ECESCON 2016

On April 22nd, 23rd and 24th 2016 some of the nation's brightest minds and newest talents will meet in Chania at the Technical University of Crete for the annual Electronic and Computer Engineering Student Convention. The ECESCON has been held in different cities around Greece since 2007 and keeps the community of engineering students up to date and connected with the industry.

JR Technologies is excited to announce our sponsorship and support for ECESCON's first visit to Chania. As a forerunner in the airline distribution industry, JRT will present to the students at ECESCON new ideas and technologies that enable personalized B2B and B2C relationships as well as discussing challenges we face and how we cope with them. By showcasing our innovative technology to this group, we hope to inspire conversation, attract new recruits and encourage creative dialogue with engineers and students alike.

Here at JRT you will find an energetic and focused group of individuals that work together in a dynamic, challenging environment. With a combined experience of 60+ years in the field, JRT's executive team has the knowledge and skill to lead the industry. Expect to apply your studies, think outside of the box and help create the future of the airline distribution industry.

Sound like the perfect fit for you? Visit our booth and find out how you can join us!
