## Chapter 1

### Part 1:

Mohammad Ali Taheri was born in March 21, 1956 in Kermanshah, Iran. In his childhood he was very curious about his environment. There were so many questions in his mind and he was following up the answers eagerly; but the infinite space and the stars were attacked his astonished mind more than anything else, so that he used to staring at the stars at nights and name each of them according to the special meaning that they had for him. He had an indescribable desire for discovering the stars and their cause, so that it led to designing and making airplanes to get closer to the stars when his was a teenager.

After his primary school he moved to Tehran to continue his studying. At the same time his enthusiasm for designing airplanes was growing on and on. For this purpose he began to study the limited scientific books and journals to find a solution for his burning desire and an answer for the questions which his teachers could not give the answer.

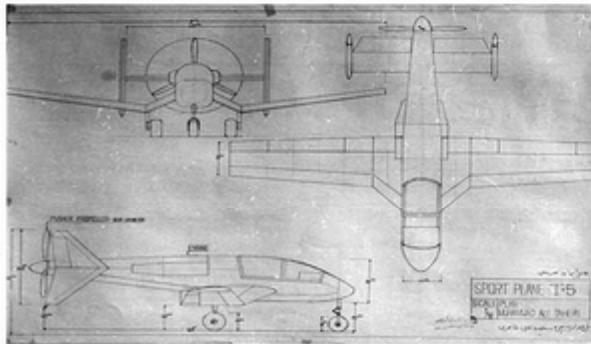

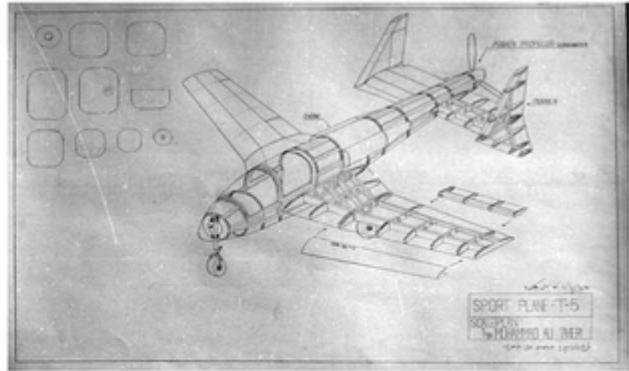

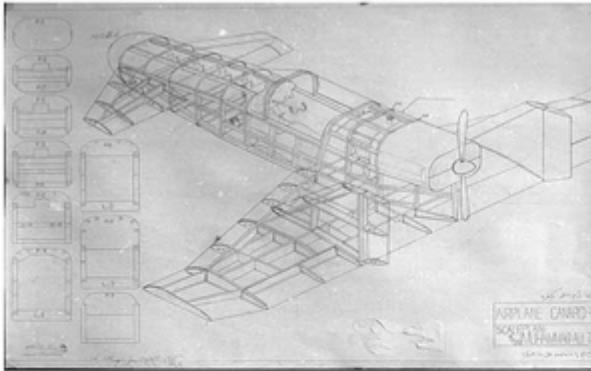

His interest in aircraft industry led to designing a controlled aircraft while he was only 13 years old and to be encouraged by his relatives and friends. Since then, he intensified his efforts on the aircraft making and he successfully made a helicopter in the yard of his house when he was 16. This invention created some troubles for his family related to the Security and Intelligence Service of Iran (SAVAK) which they believed that it is impossible that a school boy design such a precise and detailed scheme. Consequently, they called his mother for some explanation and interrogated her to understand the purpose of making this aircraft and make clear that if there is any foreign country behind this incidence. Finally, after long investigation and presenting the "Dictionary of Aviation Technical Terms" written by him, the SAVAK experts have convinced that he has a special ingenuity. Therefore, he was able to continue his research and as a result, he built a kite and experienced several flights.

In 1976, he participated in the first National Exhibition of Youth Innovators and Inventors by designing and making remote controlled airplane which merely needed fuel for take-off and landing,

and several scheme of aircrafts including the world's first vertical take-off and landing (VTOL) aircraft and won the first prize of the competition in technology and inventions.

**The first National Exhibition of Youth Innovators and Inventors**

**Mohammad Ali Taheri with his schemes and remote controlled airplane – 1976**

Next year (1978), he participated in the same exhibition by presenting a single flyer plane, some more aircraft schemes and his "Dictionary of Aviation Technical Terms", which its draft has just been finished. For the second time, he won the first prize of the competition in technology and received

some scholarship from different international universities, but for some seasons he rejected all of them.

He had many interviews on national presses and TV about his work, inventions and researches in mathematics. Following you can see his interview on Mehr magazine and parts of his book, Dictionary of Aviation Technical Terms.

### اسامی بردگان

## دومین نمایشگاه آثار نوبلگان جوانان

### سراسر کشور

حیات عالی دادان نمایشگاه آثار نوبلگان و جوانان، سر ازوسیه‌های دیو، از میان هزار اثر برنده در دومین نمایشگاه، ۱۰ تصدیق اثر را به عنوان بهترین برگزیدند، اسامی بردگان جوانان نمایشگاه دومین نمایشگاه آثار نوبلگان و جوانان سراسر کشور را به این نام اعلام کردند.

برندگان رشته اختراعات و کارهای فنی

- ۱- محمد علی طاهری (نمایشگاه) ۱۰ - حسن عزیزی (نمایشگاه) ۱۱ - حسن عزیزی (نمایشگاه) ۱۲ - حسن عزیزی (نمایشگاه) ۱۳ - حسن عزیزی (نمایشگاه) ۱۴ - حسن عزیزی (نمایشگاه) ۱۵ - حسن عزیزی (نمایشگاه) ۱۶ - حسن عزیزی (نمایشگاه) ۱۷ - حسن عزیزی (نمایشگاه) ۱۸ - حسن عزیزی (نمایشگاه) ۱۹ - حسن عزیزی (نمایشگاه) ۲۰ - حسن عزیزی (نمایشگاه)

برندگان رشته ادبیات

- ۱- آرشاد حسینی (نمایشگاه) ۲- علیزاده (نمایشگاه) ۳- علیزاده (نمایشگاه) ۴- علیزاده (نمایشگاه) ۵- علیزاده (نمایشگاه) ۶- علیزاده (نمایشگاه) ۷- علیزاده (نمایشگاه) ۸- علیزاده (نمایشگاه) ۹- علیزاده (نمایشگاه) ۱۰- علیزاده (نمایشگاه) ۱۱- علیزاده (نمایشگاه) ۱۲- علیزاده (نمایشگاه) ۱۳- علیزاده (نمایشگاه) ۱۴- علیزاده (نمایشگاه) ۱۵- علیزاده (نمایشگاه) ۱۶- علیزاده (نمایشگاه) ۱۷- علیزاده (نمایشگاه) ۱۸- علیزاده (نمایشگاه) ۱۹- علیزاده (نمایشگاه) ۲۰- علیزاده (نمایشگاه)

برندگان رشته ورزشی

- ۱- علیزاده (نمایشگاه) ۲- علیزاده (نمایشگاه) ۳- علیزاده (نمایشگاه) ۴- علیزاده (نمایشگاه) ۵- علیزاده (نمایشگاه) ۶- علیزاده (نمایشگاه) ۷- علیزاده (نمایشگاه) ۸- علیزاده (نمایشگاه) ۹- علیزاده (نمایشگاه) ۱۰- علیزاده (نمایشگاه) ۱۱- علیزاده (نمایشگاه) ۱۲- علیزاده (نمایشگاه) ۱۳- علیزاده (نمایشگاه) ۱۴- علیزاده (نمایشگاه) ۱۵- علیزاده (نمایشگاه) ۱۶- علیزاده (نمایشگاه) ۱۷- علیزاده (نمایشگاه) ۱۸- علیزاده (نمایشگاه) ۱۹- علیزاده (نمایشگاه) ۲۰- علیزاده (نمایشگاه)

## دومین گزارش از نمایشگاه آثار نوبلگان جوانان سراسر کشور

\* گفتگوی «مهر» با محمدعلی طاهری برنده نخست نمایشگاه در رشته اختراعات

### افزایش امکانات، تنها راه پرورش استعدادهاست

**محمدعلی طاهری در کنار هواپیمای اختراعی**

«مهر» به هنگام برگزاری دومین نمایشگاه آثار نوبلگان و جوانان سراسر کشور، با چندین از جوانان و نوجوانانی که دستاوردهای خود در این نمایشگاه با نامهای آشنایی و محبوبیت به دست آورده‌اند گفت و شنود کرد. در این شماره مجله، شما شاهد گفتگوی است با محمد علی طاهری، برنده نخست نمایشگاه اختراعات در این رشته است.

## Part 2: Mohammad Ali Taheri's life after the realm of mysticism (October 1978)

During this period, he was trying to understand the universe and the mystery of the existence. Additional to aircrafts and research on mathematics, he was studying the stars and cosmology by making handmade telescopes.

Over time, he became more and more astonished about the formation of the universe. This continued until October 1978 that a new incidence occurred in his life. He faced with an inner evolution; thereupon, a widow from another world has opened to him which he called it the world of enthusiasm and love. Consequently, he perceived this fact that science is not the only way to discover the mystery of the universe, and there is another way. With passion, virtu, enthusiasm and astonishment, by the path of love and with enlightenment and intuition, one can obtain knowledge of the universe. In fact, our great mystics have reached the same truth as Rumi says:

ما را به چشم سر مبین      ما را به چشم سیر ببین

Entering into the world of spirituality and finding the answers of unanswered questions did not reduce his enthusiasm for perceiving the universe, and just changed its form. Since then, he continued his investigations in both science and spirituality tireless. However, his spiritual impression and thoughts was not intelligible for others, but the results and application of those researches was amazing for them.

Whether before or after mysticism, he was hardly sleeping more than 3 hours. Even though he was only a child, he was always working and studying. This was really surprising for his family and friends when they saw that he doesn't get tired.

These uninterrupted efforts have continued after Islamic Revolution and during the first years of the Iran's war our government used his technical skills and ingenuity in offering services and military purposes. He designed two types of submachine guns named, Shahab and Shafagh and prepared them for manufacturing which they had much higher quality than those day's guns. Mr. Hashemi Rafsanjani, Iranian politician, also has been talking about him in his autobiography.

۱۳۶۱/۳/۲۹  
کد مطلب: ۱۷۱۸

خاطرات روزانه آیت الله هاشمی رفسنجانی سال ۱۳۶۱ - پس از بحران

شنبه ۲۹ خرداد تمام وقت در خانه ماندم. چند ملاقات در خانه داشتم و کارها را با تلفن پیگیری کردم. گزارشها را هم از مجلس آوردند. آقای محمدعلی طاهری که جوانی با ذوق است و اختراعاتی در زمینه اسلحه دارد، آمد و گفت که مقامات وزارت دفاع رسیدگی نمیکنند. قرار شد که به وزیر دفاع معرفی شود. برای خطبههای نماز جمعه و کلاس درس مواضع [حرب جمهوری اسلامی]، مفداری از کتاب رسائل و المحججه البیضا، راجع به احتکار مطالعه و مطالب خوبی دریافت کردم. عصر محمد تقی،

بررگر ما در بهرمان آمد و گزارش کارش را داد به او و همراهش انعام دادم. میگفت که پس از انقلاب وضع مردم روستاهای بوفی خیلی خوب شده و همه راضی و وفادار هستند. احمد آقا آمد و گفت که امام مایلند، من در مجلس یا جای دیگر بر مسئله اولویت جنگ با عراق ناکید کنم. آقای [سیدحسین] موسوی تبریزی دادستان [کل] انقلاب آمد و راجع به اختلافات مقامات قضایی بحث کردیم. امام به من و آقای حامیه‌ای تکلیف کرده‌اند که به اختلافاتشان رسیدگی و اصلاح امور کنیم. آقای موسوی [تبریزی] معتقد است که شورای عالی قضایی ضعیف است و کادر مدیریت زندانها بی‌نظم است. من نسبت به برخوردهای نادرست با خانواده‌های زندانی‌ها اتمام کردم. قرار شد که رسیدگی شود. دوست فاطمی برانمان مفداری گیلان ار درخت خانه خودشان آورد. آقای [عبدانکریم] موسوی اردبیلی و آقای [محمد] امامی کاشانی تلفن کردند که من را راضی کنید، برای این که آقای امامی کاشانی از مجلس استعفا بدهد و مسئول دیوان عدالت اداری بشود؛ با اصرار آقای [موسوی] اردبیلی موافقت کردم.

Since his efforts to manufacturing the guns remained inconclusive, he decided to continue his education out of Iran. After visiting many European counties and Japan finally he stopped at Ankara, Turkey and studied at Middle East Technical University (METU) for a while.

The remarkable point is that according to his experience and interest he was expected to continue his studying on aircraft industry and mechanical engineering, but he chose environmental engineering as his study field. The reason for this choice was that he was trying to discover the macrocosm by creating telescopes before; while, it was a great opportunity for him to search in microcosm this time and find the answers for his countless questions.

After going back to his country, he founded Tiva Kian Engineering and Design Company (Registration No. 139330) with his sister and brother in law. He began to work as a creative and skilled CEO and designed and made several machines for industrial use such as mushroom production factory, wheat flour, poultry foods and so on.

During this period, he designed and produced some machines that could transport wheat flour and the poultry foods from storepit, weigh and pack them automatically for the first time in the country. Manufacturing, sale and installation cost of this device was much cheaper than those were importing to Iran from foreign countries.

In this period, after the daily works and along with managing the Tiva Kian Company, he was investigating on spirituality and it resulted in founding a spiritual path called Interuniversal Mysticism (Persian: Erfan-e-Keyhani) or Halqeh Mysticism and two complementary medicine of Faradarmani and Psymatology.

### Part 3:

Mr. Taheri represented the results of his spiritual investigation to public in 2000s; and in summer of 2006 he founded an institute called Interuniversal Mysticism Institute of Art and Culture (Halqeh) to teach Interuniversal Mysticism and two complementary medicines of Faradarmani and Psymatology. Many people, especially university students, doctors and psychologists, showed interests in this course and they welcomed it unexpectedly. Soon the small classes changed to crowded ones with over 500 students in each class and also considered by government-based

organizations. After a while it expanded and registered as “Centre of Interuniversal Mysticism” in National Youth Organization of Presidential Institution.

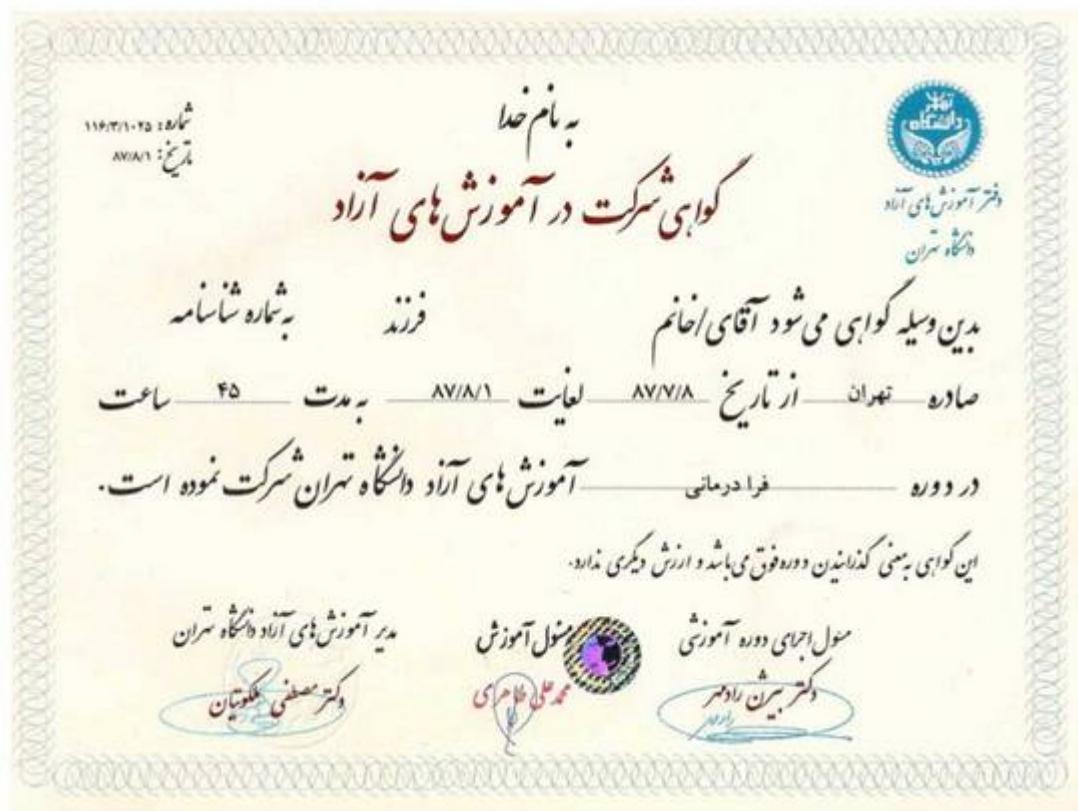

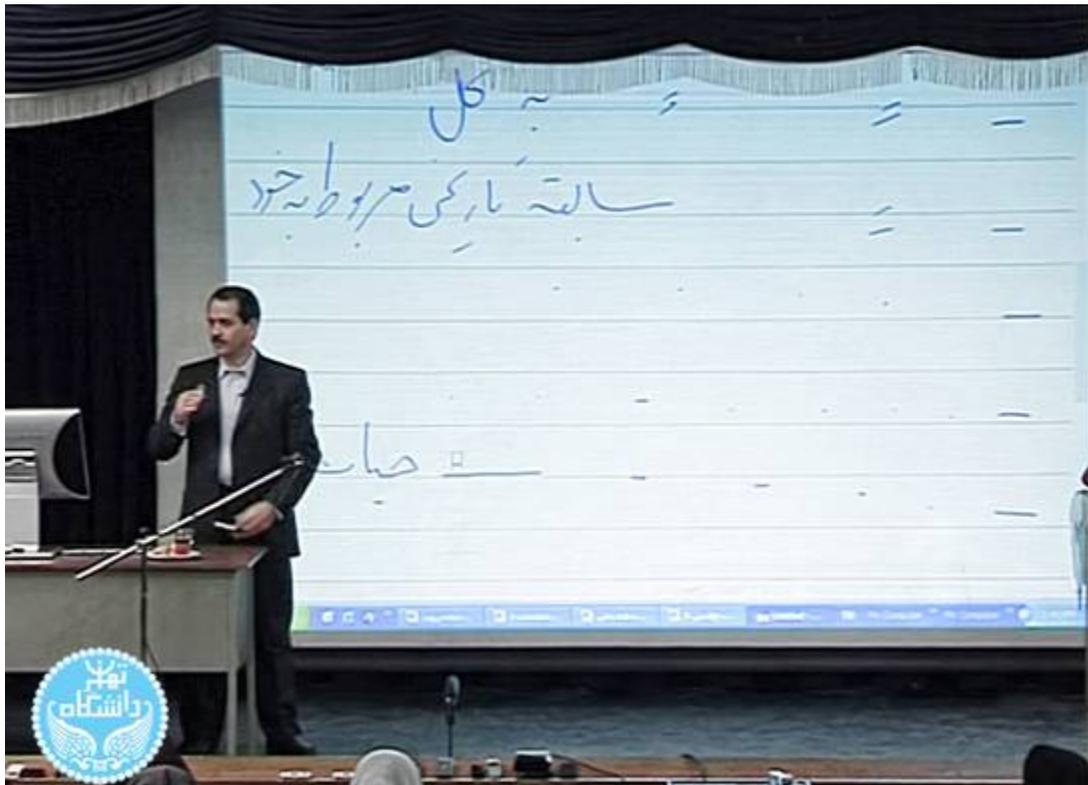

According to his own demand, all his training courses were recorded in audio-visual form and in addition, the subjects of the course published as different books with official license from Iran's government.

These courses expanded to highly credited universities of Iran such as Tehran University with Fara-Pezeshki courses in which hundreds of Medical doctors, psychiatrist and psychologist participated. Total participant for this short course were over 3500 person who received certification from Tehran University.

Tehran University by the officials of the Ministry of Health

<http://mataheri.ca/videogallery/%D9%82%D8%AF%D8%B1%D8%AF%D8%A7%D9%86%DB%8C-%D8%A7%D8%B2-%D9%85%D8%AD%D9%85%D8%AF%D8%B9%D9%84%DB%8C-%D8%B7%D8%A7%D9%87%D8%B1%DB%8C-%D8%AC%D9%87%D8%AA-%D8%AA%D8%AF%D8%B1%DB%8C%D8%B3-%D8%AF%D8%B1-%DA%A9/>

Moreover, in 2009 his Psymtology short courses were held in Iran Medical School with over 1100 students in each class. It should be noted that the subject of Psymtology is the study of the human's mind, psyche and the related problems in order to heal those disorders. In this therapeutic method medications or psychotherapy techniques are not used and the healing happens by the inner revolution of the individual.

## Chapter 2

### Publications

The published books are:

--- "Erfan-e-Keyhani [Halqeh]" (Interuniversal Mysticism) in which has been republished 7 times; each time 5 to 10 thousand copies by now.

--- Human From Another Outlook" in which has been republished 9 times; each time 10 thousand copies in Iran, and also in Lebanon by now. This book focuses on presenting the basis of the complementary medicine of "Faradarmani" and has been translated and published in English [In two different versions] two times, also an Arabic copy of it is available. Russian, French and German translations are in progress.

--- "The Human Comprehensive View on the World" which has recently been published and the English, Arabic and Russian translations are under publication.

Alongside the publication of books, some of the reports and research papers of complementary medicines of "Faradarmani" and "Psymentology" have been published in Farsi and English via seven

supplements of "Holistic Medicine" and "The Science of Medicine" Journals, which can provide a primary introduction to the functions of "Faradarmani" and "Psymentology" sciences. The first three volumes of these publications are allocated to the Case Reports about the effect of Faradarmani on different kinds of diseases and different body organs, and such presented reports are only selected samples from the vast reported results. The forth publication is a clinical study about Faradarmani effect on "Bronchiectasic patients who are candidates for lung transplant" which was performed in Masih Daneshvari Hospital in 2009-2010. The fifth publication is allocated to the Faradarmani effect on "Infertility" which is again presented as selected samples from the numerous cases. The sixth publication studies the Faradarmani effect on Cell proliferation in Laboratory conditions [in vitro] in one chapter and also Faradarmani effect on plants in another chapter. The seventh publication is considered as the first specialized Psymentology ['Psyche' + 'Mental' +Logy] supplement and studies the effect of Psymentology on behavioural disorders.

In addition to the above mentioned publications, the Interuniversal Mysticism foundation has presented three other publications on the concepts of Ideology and insights:

- "Anthology of Articles" publication in the periodical "The Culture of Education" which includes the published articles by Dr Mohamad Ali Taheri through Iran's national publications during 2009.
- "Human Worldview" 2010 April publication of the monthly "Rah-e-Kamal (The way to the human spiritual growth)" journal.
- "Erfan[Mysticism] from another Outlook" 2010 June paper of the monthly "Rah-e-Kamal (The way to the human spiritual growth)" journal.

### Research Projects

Members of research groups of this organization with the necessary scientific and executive eligibility, have done extensive researches by benefiting from the teachings of "Faradarmani" and "Psymentology" founder -Dr Master Mohamad Ali Taheri- and in recent years; by focusing on these complementary and alternative medicines have been outstandingly active in presenting articles in medical and para-medical [medical related healthcare] seminars and congresses including the second national congress of complementary and alternative medicine. The Research groups welcome any cooperation in any scientific and formal research project that would evaluate these treatment methods and their range of applications.

### Examples of performed researches on Faradarmani

- A research with the title of "The Study of Faradarmani Effect on the Course of

"Asthma Treatment" was done as a thesis for a Medical Degree Doctorate Award; at Shahed University which was defended in summer of 2009 (Registration number P 389/77).

-Project of "The effect of Faradarmani on pain relief in patients who have had a surgical operation" in surgery ward of Tehran Imam Khomeini Hospital in 2008- 2009. The results indicate the general satisfaction of 110 patients of this ward and the decrease of Morphine demand in 70% of patients.

- Project of "The study of Faradarmani effect on "Bronchiectasic" patients who are candidates for lung transplant" which was performed in Masih Daneshvari Hospital in 2009-2010. Outstanding results were achieved and the statement of the director of the transplantation ward along with some recovery reports on patients who took part in this project; are published in the fourth specialized Faradarmani supplement by "Holistic Medicine" and "The Science of Medicine" Journals publications.

- The project of "Faradarmani effect on the proliferation of skin tissue primary cell culture" in Laboratory conditions (in vitro) in "Iran National Centre of Genetic and Bioresources Bank" was performed in 2010. The results indicate the positive effect of Faradarmani on cells proliferation of the tissue under the experiment, and take in to account the application of this treatment method in human and animal skin repair.

#### **Examples of ready and ongoing research projects of "Medicine" and "Psychology, Psychiatry" specialist groups**

-Medical research projects of "Study the Effect of Faradarmani" on:

Patients who undertake Dialysis, respiratory complications in patients who are affected by chemical weapons in war, type 1 and 2 Diabetes, fatty liver, Hypothyroidism and Hyperthyroidism, Asthma, MS, Essential Hypertension, Pulmonary Fibrosis, COPD, PPH, AIDS and several other cases.

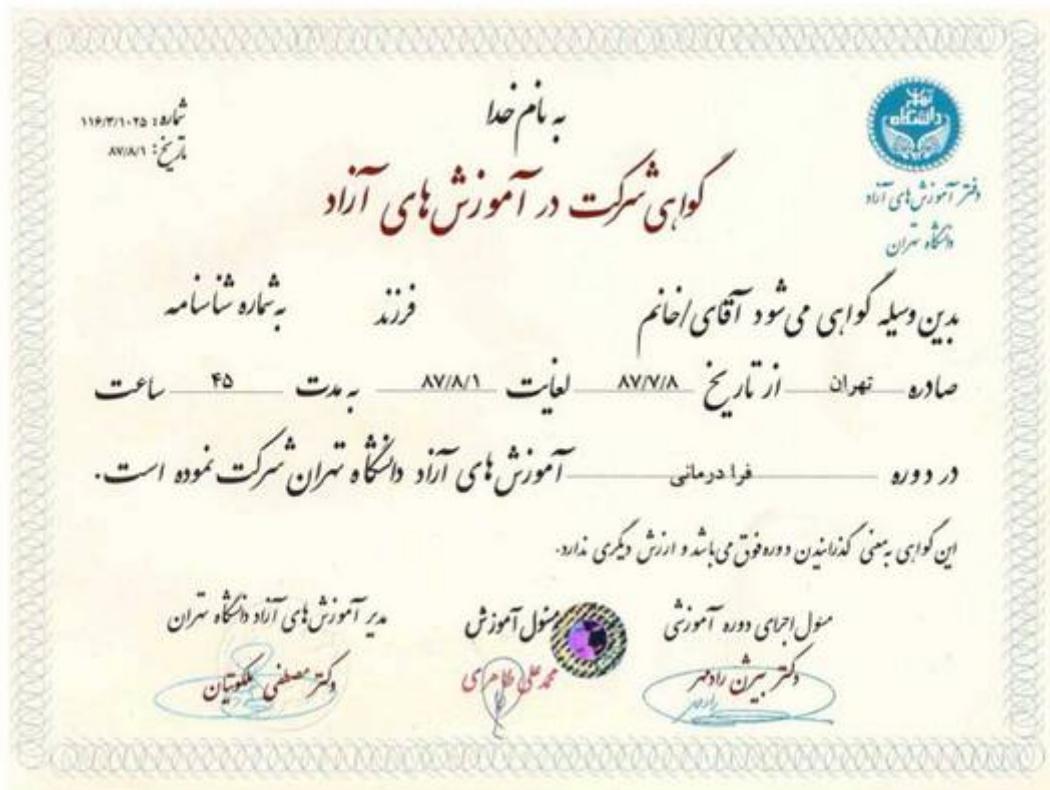

-Psychology and Psychiatry research projects of "Study the Effect of Psymmentology" on:

Patients with positive signs of Schizophrenia in selected hospitals of Tehran in 2010, signs of primary depression, signs of social phobia, signs of hyperactivity disorder ADHD in city of Karaj clinics in 2010, signs of hyperactivity disorder ADHD in male students of city of Karaj in 2010 and several other cases.

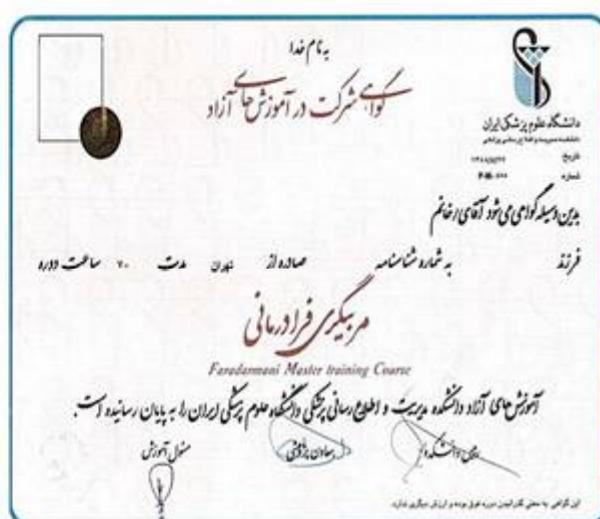

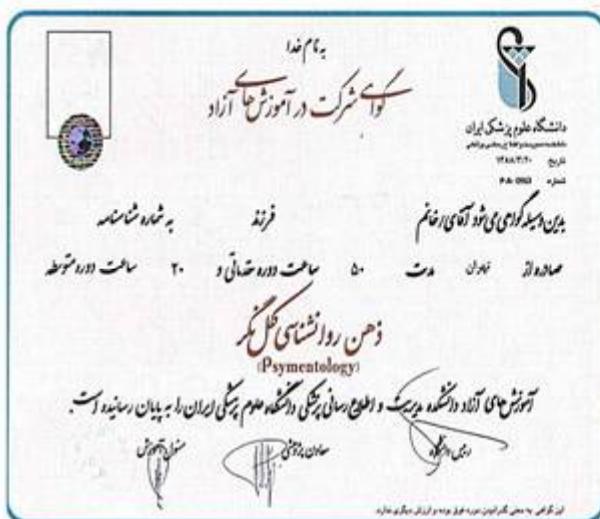

#### **Scientific and Academic Bases of "Faradarmani" and "Psymmentology"**

Upon signing an agreement for scientific cooperation with "The office of open educations in Tehran University", "Iran University of Medical Sciences", " University of Traditional Medicine of Armenia "and" The International Academy of Eco-Energy of Azerbaijan Republic "; and holding Faradarmani and Psymmentology courses in these centers, certificates have been awarded to the participants. Such courses are examples of delivery of such treatment methods in scientific and academic centers.

A. Signing a contract for scientific cooperation for delivery of Faradarmani and Psymmentology complementary medical courses in the centre of open educations of Tehran University (according to an official agreement) and issuing participation certificates to the pupils.

B. Signing a contract for research, scientific and educational cooperation with The University of Medical Sciences and Tehran Health and Treatment Services (previously known as 'Iran' University) and issuing certificates for taking part in open education of these complementary medical courses and also awarding Master of Faradarmani Certificates from this university.

C. A contract signed between Interuniversal Erfan (Halqeh) Institute and the University Of Complementary Medicine Of Armenia. After three years of continual studies in this university which is a member of the European Union, these two subjects were recognized as Iranian complementary medicine. Currently, this university has established faculties for these subjects and has began educational and research activities, and also issuing certificates, registering students and issuing degrees in this field.

D. In an agreement between Interuniversal Mysticism (Halqeh) Institute and the International Ecoenergy Academy of Azerbaijan, a contract was signed with the

Scientific Manufacturing Association (Gunesht) with the aim of more cooperation in research in the complementary and alternative treatment methods of Faradarmani and Psymetology (mental-psychology). According to the scope of this contract, the two sides agree to have extensive research cooperation which will lead to issuing educational degrees in various stages and up to PhD.

## **The Scientific Theories of Mohammad Ali Taheri**

Mohammad Ali Taheri has offered novel theories in the past 3 decades of research in various fields which have proved useful to researchers all across the world. Some of his theories include:

1. Interuniversalism (the basis of his theories on insight, treatment and science)
2. “Consciousness Bond” or the “Consciousness Bond of the Parts” theory (the basis of Iranian complementary treatment methods of “Faradarmani” and “Psymentology”)
3. Consciousness Field Theory
4. Consciousness Field Behavior Theory
5. Consciousness Immunity Theory
6. Consciousness Pollution Theory
7. Disproving the role of genetics in incurability
8. Reparability Theory
9. Brain Function Theory
10. Consciousness Illnesses Theory
11. Consciousness Copy Theory
12. Consciousness Metastasis
13. Vital Force Sub-DNA Reactors
14. Information Transfer Theory
15. Universal Internet, Switching and Recovery Theory
16. Theory of Faradarmani and Consciousness Repair in the body’s software which has been proven by medical research.
17. Theory of Consciousness Coherence and its effect on organ transplant acceptance.
18. Theory of Inorganic Viruses as agents of mental and psychological illnesses.
19. Theory of Psymentology or mental-psychology with an Interuniversalist viewpoint which is a complementary medicine for treatment of mental and psychological illnesses.
20. Adjacent Worlds Theory
21. Universal Coherence Theory and defining illnesses that arise from incoherence

22. Corporeal Coherence Theory and defining illnesses that arise from incoherence
23. Secondary Nervous System Theory
24. Parallel, Identical and Non-Identical Worlds Theory
25. Zehni (Mind) and Farazehni (Meta-Mind) Receptors Theory
26. Theory of distinguishing between IQ (intelligence quotient), MQ, and WQ (wisdom quotient) and defining the core of intelligence, logic and memory.
27. Theory of Consciousness and Anti-Consciousness, Axis of Existences and identifying it through reverse playback of the voice.
28. Theory of Ion and Electron Exchange in the human body.
29. Theory of the body of the Collective Soul and the positive effects in the Collective Soul.
30. Theory of Addiction and Rehabilitation
31. Theory of Behavioural Pathology and practical methods of solving classical family and social issues.
32. Mono-Form Universe Theory

## Honorable Science Degrees

1. After three years of research on Iranian complementary and alternative medicine (Faradarmani and Psymentology), the University of Traditional Medicine of Armenia has conferred an honorary doctorate degree in the field of complementary medicine to the founder of these subjects Master Dr. Mohammad Ali Taheri (20/10/2010).

Upon the recommendation of the Scientific Council of International Ecoenergy Academy dated on 15 January 2009 (Protocol N: 059) hereby confers on

# Mohammad Ali Taheri

IEA N 018

Baku  
Azerbaijan Republic

The degree of  
**HONOURABLE**  
DOCTOR OF PHILOSOPHY (Ph.D)  
In  
Complementary and Alternative  
Medicine

## DIPLOMA

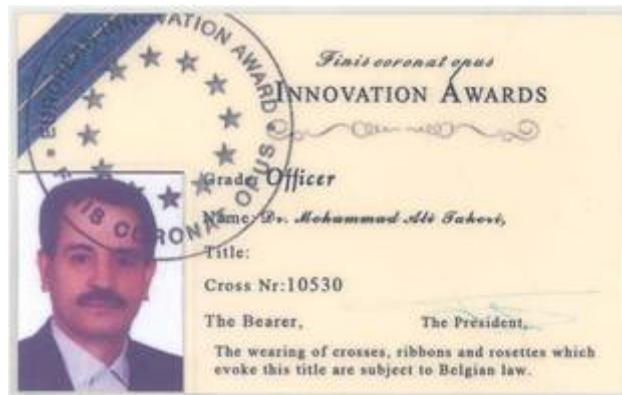

**Honorable Doctor of Philosophy in Complementary and Alternative Medicine**

For the first time an Iranian scholar was succeeded to receive his second Honorary Doctorate from an academy in Azerbaijan republic. After dedication of Honorary Doctorate from International Ecoenergy Academy of Azerbaijan republic in 2009 in Complementary and alternative medicine to Dr Mohammad Ali Taheri- founder of the complementary medicine of Faradarmani nd Psymtology- from Islamic republic of Iran; in 10th of November 2010 for the second time this outstanding scientist after submitting his scientific articles and research based books as scientific resources for these complementary and alternative medicine methods, has succeeded to receive an Honorary Doctorate from the academy of Eco-Energy of Azerbaijan republic in Baku.

3. Medal of scientific research and the degree of "OFFICER" were rewarded by the Royal Palace of the capital of the European Union (Brussels, Belgium) and the Mayor of Brussels to Master Dr. Mohammad Ali Taheri for founding the Iranian complementary and alternative medicines, Faradarmani and Psymtology. (It is noted that the degree of OFFICER is ranked higher than the degree of KNIGHT at the Royal Palace of the European Union capital.)

It is more than three decades since the foundation of Inter universal Gnosticism (Erfan Halqeh) and its subdivisions including the two complementary medicines of “Faradarmani” and “Psymatology” by Dr Master Mohamad Ali Taheri in Iran. Currently about 20000 trainers are teaching the concepts of this pathway worldwide and there are millions of people who are familiar with and users of its practical applications.

Experience gained through the practical part of this Gnosticism -specially the complementary medical methods of “Faradarmani” and “Psymatology”- has brought about outstanding results, and due to the unique effectiveness of these methods among different types of complementary medicines; it has attracted the attention of many medical doctors and health service professionals through the past decade.

Currently extensive research is going on by the professional groups of scientists, medical doctors, and psychologists about the effects of these two complementary medical branches on humans, animals, and plants even in Laboratory environment and at the cellular molecular level. Numerous scientific articles and reports have been published about the research results and the effectiveness of these methods on different kinds of diseases. Now, Faradarmani and Psymatology fields of activity have expanded to research groups of “Cellular- Molecular” , “Veterinary” and “Dentistry”.

In Faradarmani: treatment of physical, psychological, and psychosomatic (involves both psych and „soma=body“) diseases are considered, whilst Psymatology considers the treatment of mental, and mentosomatic („involves both mental =mind“ and“ soma=body“) illnesses in an exceptional way. These methods are described based on the theory of “The Consciousness Bond” or “Parts having consciousness in common”. According to this theory, when a link is established between the “whole” consciousness (The Inter universal Consciousness) and the consciousness of a “part” [of human being]; the whole consciousness –via the consciousness of the mind- is capable of correcting, repairing and curing the mind, psyche and body thus healing and recovery will take place. Consciousness of the “parts” includes the consciousness of countless different components which comprise human being. The “whole” consciousness is the awareness and intelligence leading the universe.

It is necessary to note that research fields and activities of this organization are not limited to Complementary and Alternative Medicine; and also in other fields such as Gnosticism, Philosophy, Social sciences, Physics and Astronomy intensive researches are taking place on the proposed theories in such areas. Master Mohamad Ali Taheri has introduced these methods and education publishing books and articles, holding educational classes and also training instructors for this science through the past two decades.**26**

14. The below awards were presented by the European exhibition of creativity and innovation (Euro Invent 2011) of Romania, held by Gheorghe Asachi Technical University, Alexandru Ioan Cuza University and FIR:

- Gold medal of Euro Invent 2011 for the foundation of Faradarmani and Psymontology
- Special award of inventors (FIR) for the foundation of Faradarmani and Psymontology
- Special diploma and scientific order of Leonardo Da Vinci for the promotion of creativity in treatment.

**Special award of inventors (FIR) for the foundation of Faradarmani**

**Gold medal of Euro Invent 2011 for the foundation of Psymontology**

**Gold medal of Euro Invent 2011 for the foundation of Faradarmani**

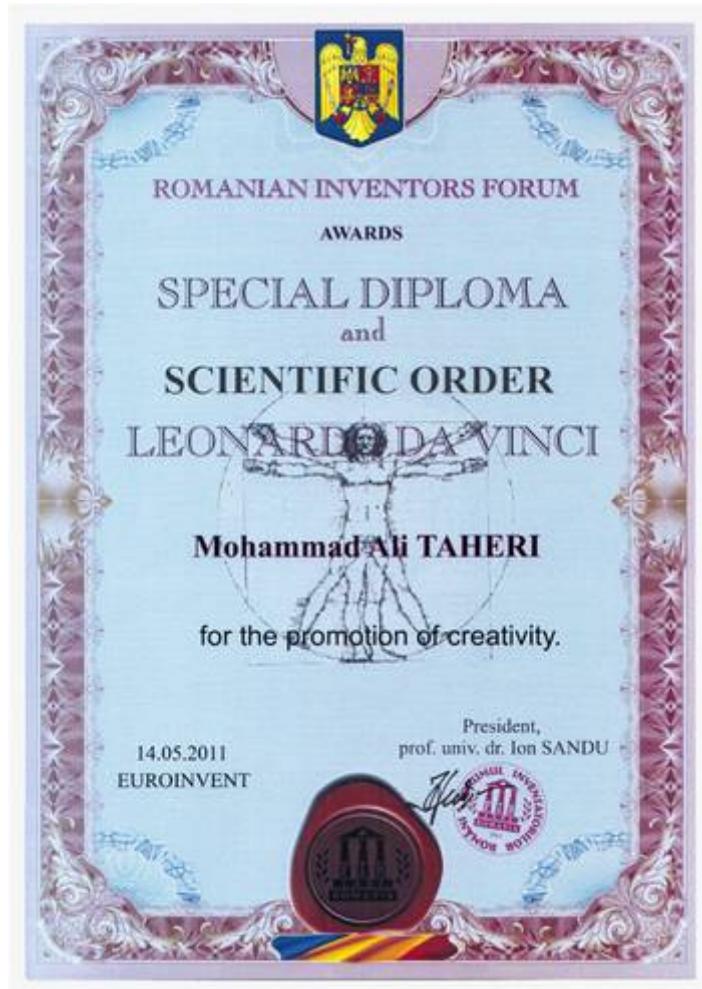

Special award of Euro Invent 2011 for the foundation of Psymontology

**Special diploma and scientific order of Leonardo Da Vinci for the promotion of creativity in treatment.**

## Participation in Scientific Conferences

- 1- Faradarmani Seminar – Faculty of Psychology, Tehran University
- 2- Complementary & Alternative Medicine Conference – Isfahan University of Medicine. Four speeches and 18 posters on Faradarmani and Psymentology researches were accepted and published in media
- 3- Joint conference of Seminaries and Co-operation Head Quarters of Ministry of Education
- 4- International Congress of Supportive & Palliative Cancer Care – Faculty of Medicine, Shahid Beheshti University. The posters were accepted and the research was presented for defense.
- 5- International Psychology Conferences – Antalya, Turkey
- 6- Introducing Erfan Keyhani & Faradarmani – Imam Khomeini Research Center- 2007
- 7- 5th Middle East Cardiovascular Congress – Providing posters, holding workshop and managing booth in congress exhibition.
- 8- 17th Domestic congress & 2nd International Congress of Fertility & Infertility Specialized- Academic Association of Iran
- 9- “Life Quality & Health Promoting” Conference – Zahedan Medical University

### Chapter 3

In 2009, while Mr. Taheri's works were appreciated by Iranian government, media and high ranking Ministry of Health officials, a group connected to the Iranian Revolutionary Guard Corps (IRGC) was suspicious of his popularity and considered him a threat to the national security, should he decide to establish an opposing political movement. Henceforth they decided to counter his activity.

In June 2009 his classes held in Iran's medical science university was coincided with the presidential election in which the security forces were monitoring every large gathering.

Since Mr. Taheri's classes had more than 1000 participating students, the university security department (under control of Security Services (IRGC) complained of not being able to guarantee security of the classes and therefore a decision was made to stop his classes and resume after the election. However, after the presidential election, the security forces never allowed the classes to resume. Nevertheless, Mr. Taheri started his research with his small team but did not hold any classes there after

#### Confinement

In March 2010 in a discussion session which was held among some Islamic clergies including Dr. MansouriLarijani, an expert in Islamic mysticism and commander of the IRGC at the time and Mr. SharifiDoost, representative of the Supreme Leader in universities; a decision was clearly made to get rid of (eliminate) Mr. Taheri.

<https://www.youtube.com/watch?v=cERYSS4j88U>

Following this meeting, IRGC intelligence service arrested Mr. Taheri for 67 days and kept him in solitary confinement on the wrongful charge of acting against national security.

With valuable efforts of his lawyer, Ms Shadi Rasadi, it was proved that he was wrongfully accused and Mr. Taheri was released with 100 million Toman bail and condition of neither him nor his students can teach the Interuniversal Mysticism courses. However, he was granted the permission by court to continue his research on the Iranian complementary medicine: *Faradarmani* and *Psymatology*. Despite their legal right, when the researchers visited hospitals, academic and research centres, they could not carry their granted right; they were warned and prohibited by a certain group and/or authorities not to continue further collaboration with Mr. Taheri and his associates, and consequently denied access to these facilities.

As a result, Mr. Taheri 's students only could continue their research on various branches of *Faradarmani* and *Psymatology* outside of Iran, resulting in three Honorary Doctorates degrees, and several international awards and medals, presented to Mr. Taheri in April 2011 which was broadcasted by national TV channels (IRIB) and covered in several newspapers in Iran. Such media attention angered Iran's IRGC and lead to the arrest and imprisonment of Mr. Taheri within 24 hours on 12 April 2011 based on no legal grounds. However, they verbally and unofficially stated the reason of his arrest is: "What do we have to do if we do not want you to get awards for this country?"

Afterward, within 22 days and through national television and public media (which are under the control of revolutionary guards), they started his character assassination by tarnishing his reputation through false accusation and finally created a warrant for his arrest based on a threat to

National Security, heresy, corruption, blasphemy, acquiring illegal wealth and the illegal usage of academic titles.

The method and the process of interrogation of Mr. Taheri by prison's intelligence unit of IRGC, has been against the human rights law. Prime examples can be: no right of visitation or calls to his lawyer or family members for months at a time, solitary confinement, taking him to the execution chamber at midnight or early morning and threatening him with immediate execution based on false court orders. By this method of torture they tried psychological warfare in order to take a force confession of him. At the same time they were harassing and threatening his family members, children, and siblings for the purpose of confession. Continuous threat and psychological pressure on family members has resulted in him blaming himself for his family safety and wellbeing and consequently attempting suicide on numerous occasions.

These thousands (1000s) of interrogation sessions in the form of psychological torturing have been physically violent to the point of damaging his eyesight, with no doctor visitation rights for months at end.

On October, 30<sup>th</sup> 2011, through three closed-door court sessions at the 26<sup>th</sup> Division of Islamic Revolutionary court, under the ruling of the judge Pir Abbassy, Mr. Taheri was convicted of:

1. Insulting to Islamic values.
2. Committing "harm" (sinful) act which is considered a crime against public prudence and morality in the Islamic penal code.
3. Illegal Medical Practice.
4. Production and distribution of illegal audio-visual works and activities.
5. Illegal acquisition of properties.
6. Illegal use of academic titles.

Based on above mentioned false charges, the court sentenced him to five (5) years imprisonment, seventy four (74) lashes, and 9,056,000,000 Rials fine (approximately \$850000.00 with the exchange rate at the time).

The verdict was appealed by Mr. Taheri and his lawyers (Mr. Ghanbari, Mr. Kazemi, Ms. Rassadi) but the Appeal court rejected the appeal and reaffirmed the verdict. The appointed Judge for the purpose of imposing further pressure on Mr. Taheri convicted him based on some other false allegations to justify and extend the time to deny Mr. Taheri of access to a legal aid or a lawyer. Therefore, until the next court hearing Mr. Taheri was still denied access to a lawyer. This acquired method by the judge was for the purpose of giving the authorities some additional time, since his ruling at the time was not justifiable for the conviction of "corruption o earth". Therefore, with the additional time, the authorities were in the position of further discussion among themselves for buying false witnesses and further public humiliation of Mr. Taheri, who, by then had more than 2 million supporters globally, and by then had started to have organized gatherings through digital media condemning the Iran's injustice against their beloved mentor, peaceful teacher, and fellow intellectual.

On March 20, 2013 after 22 months without any connection with the outside world, for the purpose of dental surgery, Mr. Taheri was given a six (6) day conditional release. During that time it became apparent to his supporters that due to his continuous physical torturing and violence and numerous letters to the authorities in- and- outside of prison on the prisoners' conditions, global human rights office being one. Mr. Taheri went on a hunger strike shortly after, which along with the daily torturing severely damaged his health.

During Mr. Taheri's six days release from the prison for dental surgery, many of his supporters and students visited him. This demonstration of his popularity put more pressure on him by IRGC in the prison resulting to Mr. Taheri going on hunger strikes again and again in opposing to his treatment and his fellow prisoners under constant torturing. The recognition of his unjustifiable state by the international community created another level of pressure on Mr. Taheri to the point of his wife imprisonment for two weeks. Despite of these pressures, he refused to give false confession. At this point which was January 2014, the Islamic Revolutionary court convicted him of the Capital Crime, "corruption on earth" or "spreader of corruption that threatens social and political well-being of the country and the enemy of God on Earth.

On December 2014, after four (4) years of suffering from psychological and physical torturing and being convicted of the capital crime from the unjustifiable allegations, Mr. Taheri went on hunger strike on 6 December 2014 for 12<sup>th</sup> time in order to be allowed to have a lawyer .On 26 December 2015 the government allowed him to hire a lawyer.He appointed Mr. Alizadeh Tabatabaei as a lawyer and stopped his hunger strike.

On the court date of February 25, 2015, more than three thousand people had gathered in front of the court house in silence, while being beaten and harassed by the IRGC outside of the court house with metal bars, waiting for the ruling of the court by Mr. Ahmadzadeh, the appointed judge. However, the judge decided to postpone the court ruling to a later date.

On March 11, 2015 the court resumed at the 26<sup>th</sup> Court Division with the same judge and the District Attorney for only two hours and due to the excessive unsubstantiated allegations and multitude of unsupported convictions, the court did not have enough time to investigate and rule accordingly. Therefore the court was postponed once again.

On April 29, 2015, the third court was in session for the purpose of ruling only without the justification or review of the facts. However, after 8 hours of well substantiated evidence and arguments provided by Mr. Taheri's Lawyer, the judge decided that due to the amount of facts at hand and the strong arguments in favor of Mr. Taheri, the court could do his final ruling based on written arguments, evidences, and the fatwas – the opinion of well-known and respected Islamic Republic scholars about the claims and the teachings of Mr. Taheri.

On 1 August 2015, Mr. Taheri's lawyer informed of Mr. Taheri's death sentence for the charge for the "corruption on earth" but Mr. Taheri has not been informed of the verdict himself.

On 8 August 2015 Mr. Saeed Khalili as a new lawyer joined the team of lawyers for the Appeal Court.

On 18 August Mr. Taheri's lawyers submitted the appeal letter to the court and waiting for the appeal court.

On 13 August Mr. Taheri decided to go on hunger strike to express his dissatisfaction of the following:

1. He has not been informed of death sentence himself, only his lawyer has been informed.
2. The judges have not considered his defences for his case and have completely disregarded his arguments.
3. The judges haven't been able to prove a crime for Mr. Taheri and the death sentence has merely been based on the verdicts (fatwas) of three high rank religious clergymen:  
Ayatollah MakaremShirazi  
Ayatollah Safi Golpayegani  
Ayatollah AlaviGorgani
4. His lawyers are in need to visit him, but they are not permitted to do so.
5. He has not given a pen and paper to write his defence for the appeal court which would be his last deem chance.
6. His prosecutor Mr. Rahimi has not submitted Mr. Taheri's 250 pages defence to his file.

Many international authorities and organizations have condemned this death sentence including Mr. Ahmed Shaheed, The United Nations Special Rapporteur on the situation of human rights in Iran:

"It is unacceptable and a clear violation of international law for an individual to be imprisoned and condemned to death for peacefully exercising his rights to freedoms of religion and of expression. Mr. Taheri has been handed a death sentence for his spiritual beliefs and teachings."

The Special Rapporteur noted that the UN opposes the use of death penalty in all circumstances, and recalled that Iran is a party to the International Covenant on Civil and Political Rights. "The Covenant protects freedom of religion or belief and provides that countries which have not abolished the death penalty may only impose it for the most serious crimes, that is, those involving intentional killing, and only after a fair trial, among other safeguards," he explained. "Mr. Taheri's actions were peaceful and constitute protected activities under international human rights law," the human rights expert said. "The rights protected by international law encompass the right to have and express any belief that one chooses, regardless of whether that expression is through private actions or public teachings," he stated. "Condemning a person to death for expressing their beliefs is unacceptable."

The Canadian Association for Rights and Truth called this death sentence "an institutionalized hate for science, knowledge, and freedom in Iran".

US Department of State also published a press statement calling the death sentence "an extreme violation of Taheri's rights":

"It is our understanding that Taheri, who has been held in Evin Prison in solitary confinement since his October 2011 conviction on charges of "insulting Islamic sanctities," received this sentence in response to his peaceful exercise of his rights to freedom of religion and freedom of expression. To sentence a citizen to death for exercising these freedoms represents an extreme violation of his rights. We call on the Iranian Government to rescind Taheri's death sentence and accord him full due process and to uphold freedom of expression and belief for its citizens."

The United Nations Special Rapporteur on the situation of human rights in Iran, Mr. [Ahmed Shaheed](#), urged Iranian authorities to immediately commute the death penalty handed down to Mr. Taheri:

“It is an unacceptable and a clear violation of international law for an individual to be imprisoned and condemned to death for peacefully exercising his rights of freedoms of religion and expression.”

[Mr. Zeid Ra’ad Al Hussein](#), the United Nations High Commissioner for Human Rights said:

“I call on the Iranian authorities to immediately withdraw the charges against Taheri and ensure his unconditional release. For an individual to be sentenced to death for peaceful exercise of freedom of expression, religion or belief is an absolute outrage – and a clear violation of international human rights law.”

Lord Carlile of Berriew CBE QC, a Liberal Democrat member of the House of Lords and co-chair of the British Parliamentary Committee for Iran Freedom called this death verdict “a political tool designed to create an atmosphere of fear”

Other authorities condemning Taheri’s death sentence include: [Andrew Saxton](#) (Member of Parliament of Canada, North Vancouver, CPC); Amnesty International; Helmut Gabel (human rights activist in Germany); [Sam Dastyari](#) (Australian senator, representative of New South Wales); Nasrin Sotoudeh (Iranian human right activist and lawyer); [Canadian center for victims of torture](#).

Canadian Association of Rights and Truth ([CART](#)) called this death sentence “an institutionalized hate for science, knowledge, and freedom in Iran”: Canadian Association of Rights and Truth expresses the profound indignation of its members against the death verdict handed down to Mohammad Ali Taheri, because the death penalty not only represents an abomination in itself, as well as a perversion of the justice system, but also, in view of this particular verdict, an institutionalized hate for science, knowledge, and freedom in Iran. We, at the Canadian Association for Rights and Truth, urge the Iranian authorities to put an end to the suffering of innocent citizens in Iran, to release all prisoners of conscience in that country, and to act in accordance with international standards on human rights issues.”

Amnesty International in its recent letter calls for [urgent action](#) to quash death penalty for Mr. Taheri. It is the third call from Amnesty International about Mohammad Ali Taheri’s case since 2014.

Note:

It is important to point out that at this moment the faith of Dr. Taheri and his life is in the hand of the Supreme Court of Iran. Unfortunately the Supreme Court of Iran doesn't have an email account and the only way to communicate with them is through sending regular mail. To assist and help in saving Dr. Taheri's life, Amnesty International Canada, has prepared a petition to be signed by citizens of communities around the world. Amnesty International Canada then will gather all mail and will send it directly to the Supreme Court of Iran.

If you are interested in saving this Inventor, researcher and author’s life, please follow the link below and where you can find a printable version of the petition which has to be filled out and sent to the given address as soon as possible:

Link: [http://www.amnesty.ca/sites/default/files/mohammad\\_taheri\\_petition.pdf](http://www.amnesty.ca/sites/default/files/mohammad_taheri_petition.pdf)

Address:

Amnesty International

312 Laurier Avenue East, Ottawa, ON K1N 6P8

\*Please note for the purpose of this petition only your name, city, country, and signature are needed and your email and phone number are to be given if you want Amnesty International Canada to contact you about its updates or its news.
