notes for full details. **b** 2006–07 classification is based on the 2006 edition of ANZSIC. Because of the combined effect of this new classification and methodological changes, new series that commenced with the 2006–07 data and are not directly comparable with previous years. See Australian Bureau of Statistics publication Explanatory Notes for full details. **c** Excludes forestry support services which are included in the category total agriculture, forestry and fishing support services. **d** Estimate has a relative standard error of 10 per cent to less than 25 per cent and should be used with caution. **e** Total does not add to components due to Australian Bureau of Statistics update of total only. **na** Not available.

a Labour force employment estimates based on ANZSIC 2006, annual data are the average of the total employment (full-time and part-time) quarterly survey numbers.

Note: Australian Bureau of Statistics advises caution using employment statistics at the ANZSIC subdivision and group levels because estimates may be subject to sampling variability and standard errors too high for most practical purposes.

a Price estimates are formed by indexing forward from actual average prices of beef, lamb and pork during December quarter 1973, based on meat subgroup indexes of the consumer price index. These indexes are based on average retail prices of selected cuts (weighted by expenditure) in state capitals. b Price estimates are formed by indexing from the December quarter 2007 price for fresh whole chickens.

a Includes dairy cattle slaughtered. b Excludes skin value. c Includes dairy cattle and buffalo. d Includes animals for breeding.

Note: The gross value of production is the value placed on recorded production at the wholesale prices realised in the market place. The point of measurement can vary between commodities. Generally the market place is the metropolitan market in each state and territory. However, where commodities are consumed locally or where they become raw material for a secondary industry, these points are presumed to be the market place. Prices used in these calculations do not include GST.

a Crop year basis. For example, the 1985–86 data are for the Queensland summer crop harvested from December 1985, the New South Wales crop harvested from April 1986, and the Queensland winter crop harvested from June 1986. b Paddy. c Gross unit value of production. d Based on Australian Bureau of Statistics data; April–March marketing year basis; generally exports of the crop harvested in the previous year – that is, 1998–99 exports are sourced from the 1997–98 crop harvest. Milled. Includes ABARES estimates from 2000 as confidentiality restrictions apply. e Gross unit value of exports. Between 1952–53 and 1987–88, calculated from financial year total export values. From 1988–89, calculated from marketing year (April–March) total export values. f Table rice until 1999–2000 and excludes rice used for feed, breakfast cereals and rice used for other purposes; includes imports. Financial year basis. From 1999–2000, ABARES estimate of apparent consumption.

a Raw sugar equivalent up to 2004–05, tel quel (refined sugar equivalent) from 2005–06 to date;

October–September year. b Figures in parentheses show closing stocks as a percentage of consumption. c Trade is defined as world gross exports including those exports made under special arrangements, such as between Comecon countries and through the Lomé Convention. Individual countries of the former Soviet Union are treated as separate trading entities from 1983–84. d Average of monthly averages of International Sugar Agreement (ISA) price; fob and stowed Caribbean ports basis, in bulk. From 1988–89 Nearby futures price, Intercontinental Exchange, New York No. 11 contract. e Australian currency equivalents of ISA price. fob free on board. n/a Not available.

na Not available. Zero is used to denote nil or less than 0.5 Gigalitres.

Note: Data presented in this table differ from the data presented in the other water tables. The 'Agriculture' industry view presented here only presents the agricultural activity that occurs in businesses where the primary income producing activity (i.e. the activity with value added that exceeds the value added of any other activity carried out by the same business) of the business is agricultural production. Businesses which undertake some agricultural activity but for which other activities provide most of the income are excluded from the 'Agriculture' industry view. As such the industry view of 'Agriculture' shows a lower level (approximately 10%) of water consumption than the agricultural activity view.

a Crop years: up to and including 1981–82: 1 December to 30 November; 1982–83 and subsequent years: 1 October to 30 September.

b Exports are of wheat and meslin (mixed grain, especially rye mixed with wheat) plus flour in wheat equivalent (conversion 1:1.29).

c Details for establishments with an estimated value of agricultural operations (EVAO) of \$2 500 or more until 1985–86; EVAO of \$5 000 or more from 1986–87 to 1988–89; EVAO of \$20 000 or more from 1989–90 to 1990–91; EVAO of \$22 500 or more from 1991–92 to 1992–93; and EVAO of \$5 000 or more from 1993–94.

d Planted area. e Export unit value based on July–June year exports until 1987–88 and crop year exports thereafter. f In principle, calculated as a residual: production plus imports less exports less any observed or assumed change in stocks. g Historical data include AWB Limited Pool and Trading Division closing stocks. na Not available.

a Sheep and lambs. b Before 1982, includes livestock holdings on establishments with an estimated value of agricultural operations (EVAO) of \$1 500 or more. Between 1982 and 1986, includes livestock holdings on establishments with an EVAO of \$2 500 or more and from 1987, an EVAO of \$5 000. c July–June years.

d Australian wool held by the Australian Wool Corporation from 1972–73 to 1990–91 and by the Australian Wool Realisation Commission from 1 July 1991 to December 1993. From July 1993 to 2004, includes stocks held on farms and unsold wool held in brokers' stores. From 2005, stocks held on farms is unavailable therefore the value is derived. e Wool International eastern market indicator from 1973–74 to 1994–95. Australian Wool Exchange eastern market indicator from 1995–96 onward. (Original market indicators for 1991–92 to 1993–94 can be calculated by dividing by 1.064. For the years between 1983–84 and 1990–91, divide by 1.114. For 1982–83 and earlier years, divide by 1.136). na Not available.

## The 'Biosphere' Graphic Element

The biosphere is a key part of the department's visual identity.

Individual biospheres are used to visually describe the diverse nature of the work we do as a department, in Australia and internationally.
