Business Imaging Systems

Value Proposition:

We make the information that drives everyday business operations more accessible, usable and secure. We do this by connecting people, processes and data, and by placing information where, when and how you need it. We eliminate tedious data entry tasks, automate costly processes, and protect valuable data against misuse and loss. We increase your efficiency to unprecedented levels, so you can get more work done with less human effort and focus on business growth.

Business Imaging Systems is the only Oklahoma based vendor that can provide all necessary disciplines turnkey, without the necessity to involve multiple vendors.

Company Description:

For 25 years, Business Imaging Systems has built a solid reputation as a full-service integrator of high-quality front-end capture and document management systems.

We offer one of the most diverse and trusted technology portfolios in the industry and provide a team of professionals. That team is where the technology's power is unleashed. Each of our team members has a distinct area of expertise and an important role to play in your IT project.

BIS works with an extensive, cross-industry client base that includes recognized names in government, education, healthcare and financial services, as well as human resources, accounts payable, accounts receivable and legal departments. BIS solutions are aimed at all organizations that manage large volumes of documents, forms, records, invoices and other critical information. Several of these solutions include custom integrations that can only be supported by BIS.

Value Proposition:

We provide end-to-end integrated services that address the labor-intensive document imaging, content capture, indexing, back-office forms processing and technology services including business process transformation planning, best fit ECM & BPM solution architecting, project implementation and application support services.

Our focus is on creating paper-less work environment that allow instant access to information from unstructured contents reducing transaction processing time, improving security and accountability along the way promoting Green Environment.

Company Description:

Ecopro provides products and services that are essential for implementing cost effective and efficient Enterprise Content Management (ECM), Electronic Medical Records (EMR) and content based Business Intelligence Analytical (BI-BA) solutions.

Our services offer radical alternatives to the way Content Capture and processing are conventionally handled. We provide refreshing and much needed relief from heavy investments required to create document scanning infrastructures, indexing human resources, expensive server and software. You can delegate all of your content capture and indexing process to us.

Value Proposition:

INTEGRIM helps companies reduce costs and increase their productivity with solutions automating the processing of supplier invoices, customer files, contracts, claims, or any other processing using standardized methods irrelevant of its origin (fax, paper, electronic).

Along with speeding up response times, achieving greater control over costs and reinforcing security, workflow solutions allow for a considerable reduction in manual data capture efforts in different corporate systems, further reducing costs.

Company Description:

INTEGRIM offers solutions to accelerate the processing of information by transforming unstructured documents into usable data for extraction and appropriate processes.

Our specialists ensure the implementation of leading-edge turnkey solutions, customized to your specific needs in terms of volume of items to process, format, and document types.

Value Proposition:

Image Access Corporation has over 15 years of experience with Kofax Software. We have been named Kofax Reseller of the year 3 times.

We have a staff of over 14 Systems Engineers trained on the deployment and support of all Kofax products. We fully understand our customers needs and are highly versed in the mortgage document process, claims processing and the new account open process.

Our customers all process large volumes of paper each day. A recent survey showed that our average customer processes 800,000 pieces of paper each month.

Company Description:

Image Access Corporation provides business process automation and integration for organizations with large volumes of paper. Our turnkey image and content management solutions allow instant access to documents and files.

Image Access Corporation specializes in the insurance, banking and transportation industries as well as State Government solutions. We also offer cross-industry accounting applications and a check capture solution. We develop systems based on an in-depth understanding of how people work in those fields.

Working with best of breed partners, including Kofax, ensures a state-of-the-art solution, fully integrated with your existing hardware and business applications.

Value Proposition:

Everyday, thousands of mail pieces are delivered to your company's mail center and are processed in the same way mail has been processed for years. Hand-sorted and physically delivered across the enterprise, onsite and off. At an ever-increasing cost. Today, this decades-old practice has evolved into a new way of doing business. Now you can cut costs, save time and optimize this labor-intensive function.

Company Description:

Image Architects has been in the document capture and management business for more than 20 years. During that time we have installed production systems in 20 countries and in 15 languages. Our customers include the US Dept. of Defense, NYC Transportation, and Johnson & Johnson Pharmaceuticals. We have been a Kofax Partner for 15 years and won numerous awards for our work: Winner of Kofax Custom Module Contest for Digital Mail, IBM Beacon Award and Finance Group Process Innovation Award

Digital Mail Distribution Solutions

Converting your incoming physical mail couldn't be easier. Once a mail piece is scanned, the recipient and sender information is automatically identified through Kofax Transformation Modules and then notified via e-mail. Using a browser, the recipient can then retrieve, view, save, forward, delete or archive the document, which is stored in a centralized database. This turns mail into a company-wide asset. Physical-to-digital mail, the latest evolution in managing incoming mail, can move your organization into the forefront of document optimization and mail center efficiency. Using a broad range of Kofax-certified scanners, we can scale from 500 to 15,000 letters per day.

Value Proposition:

SYSCOM uses our Project Management Methodology and System Development Life Cycle (SDLC) to deliver solutions on time and on budget. Clearly defined, proven project methodology is the best way to reduce risk and deliver quality in all projects.

SYSCOM bases our approach on the Project Management Institute’s Project Body of Knowledge (PMBOK). It contains best practices, compiled from many different industries and solutions.

Company Description:

For over twenty-five years, SYSCOM, Inc. has deployed not just IT systems, but total business solutions. SYSCOM helps apply the right technology at the right time. We know that the newest, latest technology is not always the best solution, but its sometimes the only solution, and we know the difference.

Whether you’re complying with privacy regulations, processing millions of documents, or improving worker efficiency, you need scalable, state-of-the-art technology at your command. You need it to solve problems now and in the future. That’s what we do: complete solutions designed to operate in your environment, aligned with your objectives, delivered the way you want it

Value Proposition:

Twofold's heritage in the specialist areas of document security and mailroom solutions dates back to 1858. Twofold were formed in August 2000, following a management buy out of the document security and forms handling division of Checkpoint Security Services Ltd.

Over the last 10 years we have become the leading independent supplier and maintainer of document management software and equipment in the UK, sustaining steady growth and stability throughout.

Company Description:

Twofold provides a comprehensive range of document management software and mailroom equipment to manage your company's incoming and outgoing documents efficiently and economically.

From franking machines and folder inserters to enterprise wide document scanning and workflow software, we have helped over 3000 UK customers including 90 of the FTSE 100 to become more efficient, productive and compliant whilst making significant time and cost savings.

Value Proposition:

Our mission is to make people's lives easier and their work more valuable. We value customer success, teamwork and stable, profitable growth. Above all else, we are laser-focused on our customers' needs.

Our solutions address customers' most immediate procurement and invoice processing needs first, evolving with them as their needs grow and change. We believe that no two companies are alike: some organizations desire to save money, others pursue efficiency, and still others are motivated by compliance needs.

Our suite of software is flexible enough to satisfy these unique needs while being easy to use, implement and expand. Verian believes in providing customers with choices. Rather than push a particular technology, we offer a wide array of software, set-up and deployment options.

Company Description:

Founded in 1997
 Headquartered in Charlotte, North Carolina
 Provides a modular application suite for: - Requisition & Purchasing - Invoice / AP Automation - Travel & Expense Management - Capital Budgeting - Inventory & Asset Management

Help midsize and large organizations reduce costs, gain organizational spending control and improve regulatory compliance. Over 170+ cross-industry clients.

---	---	---

Value Proposition:

To become a nationwide leader in providing software and services to integrate AP invoice processing with accelerated data capture. We help clients realize tremendous savings in invoice processing costs by leveraging imaging technologies and automating the data capture and approval processes. AgilityDocs the name says it all. Our commitment to providing rock solid solutions for the agile enterprise.

Company Description:

AgilityDocs has been providing document management solutions to clients of all sizes for more than 20 years. Over the course of those years we have scanned more than 30 million documents. Headquartered in Houston, Texas, we made our name serving the needs of the oil and gas industry. Our ability to serve the intense demands of this industry more than prepared us to handle the unique challenges of other sectors, including insurance, transportation, legal, and higher education. Originally known as Engraphix Imaging Systems, the company changed its name to AgilityDocs in 2010. What hasn't changed is our commitment to providing the document management services and solutions that meet each customer's unique needs.

Value Proposition:

Every business has its own special needs, and its own set of circumstances. We use our decades of experience to provide solutions for individual situations. Using proven tools and best practices specific to your industry, we design programs to integrate with your existing technology investment, resulting in real returns for your organization.

As your technology partner, we help define short- and long-term goals, and we work with you to make sure those goals are met. By establishing ongoing relationships with each of our clients, we are able to bring a depth of knowledge and understanding to technology solutions. At iBridge, we offer an independent and objective approach rather than a one-size-fits-all philosophy.

Company Description:

iBridge Group, Inc. (iBridge) is a Kofax Platinum Partner that provides governments and businesses alike with the latest technology, the most efficient processes, and a full-spectrum of services to reduce paperwork, accelerate decision-making and ensure regulatory compliance.

iBridge provides the technology and the experience to deliver the solutions your business or government entity requires. By simplifying data management and connecting people with the information they seek, we can streamline the business process, increasing speed, performance and efficiency while enhancing the human experience. Equally important, we can ensure that your organizations most critical information is secure and protected.

Value Proposition:

An innovator in information capture solutions since its inception in 1994, Optiform’s Business Process Automation (BPA) solutions encompass the “capture-to-processing” of both electronic and paper-based forms and documents. This integrated offering uniquely addresses the data and document collection operations for healthcare, education, government, and environmental industries. Moreover, the company’s solutions satisfy a wide spectrum of customer requirements, ranging from strategic, mission-critical applications such as FDA compliant clinical trials, to tactical, department level implementations such as clinical research for national database registries

Company Description:

Optiform delivers market-proven solutions that enhance business productivity and agility by automating forms and document-based business processes. A contemporary, powerful and standards-compliant suite of products enables customers to improve operational efficiency and gain a competitive edge by reducing manual data entry costs, improving information accuracy, automating routing procedures, and providing immediate, personalized communications to customers, partners and employees.

Xcellerate IT Pty Limited

Value Proposition:

Xcellerate IT solutions automate paper driven business processes and reduce costs by extracting critical information from paper documents, e-documents and forms, and transforming them into retrievable information. Pre-integrated to leading ERP and ECM systems, our solutions deliver complete end-to-end automation, empowering people, reducing paperwork and providing the necessary tools to adhere to best practice principles.

Xcellerate IT specializes in solutions for automated invoice processing, transaction workflow, forms and correspondence processing.

Company Description:

With 14 years of experience in the document delivery and capture marketplace, Xcellerate IT is the Australian leading provider of business process automation solutions. Founded in 1997, Xcellerate IT has established its reputation providing industry leading solutions that streamline the flow of information throughout an organisation.

Xcellerate IT's solution handles the capture, transformation and exchange of business critical information arising in paper, fax and electronic formats in a more accurate, timely and cost effective manner.

Value Proposition:

Everyday, thousands of mail pieces are delivered to your company's mail center and are processed in the same way mail has been processed for years. Hand-sorted and physically delivered across the enterprise, onsite and off. At an ever-increasing cost. Today, this decades-old practice has evolved into a new way of doing business. Now you can cut costs, save time and optimize this labor-intensive function.

Company Description:

Image Architects has been in the document capture and management business for more than 20 years. During that time we have installed production systems in 20 countries and in 15 languages. Our customers include the US Dept. of Defense, NYC Transportation, and Johnson & Johnson Pharmaceuticals. We have been a Kofax Partner for 15 years and won numerous awards for our work: Winner of Kofax Custom Module Contest for Digital Mail, IBM Beacon Award and Finance Group Process Innovation Award

Digital Mail Distribution Solutions

Converting your incoming physical mail couldn't be easier. Once a mail piece is scanned, the recipient and sender information is automatically identified through Kofax Transformation Modules and then notified via e-mail. Using a browser, the recipient can then retrieve, view, save, forward, delete or archive the document, which is stored in a centralized database. This turns mail into a company-wide asset. Physical-to-digital mail, the latest evolution in managing incoming mail, can move your organization into the forefront of document optimization and mail center efficiency. Using a broad range of Kofax-certified scanners, we can scale from 500 to 15,000 letters per day.

Value Proposition:

BizTech Solutions is a work process automation integrator. We are a GOLD Certified Microsoft partner and specialize in document capture, OCR and Forms Processing, Document Management and Workflow and systems integration.

Company Description:

BizTech Solutions, Inc. is a privately held corporation founded on Valentine’s Day, 2000. The founder and president, Doane Hadley, had enough of the “technology first” world and set out to build a company whose found principle is: business needs should come first and technology second. All of the latest and greatest technology is useless if the core business needs are unmet.

Our dedication to “business first” has made us an award-winning systems integrator for work process automation and web business applications. We provide innovative departmental and enterprise-wide solutions to reduce operating costs and increase cash flow, focusing first on understanding the business requirements, and then applying technology where appropriate. Integration, Collaboration, and Process Automation are key components of these solutions. They allow clients to implement leading edge solutions quicker and cost effectively, enabling them to differentiate themselves in their respective industry.

Business Imaging Systems

Value Proposition:

We make the information that drives everyday business operations more accessible, usable and secure. We do this by connecting people, processes and data, and by placing information where, when and how you need it. We eliminate tedious data entry tasks, automate costly processes, and protect valuable data against misuse and loss. We increase your efficiency to unprecedented levels, so you can get more work done with less human effort and focus on business growth.

Business Imaging Systems is the only Oklahoma based vendor that can provide all necessary disciplines turnkey, without the necessity to involve multiple vendors.

Company Description:

For 25 years, Business Imaging Systems has built a solid reputation as a full-service integrator of high-quality front-end capture and document management systems.

We offer one of the most diverse and trusted technology portfolios in the industry and provide a team of professionals. That team is where the technology's power is unleashed. Each of our team members has a distinct area of expertise and an important role to play in your IT project.

BIS works with an extensive, cross-industry client base that includes recognized names in government, education, healthcare and financial services, as well as human resources, accounts payable, accounts receivable and legal departments. BIS solutions are aimed at all organizations that manage large volumes of documents, forms, records, invoices and other critical information. Several of these solutions include custom integrations that can only be supported by BIS.

CDIT, Inc.

Value Proposition:

As one of Canada's most experienced Kofax Partners, CDIT has the breadth and depth of experience to address the most complex capture challenges.

Our key value propositions are the best practices that we have developed through our extensive real-world experience. Consistently delivering unique, high-value solutions for our clients/partners, we ensure risks are minimized and always exceed delivery expectations.

CDIT's dedicated implementation and support engineers with multiple Kofax technical certifications, architect innovative solutions and provide exceptional ongoing support. We have developed complementary custom modules for the Kofax suite of products, including specialized Utility Bill extraction expertise, and continue to innovate as our clients bring forth unique challenges.

Company Description:

CDIT Inc. (CDIT) is Canada's leading Enterprise Content Management (ECM) solutions consulting/implementation firm, with exceptional business process re-engineering and project management expertise.

Since 1994, we have been focused on accelerating the CAPTURE, TRANSFORMATION, DELIVERY and EXCHANGE of critical information that is an essential part of every organization by delivering exceptional Capture solutions for both our public and private sector clients.

CDIT is well respected in the ECM industry for our innovative approach and our years of hands-on experience in implementing complex, distributed, high-volume Document Imaging systems using the full suite of Kofax products.

Value Proposition:

Dataimage specializes in helping companies to realize the greatest return on their investment in document imaging. Document imaging is no longer about scanning documents at the end of a process for archiving purposes only.

The next generation of document imaging involves moving the scanning process to the very front using the image to drive true business process automation. Leveraging the power of Kofax to automate data capture, document classification, and document separation greatly reduces the time and costs associated with manual processes.

Company Description:

Founded in 1981, Dataimage is recognized as an industry leading provider of intelligent data capture and electronic document management solutions. Headquartered in Salt Lake City, Utah Dataimage provides award winning comprehensive solutions to clients throughout the United States and Canada.

Value Proposition:

Every business has its own special needs, and its own set of circumstances. We use our decades of experience to provide solutions for individual situations. Using proven tools and best practices specific to your industry, we design programs to integrate with your existing technology investment, resulting in real returns for your organization.

As your technology partner, we help define short- and long-term goals, and we work with you to make sure those goals are met. By establishing ongoing relationships with each of our clients, we are able to bring a depth of knowledge and understanding to technology solutions. At iBridge, we offer an independent and objective approach rather than a one-size-fits-all philosophy.

Company Description:

iBridge Group, Inc. (iBridge) is a Kofax Platinum Partner that provides governments and businesses alike with the latest technology, the most efficient processes, and a full-spectrum of services to reduce paperwork, accelerate decision-making and ensure regulatory compliance.

iBridge provides the technology and the experience to deliver the solutions your business or government entity requires. By simplifying data management and connecting people with the information they seek, we can streamline the business process, increasing speed, performance and efficiency while enhancing the human experience. Equally important, we can ensure that your organizations most critical information is secure and protected.

Value Proposition:

Everyday, thousands of mail pieces are delivered to your company's mail center and are processed in the same way mail has been processed for years. Hand-sorted and physically delivered across the enterprise, onsite and off. At an ever-increasing cost. Today, this decades-old practice has evolved into a new way of doing business. Now you can cut costs, save time and optimize this labor-intensive function.

Company Description:

Image Architects has been in the document capture and management business for more than 20 years. During that time we have installed production systems in 20 countries and in 15 languages. Our customers include the US Dept. of Defense, NYC Transportation, and Johnson & Johnson Pharmaceuticals. We have been a Kofax Partner for 15 years and won numerous awards for our work: Winner of Kofax Custom Module Contest for Digital Mail, IBM Beacon Award and Finance Group Process Innovation Award

Digital Mail Distribution Solutions

Converting your incoming physical mail couldn't be easier. Once a mail piece is scanned, the recipient and sender information is automatically identified through Kofax Transformation Modules and then notified via e-mail. Using a browser, the recipient can then retrieve, view, save, forward, delete or archive the document, which is stored in a centralized database. This turns mail into a company-wide asset. Physical-to-digital mail, the latest evolution in managing incoming mail, can move your organization into the forefront of document optimization and mail center efficiency. Using a broad range of Kofax-certified scanners, we can scale from 500 to 15,000 letters per day.

Value Proposition:

SYSCOM uses our Project Management Methodology and System Development Life Cycle (SDLC) to deliver solutions on time and on budget. Clearly defined, proven project methodology is the best way to reduce risk and deliver quality in all projects.

SYSCOM bases our approach on the Project Management Institute's Project Body of Knowledge (PMBOK). It contains best practices, compiled from many different industries and solutions.

Company Description:

For over twenty-five years, SYSCOM, Inc. has deployed not just IT systems, but total business solutions. SYSCOM helps apply the right technology at the right time. We know that the newest, latest technology is not always the best solution, but its sometimes the only solution, and we know the difference.

Whether you're complying with privacy regulations, processing millions of documents, or improving worker efficiency, you need scalable, state-of-the-art technology at your command. You need it to solve problems now and in the future. That's what we do: complete solutions designed to operate in your environment, aligned with your objectives, delivered the way you want it

Western Office Systems

Value Proposition:

In today's fast-paced, service-oriented information economy, the volume of business information is increasing at an astounding pace. The challenge faced by today's market leaders: to cost effectively capture, store, manage, protect and, most importantly, extract value from business information assets.

At Western Office Systems, our goal is simple: partnering with customers to help increase capabilities, productivity and processes. We are dedicated to helping you successfully process and manage your business content.

Company Description:

Founded in 1982, Western Office Systems (WOS) is a systems integration firm specializing in the design, Customization, implementation and support of production-level document and data capture solutions, content management applications and imaging systems.

Headquartered in Tempe, Arizona, Western Office also has offices in San Francisco and Sacramento operating as Western Integrated Systems. WOS has over 42 years of combined experience helping companies capture, manage and secure corporate information assets.

All Star Software Systems, Inc.

Value Proposition:

All Star has focused on workflow solutions that integrate with ERP systems from the start. There is a difference between a company who focuses on business process automation and an imaging company. 95% of our customers use our workflow solutions.

Company Description:

All Star sells solutions that automate business processes. Our solutions capture inbound information, extract pertinent data, route the data for approval and exception processing and populates ERP systems with that data once approved.

All Star Software Systems' Core Values

Provide the best software and services for a reasonable price. All work is accomplished with an unparalleled level of detail. Our systems are sold, implemented, and supported by people who have a passion for success. Winners do what others don't want to do or only talk about doing.

All Star Software Systems' Mission Statement

To be your organization's most valued systems integration partner by accelerating your business processes through unparalleled, best-in-class and cost-effective software and services.

All Star provides solutions that automate business processes. Our solutions capture inbound information (paper, fax, email, EDI, XML, edocs, eForms etc), extract pertinent data (thus eliminating data entry into line of business systems), allow users to retrieve the information in seconds and automate the approval and exception processing of that information.

Value Proposition:

BizTech Solutions is a work process automation integrator. We are a GOLD Certified Microsoft partner and specialize in document capture, OCR and Forms Processing, Document Management and Workflow and systems integration.

Company Description:

BizTech Solutions, Inc. is a privately held corporation founded on Valentine’s Day, 2000. The founder and president, Doane Hadley, had enough of the “technology first” world and set out to build a company whose found principle is: business needs should come first and technology second. All of the latest and greatest technology is useless if the core business needs are unmet.

Our dedication to “business first” has made us an award-winning systems integrator for work process automation and web business applications. We provide innovative departmental and enterprise-wide solutions to reduce operating costs and increase cash flow, focusing first on understanding the business requirements, and then applying technology where appropriate. Integration, Collaboration, and Process Automation are key components of these solutions. They allow clients to implement leading edge solutions quicker and cost effectively, enabling them to differentiate themselves in their respective industry.

Business Imaging Systems

Value Proposition:

We make the information that drives everyday business operations more accessible, usable and secure. We do this by connecting people, processes and data, and by placing information where, when and how you need it. We eliminate tedious data entry tasks, automate costly processes, and protect valuable data against misuse and loss. We increase your efficiency to unprecedented levels, so you can get more work done with less human effort and focus on business growth.

Business Imaging Systems is the only Oklahoma based vendor that can provide all necessary disciplines turnkey, without the necessity to involve multiple vendors.

Company Description:

For 25 years, Business Imaging Systems has built a solid reputation as a full-service integrator of high-quality front-end capture and document management systems.

We offer one of the most diverse and trusted technology portfolios in the industry and provide a team of professionals. That team is where the technology's power is unleashed. Each of our team members has a distinct area of expertise and an important role to play in your IT project.

BIS works with an extensive, cross-industry client base that includes recognized names in government, education, healthcare and financial services, as well as human resources, accounts payable, accounts receivable and legal departments. BIS solutions are aimed at all organizations that manage large volumes of documents, forms, records, invoices and other critical information. Several of these solutions include custom integrations that can only be supported by BIS.

Cerner

Value Proposition:

Cerner integrates Kofax Capture as the standard batch capture component for their Cerner ProVision Document Imaging (PDI) solution. Cerner PDI is built on the Cerner Millennium® architecture. This single foundation database enables healthcare image scanning to be conducted once and then utilized by all other Cerner Millennium applications. Cerner PDI eliminates the need for interfaces; reducing costs, eliminating 'points of failure' and removing informational redundancies.

Company Description:

Cerner is the largest player in the market focused on medical technology and electronic medical systems, or Healthcare Information Technology (HIT). Cerner's product line includes a broad suite of solutions serving Hospitals, Physician Practices, Home Health, Pharmacy, Employers, and more. Cerner sells its traditional software (Cerner Millennium® suite of products) and provides hosting services, medical devices, and IT outsourcing.

The core of Cerner's business model is the creation of intellectual property (IP) in the form of software and other types of digital content. Cerner software is bundled with other technologies (such as Kofax software) and services to create complete clinical and business solutions for healthcare providers

A typical Cerner end-user agreement includes many solutions and most client contracts contain provisions for support contracts in which Cerner agrees to provide a broad set of services that support clients' use of solutions in demanding clinical settings.

Vertical Markets:

Healthcare

How/When to engage:

- Healthcare Vertical Only
- Kofax Sales should determine early in sales cycle whether a healthcare prospect is a current Cerner customer; if so contact Mark Golden for Cerner Sales engagement
- Contact Mark Golden for engagement with Cerner Sales team or for any questions regarding partnering with Cerner

CM Mitchell Consulting Corp

Value Proposition:

CMMC is unique in the industry in that it has certified consultants who understand not only capture and OCR technology along with document management, but also have a strong certified knowledge base of the Oracle E-Business Suite. Many of our customers have implemented Kofax KTM with Oracle EBS for Procure to pay. In addition to our focus in banking, healthcare and insurance, we also have a strong oil & gas revenue remittance processing solution.

Company Description:

CMMC provides comprehensive and certified Professional Services for Kofax Capture and Kofax KTM, IBM FileNet P8 and Oracle E-Business Suite. Our unique combination of value-added solutions includes: our award winning DocSavi™ product which seamlessly integrates Kofax and FileNet with EBS, WeWebU an intuitive and easy-to-use front end to FileNet, and IBM Optim for EBS data archiving.

Value Proposition:

Dataimage specializes in helping companies to realize the greatest return on their investment in document imaging. Document imaging is no longer about scanning documents at the end of a process for archiving purposes only.

The next generation of document imaging involves moving the scanning process to the very front using the image to drive true business process automation. Leveraging the power of Kofax to automate data capture, document classification, and document separation greatly reduces the time and costs associated with manual processes.

Company Description:

Founded in 1981, Dataimage is recognized as an industry leading provider of intelligent data capture and electronic document management solutions. Headquartered in Salt Lake City, Utah Dataimage provides award winning comprehensive solutions to clients throughout the United States and Canada.

All Star Software Systems, Inc.

Value Proposition:

All Star has focused on workflow solutions that integrate with ERP systems from the start. There is a difference between a company who focuses on business process automation and an imaging company. 95% of our customers use our workflow solutions.

Company Description:

All Star sells solutions that automate business processes. Our solutions capture inbound information, extract pertinent data, route the data for approval and exception processing and populates ERP systems with that data once approved.

All Star Software Systems' Core Values

Provide the best software and services for a reasonable price. All work is accomplished with an unparalleled level of detail. Our systems are sold, implemented, and supported by people who have a passion for success. Winners do what others don't want to do or only talk about doing.

All Star Software Systems' Mission Statement

To be your organization's most valued systems integration partner by accelerating your business processes through unparalleled, best-in-class and cost-effective software and services.

All Star provides solutions that automate business processes. Our solutions capture inbound information (paper, fax, email, EDI, XML, edocs, eForms etc), extract pertinent data (thus eliminating data entry into line of business systems), allow users to retrieve the information in seconds and automate the approval and exception processing of that information.

Value Proposition:

BizTech Solutions is a work process automation integrator. We are a GOLD Certified Microsoft partner and specialize in document capture, OCR and Forms Processing, Document Management and Workflow and systems integration.

Company Description:

BizTech Solutions, Inc. is a privately held corporation founded on Valentine’s Day, 2000. The founder and president, Doane Hadley, had enough of the “technology first” world and set out to build a company whose found principle is: business needs should come first and technology second. All of the latest and greatest technology is useless if the core business needs are unmet.

Our dedication to “business first” has made us an award-winning systems integrator for work process automation and web business applications. We provide innovative departmental and enterprise-wide solutions to reduce operating costs and increase cash flow, focusing first on understanding the business requirements, and then applying technology where appropriate. Integration, Collaboration, and Process Automation are key components of these solutions. They allow clients to implement leading edge solutions quicker and cost effectively, enabling them to differentiate themselves in their respective industry.

Value Proposition:

INTEGRIM helps companies reduce costs and increase their productivity with solutions automating the processing of supplier invoices, customer files, contracts, claims, or any other processing using standardized methods irrelevant of its origin (fax, paper, electronic).

Along with speeding up response times, achieving greater control over costs and reinforcing security, workflow solutions allow for a considerable reduction in manual data capture efforts in different corporate systems, further reducing costs.

Company Description:

INTEGRIM offers solutions to accelerate the processing of information by transforming unstructured documents into usable data for extraction and appropriate processes.

Our specialists ensure the implementation of leading-edge turnkey solutions, customized to your specific needs in terms of volume of items to process, format, and document types.

Value Proposition:

Image Access Corporation has over 15 years of experience with Kofax Software. We have been named Kofax Reseller of the year 3 times.

We have a staff of over 14 Systems Engineers trained on the deployment and support of all Kofax products. We fully understand our customers needs and are highly versed in the mortgage document process, claims processing and the new account open process.

Our customers all process large volumes of paper each day. A recent survey showed that our average customer processes 800,000 pieces of paper each month.

Company Description:

Image Access Corporation provides business process automation and integration for organizations with large volumes of paper. Our turnkey image and content management solutions allow instant access to documents and files.

Image Access Corporation specializes in the insurance, banking and transportation industries as well as State Government solutions. We also offer cross-industry accounting applications and a check capture solution. We develop systems based on an in-depth understanding of how people work in those fields.

Working with best of breed partners, including Kofax, ensures a state-of-the-art solution, fully integrated with your existing hardware and business applications.

Western Office Systems

Value Proposition:

In today's fast-paced, service-oriented information economy, the volume of business information is increasing at an astounding pace. The challenge faced by today's market leaders: to cost effectively capture, store, manage, protect and, most importantly, extract value from business information assets.

At Western Office Systems, our goal is simple: partnering with customers to help increase capabilities, productivity and processes. We are dedicated to helping you successfully process and manage your business content.

Company Description:

Founded in 1982, Western Office Systems (WOS) is a systems integration firm specializing in the design, Customization, implementation and support of production-level document and data capture solutions, content management applications and imaging systems.

Headquartered in Tempe, Arizona, Western Office also has offices in San Francisco and Sacramento operating as Western Integrated Systems. WOS has over 42 years of combined experience helping companies capture, manage and secure corporate information assets.

Dolphin Enterprise Solutions Corporation

Value Proposition:

Dolphin solutions are tailored to customer's needs and have been developed incorporating SAP Business Workflow so that there are no redundancies and a single system of record.

The easy to use dashboards enable visibility into the process instantly providing real time information. Robust reporting gives you the necessary tools and information to better manage the process.

The results are sustainable cost reduction and containment and productivity gains with a fast time to implement and lower total cost of ownership.

Company Description:

Dolphin makes crucial business operations like data management, data archiving, accounts payable, accounts receivable and order management run better and smarter for organizations using SAP solutions.

Focused on improving business performance through Information Lifecycle Management and Business Process Management, Dolphin produces the right solution for each customer, faster, through its unmatched experience in SAP technologies, and its proven best practices, tools and SAP add-on applications. Dolphin solutions improve business and IT performance, lower total cost of ownership and deliver high return on investment.

The company was founded in 1995 and has offices in Philadelphia, PA and San Jose, CA. Dolphin solutions are implemented across North America and around the world.

Value Proposition:

INTEGRIM helps companies reduce costs and increase their productivity with solutions automating the processing of supplier invoices, customer files, contracts, claims, or any other processing using standardized methods irrelevant of its origin (fax, paper, electronic).

Along with speeding up response times, achieving greater control over costs and reinforcing security, workflow solutions allow for a considerable reduction in manual data capture efforts in different corporate systems, further reducing costs.

Company Description:

INTEGRIM offers solutions to accelerate the processing of information by transforming unstructured documents into usable data for extraction and appropriate processes.

Our specialists ensure the implementation of leading-edge turnkey solutions, customized to your specific needs in terms of volume of items to process, format, and document types.

Value Proposition:

Image Access Corporation has over 15 years of experience with Kofax Software. We have been named Kofax Reseller of the year 3 times.

We have a staff of over 14 Systems Engineers trained on the deployment and support of all Kofax products. We fully understand our customers needs and are highly versed in the mortgage document process, claims processing and the new account open process.

Our customers all process large volumes of paper each day. A recent survey showed that our average customer processes 800,000 pieces of paper each month.

Company Description:

Image Access Corporation provides business process automation and integration for organizations with large volumes of paper. Our turnkey image and content management solutions allow instant access to documents and files.

Image Access Corporation specializes in the insurance, banking and transportation industries as well as State Government solutions. We also offer cross-industry accounting applications and a check capture solution. We develop systems based on an in-depth understanding of how people work in those fields.

Working with best of breed partners, including Kofax, ensures a state-of-the-art solution, fully integrated with your existing hardware and business applications.

Image Integration Systems

Value Proposition:

To become a nationwide leader in providing software and services to integrate AP invoice processing with accelerated data capture. We help clients realize tremendous savings in invoice processing costs by leveraging imaging technologies and automating the data capture and approval processes. AgilityDocs the name says it all. Our commitment to providing rock solid solutions for the agile enterprise.

Company Description:

AgilityDocs has been providing document management solutions to clients of all sizes for more than 20 years. Over the course of those years we have scanned more than 30 million documents. Headquartered in Houston, Texas, we made our name serving the needs of the oil and gas industry. Our ability to serve the intense demands of this industry more than prepared us to handle the unique challenges of other sectors, including insurance, transportation, legal, and higher education. Originally known as Engraphix Imaging Systems, the company changed its name to AgilityDocs in 2010. What hasn't changed is our commitment to providing the document management services and solutions that meet each customer's unique needs.

Dolphin solutions are tailored to customer's needs and have been developed incorporating SAP Business Workflow so that there are no redundancies and a single system of record.

The easy to use dashboards enable visibility into the process instantly providing real time information. Robust reporting gives you the necessary tools and information to better manage the process.

The results are sustainable cost reduction and containment and productivity gains with a fast time to implement and lower total cost of ownership.

Company Description:

Dolphin makes crucial business operations like data management, data archiving, accounts payable, accounts receivable and order management run better and smarter for organizations using SAP solutions.

Focused on improving business performance through Information Lifecycle Management and Business Process Management, Dolphin produces the right solution for each customer, faster, through its unmatched experience in SAP technologies, and its proven best practices, tools and SAP add-on applications. Dolphin solutions improve business and IT performance, lower total cost of ownership and deliver high return on investment.

The company was founded in 1995 and has offices in Philadelphia, PA and San Jose, CA. Dolphin solutions are implemented across North America and around the world.

Value Proposition:

Our mission is to make people's lives easier and their work more valuable. We value customer success, teamwork and stable, profitable growth. Above all else, we are laser-focused on our customers' needs.

Our solutions address customers' most immediate procurement and invoice processing needs first, evolving with them as their needs grow and change. We believe that no two companies are alike: some organizations desire to save money, others pursue efficiency, and still others are motivated by compliance needs.

Our suite of software is flexible enough to satisfy these unique needs while being easy to use, implement and expand. Verian believes in providing customers with choices. Rather than push a particular technology, we offer a wide array of software, set-up and deployment options.

Company Description:

Founded in 1997
 Headquartered in Charlotte, North Carolina
 Provides a modular application suite for: - Requisition & Purchasing - Invoice / AP Automation - Travel & Expense Management - Capital Budgeting - Inventory & Asset Management

Value Proposition:

Dataimage specializes in helping companies to realize the greatest return on their investment in document imaging. Document imaging is no longer about scanning documents at the end of a process for archiving purposes only.

The next generation of document imaging involves moving the scanning process to the very front using the image to drive true business process automation. Leveraging the power of Kofax to automate data capture, document classification, and document separation greatly reduces the time and costs associated with manual processes.

Company Description:

Founded in 1981, Dataimage is recognized as an industry leading provider of intelligent data capture and electronic document management solutions. Headquartered in Salt Lake City, Utah Dataimage provides award winning comprehensive solutions to clients throughout the United States and Canada.

Value Proposition:

KP focuses on BPA solutions which affect document driven business processes. Those processes where the information involved are mainly stored on documents, no matter they are digital or paper-based.

KP BPA solutions help reduce both costs and manual activities, enabling organizations to save money and consistently reduce manual efforts with each customer. These solutions offer a highly automated link between back office information processes, front office knowledge workers, customers and partners around the world, enabling organizations to exchange information automatically with anyone, anywhere, in any format.

Our experience allows us to deal with organizations with a substantial inflow of documents, such as banks, financial institutions, insurance, and many others.

Company Description:

KP offers management consulting services to firms with a strong focus on the areas of performance management and information systems management. KP addresses medium-sized companies, large corporations and entrepreneurial ventures with significant innovation programs. KP operates successfully in different vertical markets from manufacturing to financial services.

Value Proposition:

The clear focus on Medical Devices and the Automotive Industry, as well as general Database Solutions and Document Management Systems, gives Softgate a solid base for continuous growth and instills in our customers confidence in our abilities.

Company Description:

Since 1992 softgate acts successfully in the area of high quality IT solutions and services and has become one of the most established and best known medium-sized companies in Germany.

The main principle, to deliver outstanding service to our customers, remains unchanged. softgate has reached this target by employing only high qualified personnel as well as by professional company driven training, tailored towards our specific needs. All of our employees identify with this principle and make it happen in our projects.

The clear focus on Medical Devices and the Automotive Industry, as well as general Database Solutions and Document Management Systems, gives softgate a solid base for continuous growth and instills in our customers confidence in our abilities.

Value Proposition:

To become a nationwide leader in providing software and services to integrate AP invoice processing with accelerated data capture. We help clients realize tremendous savings in invoice processing costs by leveraging imaging technologies and automating the data capture and approval processes. AgilityDocs the name says it all. Our commitment to providing rock solid solutions for the agile enterprise.

Company Description:

AgilityDocs has been providing document management solutions to clients of all sizes for more than 20 years. Over the course of those years we have scanned more than 30 million documents. Headquartered in Houston, Texas, we made our name serving the needs of the oil and gas industry. Our ability to serve the intense demands of this industry more than prepared us to handle the unique challenges of other sectors, including insurance, transportation, legal, and higher education. Originally known as Engraphix Imaging Systems, the company changed its name to AgilityDocs in 2010. What hasn't changed is our commitment to providing the document management services and solutions that meet each customer's unique needs.

All Star Software Systems, Inc.

Value Proposition:

All Star has focused on workflow solutions that integrate with ERP systems from the start. There is a difference between a company who focuses on business process automation and an imaging company. 95% of our customers use our workflow solutions.

Company Description:

All Star sells solutions that automate business processes. Our solutions capture inbound information, extract pertinent data, route the data for approval and exception processing and populates ERP systems with that data once approved.

All Star Software Systems' Core Values

Provide the best software and services for a reasonable price. All work is accomplished with an unparalleled level of detail. Our systems are sold, implemented, and supported by people who have a passion for success. Winners do what others don't want to do or only talk about doing.

All Star Software Systems' Mission Statement

To be your organization's most valued systems integration partner by accelerating your business processes through unparalleled, best-in-class and cost-effective software and services.

All Star provides solutions that automate business processes. Our solutions capture inbound information (paper, fax, email, EDI, XML, edocs, eForms etc), extract pertinent data (thus eliminating data entry into line of business systems), allow users to retrieve the information in seconds and automate the approval and exception processing of that information.

Value Proposition:

Every business has its own special needs, and its own set of circumstances. We use our decades of experience to provide solutions for individual situations. Using proven tools and best practices specific to your industry, we design programs to integrate with your existing technology investment, resulting in real returns for your organization.

As your technology partner, we help define short- and long-term goals, and we work with you to make sure those goals are met. By establishing ongoing relationships with each of our clients, we are able to bring a depth of knowledge and understanding to technology solutions. At iBridge, we offer an independent and objective approach rather than a one-size-fits-all philosophy.

Company Description:

iBridge Group, Inc. (iBridge) is a Kofax Platinum Partner that provides governments and businesses alike with the latest technology, the most efficient processes, and a full-spectrum of services to reduce paperwork, accelerate decision-making and ensure regulatory compliance.

iBridge provides the technology and the experience to deliver the solutions your business or government entity requires. By simplifying data management and connecting people with the information they seek, we can streamline the business process, increasing speed, performance and efficiency while enhancing the human experience. Equally important, we can ensure that your organizations most critical information is secure and protected.

Value Proposition:

We provide end-to-end integrated services that address the labor-intensive document imaging, content capture, indexing, back-office forms processing and technology services including business process transformation planning, best fit ECM & BPM solution architecting, project implementation and application support services.

Our focus is on creating paper-less work environment that allow instant access to information from unstructured contents reducing transaction processing time, improving security and accountability along the way promoting Green Environment.

Company Description:

Ecopro provides products and services that are essential for implementing cost effective and efficient Enterprise Content Management (ECM), Electronic Medical Records (EMR) and content based Business Intelligence Analytical (BI-BA) solutions.

Our services offer radical alternatives to the way Content Capture and processing are conventionally handled. We provide refreshing and much needed relief from heavy investments required to create document scanning infrastructures, indexing human resources, expensive server and software. You can delegate all of your content capture and indexing process to us.

BPM OEM Providers

Broadridge City Networks

Broadridge City Networks specializes in process automation and operational risk management software and services. They provide solutions that allow their customers to differentiate competitively, control cost, improve earnings and reduce risk.

Capita Software Services (CSS)

Capita Software Services (CSS) is the leading supplier of software solutions to the public sector and social housing marketplace. They undertake a strong partnership approach and work closely with all their customers to ensure we provide systems tailored to suit their exact requirements. Their software solutions cover the disciplines of customer services, mobile technology, payment collection, income management, integrated housing management, revenues and benefits processing and services and policy training. Capita Software Services' customers benefit from a bespoke service, helping them to streamline their processes and deliver a high performance citizen-centric service.

Hitec Laboratories

Hitec Laboratories' software solutions provide document, policy and risk management that transform organizations' ability to drive crucial efficiencies, demonstrate rigorous governance and minimize critical risks. Giving back control, letting them focus their energies on their core business, Hitec expertise and software have now been used by customers over two decades in more than 50 countries across the globe.

Lagan Technologies

Founded in 1994, Lagan Technologies is the global leader in G2C (government to citizen) technology. Its solutions enable governments and citizens to communicate online, on the phone and on the move. With nearly 200 government customers worldwide, Lagan helps local governments serve the everyday interests of more than 60 million citizens.

Northgate Information Solutions Limited

Northgate Information Solutions Limited is a market leader in providing specialist software, outsourcing and information technology (IT) services to the human resources, local government, education and public safety markets. Northgate currently employs over 12,000 employees and operates in 46 countries across 5 continents. NorthgateArinso serves approximately 1,000 multinational customers, which includes more than 20% of Global Fortune 1000, 4,500 large/ medium customers and approximately 10,500 small/ medium enterprise (SME) customers worldwide.

Global Alliance Partners

Financial

Hewlett Packard

Government

Carahsoft

Hewlett Packard

Healthcare

Cerner

Manufacturing

Hewlett Packard

Other Non-Specific

Hewlett Packard

Ricoh

Value Proposition:

Carahsoft is a US Federal, State and Local Government teaming partner for Kofax and has numerous government contracts Kofax and other Kofax resellers can leverage to bypass the procurement process. Carahsoft is one of a few resellers that are part of the US Communities Contract. Carahsoft is also part of the GSA schedule and can assist with:

- Team security clearance management
- Field marketing
- Creating and executing demand generation activities
- Absorbing all risks within the contract terms and conditions

Company Description:

Carahsoft Technology Corp. is the trusted Government IT solutions provider. As a top-ranked GSA Schedule Contract holder, Carahsoft serves as the master government aggregator for many of its best-of-breed vendors, supporting an extensive ecosystem of manufacturers, resellers, and consulting partners committed to helping government agencies select and implement the best solution at the best possible value.

The company's dedicated Solutions Divisions proactively market, sell and deliver Adobe, Symantec, Data Domain, VMware, Open Source, HR, HP Software, Intelligence, and SAP products and services, among others. Carahsoft is consistently recognized by its partners as a top revenue producer, and is listed annually among the industry's fastest growing firms by VAR Business, CRN, Inc., Washington Technology, and the Washington Business Journal.

Partner Category:	Platinum
Year Founded:	2004
Number of Employees:	175

Vertical Markets:

Government - Federal
Government - State & Local/Provincial

How/When to engage:

Carahsoft is a government reseller for Kofax – they generate demand (eg: do marketing) and re-sell directly to the government customer. Carahsoft has a suite of government contracts that Kofax can leverage, more than any other Kofax government reseller.

Carahsoft is also a Government teaming partner in the Kofax world. Other Kofax resellers can leverage the Carahsoft government contracts, and can use Carahsoft as their inside sales / back office.

The order process is:

1. The Reseller can either handle all of the quoting and deal administration directly with the customer (aka, the Reseller takes down the deal directly), or can have Carahsoft send the government customer the quotes, and handle all of the deal administration (Carahsoft takes down the deal on behalf of the Reseller).
2. The government customer places the order jointly with the Reseller and Carahsoft (this is known as teaming, and it's how the reseller is able to leverage the Carahsoft contracts).
3. If it is a deal that the reseller takes down directly, but uses Carahsoft as a back office or teams with them to use a contract, Carahsoft will send the order to Kofax. Resellers get their commission by marking-up the product (Carahsoft provides a quote for their cost, and the GSA price they can charge).
4. If it is a deal that Carahsoft takes down on the Reseller's behalf, Carahsoft will pay their margin on the backend and ensure that they get credit at Kofax for the entire deal.

Kofax Products:

All Kofax products and services are available for sale via Carahsoft GSA Schedule # GS-35F-0131R

Contacts:

www.carahsoft.com/intelligence

Phone: (703) 871-8684
William Canter
William.canter@carahsoft.com

Cerner

Value Proposition:

Cerner integrates Kofax Capture as the standard batch capture component for their Cerner ProVision Document Imaging (PDI) solution. Cerner PDI is built on the Cerner Millennium® architecture. This single foundation database enables healthcare image scanning to be conducted once and then utilized by all other Cerner Millennium applications. Cerner PDI eliminates the need for interfaces; reducing costs, eliminating 'points of failure' and removing informational redundancies.

Company Description:

Cerner is the largest player in the market focused on medical technology and electronic medical systems, or Healthcare Information Technology (HIT). Cerner's product line includes a broad suite of solutions serving Hospitals, Physician Practices, Home Health, Pharmacy, Employers, and more. Cerner sells its traditional software (Cerner Millennium® suite of products) and provides hosting services, medical devices, and IT outsourcing.

The core of Cerner's business model is the creation of intellectual property (IP) in the form of software and other types of digital content. Cerner software is bundled with other technologies (such as Kofax software) and services to create complete clinical and business solutions for healthcare providers

A typical Cerner end-user agreement includes many solutions and most client contracts contain provisions for support contracts in which Cerner agrees to provide a broad set of services that support clients' use of solutions in demanding clinical settings.

Vertical Markets:

Healthcare

How/When to engage:

- Healthcare Vertical Only
- Kofax Sales should determine early in sales cycle whether a healthcare prospect is a current Cerner customer; if so contact Mark Golden for Cerner Sales engagement
- Contact Mark Golden for engagement with Cerner Sales team or for any questions regarding partnering with Cerner

Partner Category:	Platinum

Hewlett Packard

Value Proposition:

Kofax works with HP's Imaging and Printing Group (IPG) primarily. IPG is "the leading imaging and printing systems provider in the world for printer hardware, printing supplies and scanning devices, providing solutions across customer segments from individual consumers to small and medium businesses to large enterprises." [43] Products and technology associated with IPG include Inkjet and LaserJet printers, consumables and related products, Officejet all-in-one multifunction printer/scanner/faxes.

Company Description:

HP is a technology company that operates in more than 170 countries around the world. We explore how technology and services can help people and companies address their problems and challenges, and realize their possibilities, aspirations and dreams. We apply new thinking and ideas to create more simple, valuable and trusted experiences with technology, continuously improving the way our customers live and work.

No other company offers as complete a technology product portfolio as HP. We provide infrastructure and business offerings that span from handheld devices to some of the world's most powerful supercomputer installations. We offer consumers a wide range of products and services from digital photography to digital entertainment and from computing to home printing. This comprehensive portfolio helps us match the right products, services and solutions to our customers' specific needs.
