to Cybercrime

STOP. THINK. CONNECT. Campaign

- The global **STOP. THINK. CONNECT.**™ public-awareness campaign is the first-ever and only globally coordinated cybersecurity messaging suite to help all digital citizens stay more secure online
- The campaign maintains a service-mark slogan, logo and brief advisory suite
- The assets are managed by the non-profit STOP. THINK. CONNECT. Messaging Convention, Inc. a Georgia corporation co-managed by two non-profits, APWG and Washington-based NCSA

Unifying the
Global Response
to Cybercrime

Fourteen National Campaigns Deployed

- [Antigua and Barbuda](#)
- [Slovenia](#)
- [Kingdom of Tonga](#)
- [The Federal Republic of Nigeria](#)
- [Mongolia](#)
- [People's Republic of Bangladesh](#)
- [Armenia](#)
- [The French Republic](#)
- [USA](#)
- [Japan](#)
- [Belize](#)
- [Switzerland](#)
- [Jamaica](#)
- [Spain](#)

- Latest campaign deployments:
 - Antigua and Barbuda
 - Belize
 - Kingdom of Tonga
 - Nigeria
- In fast-track deployment mode this quarter:
 - Colombia
 - Swaziland

27 Memorandums of Cooperation With National Ministries, CERTs and NGOs

- **Armenia** – Armenia Education Center and Internet Society of Armenia
- **Antigua and Barbuda** – Ministry of Information, Broadcasting, Telecommunications & Information Technology
- **Bangladesh** – Bangladesh Computer Council
- **Canada** – Public Safety Canada (2012/Harper Administration)
- **Colombia** - MinTIC
- **Czech Republic** – NCBI / SaferInetnet.cz
- **Dominica** - Ministry of Information Science Telecommunications and Technology
- **Ecuador** - Centro de respuesta a incidentes informáticos del Ecuador
- **France** – CECyF (Ministère de l'intérieur / Ministère des finances)
- **Italy** – Poste Italiene
- **Japan** – Council of Anti-Phishing Japan (JP CERT)
- **Jamaica** – Ministry of Science, Technology, Energy and Mining
- **Latvia** – IMCS UL / CERT.LV
- **Spain** – Instituto Nacional de Ciberseguridad de España, S.A.
- **Malaysia** – Cybersecurity Malaysia
- **Mongolia** – Mongolia CERT
- **Nigeria** – CSEAN
- **Norway** – NorSIS
- **Panama** – Autoridad Nacional para la Innovación Gubernamental
- **Paraguay** – Secretaría Nacional de Tecnologías de la Información y Comunicación (SENATICS)
- **Poland** – NASK
- **Slovakia** – Preventista.sk
- **Slovenia**– Slovenian Computer Emergency Response Team (SI-CERT)
- **Swaziland** – Office of the Secretary to Cabinet
- **Switzerland** – Swiss Internet Security Alliance (SWITCH/SwissPost)
- **Kingdom of Tonga** – Ministry of Information & Communications
- **Uruguay** – Agencia para el Desarrollo del Gobierno de Gestión Electrónica y la Sociedad de la Información y del Conocimiento (AGESIC)

Latest Memorandums of Understanding signed:

- Norway (NorSIS)
- Swaziland (Sec't of Office of Prime Minister)
- Colombia (MinTIC)
- Slovenia (CERT.si)
- Czech Republic (NCSC)
- Latvia (CERT.lv)
- Slovakia (CERT.sk)

Latest Memorandums of Understanding shipped for due diligence:

- Macedonia (CSIRT)
- Argentina (UNLP / UBA)
- Mexico (Digital Family)
- Bhutan (CERT)
- Sudan (CERT)

30 National Curators in Due Diligence for Memo of Cooperation

- APWG working peer-to-peer with national ministries and national-scope NGOs
- APWG working with multi-lateral treaty organizations, representing 150 member nations with an interest in seeing them adopt STC:
 - **Organization of American States**
 - 2012 Memorandum of Cooperation
 - **Commonwealth Secretariat**
 - Advising in development of Commonwealth Cybercrime capacity development strategy, presented STC at conferences in St Lucia, Australia and Namibia in 2015
 - **Europol (EU)**
 - Presented at INTERPOL-Europol cybercrime conference 2015
 - Looking ahead to further collaborations
 - On going dialog with **African Union**, **United Nations** (ODC), **OSCE**, and **Council of Europe** (Cybercrime Convention)

Hybrid Vigor: Campaign Invites Flexibility in Deployment Scenarios

- The Messaging Convention has entered into cooperative memorandums with a number of different kinds of curating enterprises
 - Government ministries
 - Government agencies
 - National CERTs
 - National-scope NGOs
 - Trade associations (like APWG)
 - Hybrid special purpose NGO
 - National postal service
 - National universities
- HINT! Maybe your STC national curation story may start: A CERT, a bank, an ICT minister and a telco walk into an APWG meeting . . .
 - Talk to us and take your place in the STC Campaign Pantheon

Curators' Corps Assures Campaign Future as a Global Resource

The Bern Symposium on Global Cybersecurity Awareness Messaging

September 1 & 2, 2016

APWGEU

STOP | THINK | CONNECT
Messaging Convention

First conference for global stakeholders working to upgrade users **at scale** with a people-as-infrastructure perspective

Curators presenting: Armenia, Latvia, Nigeria, USA, France, Spain, Switzerland, Slovenia

Program Partners: **Organization of American States, Commonwealth Secretariat, Europol & IGF**, organizations with delegations from around 116 countries

Key proposal: National baselining protocol for assessing cyber resilience of national populations

Unifying the
Global Response
to Cybercrime

National Cyber Resilience Baselining Survey Protocol

- National survey protocol would use regression factor analysis based on technical experiences to predict the likelihood that a subject will be able to accurately recognize a cybercrime in progress – like a phishing attack email
- The baseline protocol that was developed at Indiana University to be a validated skills-measurement protocol
- Now validated, APWG curators, likely in collaboration with research universities, can use this protocol as a broadly deployable baseline awareness and expertise study
- Then we can add data-specific before and after questions or phishing tests to see 1) if there are changes in responses and 2) if those changes are a result of superior education or other outside influence

Campaign Architecture - Japan

- STC is evolved into a keystone for cybersecurity awareness outreach instrument for stakeholders addressing the general public and for industry actors
- Can play to a crowd and, through industry, talk 'inside baseball'

France

- Memorandum of Cooperation completed for the Republic of France in December 2015 by the French Center of Excellence Against Cybercrime, signed by IG of **Gendarmerie Nationale**
- CECyF is a public private partnership with management provided by French Interior
- Website launched in February 2016
- SEE: cyberprevention.fr

The screenshot shows the homepage of the CECyF website. At the top, there is a navigation bar with the slogan "ARRÊTE-TOI | RÉFLÈCHIS | CONNECTE-TOI" and the CECyF logo. Below this, there are several sections:

- Accueil**: A main navigation menu with links for "Conseils & astuces", "Ressources", "Campagnes", and "À propos".
- Projets**: A section titled "ARRÊTE-TOI. RÉFLÈCHIS. CONNECTE-TOI." with a sub-header "Antibot". It describes the project as a partnership between CECyF and Signal Spam, aimed at providing information on botnets.
- Rechercher**: A search bar with the text "Rechercher" and a search input field.
- Partagez**: A section with the text "Partagez votre expérience" and a social media icon.
- Texte principal**: A large section of text starting with "Le CECyF - Centre Expert contre la Cybercriminalité Français - est une association créée en 2014, regroupant des partenaires institutionnels, académiques et industriels pour conduire des projets de prévention, formation et de recherche et développement contre la cybercriminalité." It also includes a sub-section "ARRÊTE-TOI. RÉFLÈCHIS. CONNECTE-TOI." and a "STOP THINK CONNECT" section.

At the bottom of the page, there are logos for APWG (Anti-Phishing Working Group) and CECyF (Centre Expert contre la Cybercriminalité Français).

Unifying the
Global Response
to Cybercrime

Campaign Architecture - France

The screenshot displays the CECyF website with a navigation bar containing 'Accueil', 'Conseils & astuces', 'Ressources', 'Campagnes', 'Blog', and 'À propos'. Below the navigation is a prominent banner that reads 'SIGNALER C'EST AGIR'. The main content area is divided into several sections: a search bar, a 'Rechercher' button, and three primary reporting actions: 'SIGNALER' (with a red warning icon and the subtext 'Agir pour Prévenir'), 'Partagez' (with the subtext 'Votre Expérience'), and 'BLOGS' (with the subtext 'Restez au Courant'). To the right, there are two detailed reporting options: 'Signaler un contenu ou une activité illégaux' (linked to 'internet-signalement.gouv.fr') and 'Signaler un contenu illicite aux acteurs du net' (linked to 'Point de Contact Net' and 'AFPI'). At the bottom of the reporting section, there are logos for 'signal spam' and 'PHISHING INITIATIVE France'.

CECyF employs the campaign to create a virtual omnibus channel for a number of cyber-security programs France manages

Jamaica to launch cybersecurity campaign this month

Thursday, January 14, 2016

State Minister in the Ministry of Science, Technology, Energy and Mining Julian Robinson (3rd right), outlines features of the Cyber Security Awareness campaign to be launched this month, during Tuesday's JIS Think Tank. Others (from left) are: Technical Advisor to the Ministry Dr Moniphla Hewling; Jamaica Bankers Association (JBA) Executive Stacy-Ann Escote; JBA cyber security task force representative, Lloyd Parchment; executive director, JBA, Richard Murray; and Scotiabank representative, Derrick Cochran. Occasion was a JIS Think Tank held Tuesday at the agency's head office in Kingston.

Jamaica

- Jamaica organized its STOP. THINK. CONNECT.™ campaign through a coalition of the Ministry of Science, Technology Energy and Mining with the collaboration of the Jamaica Bankers Association
- Its launch in January of 2016 garnered national media attention from the first day of the campaign
- See: stopthinkconnect.org.jm

Unifying the Global Response to Cybercrime

Campaign Architecture - Jamaica

The screenshot shows the homepage of the 'STOP, THINK, CONNECT' campaign. At the top, there is a navigation bar with links for HOME, RESOURCES, CAMPAIGN, GET INVOLVED, TIPS & ADVICE, SUBSCRIBE & SUPPORT US, BLOGS, and ABOUT US. The main header features the slogan 'STOP. THINK. CONNECT.' and the tagline 'Keeping the web a safer place for everyone.' Below this, there is a large banner with the text 'WHEN IN DOUBT THROW SUSPICIOUS EMAILS OUT'. To the right of the banner is a 'Get Involved!' button with icons for a smartphone, tablet, and laptop, and a 'GET INVOLVED' button. Below the banner, there are several sections: 'STOP, THINK, CONNECT.' with a sub-section 'DID YOU KNOW?' about Jamaica's Cyber Crime Act 2015; 'TIP OF THE WEEK' about combining capital and lowercase letters with numbers and symbols; and 'BLOGS' with links to 'Event Blog', 'Systemic Security Blog', and 'McAfee Family Safety Blog'. At the bottom left, there is a footer for the APWG (Asia Pacific Web Gateway) program, with the APWG logo.

- Under the leadership of Jamaica CIRT and MSTEM ministry, the campaign is an outreach and advisory scheme that brands and extends all general-public awareness programs in Jamaica
- The one-stop shop provides STC-themed presentations to Boards, civil society groups and:
 - Posters o schools, churches and civic organizations;
 - This year, distributing a student cybersecurity handbook
- Leveraging STC, the MSTEM ministry is developing plans for a full scale observance of Cyber security awareness month for this October

Unifying the
Global Response
to Cybercrime

Cyberkriminelle haben die Erpressung für sich entdeckt. Mit Verschlüsselungs-trojanern, sogenannter Ransomware, machen Sie Daten von Privatpersonen und Firmen unzugänglich. Um die eigenen Daten zurückzubekommen, fordern sie von Ihren Opfern hohe Lösegelder und erzielen damit Gewinne in Millionenhöhe.

Was ist Ransomware?

Ransomware bezeichnet Schadsoftware (Viren), welche Dateien auf dem befallenen Computer und angeschlossenen Laufwerken verschlüsselt. Der Benutzer kann also nicht mehr auf seine Daten (Fotos, Dokumente und weitere Dateien) zugreifen. Ist der Verschlüsselungsprozess abgeschlossen, fordern die Cyberkriminellen zur Zahlung eines Lösegelds auf. Wer diesen Betrag einzahlt, erhält ein Programm, das seine Dateien wiederherstellt. Garantie, dass man diese Software erhält, und dass sie funktioniert, gibt es keine.

Auf rund US \$ 325 Mio. beziffern Experten den durch Ransomware angerichteten Schaden im letzten Jahr. Neben dem Lösegeld entstehen für Anwender auch Aufwände und Kosten, um das betroffene System neu zu installieren und die Daten aus einer Sicherung wiederherzustellen.

Wer ist betroffen?

Treffen kann es jeden. Bekannt sind Fälle von Privatpersonen, Unternehmen jeder Grösse und Behörden. Die Erpresser passen das Lösegeld oft den Opfern an: Es beträgt bei Privatpersonen in der Regel einige hundert Franken, bei Firmen abhängig von deren Grösse tausende bis hunderttausende Franken.

Wie kommt Ransomware auf den Computer?

Ransomware wird über verschiedene Methoden verteilt: Verbreitet sind Spam-Mails, die eine Dringlichkeit vortäuschen ("Betreff: Ihre Rechnung") oder die Neugier der Opfer wecken soll ("Betreff: Vertrauliches Dokument"). Wer den Mail-Anhang öffnet, installiert damit die Ransomware. Deshalb sollten solche Mails ungelesen gelöscht werden.

Switzerland

- **SWITCH**, the national CERT and ccTLD manager, arranged for the MoC through Swiss Internet Security Alliance (SISA), an NGO largely managed by SWITCH and PostBank Switzerland
- Campaign launched in late 2015. First in Europe to prepare and present materials for local languages. So far, German and French.
- See: stopthinkconnect.ch

Campaign Architecture - Switzerland

The screenshot shows a web browser displaying the STOPTHINKCONNECT.CH website. The page features a header with the logo of the Swiss Internet Security Alliance (SISA) and the slogan "STOP | THINK | CONNECT". The main content area is titled "Ransomware Info Tag 19.05.2016" and includes the question "Wie kann ich mich sinnvoll vor Erpressungs-Trojanern schützen?". Below the title, there is a paragraph of text explaining the threat of ransomware, a section titled "Was ist Ransomware?" with a detailed description, a section titled "Wer ist betroffen?" with statistics, and a section titled "Wie kommt Ransomware auf den Computer?" with information on prevention. A sidebar on the right lists "Weitere Informationen" with links to various resources.

STOPTHINKCONNECT.CH

Ransomware Info Tag

STOP THINK CONNECT Keeping the web a safer place for everyone.

HOME RESOURCES CAMPAIGNS GET INVOLVED TIPS & ADVICE RESEARCH & SURVEYS BLOGS ABOUT US

DO YOUR PART TO MAKE THE INTERNET SAFER FOR EVERYONE.

STOP. THINK. CONNECT.
When you cross the street, you look both ways to make sure it's safe. Staying safe on the Internet is similar. It takes some common sense steps.

STOP: Before you use the Internet, take time to understand the risks and learn how to spot potential problems.

THINK: Take a moment to be certain the path ahead is clear. Watch for warning signs and consider how your actions online could impact your safety, or your family's.

CONNECT: Enjoy the Internet with greater confidence, knowing you've taken the right steps to safeguard yourself and your computer.

Protect yourself and help keep the web a safer place for everyone.

The Anti-Phishing Working Group (APWG) and National Cyber Security Alliance (NCSA) led the development of the STOP, THINK, CONNECT campaign. Today hundreds of global and local businesses, as well as national governments and national-scope NGOs are supporting the campaign to bring its cybersecurity messages to the world - and reinforce them for global resonance and user retention. Contact info@stophinkconnect.org to join.

A Cybersecurity Awareness Program of the APWG Public Education Initiative Dedicated to Upgrading Users Worldwide
