

The following Voluntary Product Accessibility information refers to Final Cut Server for Mac OS X. For more information on the accessibility features of Mac OS X and Final Cut Studio, visit Apple's accessibility web site at <http://www.apple.com/accessibility>

Summary Table  
Voluntary Product Accessibility Template

<b>Criteria</b>	<b>Supporting Features</b>
§ 1194.21 Software applications and operating systems.	<b>Please refer to the attached VPAT</b>
§ 1194.22 Web-based intranet and internet information and applications.	<b>Not Applicable</b>
§ 1194.23 Telecommunications products.	<b>Not Applicable</b>
§ 1194.24 Video and multimedia products.	<b>Not Applicable</b>
§ 1194.25 Self contained, closed products.	<b>Not Applicable</b>
§ 1194.26 Desktop and portable computers.	<b>Not Applicable</b>
§ 1194.31 Functional performance criteria.	<b>Please refer to the attached VPAT</b>
§ 1194.41 Information, documentation, and support.	<b>Please refer to the attached VPAT</b>

## Subpart B -- Technical Standards

### § 1194.21 Software applications and operating systems

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Partially supported	Some shortcuts are accessible, and some functions can be reached using the keyboard.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically	Not supported	

<p>exposed so that assistive technology can track focus and focus changes.</p>		
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to assistive technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	<p>Partially supported</p>	<ol style="list-style-type: none"> <li>1. Images that are used to label controls also are identified through tool tips.</li> <li>2. Some elements, such as checkboxes, are identified by VoiceOver as checked or unchecked.</li> </ol>
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	<p>Supported</p>	
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>Not supported</p>	<p>The VoiceOver "speak text" function works when the mouse is passed over elements that have been explicitly labeled.</p>
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>Supported</p>	

<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>n/a</p>	
<p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Not supported</p>	
<p>(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.</p>	<p>Supported</p>	
<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supported</p>	
<p>(l) When electronic forms are used, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Partially supported</p>	<p>See 1194.21(a) and (f)</p>

## Subpart C -- Functional Performance Criteria

### § 1194.31 Functional performance criteria

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Partially supported	Some information is passed to the screen reader. Some contrast, labeling, and keyboard control features make it possible for someone who is visually impaired to use Final Cut Studio applications.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Partially supported	<ol style="list-style-type: none"> <li>1. FCS can be operated using Zoom; some pixelation of text occurs at high magnification levels.</li> <li>2. Some text labels and button graphics are shown in various shades of gray, and some drop-down menus (such as Preferences or advanced search) use dark-blue bands to indicate selections under the pointer.</li> </ol>
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supported	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory	Supported	Visual alerts can be used in place of audible alerts.

<p>fashion, or support for assistive hearing devices shall be provided.</p>		
<p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.</p>	<p>Supported</p>	
<p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Partially supported</p>	<p>Mouse Keys can be used to operate FCS and execute fine-motor functions instead of the mouse.</p>

## Subpart D -- Information, Documentation and Support

### § 1194.41 Information, documentation, and support

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Partially supported	Online documentation can be found at <a href="http://www.apple.com/support/finalcutserver">http://www.apple.com/support/finalcutserver</a> . The HTML documentation is accessible to VoiceOver.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Information about Apple's built-in access technologies is available at <a href="http://www.apple.com/accessibility">http://www.apple.com/accessibility</a> .
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported	E-mail support and discussion groups are available at <a href="http://www.apple.com/support/finalcutserver">http://www.apple.com/support/finalcutserver</a> .
