

The following Voluntary Product Accessibility information refers to Apple QuickTime 7 Pro for Mac OS X. For more information on the accessibility features of Mac OS X and QuickTime, visit Apple's accessibility web site at <http://www.apple.com/accessibility>

**Summary Table
Voluntary Product Accessibility Template**

Criteria	Supporting Features
§ 1194.21 Software applications and operating systems.	Please refer to the attached VPAT
§ 1194.22 Web-based intranet and internet information and applications.	Not Applicable
§ 1194.23 Telecommunications products.	Not Applicable
§ 1194.24 Video and multimedia products.	Not Applicable
§ 1194.25 Self contained, closed products.	Not Applicable
§ 1194.26 Desktop and portable computers.	Not Applicable
§ 1194.31 Functional performance criteria.	Please refer to the attached VPAT
§ 1194.41 Information, documentation, and support.	Please refer to the attached VPAT

Subpart B -- Technical Standards

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported	Requires Full Keyboard Access be set to "All controls" in Keyboard & Mouse System Preferences.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that assistive technology can track focus and focus changes.	Supported	
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to assistive technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Partially supported	Most dialogs are accessible to VoiceOver and to keyboard-only users.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported	

§ 1194.21 Software applications and operating systems.

(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Partially supported	The VoiceOver “speak text” function works when the mouse is passed over elements that have been explicitly labeled.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supported	
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	n/a	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Supported	A/V Controls allow for brightness, color, contrast, and tint adjustments during playback.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported	
(l) When electronic forms are used, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported	

Subpart C -- Functional Performance Criteria

§ 1194.31 Functional performance criteria.

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Partially supported	Most functions in QuickTime 7 Pro can be operated by users who are visually impaired by using VoiceOver on Mac OS X. For more information Mac OS X accessibility features, visit www.apple.com/accessibility .
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Partially supported	QuickTime 7 Pro can be operated by users who rely on a screen magnification by using Zoom on Mac OS X. For more information Mac OS X accessibility features, visit www.apple.com/accessibility .
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for assistive technology used by people who are deaf or hard of hearing shall be provided.	Supported	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supported	Visual alerts can also be used in place of audible alerts. Mac OS X accessibility features, visit www.apple.com/accessibility .
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for assistive technology used by people with disabilities shall be provided.	Supported	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supported	QuickTime 7 Pro can be used with Sticky Keys to avoid simultaneous actions. Mouse Keys can be used to execute certain fine-motor functions instead of the mouse. Mac OS X accessibility features, visit www.apple.com/accessibility .

Subpart D -- Information, Documentation, and Support

§ 1194.41 Information, documentation, and support.

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Partially supported	Online documentation can be found at http://www.apple.com/support/quicktime/ .
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Information about Apple product accessibility and compatibility features is available on the Web in an HTML format that is compatible with screen readers for the blind and visually impaired, including VoiceOver, can be displayed in large print using web browsers and software magnifiers for those with low vision at http://www.apple.com/accessibility .
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported	E-mail support and Web-based discussion groups are available at http://www.apple.com/support/quicktime/ .
