# Financial Services Reports

# Forecasts for the financial services industry in 60 countries worldwide

The Economist Intelligence Unit's **Financial Services Reports** deliver complete 5-year outlooks of the financial services sector globally. The service enables institutions to assess the risks and opportunities presented across a variety of 60 countries worldwide, and the implications of industry developments for their organisations.

The Financial Services Reports help you to answer vital industryspecific questions around long-term trends that influence important decision-making and economic outcomes for businesses:

- What is the market environment for corporate and consumer financial services in each country?
- Are emerging markets still the main growth area for financial services companies?
- How can we best prepare for tackling challenges and regulatory risk?
- Am I able to forecast effectively to ensure that my business networks are in the right places now, next year or in 5 years' time?

The service combines up-to-date events analysis, economic and political developments, global and regional trends, and market- or competitor-specific factors that are likely to have an impact on the financial services sector in the future.

## **Use Financial Services Reports to:**

- Assess the financial services market world-wide.
- Measure the relative importance of international financial flows within a country.
- Assess the health of any given country's banking sector.
- Understand the key trends in insurance, fund management and securities markets.

## A unique forecasting methodology

The reports are driven by the country-based macroeconomic forecasts for which The Economist Intelligence Unit is renowned. Each report focuses on sectoral and subsectoral demand in the world's major economies, and are updated quarterly, semi-annually or annually depending on the country (see schedule at the end). Our team of 160 in-house country and industry analysts monitor our baseline forecasts, adjusting the outlook where necessary and taking into account our extensive local knowledge of the market. The Economist Intelligence Unit ensures that robust econometric modelling techniques and deep country and industry expertise combine to provide the best possible forecasts.

# Financial services sub-sectors
