The following Voluntary Product Accessibility information refers to the Apple MacBook. For more information on the accessibility features of the MacBook, visit Apple's accessibility Web site at http://www.apple.com/accessibility.

Standards Subpart	Remarks
§ 1194.21 Software applications and operating systems.	The MacBook comes with the OS X operating system (the MacBook tested was running OS X 10.4.10). Accessibility information for OS X is available at http://www.apple.com/accessibility/ .
§ 1194.22 Web-based intranet and internet information and applications.	Not applicable
§ 1194.23 Telecommunications products.	Please refer to the attached VPAT. 1194.23(k) and its subparts apply to the MacBook.
§ 1194.24 Video and multimedia products.	Not applicable
§ 1194.25 Self contained, closed products.	Not applicable
§ 1194.26 Desktop and portable computers.	Please refer to the attached VPAT
§ 1194.31 Functional performance criteria.	Please refer to the attached VPAT and to the OS X VPAT at http://www.apple.com/accessibility/ .
§ 1194.41 Information, documentation, and support.	Please refer to the attached VPAT

Summary Table Voluntary Product Accessibility Template

Subpart B -- Technical Standards

§ 1194.23 Telecommunications products.

Criteria	Supporting Features	Remarks and explanations
(a) Telecommunications	Not applicable	
products or systems which		
provide a function allowing		
voice communication and		
which do not themselves		
provide a TTY functionality		
shall provide a standard non-		
acoustic connection point for		
TTYs. Microphones shall be		
capable of being turned on and		
off to allow the user to intermix		
speech with TTY use.		
(b) Telecommunications	Not applicable	
products which include voice		
communication functionality		
shall support all commonly		
used cross-manufacturer non-		
proprietary standard TTY signal		
protocols.		
(c) Voice mail, auto-attendant,	Not applicable	
and interactive voice response		
telecommunications systems		
shall be usable by TTY users		
with their TTYs.	Not applicable	
(d) Voice mail, messaging, auto-attendant, and interactive	Not applicable	
voice response		
telecommunications systems		
that require a response from a		
user within a time interval,		
shall give an alert when the		
time interval is about to run		
out, and shall provide sufficient		
time for the user to indicate		
more time is required.		
(e) Where provided, caller	Not applicable	
identification and similar		
telecommunications functions		
shall also be available for users		
of TTYs, and for users who		
cannot see displays.		
(f) For transmitted voice signals,	Not applicable	
telecommunications products		
shall provide a gain adjustable		
up to a minimum of 20 dB. For		
incremental volume control, at		
least one intermediate step of		

12 dB of gain shall be		
provided.		
(g) If the telecommunications	Not applicable	
product allows a user to adjust		
the receive volume, a function		
shall be provided to		
automatically reset the volume		
to the default level after every		
use.		
(h) Where a	Not applicable	
telecommunications product		
•		
delivers output by an audio		
transducer which is normally		
held up to the ear, a means for		
effective magnetic wireless		
coupling to hearing		
technologies shall be provided.		
(i) Interference to hearing	Not applicable	
technologies (including hearing		
aids, cochlear implants, and		
assistive listening devices) shall		
be reduced to the lowest		
possible level that allows a user		
of hearing technologies to		
utilize the telecommunications		
product.		
(j) Products that transmit or	Not applicable	
conduct information or		
communication, shall pass		
through cross-manufacturer,		
non-proprietary, industry-		
standard codes, translation		
protocols, formats or other		
information necessary to		
provide the information or		
communication in a usable		
format. Technologies which		
use encoding, signal		
compression, format		
transformation, or similar		
techniques shall not remove		
information needed for access		
or shall restore it upon delivery.		
(k) Products which have		
mechanically operated controls		
or keys, shall comply with the		
following:		
(1) Controls and keys shall be	Supported	
tactilely discernible without		
activating the controls or keys.		
(2) Controls and keys shall be	Supported	Sticky Keys, Mouse Keys and
operable with one hand and		Slow Keys can be used for one-
shall not require tight grasping,		hand operation of the
shan not require tight graspling,	l	nand operation of the

pinching, or twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2 N) maximum.		MacBook.
 (3) If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character. 	Supported	Key repeat can be configured at the system level.
(4) The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.	Supported with minor exceptions	 Visual and aural indicators are adjustable via the Universal Access panel in System Preferences. When key sounds and key display are turned on, the locking status of modifier keys is made visible on the screen as well as through audible alerts.

Criteria	Supporting Features	Remarks and explanations
(a) All mechanically operated controls and keys shall comply with §1194.23 (k) (1) through (4).	Supported with minor exceptions	See 1194.23(k1-4).
(b) If a product utilizes touchscreens or touch-operated controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Not applicable	
(c) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not applicable	
(d) Where provided, at least one of each type of expansion slots, ports and connectors shall comply with publicly available industry standards.	Supported with minor exceptions	The MacBook has ten connectors located on the left side of the unit, all of which are compliant with publicly available industry standards.

§ 1194.26 Desktop and portable computers.

Subpart C -- Functional Performance Criteria

§ 1194.31 Functional performance criteria.

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for assistive technology used by people who are blind or visually impaired shall be provided.	Supported with exceptions	VoiceOver provides access to the operating-system controls, including initial set-up and log- in, as well as numerous applications.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Supported	Visually impaired users can take advantage of Zoom, the screen magnifier built into OS X.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supported	Visual alerts can be used in place of, or in conjunction with, audible alerts.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supported	Volume can be controlled at the system level. External speakers can be attached if necessary for further amplification.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.	Supported	Speech is not required for operation or information retrieval.
(f) At least one mode of operation and information retrieval that does not require fine motor control or	Supported	Sticky Keys and Slow Keys can be used to avoid simultaneous actions. Mouse keys can be used in place of a mouse.

simultaneous actions and that	
is operable with limited reach	
and strength shall be provided.	

Subpart D -- Information, Documentation, and Support

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end- users shall be made available in alternate formats upon request, at no	Supported	1. Support documentation is available at <u>http://www.apple.com/support/</u>
additional charge. (b) End-users shall	Supported	Information about Apple access
have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.		technologies is available at <u>http://www.apple.com/accessibility</u> .
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported	E-mail support and discussion groups are available.
